WESTERN SAHARA

The Western Sahara was designated by The United Nations in 1975, its borders having been marked as a result of agreements made between France, Spain and Morocco in 1900, 1904 and 1912. Sovereignty of the territory is in dispute between Morocco and the Polisario Front (Popular Front for the Liberation of the Saguia el Hamra and Rio de Oro), which formally proclaimed a government-in-exile of the Sahrawi Arab Democratic Republic (SADR) in Feb. 1976. According to a new UN proposal agreed in 2001, Western Sahara should be a part of Morocco for four years but at the same time 'autonomous'. There is then to be a referendum to decide whether it remains part of Morocco or becomes a separate state.

Area 266,769 sq. km (102,680 sq. miles). Around 230,000 inhabitants (estimate July 1997) are within Moroccan jurisdiction. Another estimated 196,000 Saharawis live in refugee camps around Tindouf in southwest Algeria. The main towns are El-Aaiún, the capital (159,000 inhabitants in 1995), Dakhla and Es-Semara.

Life expectancy at birth (1997 est.) male, 46·7 years; female, 50·0 years. Birth rate (1997 est.) per 1,000 population: 46·1; death rate: 17·5. The projected population for 2010 is 365,000.

The population is Arabic-speaking, and almost entirely Sunni Muslim.

President: Mohammed Abdelaziz.
Prime Minister: Bouchraya Hammoudi Bayoune.

Rich phosphate deposits were discovered in 1963 at Bu Craa. Morocco holds 65% of the shares of the former Spanish state-controlled company. Production reached 5·6m. tonnes in 1975, but exploitation has been severely reduced by guerrilla activity. After a nearly complete collapse, production and transportation of phosphate resumed in 1978, ceased again, and then resumed in 1982. Installed electrical capacity was 56,000 kW in 1995, with production of 85m. kWh in 1998. There are about 6,100 km of motorable tracks, but only about 500 km of paved roads. There are airports at El-Aaiún and Dakhla. As most of the land is desert, less than 19% is in agricultural use, with about 2,000 tonnes of grain produced annually. There were 56,000 radio receivers and 6,000 television sets in 1997. In 1989 there were 27 primary schools with 14,794 pupils and 18 secondary schools with 9,218 pupils.

KEY HISTORICAL EVENTS

Mozambique was at first ruled as part of Portuguese India but a separate administration was created in 1752. Following a decade of guerrilla activity, independence was achieved on 25 June 1975. A one-party state dominated by the Liberation Front of Mozambique (FRELIMO) was set up but armed insurgency led by the Mozambique National Resistance (RENAMO) continued until 4 Oct. 1992. The peace treaty provided for all weapons to be handed over to the UN and all armed groups to be disbanded within six months. In 1994 the country held its first multi-party elections. In early 2000 some 700 people died in the floods which made thousands homeless.

TERRITORY AND POPULATION

Mozambique is bounded east by the Indian ocean, south by South Africa, southwest by Swaziland, west by South Africa and Zimbabwe and north by Zambia, Malaŵi and Tanzania. It has an area of 799,380 sq. km (308,642 sq. miles) and a population, according to the 1997 census, of 16,099,246, giving a density of 20 per sq. km. Up to 1·5m. refugees abroad and 5m. internally displaced persons during the Civil War have begun to return home.

The UN gives a projected population for 2010 of 21·65m.

In 1999 an estimated 61·1% of the population were rural, but urbanization is increasing rapidly. In the period 1990–95 the annual growth in the urban population was 8·7%, a rate only exceeded by Botswana. The areas, populations and capitals of the provinces are:

ECONOMY

Agriculture accounted for 34·3% of GDP in 1998, industry 20·8% and services 44·9%.

The government under prime minister Pascoal Mocumbi has attempted to curb corruption. In 1997 the UK's Crown Agents were hired to operate the customs service for three years. More than 100 officials were dismissed and the volume of tariff revenue increased by nearly 50% in the first two years.

Overview. In 1990 the government abandoned economic planning in favour of a market economy. In Dec. 1993 the National Reconstruction Plan was launched to repair the rural economic and social infrastructure. Its implementation is dependent upon foreign aid. A privatization programme launched in 1989 resulted in a decline of the public sector share of GDP from 70% to less than 20% ten years later.

Currency. The unit of currency is the *metical* (MZM) of 100 *centavos.* Inflation was 9·0% in 2001. Foreign exchange reserves were US$706m. in June 2002. Total money supply in May 2002 was 10,364·30bn. meticais.

Budget. In 1996 revenues were an estimated US$324m. and expenditure US$600m.

Performance. GDP growth has averaged 5·3% since 1990, making Mozambique one of Africa's fastest expanding economies. Mozambique was forecast to be among the fastest growing economies in the world in 2000 but the disastrous floods of early 2000 caused a major setback, resulting in growth for the year of only 1·6%. However, the economy then grew by 13·9% in 2001. Total GDP in 2001 was US$3·6bn.

Banking and Finance. Most banks had been nationalized by 1979. The central bank and bank of issue is the Bank of Mozambique (*Governor,* Adriano Afonso Maleiane) which hived off its commercial functions in 1992 to the newly-founded Commercial Bank of Mozambique. In 1998 the Commercial Bank of Mozambique had 35% of deposits. There are 9 commercial banks, 1 investment bank and a leasing institution. The new Mozambique Stock Exchange opened in Maputo in Oct. 1999. By the late 1990s financial services had become one of the fastest-growing areas of the economy.

Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* carbon dioxide emissions in 1998 were the equivalent of 0·1 tonnes per capita.

Electricity. Installed capacity was 2m. kW in 1997. Production in 1998 was 1·2m. kWh. Consumption per capita in 1998 was 54 kWh.

Oil and Gas. Natural gas finds are being explored for potential exploitation, and both onshore and offshore foreign companies are prospecting for oil. In 1997 natural gas reserves were 57bn. cu. metres. Some river basins, especially the Rovuma, Zambezi and Limpopo, are of interest to oil prospectors.

Water. Although the country is rich in water resources, the provision of drinking water to rural areas remains a major concern.

Minerals. There are deposits of pegamite, tantalite, graphite, apatite, tin, iron ore and bauxite. Other known reserves are: nepheline, syenite, magnetite, copper, garnet, kaolin, asbestos, bentonite, limestone, gold, titanium and tin.

Output (in 1,000 tonnes): salt (1997 estimate), 60; coal (1996), 40; bauxite (1998), 6; gold (1995), 6,800 kg.

Production in 1,000 tonnes (2000): cassava, 4,643; maize, 1,019; sugarcane, 440; coconuts, 300; sorghum, 252; rice, 158; groundnuts, 100; seed cotton, 80; copra, 73; bananas, 59; cottonseed, 51; potatoes, 50.

Livestock, 2000: 1·32m. cattle, 392,000 goats, 125,000 sheep, 180,000 pigs, 28m. chickens.

A quarter of all crops and a third of cattle were lost during the flooding which devastated the country in the early part of 2000.

Forestry. In 1995 there were 16·86m. ha of forests, or 21·5% of the land area (down from 17·44m. ha in 1990), including eucalyptus, pine and rare hardwoods. In 1999 timber production was 18·04m. cu. metres.

Fisheries. The catch in 1999 was 35,560 tonnes, of which 24,823 tonnes were from sea fishing. Prawns and shrimps are the major export at 10,000 tonnes per year. The potential sustainable annual catch is estimated at 500,000 tonnes of fish (anchovies 300,000 tonnes, the rest mainly mackerel).

INDUSTRY

Although the country is overwhelmingly rural, there is some substantial industry in and around Maputo (steel, engineering, textiles, processing, docks and railways). A huge aluminium smelter, completed in 2000, is scheduled to produce 250,000 tonnes annually and is a focal point in the country's strategy of attracting foreign investment.

Labour. The labour force in 1996 totalled 9,221,000 (52% males). In 1998, 83% of the economically active population were engaged in agriculture, 8% in industry and 9% in services. Women represent 48% of the total labour force.

Passenger cars numbered 4,900 in 1996 (0·3 per 1,000 inhabitants), down from 60,000 in 1993. There were 4,748 road accidents in 1997, with 805 fatalities. KEY HISTORICAL EVENTS

After Burma's invasion of the kingdom of Assam, the British East India Company retaliated in defence of its Indian interests and in 1826 drove the Burmese out of India. Territory was annexed in south Burma but the kingdom of Upper Burma, ruled from Mandalay, remained independent. A second war with Britain in 1852 ended with the British annexation of the Irrawaddy Delta. In 1885 the British invaded and occupied Upper Burma. In 1886 all Burma became a province of the Indian empire. There were violent uprisings in the 1930s and in 1937 Burma was separated from India and permitted some degree of self-government. Independence was achieved in 1948. In 1958 there was an army coup, and another in 1962 led by Gen. Ne Win, who installed a Revolutionary Council and dissolved parliament.

The Council lasted until March 1974 when the country became a one-party socialist republic. On 18 Sept. 1988 the Armed Forces seized power and set up the State Law and Order Restoration Council (SLORC). Since then civil unrest has cost more than 10,000 lives. On 19 June 1989 the government changed the name of the country in English to the Union of Myanmar. Aung San Suu Kyi, leader of the National League for Democracy, was put under house arrest in July 1989. In spite of her continuing detention, her party won the 1990 election by a landslide, but the military junta refused to accept the results. She was eventually freed in July 1995, only to be placed under house arrest for a second time in Sept. 2000 and again released in May 2002.

TERRITORY AND POPULATION

Myanmar is bounded in the east by China, Laos and Thailand, and west by the Indian Ocean, Bangladesh and India. Three parallel mountain ranges run from north to south; the Western Yama or Rakhine Yama, the Bagu Yama and the Shaun Plateau. The total area of the Union is 261,228 sq. miles (676,577 sq. km). The population in 1983 (census) was 35,313,905. Estimate (1996) 45·92m. (23·05m. female); density, 68 per sq. km. In 1999, 72·7% of the population lived in rural areas.

The UN gives a projected population for 2010 of 53·0m.

The leading towns are: Yangon (Rangoon), the capital (1999 population of 4,101,000); other towns (1983 estimates), Mandalay, 532,985; Moulmein, 219,991; Pegu, 150,447; Bassein, 144,092; Sittwe (Akyab), 107,907; Taunggye, 107,607; Monywa, 106,873.

The population of the seven states and seven administrative divisions (1994 estimates): Irrawaddy Division, 6,107,000; Magwe Division, 4,067,000; Mandalay Division, 5,823,000; Pegu Division, 4,607,000; Sagaing Division, 4,889,000; Tenasserim Division, 1,187,000; Yangon Division, 5,037,000; Chin State, 438,000; Kachin State, 1,135,000; Kayah State, 228,000; Karen State, 1,323,000; Mon State, 2,183,000; Rakhine State, 2,482,000; Shan State, 4,416,000. Myanmar is inhabited by many ethnic nationalities. There are as many as 135 national groups with the Bamars, comprising about 68·96% of the population, forming the largest group.

The official language is Burmese; English is also in use.

SOCIAL STATISTICS

1995 births, 1,263,000; deaths, 465,000. Birth rate (1995), 28·0 per 1,000 population; death rate, 10·3. Annual population growth rate, 1990–99, 1·2%. Life expectancy at birth, 1999, was 53·6 years for males and 58·4 years for females. Infant mortality, 1999, 79 per 1,000 live births; fertility rate, 1999, 2·3 births per woman.

CLIMATE

The climate is equatorial in coastal areas, changing to tropical monsoon over most of the interior, but humid temperate in the extreme north, where there is a more significant range of temperature and a dry season lasting from Nov. to April. In coastal parts, the dry season is shorter. Very heavy rains occur in the monsoon months May to Sept. Rangoon, Jan. 77°F (25°C), July 80°F (26·7°C). Annual rainfall 104" (2,616 mm). CONSTITUTION AND GOVERNMENT

Following elections in May 1990, the ruling State Law and Order Restoration Council (SLORC) said it would hand over power after the People's Assembly had agreed on a new constitution, but in July 1990 it stipulated that any such constitution must conform to guidelines which it would itself prescribe.

In May 1991, 48 members of the National League for Democracy (NLD) were given prison sentences on charges of treason. In July 1991 opposition members of the People's Assembly were unseated for alleged offences ranging from treason to illicit foreign exchange dealing. Such members, and unsuccessful candidates in the May 1990 elections, are forbidden to stand in future elections.

On 28 Nov. 1995 the government re-opened a 706-member Constitutional Convention in which the NLD was given 107 places. The NLD withdrew on 29 Nov.

In Nov. 1997 the country's ruling generals changed the name of the government to the State Peace and Development Council (SPDC), and reshuffled the cabinet. In Dec. 1997, following a period when the national currency fell to a record low, there were further changes to the cabinet, while corruption investigations were begun against some former ministers.

National Anthem. 'Gba majay Bma' ('We shall love Burma for ever'); words and tune by Saya Tin.

RECENT ELECTIONS

In elections in May 1990 the opposition National League for Democracy (NLD), led by Aung San Suu Kyi (b. 1945), won 392 of the 485 People's Assembly seats contested with some 60% of the valid vote. Turn-out was 72%, but 12·4% of ballots cast were declared invalid. The military ignored the result and refused to hand over power.

KEY HISTORICAL EVENTS

In 1884 South West Africa was declared a German protectorate. Germany then introduced racial segregation and the exploitation of the diamond mines began. In 1915 the Union of South Africa occupied German South West Africa and on 17 Dec. 1920 the League of Nations entrusted the territory as a Mandate to the Union of South Africa. After World War II South Africa applied for its annexation to the Union and continued to administer the territory in defiance of various UN resolutions. In June 1968 the UN changed the name of the territory to Namibia.

After negotiations between South Africa and the UN, a multi-racial Advisory Council was appointed in 1973 in preparation for independence, but despite several attempts at organizing free elections South Africa remained dominant in the area until the UN Transition Assistance Group supervised elections for the constituent assembly in Nov. 1989. Independence was achieved on 21 March 1990.

TERRITORY AND POPULATION

Namibia is bounded in the north by Angola and Zambia, west by the Atlantic Ocean, south and southeast by South Africa and east by Botswana. The Caprivi Strip (Caprivi Region), about 300 km long, extends eastwards up to the Zambezi river, projecting into Zambia and Botswana and touching Zimbabwe. The area, including the Caprivi Strip and Walvis Bay, is 824,269 sq. km. South Africa transferred Walvis Bay to Namibian jurisdiction on 1 March 1994. Census population, 1991, 1,401,711 (720,784 females; urban, 32·76%). Estimate, 1996, 1,677,200; density, 2 per sq. km. In 1999, 69·6% of the population were rural.

The UN gives a projected population for 2010 of 2·10m.

CLIMATE

The rainfall increases steadily from less than 50 mm in the west and southwest up to 600 mm in the Caprivi Strip. The main rainy season is from Jan. to March, with lesser showers from Sept. to Dec. Namibia is the driest African country south of the Sahara.

CONSTITUTION AND GOVERNMENT

On 9 Feb. 1990 with a unanimous vote the Constituent Assembly approved the Constitution which stipulated a multi-party republic, an independent judiciary and an executive *President* who may serve a maximum of two five-year terms. The constitution was amended in 1999 to allow President Sam Nujoma to stand for a third term in office. The bicameral legislature consists of a 78-seat *National Assembly*, 72 members of which are elected for five-year terms by proportional representation and up to six appointed by the president by virtue of position or special expertise, and a *National Council* consisting of two members from each Regional Council elected for six-year terms.

National Anthem. ‘Namibia, land of the brave’; words and tune by Axali Doeseb.

RECENT ELECTIONS

Presidential and parliamentary elections were held on 30 Nov. and 1 Dec. 1999. Incumbent Sam Nujoma (SWAPO) was re-elected President with 76·8% of votes cast followed by Ben Ulenga (Congress of Democrats/CoD) with 10·5%, Katuutire Kaura (Democratic Turnhalle Alliance/DTA) with 9·6% and Chief Justus Garoëb (United Democratic Front/UDF) with 3·0%. In parliamentary elections the South West Africa People’s Organization (SWAPO) won 55 of the available 72 seats with 76·1% of the vote; the CoD, 7 with 9·9%; DTA, 7 with 9·5%; UDF, 2 with 2·9%; Monitor Action Group, 1 with 0·7%. Turn-out was 53%. The Congress of Democrats, formed early in 1999 as an opposition party to contest the election, represents the best chance of a credible challenge to the dominance of SWAPO and its autocratic leadership in the future in spite of its small share of the vote at the 1999 elections.

INTERNATIONAL RELATIONS

Namibia is a member of the UN, WTO, the Commonwealth, the African Union, African Development Bank, COMESA, SADC and is an ACP member state of the ACP-EU relationship.

ECONOMY

Agriculture accounted for 10·0% of GDP in 1998, industry 34·2% and services 55·8%.

The Namibian economy is heavily dependent on mining and fisheries.

Currency. The unit of currency is the *Namibia dollar* (NAD) of 100 *cents*, introduced on 14 Sept. 1993 and pegged to the South African rand. The rand is also legal tender at parity. In 2001 inflation was 13·4%. In June 2002 foreign exchange reserves were US$230m. Gold reserves are negligible. Total money supply in June 2002 was N$7,063m.

Budget. The financial year runs from 1 April. In 1999–2000 total government revenue was N$7,184·9m. (N$7,765·3m. estimated for 2000–01) and total expenditure was N$7,831·3m. (2000–01 estimate, N$8,610·0m.).

ENERGY AND NATURAL RESOURCES

Electricity. In 1999 electricity production was 1·2bn. kWh. Namibia also imports electricity from South Africa (890m. kWh in 1999). Consumption per capita in 1995 was 584 kWh.

Oil and Gas. Natural gas reserves in 1997 totalled 85bn. cu. metres.

Water. The 12 most important dams have a total capacity of 589·2m. cu. metres. The Kunene, the Okavango, the Zambezi, the Kwando or Mashi and the Orange River are the only permanently running rivers but water can generally be obtained by sinking shallow wells. Except for a few springs, mostly hot, there is no surface water.

Minerals. There are diamond deposits both inshore and off the coast, with production equally divided between the two. Some 3bn. carats of diamonds are

believed to be lying in waters off Namibia's Atlantic coast. Namibia produced 1,611,000 carats in 1999, with 98% of the diamonds being of gem quality. 1996 output (in tonnes): salt, 493,000 (1997); lead, 67,760; zinc, 64,600; copper, 25,000; silver, 34 (1997); gold, 2,205 kg; diamonds, 1,611,000 carats (1999). Uranium production, 1998, 2,762 tonnes.

Agriculture. Namibia is essentially a stock-raising country, the scarcity of water and poor rainfall rendering crop-farming, except in the northern and northeastern parts, almost impossible. There were 816,000 ha of arable land in 1998 and 4,000 ha of permanent crops. Generally speaking, the southern half is suited for the raising of small stock, while the central and northern parts are more suited for cattle. Guano is harvested from the coast, converted into fertilizer in South Africa and most of it exported to Europe. In 1995, 45% of the active labour force worked in the agricultural sector, and 45% of the population was dependent on agriculture.

Livestock (2000): 2·06m. cattle, 2·10m. sheep, 1·65m. goats, 2m. chickens.

Forestry. Forests covered 12·37m. ha in 1995, or 15% of the land area, down from 12·58m. ha in 1990.

Fisheries. Pilchards, mackerel and hake are the principal fish caught. The catch in 1999 was 299,151 tonnes (21,225 tonnes in 1989), of which more than 99% came from marine waters. The rate of growth in the annual catch between 1989 and 1999 was one of the highest in the world. Conservation policies are in place. The policy aims at ensuring that the country's fisheries resources are utilized on a sustainable basis and also aims to ensure their lasting contribution to the country's economy.

INDUSTRY

Of the estimated total of 400 undertakings, the most important branches are food production (accounting for 29·3% of total output), metals (12·7%) and wooden products (7%). The supply of specialized equipment to the mining industry, the assembly of goods from predominantly imported materials and the manufacture of metal products and construction material play an important part. Small industries (including home industries, textile mills, leather and steel goods) have expanded. Products manufactured locally include chocolates, beer, cement, leather shoes, and delicatessen meats and game meat products.

Labour. In 1996 the labour force totalled 650,000 (59% males). Nearly half the economically active population in 1991 were engaged in agriculture, fisheries and forestry. Around 20% of the workforce was unemployed in 1991. The main employers were government services, agriculture and mining.

KEY HISTORICAL EVENTS

Nepal is an independent Himalayan Kingdom located between India and the Tibetan region of China. From the 8th to the 11th centuries many Buddhists fled to Nepal from India, which had been invaded by Muslims. In the 18th century Nepal was a collection of small principalities (many of Rajput origin) and the three kingdoms of the Malla dynasty: Káthmandu, Pátan and Bhádgaon. In central Nepal lay the principality of Gurkha (or Gorkha); its ruler after 1742 was Prithvi Náráyan Sháh, who conquered the small neighbouring states. Fearing his ambitions, in 1767 the Mallas brought in forces lent by the British East India Company. In 1769 these forces were withdrawn and Gurkha was then able to conquer the Malla kingdoms and unite Nepal as one state with its capital at Káthmandu. In 1846 the Ráná family became the effective rulers of Nepal, establishing the office of prime minister as hereditary. In 1860 Nepal reached agreement with the British in India whereby Nepali independence was preserved and the recruitment of Gurkhas to the British army was sanctioned.

In 1950 the Sháh royal family allied itself with Nepalis abroad to end the power of the Ránás. The last Ráná prime minister resigned in Nov. 1951, the king having proclaimed a constitutional monarchy in Feb. 1951. A new constitution, approved in 1959, led to confrontation between the king and his ministers; it was replaced by one less liberal in 1962. In Nov. 1990 the king relinquished his absolute power. Nepal remains one of the poorest countries but a five-year plan encompasses economic reform with the hope of ending illiteracy among the young by 2005. The Maoists abandoned parliament in 1996 and launched a 'people's war' in the aim of turning the kingdom into a republic. This has resulted in more than 3,500 deaths.

In June 2001 the king and queen, along with six other members of the royal family, were shot dead by their son and heir to the throne, Crown Prince Dipendra, allegedly following a dispute over his choice of bride. Prince Dipendra then shot himself. The former monarch's younger brother, Gyanendra, was crowned king. In Nov. 2001 King Gyanendra declared a state of emergency and ordered troops to contain a fresh outbreak of Maoist violence. In Jan. 2003 the government and Maoist rebels reached a ceasefire agreement, seen as a first step towards bringing to an end the rebels' seven-year insurgency.

ECONOMY

Agriculture accounted for 40·5% of GDP in 1998, industry 22·2% and services 37·3%.

Overview. Since May 1991 the government has been moving forward with economic reforms, particularly those that encourage trade and foreign investment, e.g. by eliminating business licenses and registration requirements to simplify investment. The government has also cut public expenditures by reducing subsidies, privatizing state industries, and laying off civil servants. Prospects for foreign trade and investment, particularly in areas other than power development and tourism, are limited by the small size of the economy, its remoteness and its susceptibility to natural disaster. The international community provides funding for 62% of Nepal's developmental budget and for 34% of total budgetary expenditures. Industrial activity is limited, mainly involving the processing of agricultural produce (jute, sugarcane, tobacco and grain). The production of textiles and carpets accounts for 85% of foreign exchange earnings. Apart from agricultural land and forests, exploitable natural resources are mica, hydropower and tourism. Agricultural production in the late 1980s grew by about 5%, compared to annual population growth of 2·6%.

Currency. The unit of currency is the *Nepalese rupee* (NPR) of 100 *paisas*. 50 *paisas* = 1 *mohur*. Inflation was 2·4% in 2001. Foreign exchange reserves were US$1,034m. in June 2002 and gold reserves totalled 15,000 troy oz (153,000 troy oz in April 2002). Total money supply in Dec. 2001 was NRs 72,161m.

Budget. Revenues and expenditures in NRs 1m. for fiscal years ending 14/15 July:

	1996–97	*1997–98*	*1998–99*	*1999–2000*	*2000–01*[1]

KEY HISTORICAL EVENTS
As the German Count of Nassau, William of Orange (1533–84) inherited vast possessions in the Netherlands and the Princedom of Orange in France. The struggle for independence from Spain began in 1568 and by the Union of Utrecht the more easily defensible seven provinces of the North—Holland, Zeeland, Utrecht, Overijssel, Groningen, Drenthe and Friesland—declared themselves independent. At the end of the Thirty Years War, by the Treaty of Westphalia (1648), Spain recognized the Republic of the United Netherlands. In 1689 Willem III acceded to the throne of England, becoming joint sovereign with his wife Mary. Willem III died in 1702 without issue, and there was no stadhouder until a member of the Frisian branch of Orange–Nassau was nominated hereditary stadhouder in 1747. However, his successor, Willem V, had to take refuge in England in 1795 when the French invaded. The country was freed from French domination in Nov. 1813. The Congress of Vienna (1815) joined the Belgian provinces, called the ‘Spanish’ or the ‘Austrian Netherlands’ before the French Revolution, to the Northern Netherlands. The union was dissolved by the Belgian revolution of 1830 and in 1839 Belgium and the Netherlands were recognized as two independent kingdoms.

In 1840 Willem I abdicated in favour of his son, Willem II, who moved the Netherlands towards a constitutional monarchy, a process that continued under successive monarchs.

The Netherlands followed a policy of non-participation in the European conflicts of the early 20th century and during the First World War remained neutral. In the Second World War, however, the Netherlands was occupied by Germany from 1940 until 1945. After liberation in 1945, the country abandoned its traditional policy of neutrality. In 1948 the Netherlands joined with Belgium and Luxembourg to form the Benelux economic union; in 1957 it was a founder member of the EEC, and in 1949 joined NATO.

TERRITORY AND POPULATION
The Netherlands is bounded in the north and west by the North Sea, south by Belgium and east by Germany. The area is 41,526 sq. km, of which 33,883 sq. km is land. Projects of sea-flood control and land reclamation (polders) by the construction of dams and drainage schemes have continued since 1920. More than a quarter of the country is below sea level.

The population was 13,060,115 at the census of 1971 and estimated to be 15,987,000 at the end of 2000 (8,077,000 females). Population growth in 2000, 0·65%. On 8 March 2001 the population reached 16m.

The UN gives a projected population for 2010 of 16·31m.

On-going ‘rolling’ censuses have replaced the former decennial counts.

Their relations are regulated by the 'Statute' for the Kingdom, which came into force on 29 Dec. 1954. Each part enjoys full autonomy; they are united, on a footing of equality, for mutual assistance and the protection of their common interests.

The Netherlands is a constitutional and hereditary monarchy.

terms. Members of the States-General must be Netherlands subjects of 18 years of age or over.

It applied to imports into the three countries from outside sources, and exempted from customs duties all imports into each of the three countries from the other two.

They can be removed only by a decision of the High Court.

At the district court the juvenile judge is specially appointed to try children's civil cases and at the same time charged with administration of justice for criminal actions committed by young persons between 12 and 18 years old, unless imprisonment of more than six months ought to be inflicted; such cases are tried by three judges.

ARUBA

KEY HISTORICAL EVENTS

Discovered by Alonzo de Ojeda in 1499, the island of Aruba was claimed for Spain but not settled. It was acquired by the Dutch in 1634, but apart from garrisons, was left to the indigenous Caiquetious (Arawak) Indians until the 19th century. From 1828 it formed part of the Dutch West Indies and, from 1845, part of the Netherlands Antilles with which, on 29 Dec. 1954, it achieved internal self government. Following a referendum in March 1977, the Dutch government announced on 28 Oct. 1981 that Aruba would proceed to independence separately from the other islands. Aruba was constitutionally separated from the Netherlands Antilles from 1 Jan. 1986, and full independence promised by the Netherlands after a ten-year period. However, an agreement with the Netherlands government in June 1990 deletes, at Aruba's request, references to eventual independence.

TERRITORY AND POPULATION

The island, which lies in the southern Caribbean 32 km north of the Venezuelan coast and 68 km west of Curaçao, has an area of 180 sq. km (75 sq. miles) and a population in Dec. 2000 of 91,065; density 506 inhabitants per sq. km. The chief towns are Oranjestad, the capital (1998 population, 29,000) and San Nicolas. Dutch is the official language, but the language usually spoken is Papiamento, a creole language. Over half the population is of Indian stock, with the balance of Dutch, Spanish and mestizo origin.

THE NETHERLANDS ANTILLES

De Nederlandse Antillen

KEY HISTORICAL EVENTS

With Aruba, the islands formed part of the Dutch West Indies from 1828, and the Netherlands Antilles from 1845, with internal self-government being granted on 29 Dec. 1954.

TERRITORY AND POPULATION

The Netherlands Antilles comprise two groups of islands, the Leeward group (Curaçao and Bonaire) being situated 100 km north of the Venezuelan coast and the

Windward group (Saba, Sint Eustatius and the southern portion of Sint Maarten) situated 800 km away to the northeast, at the northern end of the Lesser Antilles. The total area is 800 sq. km (308 sq. miles) and the population in 1995 was 207,333. The estimated population for 2000 was 215,000. An estimated 69·2% of the population were urban in 1995. Willemstad is the capital and had a 1999 population of 123,000.

The areas, populations and chief towns of the islands are:

Island	*Sq. km*	*1995 population*	*Chief town*
Bonaire	288	14,218	Kralendijk
Curaçao	444	151,448	Willemstad
Saba	13	1,200	The Bottom
Sint Eustatius	21	1,900	Oranjestad
Sint Maarten[1]	43	38,567	Philipsburg

[1]The northern portion (St Martin) belongs to France.

Dutch is the official language, but the languages usually spoken are Papiamento (derived from Dutch, Spanish and Portuguese) on Curaçao and Bonaire, and English in the Windward Islands.

All the islands have a tropical marine climate, with very little difference in temperatures over the year. There is a short rainy season from Oct. to Jan. Willemstad, Feb. 27·7°C, Aug. 29°C. Annual rainfall 499 mm.

CONSTITUTION AND GOVERNMENT

On 29 Dec. 1954 the Netherlands Antilles became an integral part of the Kingdom of the Netherlands but are fully autonomous in internal affairs, and constitutionally equal with the Netherlands and Aruba. The Sovereign of the Kingdom of the Netherlands is Head of State and Government, and is represented by a Governor.

The executive power in internal affairs rests with the Governor and the Council of Ministers, who together form the government. The Ministers are responsible to a unicameral legislature *(States)* consisting of 22 members, elected for a four-year term in three multi-seat constituencies and two single-seat constituencies.

The executive power in external affairs is vested in the Council of Ministers of the Kingdom, in which the Antilles is represented by a Minister Plenipotentiary with full voting powers. On each of the insular communities, local autonomous power is divided between an Island Council (elected by universal suffrage), the Executive Council and the Lieut.-Governor, responsible for law and order.

At a referendum in Curaçao on 19 Nov. 1993, 73% of votes cast favoured maintaining the status quo of Curaçao as part of the Netherlands Antilles. The other options were: autonomy (18%), unification with the Netherlands (8%) or complete independence (1%). At a referendum in Oct. 1994 Sint Maarten, Sint Eustatius and Saba voted to remain part of the Netherlands Antilles.

NEW ZEALAND

Capital: Wellington
Population estimate, 2000: 3·8m.
GDP per capita, 2000: (PPP$) 20,070
HDI/world rank: 0·917/19

KEY HISTORICAL EVENTS

New Zealand was first called *Aotearoa* by the Maori who migrated from other northern islands in Polynesia, sometime around AD 1400. The first European to discover New Zealand was Abel Tasman in 1642. He named the south island after the Dutch province of Zeeland. The coast was explored by Capt. Cook in 1769. From about 1800 onwards, New Zealand became a resort for whalers and traders, chiefly from Australia. New Zealand's European constitutional history can be traced back to 1840 when the Maori entered into an agreement with the Crown under the Treaty of Waitangi and New Zealand became a British colony with the Maori retaining full rights of self-governance. However, the effective administration of the country was soon taken over by European settlers although there were movements for Maori self-government. These movements declined in the early 1900s but the struggle for self-determination has re-emerged in recent years which have also seen a relative decline in the number of immigrants from England, Scotland and Ireland. New Zealand had its first elected House of Representatives in 1852 along with a nominated legislative Council and a Governor. Sheep farming came to dominate the economy and in 1882 the first refrigerated meat was sent to Britain.

In the last years of the 19th century, New Zealand adopted a succession of radical social reforms. New Zealand women gained the vote in 1893, the first in the world to be enfranchized.

TERRITORY AND POPULATION

New Zealand lies southeast of Australia in the south Pacific, Wellington being 1,983 km from Sydney. There are two principal islands, the North and South Islands, besides Stewart Island, Chatham Islands and small outlying islands, as well as the territories overseas.

New Zealand (*i.e.*, North, South and Stewart Islands) extends over 1,750 km from north to south. Area, excluding territories overseas, 270,534 sq. km: comprising North Island, 115,777 sq. km; South Island, 151,215 sq. km; Stewart Island, 1,746 sq. km; Chatham Islands, 963 sq. km. The minor islands (total area, 320 sq. miles or 829 sq. km) included within the geographical boundaries of New Zealand (but not within any local government area) are the following: Kermadec Islands (34 sq. km), Three Kings Islands (8 sq. km), Auckland Islands (606 sq. km), Campbell Island (114 sq. km), Antipodes Islands (62 sq. km), Bounty Islands (1 sq. km), Snares Islands (3 sq. km), Solander Island (1 sq. km). With the exception of meteorological station staff on Raoul Island in the Kermadec Group and Campbell Island there are no inhabitants.

The Kermadec Islands were annexed to New Zealand in 1887, have no separate administration and all New Zealand laws apply to them. Situation, 29° 10' to 31° 30' S. lat., 177° 45' to 179° W. long., 1,600 km NNE of New Zealand. The largest of the group is Raoul or Sunday Island, 29 sq. km, smaller islands being Macaulay and Curtis, while Macaulay Island is 5 km in circuit.

Pacific Island people made up 6·5% of the population in 2001 (5·0% in 1991); Asian ethnic groups went from 3·0% in 1996 to 6·6% in 2001. Permanent and long-term arrivals in 2001 totalled 81,094, including 16,844 from the UK, 12,186 from Australia, 11,107 from the People's Republic of China, 4,249 from India and 3,920 from Japan. From the 1970s organizations were formed to pursue Maori grievances over loss of land and resources. The Waitangi Tribunal was set up in 1975 as a forum for complaints about breaches of the Treaty of Waitangi, and in 1984 empowered to

hear claims against Crown actions since 1840. Direct negotiations with the Crown have been offered to claimants and a range of proposals to resolve historical grievances launched for public discussion in Dec. 1994. These proposals specify that all claims are to be met over ten years with treaty rights being converted to economic assets. There have been four recent major treaty settlements: NZ$170m. each for Tainui and Ngai Tahu, the NZ$150m. Sealord fishing agreement and NZ$40m. for Whakatohea in the Bay of Plenty. The Maori Land Court has jurisdiction over Maori freehold land and some general land owned by Maoris under the Te Ture Whenue Maori Act 1993.

CLIMATE

Lying in the cool temperate zone, New Zealand enjoys very mild winters for its latitude owing to its oceanic situation, and only the extreme south has cold winters. The situation of the mountain chain produces much sharper climatic contrasts between east and west than in a north-south direction. Mean daily maximum temperatures and rainfall figures:

	Jan (°C)	*July (°C)*	*Annual rainfall (mm) in 2000*
Auckland	23·3	14·4	1,046
Christchurch	22·5	11·2	706
Dunedin	18·9	9·9	926
Wellington	20·3	11·3	994

The highest extreme temperature recorded in 2000 was 35·0°C, recorded at both Darfield and Culverden on 4 March, and the lowest –12·4°C, at Tekapo on the morning of 24 Aug.

CONSTITUTION AND GOVERNMENT

Definition was given to the status of New Zealand by the (Imperial) Statute of Westminster of Dec. 1931, which had received the antecedent approval of the New Zealand Parliament in July 1931. The Governor-General's assent was given to the Statute of Westminster Adoption Bill on 25 Nov. 1947.

The powers, duties and responsibilities of the Governor-General and the Executive Council are set out in Royal Letters Patent and Instructions thereunder

of 11 May 1917. In the execution of the powers vested in him the Governor-General must be guided by the advice of the Executive Council.

At a referendum on 6 Nov. 1993 a change from a first-past-the-post to a proportional representation electoral system was favoured by 53·9% of votes cast.

Parliament is the *House of Representatives*, since 1996 consisting of 120 members: 60 for general seats, 55 for party list seats and 5 for Maori seats, elected by universal adult suffrage on the mixed-member-proportional system (MMP) for three-year terms. The five Maori electoral districts cover the whole country. Maori and people of Maori descent are entitled to register either for a general or a Maori electoral district. As at Sept. 1997 there were 163,310 persons on the Maori electoral roll. There are now six Maori seats at general elections.

INTERNATIONAL RELATIONS

New Zealand is a member of the UN, WTO, the Commonwealth, OECD, Asian Development Bank, the Pacific Community, the Pacific Islands Forum, Colombo Plan, APEC and the Antarctic Treaty.

ECONOMY

Services accounted for 66% of GDP in 1997, industry 25% and agriculture 9%.

According to the anti-corruption organization *Transparency International*, New Zealand ranked equal second in the world behind Finland in a 2002 survey of the countries with the least corruption in business and government. It received 9·5 out of 10 in the annual index.

Currency. The monetary unit is the *New Zealand dollar* (NZD), of 100 *cents*. The total value of notes and coins on issue from the Reserve Bank in Dec. 2000 was NZ$2,069m. Inflation was 1·8% in 2001. In June 2002 foreign exchange reserves were US$1,843m. Gold reserves are negligible. Total money supply in June 2002 was NZ$18,235m.

Budget. The following tables of revenue and expenditure relate to the Consolidated Account, which covers the ordinary revenue and expenditure of the government—*i.e.*, apart from capital items, commercial and special undertakings, advances, etc. Total revenue and expenditure of the Consolidated Account, in NZ$1m., year ended 30 June:

	1995	*1996*	*1997*	*1998*	*1999*

1999 tax revenue included (in NZ$1m.): income tax, NZ$14,963; company tax, NZ$3,888; withholding taxes, NZ$1,637; domestic goods and services, NZ$8,215. Non-tax revenue was approximately NZ$3,350m.

The gross public debt at June 1999 was NZ$36,712m., of which NZ$29,610m. was held in New Zealand currency and NZ$7,102m. in foreign currency.

New Zealand System of National Accounts. National Accounts aggregates for six years are given in the following table (in NZ$1m.):

Year ended 31 March	*Gross domestic product*	*Gross national income*	*National income*
1994	81,502	76,980	65,453

1999	101,169	96,192	82,063

Performance. GDP at current prices grew to NZ$103,857m. in the year ended March 2000, up from NZ$95,816m. in 1997. The New Zealand economy grew by 3·8% in 2000 and 2·6% in 2001. Total GDP was US$48·3bn. in 2001.

Banking and Finance. The central bank and bank of issue is the Reserve Bank (*Governor*, Dr Alan Bollard).

The financial system comprises a central bank (the Reserve Bank of New Zealand), registered banks, and other financial institutions. Registered banks include banks from abroad, which have to satisfy capital adequacy and managerial quality requirements. Other financial institutions include the regional trustee banks, now grouped under Trust Bank, building societies, finance companies, merchant banks and stock and station agents. The number of registered banks was 18 in 2000 of which only four were operating in New Zealand before 1986. Around 99% of the assets of the New Zealand banking system were under the ownership of a foreign bank parent.

The primary functions of the Reserve Bank are the formulation and implementation of monetary policy to achieve the economic objectives set by the government, and the promotion of the efficiency and soundness of the financial system, through the registration of banks, and supervision of financial institutions. Since 1996 supervision has been conducted on a basis of public disclosure by banks of their activities every quarter.

On 31 Dec. 2000 the funding (financial liabilities including deposits) and claims (financial assets including loans) for all registered banks and other financial institutions were: funding, NZ$179,617m. (in foreign currency, NZ$40,362m.); claims, NZ$142,915m. (foreign currency, NZ$12,398m.).

The stock exchange in Wellington conducts on-screen trading, unifying the three former trading floors in Auckland, Christchurch and Wellington.

Weights and Measures. The metric system of weights and measures operates.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* New Zealand's carbon dioxide emissions were the equivalent of 7·9 tonnes per capita in 1998.

Electricity. On 1 April 1987 the former Electricity Division of the Ministry of Energy became a state-owned enterprise, the Electricity Corporation of N.Z. Ltd, which has since been split into two state-owned enterprises causing a competitive wholesale electricity market to be established. Around 75% of the country's electricity is generated by renewable sources. Hydro-electric plants, mainly based in the South Island, account for some 70% with geothermal power, generated in the North Island, accounting for around 5%. The rest comes from natural gas (22%), coal, wind and landfill gas. Electricity generating capacity, 1997, 8m. kW. Consumption per capita was 8,215 kWh in 1998.

Electricity consumption statistics (in GWh) for years ended 31 March are:

	Residential	*Commercial*	*Industrial*	*Total consumption*
1996	10,584	5,595	14,342	30,522
1997	10,959	6,101	14,200	31,260
1998	10,824	6,988	13,577	31,390
1999	10,089	7,195	13,745	32,029

New Zealand also has two wind farms.

Oil and Gas. Crude oil and condensate production was 120·61 petajoules in 1997, all from the Taranaki region. Around two-thirds of production is exported. 168·39 petajoules were imported in 1997.

In 1998 gasfields produced 201 petajoules. Gas reserves are estimated to last until about 2014, with the Maui field possibly running out around 2006.

Minerals. Coal production for the year ended Dec. 1997 was 3·4m. tonnes. Of the 45 mines operating (down from 53 in 1995), 29 were opencast and 16 underground, responsible for about 78% and 22% of total coal production respectively. Only five mines produced over 200,000 tonnes of coal, and 18 operations had an output of less than 10,000 tonnes. Around 60% of New Zealand's exported coal goes to India and Japan.

While New Zealand's best known non-fuel mineral is gold (producing about 12 tonnes annually) there is also production of silver, ironsand, aggregate, limestone, clay, dolomite, pumice, salt, serpentinite, zeolite and bentonite. In addition, there are resources or potential for deposits of titanium (ilmenite beachsands), platinum, sulphur, phosphate, silica and mercury.

Agriculture. Two-thirds of the land area is suitable for agriculture and grazing. The total area of farmland in use at 30 June 1999 was 15,585,027 ha. There were 13,863,279 ha of grazing, arable, fodder and fallow land, 53,692 ha of land for horticulture and 446,954 ha of plantations of exotic timber.

The largest freehold estates are held in the South Island. The number of occupied holdings as at 30 June 1999 were as follows:

Regional Council	*No. of farms*	*Total area of farms (1,000 ha)*	*Regional Council*	*No. of farms*	*Total area of farms (1,000 ha)*

Total meat produced in 2000 was 1·33m. tonnes (including 623,000 tonnes of beef and veal, and 525,000 tonnes of lamb and mutton). Meat industry products are New Zealand's second largest export income earner, accounting for about 18% of merchandise exports. New Zealand's main meat exports are lamb, mutton and beef. About 80% of lamb, 80% of mutton and 80% of beef produced in New Zealand in 1997–98 was exported overseas. The domestic market absorbs over 99% of the pigmeat and poultry produced in New Zealand. 54% of the world's exported sheepmeat comes from New Zealand.

Production of wool for the year 1999–2000 was 193,000 tonnes. Milk production for 2000–01 totalled a record 12,322m. litres. In 1998–99 butter production totalled 232,948 tonnes and cheese production 238,535 tonnes.

Forestry. Forests covered 8·1m. ha in 1998 (29% of New Zealand's land area), up from 7·67m. ha in 1990. Of this, about 6·4m. ha are indigenous forest and 1·7m. ha planted productive forest. New planting increased from 15,000 ha in 1991 to 66,000 ha in 1997. Introduced pines form the bulk of the large exotic forest estate and among these radiata pine is the best multi-purpose tree, reaching log size in 25–30 years. Other species planted are Douglas fir and Eucalyptus species. Total roundwood production in 1999–2000 was 18·11m. cu. metres. The table below shows production of rough sawn timber in 1,000 cu. metres for years ending 31 March:

In 1999–2000 forest industries consisted of 338 sawmills, 6 plywood and 10 veneer plants, 4 particle board mills, 6 wood pulp mills (4 of which also produced paper and paperboard) and 5 fibreboard mills.

The basic products of the pulp and paper mills are mechanical and chemical pulp which are converted into newsprint, kraft and other papers, paperboard and fibreboard. Production of woodpulp in the year ending 31 March 2000 amounted to 1,527,565 tonnes and of paper (including newsprint paper and paperboard) to 829,812 tonnes.

Fisheries. In 1999 the total catch was 594,084 tonnes, almost entirely from sea fishing. The total value of New Zealand fisheries exports during the year ended Dec. 1998 was NZ$1,233m., of which hoki exports constituted NZ$294·6m.

Compulsory trade union membership was made illegal in 1991, and the national wage award system was replaced by local wage agreements under the Employment Contracts Act 1991. The NZCTU brings together nearly 300,000 union members in 34 affiliated unions.

COMMUNICATIONS

Roads. Total length of maintained roads at 1998 was 91,996·4 km (56,338·4 km sealed and 35,628 km gravel) with 15,800 bridges. There were 74 national and provincial state highways comprising 10,453 km of roadway, including the principal arterial traffic routes.

In Feb. 1998 there were 9,110 full-time equivalent persons employed in the provision of road passenger transport and 22,210 persons providing road freight transport.

Total expenditure on roads (including state highways), streets and bridges—by the central government and local authorities combined—amounted to NZ$1·1bn. in 1997.

At 31 March 1999 motor vehicles licensed numbered 2,668,536, of which 1,831,118 were cars. In 1997 there were 16,139 omnibuses/public taxis, and 38,288 motorcycles. Included in the remaining numbers were 8,425 powercycles, 346,489 trucks and 303,371 trailers and caravans.

In 1999 there were 434 deaths in road accidents.

Rail. New Zealand Rail was privatized in 1994 and is now known as Tranz Rail. In 1994 a 24-hour freight link was introduced between Auckland and Christchurch. There were, in 2000, 3,904 km of 1,067 mm gauge railway open for traffic (506 km electrified). In 1998 Tranz Rail carried 11·7m. tonnes of freight and 11·3m. passengers. Total revenue in the financial year 1999–2000 was NZ$594·5m.

At 30 June 2000 Tranz Rail track and rolling stock included 343 diesel, electric and shunting locomotives, 5,948 freight wagons, 321 passenger carriages and commuter units, three rail/road ferries (linking the North and South Islands) and plant and support equipment.

Civil Aviation. There are international airports at Wellington, Auckland and Christchurch, with Auckland International being the main airport. The national carrier is Air New Zealand. Trans-Tasman air travel is subject to agreement between Air New Zealand and Qantas.

New Zealand has one of the highest ratios of aircraft to population in the world with 3,403 aircraft in the year to June 1998. Since 1992 air transport flights have increased by about 9% per year. In 1999 scheduled airline traffic of New Zealand-based carriers flew 172·2m. km, carrying 8,892,000 passengers (2,829,000 on international flights).

Shipping. In 1998 merchant shipping totalled 336,000 GRT, including oil tankers 73,000 GRT.

Telecommunications. The provision of telecommunication services is the responsibility of the Telecom Corporation of New Zealand, formed in 1987 and privatized in 1990; and CLEAR Communications, which began operations in Dec. 1990. In 2000 there were 1,915,000 main lines, or 499·9 for every 1,000 persons, and 1·4m. PCs in use (360·2 per 1,000 persons). Mobile phone subscribers numbered 881,000 (230 per 1,000 persons) in 1999 and there were 65,000 fax machines in 1995. There were 2·06m. Internet users in Aug. 2002. IT spending in 1997, at 8·7% of GDP, is one of the highest in the developed world.

Postal Services. On 1 April 1998 the Postal Services Act removed New Zealand Post's former statutory monopoly on the carriage of letters and opened the postal market to full competition. To carry out a business involving the carriage of letters, a person or company must be registered as a postal operator with the Ministry of Commerce.

In 1997 there were 297 post shops, 705 post centre franchises and 3,663 stamp resellers.

SOCIAL INSTITUTIONS

Justice. The judiciary consists of the Court of Appeal, the High Court and District Courts. All exercise both civil and criminal jurisdiction. Final appeal lies to the Privy Council in London. Special courts include the Maori Land Court, the Maori Appellate Court, Family Courts, the Youth Court, Environment Court and the Employment Court. On 20 Nov. 1997 there were 4,935 sentenced inmates of whom 207 were women. Of the male inmates 44% (some 1,566) identified themselves as Maori only compared to 38% who identified themselves as European only. Some 526,372 offences, including 165 homicides, were reported in the year ending June 1997. The death penalty for murder was replaced by life imprisonment in 1961.

The Criminal Injuries Compensation Act, 1963, which came into force on 1 Jan. 1964, provided for compensation of persons injured by certain criminal acts and the dependants of persons killed by such acts. However, this has now been phased out in favour of the Accident Compensation Act, 1982, except in the residual area of property damage caused by escapees. The Offenders Legal Aid Act 1954 provides

that any person charged or convicted of any offence may apply for legal aid which may be granted depending on the person's means and the gravity of the offence etc. Since 1970 legal aid in civil proceedings (except divorce) has been available for persons of small or moderate means. The Legal Services Act 1991 now brings together in one statute the civil and criminal legal aid schemes.

Police. The police are a national body maintained by the central government. Legislation of 1994 permits the private management of prisons and prisoner escort services. For operational purposes New Zealand was divided into four police regions in July 1997, each controlled by an assistant commissioner. In 1991, 1,100 traffic officers merged with the police, who previously did not control traffic. In June 1998 there were 6,760 full-time equivalent sworn officers.

Ombudsmen. The office of Ombudsman was created in 1962. From 1975 additional Ombudsmen have been authorized. There are currently two. Ombudsmen's functions are to investigate complaints under the Ombudsman Act, the Official Information Act and the Local Government Official Information and Meetings Act from members of the public relating to administrative decisions of central, regional and local government.

During the year ended 30 June 2000 a total of 4,798 complaints were received, with files opened on 407 other cases. A total of 34 complaints were sustained during the year and 387 were still under investigation.

Religion. No direct state aid is given to any form of religion. For the Church of England the country is divided into seven dioceses, with a separate bishopric (Aotearoa) for the Maori. The Presbyterian Church is divided into 23 presbyteries and the Maori Synod. The Moderator is elected annually. The Methodist Church is divided into ten districts; the President is elected annually. The Roman Catholic Church is divided into four dioceses, with the Archbishop of Wellington as Metropolitan Archbishop.

There were four teachers' training colleges with 8,429 equivalent full-time students in 1999, and 70,338 equivalent full-time students were enrolled in polytechnic courses in 1999.

Total budgeted expenditure estimated in 1998 on education was NZ$5,756m. (16·8% of government expenses). The universities are autonomous bodies. All state-funded primary and secondary schools are controlled by boards of trustees. Education in state schools is free for children under 19 years of age. All educational institutions are reviewed every three years by teams of educational reviewers.

A series of reforms is being implemented by the government following reports of 18 working groups on tertiary education. These include a new funding system, begun in 1991 and based solely on student numbers.

From 1 Oct. 1998 anyone receiving unemployment benefit, sickness benefit, a training benefit, a 55 plus benefit, or a young job seekers allowance has received a benefit called the Community Wage. In return for receiving the Community Wage, recipients are expected to search for work, meet with Work and Income New Zealand when asked, take a suitable work offer, and take part in activities that would improve their chances of finding a job. For the year ended 30 June 1998, 154,774 people received Unemployment Benefits (replaced by the Community Wage on 1 Oct. 1998) with total gross expenditure amounting to NZ$1,496,701,000.

In the budget of July 1991 it was announced that current rates of Guaranteed Retirement Income Scheme (GRI) payment would be frozen until 1 April 1993, thereafter to be on the previous year's consumer price index. On 1 April 1992 GRI was replaced by the national superannuation scheme which is income-tested. Eligibility has been gradually increased to 65 years. Universal eligibility is available at 70 years. At 1 April 1999 a married couple received NZ$325·58 per week, a single person living alone NZ$212·69 per week.

Reciprocity with Other Countries. New Zealand has overseas social security agreements with the United Kingdom, the Netherlands, Greece, Ireland, Australia, Jersey and Guernsey, Denmark, Canada and Italy. The main purpose of these agreements is to encourage free movement of labour and to ensure that when a person has lived or worked in more than one country, each of those countries takes

a fair share of the responsibility for meeting the costs of that person's social security coverage. New Zealand also pays people eligible for New Zealand Superannuation or veterans' pensions who live in the Cook Islands, Niue or Tokelau.

TERRITORIES OVERSEAS

Territories Overseas coming within the jurisdiction of New Zealand consist of Tokelau and the Ross Dependency.

Tokelau

Tokelau is situated some 500 km to the north of Samoa and comprises three dispersed atolls—Atafu, Fakaofo and Nukunonu. The land area is 12 sq. km and the population at the 1996 census was 1,507, giving a density of 126 per sq. km.

The British government transferred administrative control of Tokelau to New Zealand in 1925. Formal sovereignty was transferred to New Zealand in 1948 by act of the New Zealand Parliament. New Zealand statute law, however, does not apply to Tokelau unless it is expressly extended to Tokelau. In practice New Zealand legislation is extended to Tokelau only with its consent.

Tokelau's three villages are its foundation, and have remained largely autonomous. There has never been any resident New Zealand administration. At the national level Tokelau's needs remain formally the responsibility of the New Zealand government, and in particular, the Administration of Tokelau.

Under a programme agreed in 1992, the role of Tokelau's political institutions is being better defined and expanded. The process under way enables the base of Tokelau government to be located within Tokelau's national level institutions rather than as before, within a public service located largely in Samoa. In 1994 the Administrator's powers were delegated to the *General Fono* (the national representative body), and when the *General Fono* is not in session, to the *Council of Faipule*. The Tokelau Amendment Act 1996 conferred on the *General Fono* a power to make rules for Tokelau, including the power to impose taxes.

Coconuts (the source of copra) are the only cash crop. Pulaka, breadfruit, papayas, the screw-pine and bananas are cultivated as food crops. Livestock comprises pigs, poultry and goats.

Development prospects are restricted by the small land area and population, geographic isolation, and the relatively high cost of providing education, health and other services including telecommunications and shipping, to three widely separated communities. For these reasons Tokelau relies substantially on external financial support, particularly from New Zealand. Nonetheless the development of government structures at the national level has promoted a wish for Tokelau to be self-reliant to the greatest extent possible.

Tokelau affirmed to the United Nations in 1994 that it had under active consideration both the Constitution of a self-governing Tokelau and an act of self-determination. It also expressed a strong preference for a future status of free association with New Zealand.

Ross Dependency

By Imperial Order in Council, dated 30 July 1923, the territories between 160° E. long. and 150° W. long. and south of 60° S. lat. were brought within the jurisdiction of the New Zealand government. The region was named the Ross Dependency. From time to time laws for the Dependency have been made by regulations promulgated by the Governor-General of New Zealand.

The mainland area is estimated at 400,000–450,000 sq. km and is mostly ice-covered. In Jan. 1957 a New Zealand expedition under Sir Edmund Hillary

established a base in the Dependency. In Jan. 1958 Sir Edmund Hillary and four other New Zealanders reached the South Pole.

The main base—Scott Base, at Pram Point, Ross Island—is manned throughout the year, about 12 people being present during winter. Temporary accommodation facilities provide support for specific activities in the Dry Valleys and elsewhere in the Ross Sea Region. The annual activities of 200–300 scientists and support staff are managed by a crown agency, Antarctica New Zealand, based in Christchurch.

SELF-GOVERNING TERRITORIES OVERSEAS

THE COOK ISLANDS

KEY HISTORICAL EVENTS

The Cook Islands, which lie between 8° and 23° S. lat., and 156° and 167° W. long., were made a British protectorate in 1888, and on 11 June 1901 were annexed as part of New Zealand. In 1965 the Cook Islands became a self-governing territory in 'free association' with New Zealand.

TERRITORY AND POPULATION

The islands fall roughly into two groups—the scattered islands towards the north (Northern group) and the islands towards the south (Southern group). The islands with their populations at the census of 1996:

CONSTITUTION AND GOVERNMENT

The Cook Islands Constitution of 1965 provides for internal self-government but linked to New Zealand by a common Head of State and a common citizenship, that of New Zealand. It provides for a ministerial system of government with a Cabinet consisting of a Prime Minister and not more than eight nor fewer than six other

Ministers. There is also an advisory council composed of hereditary chiefs, the 15-member House of Ariki, without legislative powers. KEY HISTORICAL EVENTS

Colonization of the Nicaraguan Pacific coast was undertaken by Spaniards from Panama, beginning in 1523. France and Britain, however, and later the USA, all tried to play a colonial or semi-colonial role in Nicaragua. Nicaragua became an independent republic in 1838 but its independence was often threatened by US intervention. Between 1910 and 1930 the country was under almost continuous US military occupation.

In 1914 the Bryan-Chamarro Treaty entitled the USA to a permanent option for a canal route through Nicaragua, a 99-year option for a naval base in the Bay of Fonseca on the Pacific coast and occupation of the Corn Islands on the Atlantic coast. The Bryan-Chamarro Treaty was not abrogated until 14 July 1970 when the Corn Islands returned to Nicaragua.

The Somoza family dominated Nicaragua from 1933 to 1979. Through a brutal dictatorship imposed by means of the National Guard, they secured for themselves a large share of the national wealth. In 1962 the radical Sandanista National Liberation Front was formed with the object of overthrowing the Somozas. After 17 years of civil war the Sandanistas triumphed. On 17 July 1979 President Somoza fled into exile. The USA made efforts to unseat the revolutionary government by supporting the Contras (counter-revolutionary forces). It was not until 1988 that the state of emergency was lifted as part of the Central American peace process. Rebel anti-Sandanista activities had ceased by 1990; the last organized insurgent group negotiated an agreement with the government in April 1994.

In Oct. 1998 Hurricane Mitch devastated the country causing 3,800 deaths.

KEY HISTORICAL EVENTS

The territory was at the centre of the slave trade in the 18th century. The port of Lagos was annexed by Britain in Aug. 1861. Growing British involvement in the Lagos hinterland and in the Niger Delta led to the chartering of the Royal Niger Company which established its own political administration over a wide territory. On 1 Jan. 1900 the Royal Niger Company transferred its territory to the British Crown. The 'colony and protectorate of Nigeria' was created in 1914. Africans were excluded from political power until the end of the Second World War. Full independence was achieved by the Federation of Nigeria on 1 Oct. 1960 and it became a republic on 1 Oct. 1963.

The republic was overthrown by a military coup on 15 Jan. 1966. Ethnic and regional conflict ensued with Hausa northerners fearing domination by the Igbo people from the east of the country. The Eastern Region decided to secede as the Republic of Biafra in May 1967. This set off a bloody civil war, prolonged by international involvement, and a severe famine. Subsequent attempts to re-establish civilian rule were thwarted by the military. Following the execution of Ogoni separatist Ken Saro-wiwa and eight other civil rights activists in Nov. 1995, Nigeria was suspended from the Commonwealth. Gen. Abacha promised to restore constitutional government by Oct. 1998 but died on 8 June 1998, reportedly of a heart attack. He was replaced as president by Gen. Abdulsalam Abubakar who scrapped election plans designed to retain power for Abacha and released political detainees. Chief Moshood Abiola, the imprisoned undeclared winner of the 1993 presidential election, died on 7 July 1998 the day before his expected release from prison.

Gen. Abubakar launched a corruption probe, announced a cabinet with civilians occupying most of the key posts and promised to give up power in May 1999 to allow for a return to civilian rule. Presidential elections were held on 27 Feb. 1999. The victor was Olusegun Obasanjo, a 62-year-old retired general who once led his country as part of a military junta. In Oct. 2000 a state of emergency was declared following violence which had claimed more than 100 lives in Lagos. Violent unrest, mainly between Christians and Muslims, has claimed more than 7,000 lives since 1999.

CONSTITUTION AND GOVERNMENT

The constitution was promulgated on 5 May 1999, and entered into force on 29 May. Nigeria is a federation, comprising 36 states and a federal capital territory. The constitution includes provisions for the creation of new states and for boundary adjustments of existing states. The legislative powers are vested in a *National Assembly*, comprising a *Senate* and a *House of Representatives*. The 109-member Senate consists of three senators from each state and one from the federal capital territory, who are elected for a term of four years. The House of Representatives comprises 360 members, representing constituencies of nearly equal population as far as possible, who are elected for a four-year term. The president is elected for a term of four years and must receive not less than one-quarter of the votes cast at the federal capital territory.

DEFENCE

In 2000 defence expenditure totalled US$2,340m. (the highest of any country in sub-Saharan Africa), equivalent to US$20 per capita and representing 4·5% of GDP.

Army. Strength (1999) 79,000.

Navy. The Navy includes one frigate with a helicopter and one corvette. The Navy has a small aviation element. Naval personnel in 1999 totalled 5,500, including Coastguard. The main bases are at Apapa (Lagos) and Calabar.

INTERNATIONAL RELATIONS

Nigeria is a member of the UN, WTO, the African Union, African Development Bank, ECOWAS, the Lake Chad Basin Commission, OIC, OPEC, IOM and is an ACP member state of the ACP-EU relationship.

ECONOMY

Agriculture accounted for 31·7% of GDP in 1998, industry 41·0% and services 27·3%. Nigeria's 'shadow' (black market or underground) economy constitutes 77% of the country's official GDP—one of the highest percentages of any country in the world.

Overview. With the change of leadership in 1999, the long promised three-phased privatization programme is under way. Money owed to oil companies has been paid. Sanctions, except for the ban on arms sales, have been lifted. A ten-year rift with the IMF ended with an agreement (Jan. 1999) on a Fund-monitored economic reform programme. Promised reforms included abolishing the dual exchange rate, ending the subsidy of local fuel and increasing the pace of privatization. If the government sticks to this programme, expected benefits include a rescheduling of foreign debt and a further IMF agreement on a US$1bn. loan. The new legislation is also committed to implementing the Vision 2010 programme drawn up in the mid 1990s, although many observers doubt whether its goals are realistically attainable. Privatization deals since 1999 have raised approaching ₦50bn.

Currency. The unit of currency is the *naira* (NGN) of 100 *kobo*. Foreign exchange reserves were US$9,226m. in May 2002 (US$1,443m. in 1995). A dual exchange rate, abolished in Oct. 1999, allowed the government to purchase US dollars for 25% of the market price. Gold reserves were 687,000 troy oz in May 2002. Inflation was 18·9% in 2001. In March 2002 total money supply was ₦835,923m.

Budget. The financial year is the calendar year. 1997 revenue, ₦384,603m. (of which petroleum royalties and rents accounted for 36·3%); expenditure, ₦312,322m. (of which capital expenditure accounted for 52·0% and recurrent expenditure 48·0%).

Performance. Real GDP growth was 4·3% in 2000 and 2·8% in 2001. Before the discovery of oil in the early 1970s Nigeria's GDP per head was around US$200. By the early 1980s it had reached around US$800, but has now declined to some US$300. Total GDP in 2001 was US$41·2bn.

Banking and Finance. The Central Bank of Nigeria is the bank of issue (*Governor*, Dr Joseph Sanusi). There were 65 commercial banks (with 2,403 branches) and 51 merchant banks in 1995 (with 144 branches), in 20 of which central or state governments held a controlling interest. There are three main banks—Union Bank, First Bank and UBA. Total assets of commercial banks, 1995, ₦463,671m.; merchant banks, ₦91,803m. Total saving deposits, Dec. 1995, ₦121,026m.

A subsequent banking crisis resulted in a decline in the number of banks to 74 at March 1999. Of these, 17 had missed the deadline for increasing their capital to US$5·75m. by the end of 1998 and faced closure if they did not recapitalize, merge or get taken over by the end of the first quarter of 1999. In banking surveys for 1998, 26 banks were classed as 'distressed' and only 25 as 'acceptable risks or better'. It was predicted that there would be further bank closures as the industry becomes more competitive.

There is a stock exchange.

Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* Nigeria's carbon dioxide emissions were the equivalent of 0·6 tonnes per capita in 1998. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked Nigeria 133rd in the world out of 142 countries analysed, with 36·7%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

Electricity. Installed capacity, 1997, 6m. kW. Production, 1998, 14·75bn. kWh (38% kWh hydro-electric); consumption per capita was 85 kWh. The government plans to break up and privatize the state-run electricity company NEPA by the end of 2003.

Oil and Gas. Oil accounts for around 97% of Nigeria's exports. The cumulative income from oil over 25 years exceeds US$220,000m. Nigeria's oil production amounted to 766·5m. bbls. in 1998 (equivalent to 2·1m. bbls. a day, up from 1·5m. bbls. per day in 1986). Reserves in 2001 totalled 24·0bn. bbls., although this figure is expected to reach around 30bn. bbls. by 2004. There are four refineries. Oil income in 1998 was around US$1bn. a month, representing more than 75% of government revenue, but unrest which threatened to escalate into civil war caused production to be cut by around a third.

Natural gas reserves, 2000 estimate, were 3,483bn. cu. metres; production, 1999, 5·7bn. cu. metres. Nigeria has signed an agreement for a US$430m., 600-km pipeline to supply natural gas to Benin, Ghana and Togo. It is expected to come into operation in 2005 moving around 1,415,000 cu. metres per day in the first instance. In Dec. 2002 the African Development Bank, six Nigerian banks and 19 international banks announced plans to invest US$1bn. in the Nigeria Liquefied Natural Gas company (NLNG) to exploit exports to the USA and Europe. Ownership of the NLNG is shared between the Nigerian National Petroleum Corporation, Total Fina Elf, Royal Dutch/Shell and AGIP.

Water. 11 River Basin Development Authorities have been established for water resources development.

Minerals. Production, 1998 (in tonnes): limestone, 3·66m.; coal (1996), 50,000; marble, 22,460. There are large deposits of iron ore, coal (reserves estimate 245m. tonnes), lead and zinc. There are small quantities of gold and uranium. Lead production was 3,000 tonnes in 1990; tin, 149 tonnes in 1992.

Agriculture. Of the total land mass, 75% is suitable for agriculture, including arable farming, forestry, livestock husbandry and fisheries. In 1998, 28·2m. ha were arable and 2·54m. ha permanent cropland. 0·23m. ha were irrigated in 1998. 90% of production was by smallholders with less than 3 ha in 1998, and less than 1% of farmers had access to mechanized tractors. Main food crops are millet and sorghum in the north, plantains and oil palms in the south, and maize, yams, cassava and rice in much of the country. The north is, however, the main food producing

area. Cocoa is the crop that contributes most to foreign exchange earnings. Output, 2000 (in 1,000 tonnes): cassava, 32,697; yams, 25,873; sorghum, 7,520; millet, 5,960; maize, 5,476; taro, 3,835; rice, 3,277; groundnuts, 2,783; plantains, 1,902; sweet potatoes, 1,662; palm oil, 896; pineapples, 881; tomatoes, 879. Nigeria is the biggest producer of yams, accounting for more than two-thirds of the annual world output. It is also the leading cassava and taro producer and the second largest millet producer.

Livestock, 2000: cattle, 19·83m.; sheep, 20·50m.; goats, 24·30m.; pigs, 4·86m.; chickens, 126m. Products (in 1,000 tonnes), 2000: beef and veal, 298; goat meat, 154; mutton and lamb, 91; pork, bacon and ham, 78; poultry meat, 172; milk, 386; eggs, 435.

Forestry. There were 13·78m. ha of forests in 1995, or 15·1% of the land area (14·39m. ha and 15·8% in 1990). The most important timber species include mahogany, iroko, obeche, abwa, ebony and camwood. Nigeria is Africa's leading roundwood producer, with removals totalling 100·64m. cu. metres in 1999.

Fisheries. The total catch in 1999 was 455,628 tonnes, of which 139,393 tonnes came from inland fishing.

INDUSTRY

Manufacturing contributes about 9% of GDP. 1998 production (in 1,000 tonnes) included: palm oil, 810; paper and products, 57; sugar, 15; cement (1997), 2,520; cigarettes (1994), 9,228. Also plywood (1994), 72,000 cu. metres.

Labour. The labour force in 1996 totalled 45,565,000 (64% males). There were 196 work stoppages in 1995 with 235·1m. working days lost. Unemployment in 1999 was approximately 40%.

The national carrier is Nigeria Airways. It has been the subject of mismanagement investigations after more than US$400m. disappeared between 1983 and 1999. It began European operations again in late 1999, and to London in 2001, having been out of service for some time in the region because of the huge debts. The government sold a 49% stake to a UK leasing company Airwing Aerospace in 2002. In 2000 Lagos handled 2,489,000 passengers (1,435,000 on domestic flights) and, in 1998, 15,100 tonnes of freight. It has original jurisdiction in any dispute between the Federal Republic and any State or between States; and to hear and determine appeals from the Federal Court of Appeal, which acts as an intermediate appellate Court to consider appeals from the High Court.

High Courts, presided over by a Chief Justice, are established in each state. All judges are appointed by the government. Magistrates' courts are established throughout the Republic, and customary law courts in southern Nigeria. In each of the northern States of Nigeria there are the Sharia Court of Appeal and the Court of Resolution. Muslim Law has been codified in a Penal Code and is applied through Alkali courts. In Oct. 1999 *sharia*, or Islamic law, was introduced in the northern province of Zamfara. The death penalty is in force and was last used in Jan. 2002.

KEY HISTORICAL EVENTS

Norway was under Danish domination from the 14th century. By a Treaty of 14 Jan. 1814, the King of Denmark ceded Norway to the King of Sweden and on 14 Aug. a convention proclaimed the independence of Norway in a personal union with Sweden. This was followed on 4 Nov. by the election of Karl XIII (II) as King of Norway. Norway declared this union dissolved on 7 June 1905 and Sweden agreed to the repeal of the union on 26 Oct. 1905. After a plebiscite, Prince Carl of Denmark was formally elected King on 18 Nov. 1905, taking the name of Haakon VII. He reigned for 52 years, after which he was succeeded by his son. From 1940 to 1944, during the Second World War, Norway was occupied by the Germans who set up a widely resented pro-German government under Vidkun Quisling. Apart from this wartime episode, the Labour Party held office, and the majority in the Storting (parliament), from 1935 to 1965. From 1965 coalitions or minority governments have held power with Labour remaining the largest single party. The discovery of extensive off shore oil reserves in the 1960s transformed the Norwegian economy, making it one of the world's richest.

TERRITORY AND POPULATION

Norway is bounded in the north by the Arctic Ocean, east by Russia, Finland and Sweden, south by the Skagerrak Straits and west by the North Sea. The total area of mainland Norway is 323,758 sq. km, including 17,506 sq. km of fresh water. Total coastline, including fjords, 21,340 km. There are more than 50,000 islands along the coastline. Exposed mountain (either bare rock or thin vegetation) makes up over 70% of the country. 25% of the land area is woodland and 4% tilled land.

Population (1990 census) was 4,247,546 (2,099,881 males; 2,147,655 females); population density per sq. km, 13·8. Estimated population, 1 Jan. 2001, 4,503,436; population density, 13·9. With the exception of Iceland, Norway is the most sparsely populated country in Europe.

The UN gives a projected population for 2010 of 4·61m.

There are 19 counties (*fylke*). Land area, population and densities:

CLIMATE

There is considerable variation in the climate because of the extent of latitude, the topography and the varying effectiveness of prevailing westerly winds and the Gulf Stream. Winters along the whole west coast are exceptionally mild but precipitation is considerable. Oslo, Jan. 24·3°F (–4·3°C), July 61·5°F (16·4°C). Annual rainfall 30·0" (763 mm). CONSTITUTION AND GOVERNMENT

Norway is a constitutional and hereditary monarchy.

The reigning King is **Harald V**, born 21 Feb. 1937, married on 29 Aug. 1968 to Sonja Haraldsen. He succeeded on the death of his father, King Olav V, on 21 Jan.

1991. *Offspring:* Princess Märtha Louise, born 22 Sept. 1971 (married Ari Behn, b. 30 Sept. 1972, on 24 May 2002); Crown Prince Haakon Magnus, born 20 July 1973 (married Mette-Marit Tjessem Høiby, b. 19 Aug. 1973, on 25 Aug. 2001; *offspring* from previous relationship, Marius, b. Jan. 1997). The king and queen together receive an annual personal allowance of 7·0m. kroner from the civil list, and the Crown Prince and Crown Princess together 4·7m. kroner. Princess Märtha Louise relinquished her allowance in 2002. Women have been eligible to succeed to the throne since 1990. There is no coronation ceremony. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

The Constitution, voted by a constituent assembly on 17 May 1814 and modified at various times, vests the legislative power of the realm in the *Storting* (Parliament). The royal veto may be exercised; but if the same Bill passes two Stortings formed by separate and subsequent elections it becomes the law of the land without the assent of the sovereign. The King has the command of the land, sea and air forces, and makes all appointments.

The 165-member Storting is directly elected by proportional representation. The country is divided into 19 districts, each electing from 4 to 15 representatives.

The Storting, when assembled, divides itself by election into the *Lagting* and the *Odelsting*. The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. Each Ting (the Storting, the Odelsting and the Lagting) nominates its own president. Most questions are decided by the Storting, but questions relating to legislation must be considered and decided by the Odelsting and the Lagting separately. Only when the Odelsting and the Lagting disagree, the Bill has to be considered by the Storting in plenary sitting, and a new law can then only be decided by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution, which can only be decided by the Storting in plenary sitting. The Storting elects five delegates, whose duty it is to revise the public accounts. The Lagting and the ordinary members of the Supreme Court of Justice (the *Høyesterett*) form a High Court of the Realm (the *Riksrett*) for the trial of ministers, members of the *Høyesterett* and members of the Storting. The impeachment before the *Riksrett* can only be decided by the Odelsting.

The executive is represented by the King, who exercises his authority through the Cabinet. Cabinet ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote.

National Anthem. 'Ja, vi elsker dette landet' ('Yes, we love this land'); words by B. Bjørnson, tune by R. Nordraak.

Norway has acceded to the Schengen Accord abolishing border controls between Norway, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, Luxembourg, the Netherlands, Portugal, Spain and Sweden.

In a referendum on 27–28 Nov. 1994, 52·2% of votes cast were against joining the EU. The electorate was 3,266,182; turn-out was 88·88%.

ECONOMY

Agriculture accounted for 2·0% of GDP in 1997, industry 32·1% and services 65·9%.

According to the anti-corruption organization *Transparency International*, in 2002 Norway ranked equal 12th in the world in a survey of the countries with the least corruption in business and government. It received 8·5 out of 10 in the annual index.

Overview. Although a small economy, in terms of GDP per capita Norway is one of the world's wealthiest nations. As the central government budget represents a large share of the economy, fiscal policy is a vital component of economic stability. Labour market tensions and high oil revenues have meant that fiscal policies have not met their objectives, which places a heavy burden on monetary policy. In 2002 passenger tax on air travel was abolished, property taxes reduced and duties on alcohol were lowered. Monetary policy aims at a stable exchange rate.

Currency. The unit of currency is the *Norwegian krone* (NOK) of 100 *øre.* After Oct. 1990 the krone was fixed to the ecu in the EMS of the EU in the narrow band of 2·25%, but it was freed in Dec. 1992. Annualized inflation was 3·0% in 2001.

Foreign exchange reserves were US$16,048m. and gold reserves 1·18m. troy oz in June 2002. In May 2002 total money supply was 658,812m. kroner.

Budget. Central government current revenue and expenditure (in 1m. kroner) for years ending 31 Dec.:

	1997	*1998*	*1999*[1]	*2000*[1]
Revenue	466,950	463,066	493,350	640,782
Expenditure	375,747	399,331	424,565	456,677

[1]Provisional.

The standard rate of VAT is 24·0%.

Performance. The strong performance of the Norwegian economy in 1993–98 lifted mainland GDP by 20%, but there was a significant slowdown in 1998 when the oil price collapsed at a time when the labour market was overheated. Real GDP growth, which averaged 5·1% between 1994–97, was 2·4% in 2000 but only 1·4% in 2001. Norway's total GDP in 2001 was US$165·5bn.

Banking and Finance. Norges Bank is the central bank and bank of issue. Supreme authority is vested in the Executive Board consisting of seven members appointed by the King and the Supervisory Council consisting of 15 members elected by the Storting. The *Governor* is Svein Gjedrem. Total assets and liabilities at 31 Dec. 1999 were 506,710m. kroner. This was estimated to have risen to 809,684m. kroner by 31 Dec. 2000.

There are three major commercial banks: Nordea Bank Norge ASA, DNB Holding ASA and Fokus. Total assets and liabilities of the 21 commercial banks at 31 Dec. 1999 were 709,280m. kroner.

The number of savings banks at 31 Dec. 1999 was 130; total assets and liabilities on 31 Dec. 1999 were 488,411m. kroner.

There is a stock exchange in Oslo.

Weights and Measures. The metric system is obligatory.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* Norway's carbon dioxide emissions in 1998 were the equivalent of 7·6 tonnes per capita. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked Norway second in the world behind Finland, with 73·0%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

In 2000 there were 18 national parks (total area, 1,386,840 ha), 1,441 nature reserves (279,590 ha), 97 landscape protected areas (779,825 ha) and 75 other areas with protected flora and fauna (9,325 ha).

Norway is one of the world leaders in recycling. In 1999, 38% of all household waste was recycled, including 81% of glass.

Electricity. Norway is the sixth largest producer of hydropower in the world and the largest in Europe. The potential total hydro-electric power was estimated at 180,199m. kWh in 1999. Installed electrical capacity in 1997 was 27m. kW, more than 95% of it hydro-electric. Production, 2000 estimate, was 142,984m. kWh (over 99% hydro-electric). Consumption per capita in 1998 was 24,607 kWh. In 1991 Norway became the first country in Europe to deregulate its energy market. Norway is a net importer of electricity.

Oil and Gas. There are enormous oil reserves in the Norwegian continental shelf. In 1966 the first exploration well was drilled. Production of crude oil, 2000, 158,625,000 tonnes. Norway is the world's third biggest oil exporter after Saudi Arabia and Russia, producing around 3·1m. bbls. a day in 2000. It had proven reserves of 9·4bn. bbls. in 2000. In March 1998 Norway announced that it would reduce its output for the year by 100,000 bbls. per day as part of a plan to cut global crude production. In June 2001 the Norwegian government sold a 17·5% stake in Statoil, the last major state-owned oil company in western Europe. The privatization was the largest in Norway's history.

Output of natural gas, 2000, 53,018m. cu. metres with proven reserves of 1,250bn. cu. metres.

Agriculture. Norway is barren and mountainous. The arable area is in strips in valleys and around fjords and lakes.

In 1999 the agricultural area[1] was 1,038,200 ha, of which 638,800 ha were meadow and pasture, 182,600 ha were sown to barley, 91,300 ha to oats, 51,600 ha to wheat and 14,900 ha to potatoes. Production (in 1,000 tonnes) in 1999: hay, 2,671; barley, 624; potatoes, 380; oats, 356; wheat, 230.

Livestock, 1999[1], 1,033,070 cattle (312,948 milch cows), 2,324,789 sheep, 68,714 goats, 738,720 pigs, 3,181,174 hens, 110,000 silver and platinum fox, 350,000 blue fox, 350,000 mink, 183,100 reindeer.

[1]Holdings with at least 50 ha agricultural area in use.

Forestry. In 1995 the total area under forests was 8·07m. ha, or 26·3% of the total land area (7·94m. ha and 25·9% in 1990). Productive forest area, 1997, approximately 67,375 sq. km. About 80% of the productive forest area consists of conifers and 20% of broadleaves. In 1999, 8·42m. cu. metres of roundwood were cut.

Fisheries. The total number of fishermen in 2000 was 20,242, of whom 5,887 had another chief occupation. In 2000 the number of registered fishing vessels (all with motor) was 8,430, and of these 4,585 were open boats.

The catch in 2000 (provisional) totalled 2,701,852 tonnes, almost entirely from sea fishing. The catch of herring totalled 799,732 tonnes, capelin 374,580 tonnes and cod 220,117 tonnes. 20,549 seals were caught in 2000 (of which 18,678 harp and 1,871 hooded seals). Commercial whaling was prohibited in 1988, but recommenced in 1993: 487 whales were caught in 2000. Norway is the second largest exporter of fishery commodities, after Thailand. In 1999 exports were valued at US$3·77bn.

There is a metro (98 km) and tram/light rail line (54 km) in Oslo.

Civil Aviation. The main international airports are at Oslo (Gardermoen), Bergen (Flesland), Trondheim (Værnes) and Stavanger (Sola). Kristiansand (Kjevik) and Torp also have a few international flights. Denmark and Norway each hold two-sevenths and Sweden three-sevenths of the capital of SAS (Scandinavian Airlines System), but they have joint responsibility towards third parties. 20,606,700 passengers were carried on all domestic and international flights in 1997. Braathens is the major airline after SAS, carrying 5,936,600 passengers in 1999 (648,700 on international flights).

In 2000 Oslo (Gardermoen) handled 14,194,334 passengers (7,480,800 on domestic flights) and 56,686 tonnes of freight. Bergen is the second busiest airport for passenger traffic, with 3,725,633 in 2000 (3,017,449 on domestic flights), and Trondheim second busiest for freight, with 7,784 tonnes (and 2,829,448 passengers) in 2000. Oslo Fornebu, which had for many years been the busiest airport, closed down in 1998 to be replaced by Gardermoen as the country's main international airport.

There were also 954 ships totalling 2,985,000 GRT on the Norwegian Ordinary Register. These figures do not include fishing boats, tugs, salvage vessels, icebreakers and similar special types of vessels. Norway's merchant fleet represents 4·3% of total world tonnage.

In 1999, 46,037,000 passengers were carried by coastwise shipping on long distance, local and ferry services.

The warm Gulf Stream ensures ice-free harbours throughout the year.

SOCIAL INSTITUTIONS

Justice. The judicature is common to civil and criminal cases; the same professional judges preside over both. These judges are state officials. The participation of lay judges and jurors, both summoned for the individual case, varies according to the kind of court and kind of case.

The 96 city or district courts of first instance are in criminal cases composed of one professional judge and two lay judges, chosen by ballot from a panel elected by the local authority. In civil cases two lay judges may participate. These courts are competent in all cases except criminal cases where the maximum penalty exceeds six years imprisonment. In every community there is a Conciliation Board composed of three lay persons elected by the district council. A civil lawsuit usually

begins with mediation by the Board which can pronounce judgement in certain cases.

The five high courts, or courts of second instance, are composed of three professional judges. Additionally, in civil cases two or four lay judges may be summoned. In serious criminal cases, which are brought before high courts in the first instance, a jury of ten lay persons is summoned to determine whether the defendant is guilty according to the charge. In less serious criminal cases the court is composed of two professional and three lay judges. In civil cases, the court of second instance is an ordinary court of appeal. In criminal cases in which the lower court does not have judicial authority, it is itself the court of first instance. In other criminal cases it is an appeal court as far as the appeal is based on an attack against the lower court's assessment of the facts when determining the guilt of the defendant. An appeal based on any other alleged mistakes is brought directly before the Supreme Court.

The Supreme Court *(Høyesterett)* is the court of last resort. There are 18 Supreme Court judges. Each individual case is heard by five judges. Some major cases are determined in plenary session. The Supreme Court may in general examine every aspect of the case and the handling of it by the lower courts. However, in criminal cases the Court may not overrule the lower court's assessment of the facts as far as the guilt of the defendant is concerned.

The Court of Impeachment *(Riksretten)* is composed of five judges of the Supreme Court and ten members of Parliament.

The population in penal institutions in 1998 was 2,466 (55 per 100,000 of national population).

Religion. There is freedom of religion, the Church of Norway (Evangelical Lutheran), however, being the national church, endowed by the State. Its clergy are nominated by the King. Ecclesiastically Norway is divided into 11 bishoprics, 96 archdeaconries and 626 clerical districts. There were 286,000 members of registered and unregistered religious communities outside the Evangelical Lutheran Church, subsidized by central government and local authorities in 2000. There were also 67 Muslim congregations with 56,458 members. The Roman Catholics are under a Bishop at Oslo, a Vicar Apostolic at Trondheim and a Vicar Apostolic at Tromsø.

Education. Free compulsory schooling in primary and lower secondary schools was extended to 10 years from 9, and the starting age lowered to 6 from 7, in July 1997. All young people between the ages of 16 and 19 have the statutory right to three years of upper secondary education. In 1999 there were 5,942 kindergartens (children up to six years old) with 187,612 children and 52,491 staff. In 1999–2000 there were 3,271 primary and lower secondary schools with 580,261 pupils and 44,740 teachers; 705 upper secondary schools with 191,669 pupils and 20,852 teachers; and 60 colleges, with 112,677 students and 5,348 teachers.

There are four universities: Oslo (founded 1811), with 31,821 students in Oct. 2000; Bergen (1946), with 16,379 students; Tromsø (1968), with 6,073 students; and the Norwegian University of Science and Technology (1996, formerly the University of Trondheim and the Norwegian Institute of Technology), with 19,426 students. There are also six university colleges and 26 state colleges. In 2000–01 the universities and university colleges had 81,561 students, and the state colleges 109,893 students. The University of Tromsø is responsible for Sami language and studies.

In 1996 total expenditure on education came to 7·4% of GNP and 15·8% of total government spending. The adult literacy rate in 1998 was at least 99%.

Health. The health care system, which is predominantly publicly financed (mainly by a national insurance tax), is run on both county and municipal levels. Persons who fall ill are guaranteed medical treatment, and health services are distributed according to need. In 1999 there were the equivalent of 6,909 full-time doctors, 21,336 nurses and 5,152 auxiliary nursing personnel. In 1994 provision of hospital beds was 51 per 10,000 population.

In 2000, 31·4% of men and 32·3% of women smoked. The rate among women is one of the highest in the world.

Norway has the EU's lowest rate of AIDS at 11·1 cases per 100,000 population.

Welfare. In 2000 there were 628,890 old age pensioners who received a total of 65,347·4m. kroner, 279,573 disability pensioners who received 30,399·2m. kroner,

27,087 widows and widowers who received 1,879·0m. kroner and 40,382 single parents who received 2,733·6m. kroner. In 2000, 1,047,618 children received family allowances. Maternity leave is for one year on 80% of previous salary; unused portions may pass to a husband. In 2000 sickness benefits totalling 37,870·8m. kroner were paid: 21,774·5m. kroner in sickness allowances and 16,096·3m. kroner in medical benefits. Expenditure on benefits at childbirth and adoption totalled 7,853·6m. kroner to 97,746 cases in 2000.

SVALBARD

An archipelago situated between 10° and 35° E. long. and between 74° and 81° N. lat. Total area, 61,229 sq. km (23,640 sq. miles). The main islands are Spitsbergen, Nordaustlandet, Edgeøya, Barentsøya, Prins Karls Forland, Bjørnøya, Hopen, Kong Karls Land and Kvitøya. The Arctic climate is tempered by mild winds from the Atlantic.

The archipelago was probably discovered by Norsemen in 1194 and rediscovered by the Dutch navigator Barents in 1596. In the 17th century whale-hunting gave rise to rival Dutch, British and Danish-Norwegian claims to sovereignty; but when in the 18th century the whale-hunting ended, the question of the sovereignty of Svalbard lost its significance. It was again raised in the 20th century, owing to the discovery and exploitation of coalfields. By a treaty, signed on 9 Feb. 1920 in Paris, Norway's sovereignty over the archipelago was recognized. On 14 Aug. 1925 the archipelago was officially incorporated in Norway.

Total population on 1 Jan. 1999 was 2,423, of whom 1,476 were Norwegians, 939 Russians and 8 Poles. Coal is the principal product. There are 2 Norwegian and 2 Russian mining camps. 399,940 tonnes of coal were produced from Norwegian mines in 1999 valued at 72,208,000 kroner.

There were 2,413 motor vehicles and trailers registered at 31 Dec. 1999, including 1,145 snow scooters.

There are research and radio stations, and an airport near Longyearbyen (Svalbard Lufthavn) opened in 1975.

JAN MAYEN

This bleak, desolate and mountainous island of volcanic origin and partly covered by glaciers is situated at 71° N. lat. and 8° 30' W. long., 300 miles north-northeast of Iceland. The total area is 377 sq. km (146 sq. miles). Beerenberg, its highest peak, reaches a height of 2,277 metres. Volcanic activity, which had been dormant, reactivated in Sept. 1970.

The island was possibly discovered by Henry Hudson in 1608, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed. Its present name derives from the Dutch whaling captain Jan Jacobsz May, who indisputably discovered the island in 1614. It was uninhabited, but occasionally visited by seal hunters and trappers, until 1921 when Norway established a radio and meteorological station. On 8 May 1929 Jan Mayen was officially proclaimed as incorporated into the Kingdom of Norway. Its relation to Norway was finally settled by law of 27 Feb. 1930. A LORAN station (1959) and a CONSOL station (1968) have been established.

BOUVET ISLAND

Bouvetøya

This uninhabited volcanic island, mostly covered by glaciers and situated at 54° 25' S. lat. and 3° 21' E. long., was discovered in 1739 by a French naval officer, Jean Baptiste Loziert Bouvet, but no flag was hoisted till, in 1825, Capt. Norris raised the Union Jack. In 1928 Great Britain waived its claim to the island in favour of

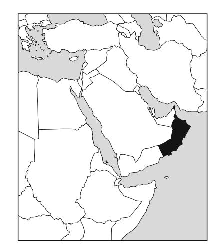
Norway, which in Dec. 1927 had occupied it. A law of 27 Feb. 1930 declared Bouvetøya a Norwegian dependency. The area is 59 sq. km (23 sq. miles). Since 1977 Norway has had an automatic meteorological station on the island.

PETER I ISLAND

Peter I Øy

This uninhabited island, situated at 68° 48' S. lat. and 90° 35' W. long., was sighted in 1821 by the Russian explorer, Admiral von Bellingshausen. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag. On 1 May 1931 Peter I Island was placed under Norwegian sovereignty, and on 24 March 1933 it was incorporated into Norway as a dependency. The area is 249 sq. km (96 sq. miles).

QUEEN MAUD LAND



Dronning Maud Land

On 14 Jan. 1939 the Norwegian Cabinet placed that part of the Antarctic Continent from the border of Falkland Islands dependencies in the west to the border of the Australian Antarctic Dependency in the east (between 20° W. and 45° E.) under Norwegian sovereignty. The territory had been explored only by Norwegians and hitherto been ownerless. In 1957 it was given the status of a dependency.

KEY HISTORICAL EVENTS

The ancestors of present day Oman are believed to have arrived in two waves of migration, the first from the Yemen and the second from northern Arabia. In the 9th century maritime trade flourished and Sohar became the greatest sea port in the Islamic world. In the early 16th century the Portuguese occupied Muscat. The Ya'aruba dynasty introduced a period of renaissance in Omani fortunes both at home and abroad, uniting the country and bringing prosperity; but, on the death in 1718 of Sultan bin Saif II, civil war broke out over the election of his successor. Persian troops occupied Muttrah and Muscat but failed to take Sohar which was defended by Ahmad bin Said who expelled the Persians from Oman after the civil war had ended. In 1744 the Al bu Said family assumed power and has ruled to the present day. Oman remained largely isolated from the rest of the world until 1970 when Said bin Taimur was deposed by his son Qaboos in a bloodless coup.

TERRITORY AND POPULATION

Situated at the southeast corner of the Arabian peninsula, Oman is bounded in the northeast by the Gulf of Oman and southeast by the Arabian Sea, southwest by Yemen and northwest by Saudi Arabia and the United Arab Emirates. There is an enclave at the northern tip of the Musandam Peninsula. An agreement of April 1992 completed the demarcation of the border with Yemen, and an agreement of March 1990 finalized the border with Saudi Arabia.

With a coastline of 1,700 sq. km from the Strait of Hormuz in the north to the borders of the Republic of Yemen, the Sultanate is strategically located overlooking ancient maritime trade routes linking the Far East and Africa with the Mediterranean.

The Sultanate of Oman occupies a total area of 309,500 sq. km and includes different terrains that vary from plain to highlands and mountains. The coastal plain overlooking the Gulf of Oman and the Arabian Sea forms the most important and fertile plain in Oman.

The **Kuria Muria** islands were ceded to the UK in 1854 by the Sultan of Muscat and Oman. On 30 Nov. 1967 the islands were retroceded to the Sultan of Muscat and Oman, in accordance with the wishes of the population. They are now known as the **Halaniyat Islands**.

In 1993 the census population was 2,017,591; density 6·5 per sq. km. Estimated population (1999), 2,325,000, chiefly Arabs, and including 0·6m. foreign workers; density 7·5 per sq. km.

The UN gives a projected population for 2010 of 3·52m.

In 1999, 82·2% of the population lived in urban areas. In the period 1990–95 the annual growth in the urban population was 8·2%, a rate only exceeded by Botswana and Mozambique. The estimated population of the capital, Muscat, in 1999 was 635,279.

The official language is Arabic; English is in commercial use.

SOCIAL STATISTICS

1997 births, estimate, 66,000; deaths, 10,000. Birth rate, 1997 estimate (per 1,000 population), 29·0; death rate, 3·8. Consequently Oman has a very young population, with approximately half the population under the age of 15. Expectation of life at birth, 1999, was 69·5 years for males and 72·4 years for females. Fertility rate, 1999, 4·6 births per woman, down from 7·8 in 1988. Oman has achieved some of the most rapid advances ever recorded. Infant mortality declined from 200 per 1,000 live births in 1960 to 14 per 1,000 live births in 1999, and as recently as 1970 life expectancy was just 40.

CLIMATE
Oman has a desert climate, with exceptionally hot and humid months from April to Oct., when temperatures may reach 47°C. Light monsoon rains fall in the south from June to Sept., with highest amounts in the western highland region. Muscat, Jan. 28°C, July 46°C. Annual rainfall 101 mm. Salalah, Jan. 29°C, July 32°C. Annual rainfall 98 mm.

CONSTITUTION AND GOVERNMENT
Oman is a hereditary absolute monarchy. The Sultan legislates by decree and appoints a Cabinet to assist him. The Basic Statute of the State was promulgated on 6 Nov. 1996.

The present Sultan is **Qaboos bin Said Al Said** (b. Nov. 1940).

In 1991 a new consultative assembly, the *Majlis al Shura*, replaced the former State Consultative Chamber. The Majlis consists of 83 elected members. It debates domestic issues, but has no legislative or veto powers. In Dec. 2002 the Sultan of Oman extended voting rights to all citizens over the age of 21.

INTERNATIONAL RELATIONS

A 1982 Memorandum of Understanding with the UK provided for regular consultations on international and bilateral issues.

Oman is a member of the UN, WTO, the League of Arab States, the Organization of the Islamic Conference and the Gulf Co-operation Council.

ECONOMY

Overview. The sixth five-year development plan (2001–05) encompasses economic balance and sustainable growth, human resources development, economic diversification and private sector development.

Privatization of water and electricity is under way.

Currency. The unit of currency is the *Rial Omani* (OMR). It is divided into 1,000 *baiza*. The rial is pegged to the US dollar. In June 2002 foreign exchange reserves were US$3,133m., total money supply was RO 813m. and gold reserves totalled 1,000 troy oz (291,000 troy oz in April 2002). Inflation was negative in 2001, at –1·1%.

In 2001 the six Gulf Arab states—Oman, along with Bahrain, Kuwait, Qatar, Saudi Arabia and the United Arab Emirates—signed an agreement to establish a single currency by 2010.

Budget. Budget revenue and expenditure (in RO 1m.):

	1996	*1997*	*1998*	*1999*	*2000*
Revenue	1,990·2	2,267·2	1,846·3	1,796·1	2,289·9
Expenditure	2,253·7	2,307·3	2,221·6	2,269·0	2,656·2

In 1999 approximately 70% of total revenue came from oil.

Performance. In 2001 GDP growth was 7·3%. Total GDP in 1998 was US$15·0bn. The non-oil sector contributed 71·3% of this figure.

Banking and Finance. The bank of issue is the Central Bank of Oman, which commenced operations in 1975 (*President*, Hamood Sangour Al Zadjali). All banks must comply with BIS capital adequacy ratios and have a minimum capital of RO 10m. In 1999 there were 20 commercial banks. The largest bank is BankMuscat SAOG, with assets of OR 1·3bn. It was created in 2000 following a merger between BankMuscat and the Commercial Bank of Oman.

There is a stock exchange in Muscat, which is linked with those in Bahrain and Kuwait.

Weights and Measures. The metric system is in operation.

ENERGY AND NATURAL RESOURCES

Environment. Oman's carbon dioxide emissions in 1998 were the equivalent of 8·8 tonnes per capita according to the *World Bank Atlas*.

Electricity. Installed capacity was 2m. kW in 1997. Production in 1998 was 7·36bn. kWh, with consumption per capita 2,828 kWh.

Oil and Gas. The economy is dominated by the oil industry. Oil in commercial quantities was discovered in 1964 and production began in 1967. Production in 1999 was 904,000 bbls. a day from 2,470 wells. In 1999 exports of oil stood at 309m. bbls. Total proven reserves were estimated in 1999 to be 5·3bn. bbls. It was announced in Aug. 2000 that two new oilfields in the south of the country had been discovered, with a potential combined daily production capacity of 12,200 bbls. a day. Earlier in 2000 oil began to be pumped from two further recently-discovered oilfields. It is hoped that by 2004 daily oil production will have increased to 1m. bbls. a day.

Gas is likely to become the second major source of income for the country. Oman's proven gas reserves were 824bn. cu. metres, until the discovery in 2000 of

two new fields which could yield a daily production of 1·78m. cu. metres. Natural gas production was 5·6bn. cu. metres in 1999.

Water. Oman relies on a combination of aquifers and desalination plants for its water, augmented by a construction programme of some 60 recharge dams. Desalination plants at Ghubriah and Wadi Adai provide most of the water needs of the capital area. In 1999 water production was 20,136m. gallons.

Minerals. Production in 1998 (in 1,000 tonnes): limestone, 1,902; marble, 166; gypsum, 165; chromite, 30; salt, 14; copper (1994), 6·5; silver (1994), 3,300 kg; gold, 569 kg. The mountains of the Sultanate of Oman are rich in mineral deposits; these include copper ore, chromite, coal, asbestos, manganese, gypsum, limestone and marble. The government is studying the exploitation of gold, platinum and sulphide.

Agriculture. Agriculture and fisheries are the traditional occupations of Omanis and remain important to the people and economy of Oman to this day. The country now produces a wide variety of fresh fruit, vegetables and field crops. The country is rapidly moving towards its goal of self-sufficiency in agriculture with the total area under cultivation standing at over 70,000 ha and total output more than 1m. tonnes. This effort has not been achieved without effort. In a country where water is a scarce commodity it has meant educating farmers on efficient methods of irrigation and building recharge dams to make the most of infrequent rainfall. According to a census of 1992–93, about 103,000 people were employed in agriculture of whom a third were women.

The coastal plain (Batinah) northwest of Muscat is fertile, as are the Dhofar highlands in the south. In the valleys of the interior, as well as on the Batinah coastal plain, date cultivation has reached a high level, and there are possibilities of agricultural development. Agricultural products, 2000 estimates (in 1,000 tonnes): dates, 135; tomatoes, 34; watermelons, 32; lemons and limes, 31; bananas, 28. Vegetable and fruit production are also important, and livestock are raised in the south where there are monsoon rains. Camels (98,000 in 2000) are bred by the inland tribes. Other livestock, 2000: sheep, 180,000; cattle, 213,000; goats, 729,000; chickens, 3m. Live animals and meat constitute more than 25% of the country's non-oil exports.

Fisheries. The catch was 108,808 tonnes in 1999, exclusively sea fish. More than 80% is taken by some 85,000 self-employed fishermen.

INDUSTRY

Apart from oil production, copper mining and smelting and cement production, there are light industries, mainly food processing and chemical products. The government gives priority to import substitute industries.

Labour. Males constituted 84% of the labour force in 1999. In 1995 there were 619,351 employees in the private sector and 110,529 persons in government service. The employment of foreign labour is being discouraged following 'Omanization' regulations of 1994.

INTERNATIONAL TRADE

Total foreign debt was US$6,267m. in 2000. A royal decree of 1994 permits up to 65% foreign ownership of Omani companies with a five-year tax and customs duties exemption.

In 2001 Oman, along with Kuwait, Bahrain, Qatar, Saudi Arabia and the United Arab Emirates agreed to the complete implementation of a customs union by 2003.

Imports and Exports. Imports and exports in US$1m.:

	1996	*1997*	*1998*	*1999*	*2000*
Imports f.o.b.	4,231	4,645	5,215	4,300	4,593
Exports f.o.b.	7,373	7,657	5,521	7,239	11,319

In 2000 oil exports made up approximately 79% of total exports. Principal non-oil exports are metal, metal goods, animals and animal products, and textiles. Main export markets (% of total trade; non-oil exports), 1996: United Arab Emirates, 41·6; Iran, 9·3; Hong Kong, 7·8; USA, 5·1. Main import suppliers: United Arab Emirates, 23·7; Japan, 17·2; UK, 8·8; USA, 7·5.

In 2000 the value of Oman's exports rose 56·4% compared to 1999. Over the same period oil exports rose by 61·1%.

COMMUNICATIONS

Roads. A network of adequate graded roads links all the main sectors of population, and only a few mountain villages are not accessible by motor vehicles. In 1996 there were 32,800 km of roads including 550 km of motorways and 2,160 km of main roads. In 1996 there were 211,000 passenger cars and 97,000 vans and lorries. The estimated average distance travelled by a passenger car in the year 1996 was 36,200 km. In 1999 there were 8,947 road accidents and 473 deaths.

Civil Aviation. Oman has a 25% share in Gulf Air with Bahrain, Qatar and the UAE. For details *see* BAHRAIN: Civil Aviation. In 1998 Gulf Air ran services in and out of Seeb international airport (20 miles from Muscat) to Abu Dhabi, Al Ain, Amman, Amsterdam, Athens, Bahrain, Bangkok, Beirut, Bombay, Cairo, Casablanca, Colombo, Dar es Salaam, Delhi, Dhaka, Doha, Dubai, Entebbe, Hong Kong, Jeddah, Karachi, Khartoum, Kuwait, London, Madras, Manila, Nairobi, Ras Al Khaima, Riyadh, Sharjah, Thiruvananthapuram and Zanzibar. Oman Air also flies on some international routes. In 2000 Seeb International Airport (Muscat) handled 2,622,000 passengers and 68,600 tonnes of freight.

Oman's two major airports, Seeb International and Salalah (mainly domestic flights), have been privatized as part of a project to develop Seeb as a regional hub. It will be rebuilt by a consortium (British Airports Authority, Oman's Bahwan Trading Company and ABB Equity Ventures) that was awarded a 25-year concession to operate the airports in Jan. 2002.

Shipping. In Mutrah a deep-water port (named Mina Qaboos) was completed in 1974. The annual handling capacity is 1·5m. tonnes. Mina Salalah, the port of Salalah, has a capacity of 1m. tonnes per year. Sea-going shipping totalled 15,000 GRT in 1998.

Telecommunications. The General Telecommunications Organization maintains a telegraph office at Muscat and an automatic telephone exchange. In 2000 there were 225,400 main telephone lines (88·8 per 1,000 persons) and 80,000 PCs in use (31·5 for every 1,000 persons). The 1999 capacity of the mobile phone network was 220,000 lines, and in 1997 there were 6,300 fax machines. Oman joined the Internet at the end of 1996 and in Dec. 2000 there were 90,000 users.

KEY HISTORICAL EVENTS

The State of Pakistan was created on 14 Aug. 1947 to provide Indian Muslims with their own state. Pakistan's status was that of a Dominion within the Commonwealth; it became a republic in 1956 and left the Commonwealth in 1972. Efforts to rejoin were opposed by India until 1989 when Pakistan once more became a full member of the Commonwealth.

The first of several periods of martial law began in 1958, followed by the rule of Field Marshal Mohammad Ayub Khan (until 1969) and Gen. Agha Mohammad Yahya Khan (until 1971). During the latter's term, differences between East and West Pakistan came to a head. Civil war broke out in March 1971 and ended in Dec. 1971 with the creation of Bangladesh. A new constitution came into force on 14 Aug. 1973, providing a federal parliamentary government with a president as head of state and a prime minister as head of the government. Zulfiquar Ali Bhutto became prime minister. His government was thought by traditionalists to be not sufficiently Islamic. There was an army coup led by Gen. Mohammad Zia ul-Haq in July 1977. Zulfiquar Ali Bhutto was hanged for conspiring to murder. His daughter, Benazir, held power twice in the 1990s but was eventually overthrown in 1996 when the President, Farooq Leghari, dismissed the government for corruption and mismanaging the economy.

Relations between Pakistan and India have foundered on the issue of Kashmir, a disputed territory divided by a ceasefire line negotiated by the UN in 1949. On 28 May 1998 Pakistan carried out five nuclear tests in the deserts of Balochistan in response to India's tests earlier in the month. US President Bill Clinton invoked sanctions but Pakistan subsequently carried out a sixth test. With first steps towards a nuclear agreement, the USA lifted most sanctions. On 11 June, following India's example, Pakistan announced a unilateral moratorium on nuclear tests. On 12 Oct. 1999 the military chief, Gen. Pervez Musharraf, seized power in a coup, overthrowing the democratically-elected government of prime minister Nawaz Sharif. The coup, which lasted less than three hours, was launched after the prime minister had tried to dismiss Gen. Musharraf from his position as army chief of staff. The former prime minister and his senior allies were placed under house arrest and subsequently put on trial. Nawaz Sharif was found guilty of corruption and sentenced to life imprisonment. The coup marked the first time in history that a military regime had taken over an affirmed nuclear power.

There have been some 35,000 deaths since the outbreak of the Kashmir insurgency in 1988. Negotiations with India over the future of the disputed territory of Kashmir began in July 1999. In May 2001 India ended its six-month long ceasefire. It then invited Pakistan's government to enter talks about the dispute, which ended with hopes of avoiding further violence. Following the terror attacks on New York and Washington of 11 Sept. 2001 Pakistan found itself in a central role in the war against terrorism. With neighbouring Afghanistan believed to be sheltering Osama bin Laden, the USA persuaded President Musharraf to allow American forces access to Pakistani air bases. In return the USA lifted sanctions imposed on Pakistan after it carried out a series of nuclear tests in 1998. In Dec. 2001 an attack was made on the Indian parliament by suicide bombers. Although no group claimed responsibility, the Indian authorities suspected Kashmiri separatists, leading to increasing tension between Pakistan and India. However, President Musharraf's subsequent crackdown on militants helped to bring the two countries back from the brink of war. Tension between Pakistan and India increased following an attack on an Indian army base

in Indian-occupied Kashmir on 14 May 2002. The attack, which killed 31 people, was linked to Islamic terrorists infiltrating into the Kashmir valley from Pakistan. It drew widespread criticism of Pakistani President Pervez Musharraf for failing to combat terrorism in the disputed region. Between 25 and 28 May Pakistan carried out three tests of short-range ballistic missiles.

TERRITORY AND POPULATION

Pakistan is bounded in the west by Iran, northwest by Afghanistan, north by China, east by India and south by the Arabian Sea. The area (excluding the disputed area of Kashmir) is 307,374 sq. miles (796,095 sq. km); population (1998 census, excluding Azad, Kashmir, Baltistan, Diamir and Gilgit), 130,579,571 (females, 62,739,434). In 1999, 63·5% lived in rural areas. There were 2·2m. refugees in 2001, mostly from Afghanistan, the highest number in any country in the world.

The UN gives a projected population for 2010 of 181·39m.

The population of the principal cities is as follows:

CONSTITUTION AND GOVERNMENT

Under the 1973 Constitution, the *President* is elected for a five-year term by a college of parliamentary deputies, senators and members of the Provincial Assemblies.

Parliament is bicameral, comprising a *Senate* of 87 members and a *National Assembly* of 217. The four Provincial Assemblies each elect 19 senators, the tribal areas are represented by eight senators elected by the National Assembly and the Federal Capital has three representatives. About half the senators are elected for six-year terms every three years. The National Assembly is directly elected with 10 religious minority representatives. However, since the 1999 coup all legislative bodies (national parliament and the four provincial assemblies) and their members have been suspended. Following the coup Gen. Musharraf announced that the Constitution was to be held 'in abeyance' and issued a 'Provisional Constitution Order No. 1' in its place. In Aug. 2002 he unilaterally amended the constitution to grant himself the right to dissolve parliament.

During the period of martial law from 1977–85 the Constitution was also in abeyance, but not abrogated. In 1985 it was amended to extend the powers of the President, including those of appointing and dismissing ministers and vetoing new legislation until 1990. Legislation of 1 April 1997 abolished the President's right to dissolve parliament, appoint provincial governors and nominate the heads of the armed services.

Gen. Pervez Musharraf, Chief of the Army Staff, assumed the responsibilities of the chief executive of the country following the removal of Prime Minister Nawaz Sharif on 12 Oct. 1999. He formed a National Security Council consisting of six members belonging to the armed forces and a number of civilians with expertise in various fields. A Federal Cabinet of Ministers was also installed working under the guidance of the National Security Council. Also formed was the National Reconstruction Bureau, a think tank providing institutional advice and input on economic, social and institutional matters. The administration declared that it intended to first restore economic order before holding general elections to install a civilian government. The Supreme Court of Pakistan allowed the administration a three-year period, which expired on 12 Oct. 2002, to accomplish this task. Elections were held on 10 Oct. 2002. On 30 April 2002 a referendum was held in which 97·7% voted in favour of extending Musharraf's rule by a further five years. Turn-out was around 50%. He amended the constitution in Aug. 2002 to formally extend his mandate by five years.

The Constitution obliges the government to enable the people to order their lives in accordance with Islam.

PALAU

Republic of Palau

Capital: Koror
Population estimate, 2000: 19,000
GDP per capita: not available

KEY HISTORICAL EVENTS

Spain acquired sovereignty over the Palau Islands in 1886 but sold the archipelago to Germany in 1899. Japan occupied the islands in 1914 and in 1921 they were mandated to Japan by the League of Nations. Captured by Allied Forces in 1944, the islands became part of the UN Trust Territory of the Pacific Islands created on 18 July 1947 and administered by the USA. Following a referendum in July 1978 in which Palauans voted against joining the new Federated States of Micronesia, the islands became autonomous from 1 Jan. 1981. A referendum in Nov. 1993 favoured a Compact of Free Association with the USA. Palau became an independent republic on 1 Oct. 1994.

TERRITORY AND POPULATION

The archipelago lies in the western Pacific and has a total area of 1,632 sq. km (630 sq. miles); water covers 1,124 sq. km (434 sq. miles). It comprises 26 islands and over 300 islets. Only eight of the islands are inhabited, the largest being Babelthuap (368 sq. km), but most inhabitants live on the small island of Koror (8 sq. km) to the south, containing the present headquarters (a new capital is being built in eastern Babelthuap). The total population of Palau at the time of the 2000 census was 19,129, giving a density of 37·7 per sq. km. Koror's population according to the 2000 census was 13,303. In 1995 approximately 73% of the population were Palauans.

República de Panamá

Capital: Panama City
Population estimate, 2000: 2·84m.
GDP per capita, 2000: (PPP$) 6,000
HDI/world rank: 0·787/57

KEY HISTORICAL EVENTS

A revolution, inspired by the USA, led to the separation of Panama from the United States of Colombia and the declaration of its independence on 3 Nov. 1903. This was followed by an agreement making it possible for the USA to build and operate a canal connecting the Atlantic and Pacific oceans through the Isthmus of Panama. The treaty granted the USA in perpetuity the use, occupation and control of a Canal Zone, in which the USA would possess full sovereign rights. In return the USA guaranteed the independence of the republic. The Canal was opened on 15 Aug. 1914.

The US domination of Panama has provoked frequent anti-American protests. In 1968 Col. Omar Torrijos Herrera took power in a coup and attempted to negotiate a more advantageous treaty with the USA. Two new treaties between Panama and the USA were agreed on 10 Aug. and signed on 7 Sept. 1977. One dealt with the operation and defence of the Canal until the end of 1999 and the other guarantees permanent neutrality.

Torrijos vacated the presidency in 1978 but maintained his power as head of the National Guard until his death in an air crash in 1981. Subsequently Gen. Manuel Noriega, Torrijos' successor as head of the National Guard, became the strong man of the regime. His position was threatened by some internal political opposition and economic pressure applied by the USA but in Oct. 1989 a US-backed coup attempt failed. On 15 Dec. Gen. Noriega declared a 'state of war' with the USA. On 20 Dec. the USA invaded. Gen. Noriega surrendered on 3 Jan. 1990. Accused of drug dealing he was convicted by a court in Miami and is now serving a 40-year jail sentence. All remaining US troops left the country when the Panama Canal was handed back to Panama at the end of 1999.

The Ship Registry System equally accepts vessels of local or international ownership, as long as they comply with all legal parameters. Ship owners also favour Panamanian registry because fees are low. Today, the Panamanian fleet is the largest in the world with 6,222 ships registered and 103,581,459 net tons in 2001.

All the international maritime traffic for Colón and Panama runs through the Canal ports of Cristóbal, Balboa and Manzanillo International.

At present some 90% of the world's shipping fleet can use the Canal, but this is set to drop as many new ships are too wide for the Canal. Feasibility studies for an additional set of locks that could take today's largest ships are under way.

Administrator of the Panama Canal Authority. Alberto Alemán Zubieta.

Particulars of the ocean-going commercial traffic through the Canal are given as follows:

Fiscal year ending 30 Sept.	*No. of vessels transiting*	*Cargo in long tons*	*Tolls revenue (in US$1)*

KEY HISTORICAL EVENTS

The Spanish first claimed the island in 1545 but the first attempt at colonization was made in 1793 by the British. The Dutch, however, claimed the west half of the island as part of the Dutch East Indies in 1828. On 6 Nov. 1884 a British Protectorate was proclaimed over the southern portion of the eastern half of New Guinea and in 1888 the territory was annexed. On 1 Sept. 1906 the Governor-General of Australia declared that British New Guinea was to be known henceforth as the Territory of Papua. The northern portion of New Guinea was a German colony until 1914 when Australian armed forces occupied it and it remained under their administration until becoming a League of Nations mandated territory in 1921, administered by Australia, and later a UN Trust Territory (of New Guinea). Australia granted Papua New Guinea self-government on 1 Dec. 1973, and on 16 Sept. 1975 Papua New Guinea became a fully independent state.

What began in 1988 as an armed campaign by tribes claiming traditional land rights against the Australian owner of the massive Panguna copper field soon escalated into a civil war for the secession of the island of Bougainville. Fighting between the government and the Bougainville Revolutionary Army (BRA) continued until 3 Sept. 1994 when a peace agreement set up a provisional Bougainville government. The ceasefire was broken by the rebels in mid-1995. In April 1998 the government of Papua New Guinea signed a 'permanent' truce with the secessionists. The nine-year rebellion claimed 20,000 lives. In Jan. 2001 the government and Bougainville signed a peace agreement that sets Bougainville on course to an autonomous government and a referendum on independence.

KEY HISTORICAL EVENTS

Paraguay was occupied by the Spanish in 1537 and became a Spanish colony as part of the viceroyalty of Peru. The area gained its independence, as the Republic of Paraguay, on 14 May 1811. Paraguay was then ruled by a succession of dictators. During a devastating war fought from 1865 to 1870 between Paraguay and a coalition of Argentina, Brazil and Uruguay, Paraguay's population was reduced from about 600,000 to 233,000. Further severe losses were incurred during the war with Bolivia (1932–35) over territorial claims in the Chaco inspired by the unfounded belief that minerals existed in the territory. A peace treaty by which Paraguay obtained most of the area her troops had conquered was signed in July 1938.

A new constitution took effect in Feb. 1968 under which executive power is discharged by an executive president. Gen. Alfredo Stroessner Mattiauda was re-elected 7 times between 1958 and 1988. Since then, Paraguay has been under more or less democratic government. On 23 March 1999 Paraguay's vice-president Luis Maria Argaña was assassinated. The following day, Congress voted to impeach President Cubas who was said to be implicated in the murder. He then resigned.

The UN gives a projected population for 2010 of 6·98m.

KEY HISTORICAL EVENTS

The Incas of Peru were conquered by the Spanish in the 16th century and subsequent Spanish colonial settlement made Peru the most important of the Spanish viceroyalties in South America. On 28 July 1821 Peru declared its independence, but it was not until after a war which ended in 1824 that the country gained its freedom. In a war with Chile (1879–83) Peru's capital, Lima, was captured and she lost some of her southern territory. Tacna, in the far south of the country, remained in Chilean control from 1880 until 1929. In 1924 Dr Victor Raúl Haya de la Torre founded the *Alianza Popular Revolucionaria Americana* to oppose the dictatorial government then in power. The party was banned between 1931 and 1945 and between 1948 and 1956 its leader failed regularly in the presidential elections but it was at times the largest party in Congress. The closeness of the 1962 elections led Gen. Ricardo Pérez Godoy, Chairman of the Joint Chiefs-of-Staff, to seize power. A coup led by Gen. Nicolás Lindley López deposed him in 1963. There followed, after elections, a period of civilian rule but the military staged yet another coup in 1968. In 1978–79 a constituent assembly drew up a new constitution, after which a civilian government was installed. However, Peru was plagued by political violence for some 15 years between the early 1980s and the mid-1990s with 30,000 people killed by Maoist insurgents and government forces. On 6 April 1992 President Alberto Fujimori suspended the constitution and dissolved the parliament. A new constitution was promulgated on 29 Dec. 1993. But while Peru has enjoyed stability and economic growth, there was still rule by autocracy which put some politicians above the law. Embroiled in a bribery and corruption scandal, President Fujimori's discredited administration came to an end in Nov. 2000 with his resignation while out of the country.

The official languages are Spanish (spoken by 80·3% of the population in 1993), Quechua (16·5%) and Aymara (3%).

Lima: Founded by the Spanish conquistador, Pizarro, in 1535, Lima quickly became an important centre of justice and religion, being the headquarters of the Inquisition and the High Court in Peru. Situated on the Rio Rimac, 8 miles from the Pacific ocean, it covers an area of 70 sq. km. Despite being devastated by an earthquake in 1746, Lima expanded massively and today its citizens account for around a third of the total population of Peru.

SOCIAL STATISTICS

1999 estimates: births, 609,800; deaths, 159,000; infant deaths (under 1 year), 42,500. Rates per 1,000 population (1999 estimate): birth, 24·2; death, 6·3. Annual population growth rate, 1990–99, 1·8%; infant mortality, 1999, 69·7 per 1,000 live births. Life expectancy, 1999: males, 66·3 years; females, 71·3. Fertility rate, 1999, 2·9 births per woman.

CLIMATE

There is a very wide variety of climate, ranging from equatorial to desert (or perpetual snow on the high mountains). In coastal areas, temperatures vary very little, either daily or annually, though humidity and cloudiness show considerable variation, with highest humidity from May to Sept. Little rain is experienced in that period. In the Sierra, temperatures remain fairly constant over the year, but the daily range is considerable. There the dry season is from April to Nov. Desert conditions occur in the extreme south, where the climate is uniformly dry, with a few heavy showers falling between Jan. and March. Lima, Jan. 74°F (23·3°C), July 62°F (16·7°C). Annual rainfall 2" (48 mm). Cusco, Jan. 56°F (13·3°C), July 50°F (10°C). Annual rainfall 32" (804 mm). El Niño is the annual warm Pacific current which moves to the coasts of Peru and Ecuador. El Niño in 1982–83 resulted in agricultural production down by 8·5% and fishing output down by 40%. El Niño in 1991–94 was unusually long. El Niño in 1997–98 resulted in a sudden rise in the surface temperature of the Pacific by 9°F (5°C) and caused widespread damage and loss of life.

CONSTITUTION AND GOVERNMENT

The 1980 Constitution provided for a legislative *Congress* consisting of a *Senate* (60 members) and a *Chamber of Deputies* (180 members) and an Executive formed of the President and a Council of Ministers appointed by him. Elections were to be every five years with the President and Congress elected, at the same time, by separate ballots. On 5 April 1992 President Fujimori suspended the 1980 constitution and dissolved Congress. A referendum was held on 31 Oct. 1993 to approve the twelfth constitution, including a provision for the president to serve a consecutive second term. 52·24% of votes cast were in favour. The constitution was promulgated on 29 Dec. 1993. In Aug. 1996 Congress voted for the eligibility of the President to serve a third consecutive term of office. All citizens over the age of 18 are eligible to vote. Voting is compulsory.

In 1998 President Fujimori estimated that El Niño caused US$12m. worth of infrastructure damage, killed over 100 people and resulted in tens of thousands becoming homeless. The government declared a state of emergency in nine out of the country's 24 regions. A programme to rebuild the infrastructure, namely

communication lines (bridges, roads, railway lines and canals) and healthcare facilities, to prevent the spread of epidemics, was initiated.

National Anthem. 'Somos libres, seámoslo siempre' ('We are free, let us always be so'); words by J. De La Torre Ugarte, tune by J. B. Alcedo.

In the congressional elections of 8 April 2001 the Peru Possible party gained 45 seats with 26·3% of votes cast. The American Revolutionary People's Alliance gained 26 seats (19·7%), the National Unity Party 17 (13·8%), the Moralizing Independent Front 11 (11·0%), Union for Peru 6 (4·1%) and We Are Peru 4 (5·8%). Peru is a member of the UN, WTO, OAS, Inter-American Development Bank, the Andean Group, LAIA, APEC, IOM and Antarctic Treaty.

ECONOMY

Agriculture produced 7·1% of GDP in 1998, industry 36·8% and services 56·1%.

Overview. Privatization began in 1991 under the aegis of the Privatization Commission (COPRI). By early 1995, 95 state companies had been sold bringing in revenue of US$4,400m. In 1996, 31 state companies were sold, bringing in US$871m. In 1994 a 'citizen participation' scheme was initiated to increase the extent of private shareholding in state enterprises; retirement pensions may also be taken as shares.

Currency. The monetary unit is the *nuevo sol* (PES), of 100 *céntimos*, which replaced the inti in 1990 at a rate of 1m. intis = 1 nuevo sol. Inflation, which had been over 7,000% in 1990, was down to 2·0% in 2001, the lowest rate in more than 40 years. Foreign exchange reserves were US$8,053m. in June 2002, gold reserves totalled 1·10m. troy oz and total money supply was 21,506m. sols.

Budget. Budget revenue and expenditure (in 1m. sols), year ending 31 Dec:

	1996	*1997*	*1998*	*1999*	*2000*
Revenue	24,023	27,705	29,380	28,747	30,543
Expenditure	24,686	27,232	30,104	34,168	36,052

At US$10·2bn., the 1998 budget was 10% higher in real terms than in 1997. There was a trade deficit of US$1·7bn. in 1997. In 1997 the World Bank approved a US$150m. loan to help Peru overcome expected problems associated with El Niño.

Performance. Real GDP growth 3·1% in 2000, but just 0·2% in 2001. Total GDP in 2001 was US$54·0bn.

Banking and Finance. The bank of issue is the Banco Central de Reserva (*President of the Directorate*, Richard Webb Duarte), which was established in 1922. The government's fiscal agent is the Banco de la Nación. In 1995 there were additionally 17 domestic commercial, 1 foreign and 4 multinational banks. Legislation of April 1991 permitted financial institutions to fix their own interest rates and reopened the country to foreign banks. The Central Reserve Bank sets the upper limit.

There are stock exchanges in Lima and Arequipa.

Weights and Measures. The metric system is in use.

ENERGY AND NATURAL RESOURCES

Peru lays claim to 84 of the world's 114 ecosystems; 28 of its climate types; 19% of all bird species; 20% of all plant species; and 25 conservation areas (7 national parks, 8 national reserves, 7 national sanctuaries and 3 historic sanctuaries).

Environment. According to the *World Bank Atlas* Peru's carbon dioxide emissions in 1998 were the equivalent of 1·1 tonnes per capita.

Electricity. In 1998 output was 18·28bn. kWh (75% hydro-electric). Total generating capacity was 5m. kW in 1997. 66·1% of the population were supplied with electricity in 1996. Consumption per capita in 1998 was 642 kWh. Peru's reliance on hydro-generated electricity means that electricity production was affected by the drought brought on by the 1997–98 El Niño.

Oil and Gas. Proven oil reserves in 1999 amounted to 400m. bbls. Output, 1996, 43·91m. bbls. Development of the huge Camisea gas field, Peru's largest commercial project, is on hold while negotiations continue with the Shell-Mobil consortium.

Natural gas reserves in 1997 were 200bn. cu. metres; output in 1997 was 40 petajoules.

Minerals. Mining accounted for some 8·4% of GDP in 1996. Lead, copper, iron, silver, zinc and petroleum are the chief minerals exploited. Mineral production, 1996 (in 1,000 tonnes): iron, 2,875·6; zinc (1998), 869; copper (1998), 522; lead, 248·8; silver (1998), 1·93; gold (2000), 133 tonnes. Early in 1998 Southern Peru Copper, the country's largest mining company, estimated that 3,000 tonnes of copper production had been lost as a result of flooding caused by El Niño.

Agriculture. There are four natural zones: the Coast strip, with an average width of 80 km; the Sierra or Uplands, formed by the coast range of mountains and the Andes proper; the Montaña or high wooded region which lies on the eastern slopes of the Andes; and the jungle in the Amazon Basin, known as the Selva. Legislation

of 1991 permits the unrestricted sale of agricultural land. Workers in co-operatives may elect to form limited liability companies and become shareholders.

Production in 2000 (in 1,000 tonnes): sugarcane, 7,750; potatoes, 3,187; rice, 1,665; plantains, 1,415; maize, 1,271; cassava, 986; onions, 367; oranges, 318; lemons and limes, 310; sweet potatoes, 230; tomatoes, 197; mangoes, 180; barley, 175; seed cotton, 175.

Livestock, 2000: sheep, 14·4m.; cattle, 4·9m.; pigs, 2·8m.; alpacas, 2·6m. (1996); poultry, 81m. Livestock products (in 1,000 tonnes), 2000: poultry meat, 580; beef and veal, 136; pork, bacon and ham, 95; mutton and lamb, 31; milk, 1,048.

In Nov. 1997 more than 3,000 ha of farmlands were washed away in floods caused by El Niño.

Coca was cultivated in 2000 on approximately 34,000 ha, down from 115,000 ha in 1995.

Forestry. In 1995 the area covered by forests was 67·56m. ha, or 52·8% of the total land area (68·65m. ha and 53·6% in 1990). The forests contain valuable hardwoods; oak and cedar account for about 40%. In 1999 roundwood removals totalled 9·16m. cu. metres.

Fisheries. Sardines and anchovies are caught offshore to be processed into fishmeal, of which Peru is a major producer. Fishing in deeper waters is being developed, subject to government conservation by the imposition of quotas and fishing bans. Total catch in 1999 was 8,429,290 tonnes, almost entirely from sea fishing. In 1995 the catch had a value of US$936·7m. Peru's annual catch is the second largest in the world after that of China. In the first nine months of 1997, 1·3m tonnes of fishmeal was produced, up 3·4% over the same period for 1996.

INDUSTRY

About 70% of industries are located in the Lima/Callao metropolitan area. Labour. The labour force in 1996 totalled 8,652,000 (71% males). In 1993, 1,852,800 people worked in agriculture, 1,167,000 in commerce, 783,900 in manufacturing, 599,700 in services, 347,500 in transport, 255,000 in building, 72,200 in mining and 18,700 in electricity production. In 1999 an estimated 7·9% of the workforce was unemployed, up from 5·9% in 1991.

Trade Unions. Trade unions have about 2m. members (approximately 1·5m. in peasant organizations and 500,000 in industrial). The major trade union organization is the *Confederación de Trabajadores del Perú*, which was reconstituted in 1959 after being in abeyance for some years. The other labour organizations recognized by the government are the *Confederación General de Trabajadores del Perú*, the *Confederación Nacional de Trabajadores* and the *Central de Trabajadores de la Revolución Peruana*.

KEY HISTORICAL EVENTS

Discovered by Magellan in 1521, the Philippine islands were conquered by Spain in 1565 and named after the Spanish king, Philip. In Dec. 1898, following the Spanish-American War, the Philippines were ceded to the USA. The Philippines acquired self-government as a Commonwealth of the USA in March 1934. The islands were occupied by the Japanese from 1942 to 1945. Independence was achieved in July 1946. From independence until 1972 the Philippines were governed under a constitution based largely on the US pattern. In Sept. 1972 President Ferdinand Marcos declared martial law. In May 1980 Benigno Aquino, Jr, the leading opponent of Marcos, was released from prison to go to the USA for medical treatment. He was killed when he returned to the Philippines after three years in exile. At the presidential elections of Feb. 1986 Ferdinand Marcos was opposed by Aquino's widow, Corazón. Aquino became president, Marcos fled the country and a new constitution limiting the president to a single, six-year term in office was ratified in Feb. 1987. Insurgent activities carried out since 1972 by the Moro National Liberation Front (Muslims) were ended by a peace agreement of 2 Sept. 1996 which provides for a Muslim autonomous region in an area of Mindanao island in southern Philippines. The rebellion left more than 120,000 people dead. In Oct. 2000 impeachment proceedings began against President Estrada who was alleged to have received more than US$10·8m. from gambling kickbacks. His impeachment trial collapsed in Jan. 2001 when he was forced from office by mass protests. Subsequently Estrada's supporters tried to force his successor, Gloria Macapagal Arroyo, from office. In Nov. 2001 the fragile peace between the government and Islamic militants was shattered.

TERRITORY AND POPULATION

The Philippines is situated between 21° 25' and 4° 23' N. lat. and between 116° and 127° E. long. It is composed of 7,107 islands and islets, 2,773 of which are named. Approximate land area, 300,000 sq. km (115,830 sq. miles). The largest islands (in sq. km) are Luzon (104,688), Mindanao (94,630), Samar (13,080), Negros (12,710), Palawan (11,785), Panay (11,515), Mindoro (9,735), Leyte (7,214), Cebu (4,422), Bohol (3,865), Masbate (3,269).

The census population in May 2000 was 76,498,735; density, 255·0 per sq. km. In 1999, 57·7% of the population lived in urban areas.

The UN gives a projected population for 2010 of 89·89m.

DEFENCE

An extension of the 1947 agreement granting the USA the use of several army, navy and air force bases was rejected by the Senate in Sept. 1991. An agreement of Dec. 1994 authorizes US naval vessels to be repaired in Philippine ports. The Philippines is a signatory of the South-East Asia Collective Defence Treaty.

Defence expenditure in 2000 totalled US$1,497m. (US$20 per capita), representing 1·9% of GDP.

Army. The Army is organized into five area joint-service commands.

Navy. The Navy consists principally of ex-US ships completed in 1944 and 1945, and serviceability and spares are a problem. The modernization programme in progress has been revised and delayed, but the first 30 inshore patrol craft of US and Korean design have been delivered. The present fleet includes one ex-US frigate.

ECONOMY

Agriculture accounted for 16·9% of GDP in 1998, industry 31·6% and services 51·5%.

Overview. In 1992–95 most state industrial assets were privatized. In 1996 a ‘third wave’ of privatization was initiated involving state pensions and social security funds. Monopolies have been dismantled in the telecommunication, oil, civil aviation, shipping, water and power industries. In Dec. 1997 a comprehensive tax reform was approved, setting an exemption level of 98,400 pesos for a family of six.

Currency. The unit of currency is the *peso* (PHP) of 100 *centavos.* Inflation was 6·1% in 2001. Foreign exchange reserves were US$14,163m. in June 2002 and gold reserves 8·22m. troy oz (3·58m. troy oz in 1995). Total money supply in April 2002 was 410,581m. pesos.

Budget. Total government revenue and expenditure (in 1m. pesos), year ending 31 Dec.:

There is a stock exchange in Manila.

The financial crisis that struck southeast Asia in 1997 led to the floating of the peso in July. It subsequently lost 36% of its value against the dollar.

The Philippines was 1 of 15 countries and territories named in a report in June 2000 as failing to co-operate in the fight against international money laundering. The Financial Action Task Force on Money Laundering was set up by the G7 group of major industrialized nations.

KEY HISTORICAL EVENTS

Poland takes its name from the Polanie ('plain dwellers'), whose ruler Mieszko I had achieved a federation by 966, a date taken as that of the foundation of the Polish state. He placed Poland under the Roman Holy See around 990. His son Bolesław I (992–1025) continued his father's territorial expansionism until by the time of his coronation in 1024 Poland's boundaries were much as they are today. The tendency of this state to fragment under German pressure was formalized by Bolesław III (1102–38), whose sons divided the kingdom into three duchies. In the 13th century Poland was laid waste by pagan proto-Russians and Mongols. In 1320 Władysław of Kraków was crowned king of Poland. The work of unification was consolidated by his son, Kazimierz III (1333–70). A descendant of his married the pagan duke of Lithuania, Jagiełło, who was converted to Catholicism and became king of Poland in 1386, uniting Poland and Lithuania in a vast multi-ethnic empire. The Jagiełłonian period to 1572 is regarded as an economic and cultural 'golden age'.

In 1648 a Cossack revolt in Ukraine resulted in a Russian victory and soon afterwards Sweden occupied and devastated the whole country. Poland's involvement in the Russo-Swedish wars of 1700–09 brought further economic ruin and political dependence on the might of Peter the Great. In the 'First Partition' of 1772 Russia and Prussia in conjunction with Austria took over a third of Poland's territory. Poland was wiped off the map by the Second and Third partitions (1793, 1795), except for a brief independent interlude under Napoleon.

Risings in 1830, 1846, 1848 and 1863 were unsuccessful. Thereafter nationalist efforts were channelled more into cultural and economic development. After the First World War, Poland was promised independence and access to the sea. A constitution was voted in March 1921. Poland's frontiers were not established until 1923 after plebiscites in Silesia and East Prussia and a war with Soviet Russia in 1920 which Poland nearly lost. In foreign affairs Poland attempted to maintain a balance between Germany and the USSR, but after Munich it accepted a British guarantee of its independence. In Aug. 1939 Hitler signed a non-aggression pact with Stalin which provided for a partition of Poland; this took place a few days after the outbreak of war.

Poland was rapidly overrun but Polish forces were able to reform on Allied soil under a government-in-exile. Subsequently, Moscow recognized the Polish Committee of National Liberation (the 'Lublin committee') which proclaimed itself the sole legal government when Lublin was liberated in July 1944. In Aug. and Sept. the Soviet army stopped short of the city while the resistance forces were destroyed in the Warsaw uprising. Elections held on 19 Jan. 1947 led to victory for the Communist-dominated 'Democratic Bloc'.

After riots in Poznań in June 1956 nationalist anti-Stalinist elements gained control of the Communist Party under the leadership of Władysław Gomułka. The raising of meat prices on 1 July 1980 resulted in a wave of strikes which broadened into generalized wage demands. Workers in Gdańsk, Gdynia and Sopot elected a joint strike committee, led by Lech Wałęsa, to demand the right to strike and to form independent trade unions, the abolition of censorship, access to the media and the release of political prisoners. On 17 Sept. various trade unions decided to form a national confederation ('Solidarity'). On 13 Dec. 1981 the Government imposed martial law and set up a Military Council of National Salvation. Solidarity was proscribed. Following strikes and demands for the reinstatement of Solidarity, the government resigned in Sept. 1988. Free parliamentary elections were instituted in Oct. 1991.

Poland joined NATO in 1999. In Oct. 2002 Poland was one of ten countries included in plans for EU enlargement scheduled for 2004.

TERRITORY AND POPULATION

Poland is bounded in the north by the Baltic Sea and Russia, east by Lithuania, Belarus and Ukraine, south by the Czech Republic and Slovakia and west by Germany. Poland comprises an area of 312,685 sq. km (120,628 sq. miles).

At the census of 7 Dec. 1988 the population was 37,879,000 (18·47m. males; 63·7% urban). Population in 2001, 38,632,000 (51·4% female and 65·2% urban in 1999), density, 123·5 per sq. km.

The UN gives a projected population for 2010 of 38·25m.

The country is divided into 16 regions or voivodships (*wojewodztwo*), created from the previous 49 on 1 Jan. 1999 following administrative reform. Area (in sq. km) and population (in 1,000) in 2001 (density per sq. km in brackets).

Warsaw: Lying in the east on the River Vistula, Warsaw became the capital city of Poland when fire destroyed the King's Kraków residence in 1596. It has had a mercurial history, suffering from partition in 1795, Nazi occupation from 1939–45 and the overbearing influence of the Soviet Union. Since the fall of the Iron Curtain in 1989, however, Warsaw has grown as a communications centre and has a burgeoning tourist industry.

Ethnic minorities are not identified. There were estimated to be 1·2m. Germans in 1984, and there are Ukrainians, Belorussians and Lithuanians. A movement for Silesian autonomy has attracted sufficient support to suggest that further moves towards decentralization may soon be considered. A Council of National Minorities was set up in March 1991. There is a large Polish diaspora, some 65% in the USA.

The national language is Polish.

CONSTITUTION AND GOVERNMENT
The present Constitution was adopted on 2 April 1997. The head of state is the *President*, who is directly elected for a five-year term (renewable once). The President may appoint, but may not dismiss, cabinets.

The authority of the republic is vested in the *Sejm* (Parliament of 460 members), elected by proportional representation for four years by all citizens over 18. There is a 5% threshold for parties and 8% for coalitions, but seats are reserved for representatives of ethnic minorities even if their vote falls below 5%. 69 of the Sejm seats are awarded from the national lists of parties polling more than 7% of the vote. The Sejm elects a *Council of State* and a *Council of Ministers.* There is also an elected 100-member upper house, the *Senate.* The President and the Senate each has a power of veto which only a two-thirds majority of the Sejm can override. The President does not, however, have a veto over the annual budget. The Prime Minister is chosen by the President with the approval of the Sejm.

A Political Council consultative to the presidency consisting of representatives of all the major political tendencies was set up in Jan. 1991.

Poland is divided into four military districts: Warsaw, Pomerania, Kraków and Silesia. In 2000 military expenditure totalled US$3,191m. (US$82 per capita), representing 2·0% of GDP.

Three-year civilian duty as a conscientious alternative to conscription of 12 months was introduced in 1988.

Army. Strength (1999) 142,500 (including 101,670 conscripts). In accordance with a programme of modernization of the armed forces, the land component of the Army is expected to reach a final number of around 108,000 soldiers. In addition there were 343,000 Army reservists in 1999 and 13,500 border guards.

Navy. The fleet comprises 3 ex-Soviet diesel submarines, 1 ex-Soviet destroyer, 1 small frigate and 4 corvettes. Naval Aviation operated 23 combat aircraft (including MiG-21s) and 11 armed helicopters.

INTERNATIONAL RELATIONS

A treaty of friendship with Germany signed on 17 June 1991 renounced the use of force, recognized Poland's western border as laid down at the Potsdam conference of 1945 (the 'Oder-Neisse line') and guaranteed minority rights in both countries.

Poland is a member of the UN, WTO, BIS, the Council of Europe, NATO, OECD, OSCE, CEFTA, CERN, CEI, Council of the Baltic Sea States, IOM, the Antarctic Treaty, an associate partner of the WEU and an associate member of the EU. Poland became a member of NATO on 12 March 1999. A European Commission report endorsed in Dec. 1999 named Poland (along with Hungary) as the country from central and eastern Europe most likely to be the first to join the EU. There is expected to be a referendum on EU membership in late 2003, with Poland scheduled to become a member on 1 May 2004.

ECONOMY

Poland is fast becoming two nations, one of relatively well-off city dwellers and one of poor villagers, many of whom work on family farms. An east–west divide has also been emerging, with the west benefiting from its close ties to Germany while the east suffers from its proximity to the much poorer Belarus and Ukraine.

Overview. The Central Planning Office was absorbed by the newly created Economies Ministry in Jan. 1997. An economic plan ran from 1994 to 1997. In 1995, 15 National Investment Funds were set up to oversee the privatization of 444 state enterprises. All citizens may buy shares in the enterprises. As of Dec. 1997, 9,143 enterprises had been privatized, with revenues from privatization totalling US$5·5bn.

Currency. The currency unit is the *złoty* (PLN) of 100 *groszy*. A new złoty was introduced on 1 Jan. 1995 at 1 new złoty = 10,000 old złotys. Inflation dropped from 249% in 1990 to 14·9% in 1997, and further to 5·5% in 2001. The złoty became convertible on 1 Jan. 1990. In 1995 the złoty was subject to a creeping devaluation of 1·2% per month; it was allowed to float in a 14% (+/–7%) band from 16 May 1995. In April 2000 Poland introduced a floating exchange rate. Foreign exchange reserves were US$26,557m. and gold reserves 3·31m. troy oz in June 2002 (0·47m. troy oz in 1996). In Feb. 2002 total money supply was 88,109m. złotys.

Budget. Budget revenue and expenditure (in 1m. złotys):

	1996	*1997*	*1998*	*1999*	*2000*
Revenue	144,454	172,507	196,952	201,131	213,865
Expenditure	153,047	185,431	207,370	216,685	236,711

Performance. Real GDP growth was 4·1% in 1999 and 4·0% in 2000, although only 1·1% in 2001. Total GDP in 2001 was US$174·6bn. Poland's economy is one of the fastest growing of the ex-communist countries in Europe. Real GDP in 1998 was 17% higher than in 1989. No other ex-communist country has seen such consistent progress. In almost all the other former communist economies, GDP was lower in 1998 than it had been in 1989 at the time of the changes which swept through central and eastern Europe. The private sector accounts for more than 70% of GDP.

Banking and Finance. The National Bank of Poland (established 1945) is the central bank and bank of issue. Its Governor is nominated by the President and approved by the Sejm (*Governor*, Dr Leszek Balcerowicz). There were 73 banks operating at the end of 2000, of which only 7 were controlled—directly or indirectly—by the Polish government through its state treasury. The two largest banks are PKO BP and Pekao, which had assets in 2000 of US$12·2bn. and US$12·0bn. respectively. Other leading banks are Bank Przemysłowo-Handlowy PBK and Bank Handlowy (a member of Citigroup). The General Savings Bank (Powszechna Kasa Oszczędności) exercises central control over savings activities.

In 2000 Poland received US$10,600m. of foreign direct investment, up from just US$89m. in 1990. It receives the most foreign direct investment of any of the former socialist countries of central and eastern Europe. The total stock of FDI at the end of 2000 was US$49·4bn.

There is a stock exchange in Warsaw.

Licenses are required for investment in ports, airports, arms manufacture, estate agency and legal services. In Dec. 1998 foreign investments totalled US$29bn.

Foreign debt was US$63,561m. in 2000.

An agreement of Dec. 1992 with the Czech Republic, Hungary and Slovakia abolished tariffs on raw materials and goods where exports do not compete directly with locally-produced items, and envisaged tariff reductions on agricultural and industrial goods in 1995–97.

KEY HISTORICAL EVENTS

Portugal has been an independent state since the 12th century apart from one period of Spanish rule (1580–1640). It became a kingdom in 1139 under Alfonso I. During the 15th century Portugal played a leading role in oceanic exploration, opening up new trade routes and establishing colonies. Portuguese influence extended to Guinea, Brazil, the Indies and the African coast. In 1807, during the Napoleonic wars, the Spaniards again invaded Portugal, but were driven out by the Duke of Wellington and Portuguese guerrillas during the peninsula war. Nationalistic republicans deposed King Manual II on 5 Oct. 1910. Another coup on 28 May 1926 replaced the unstable parliamentary republic with a military government which in turn was succeeded by civil dictatorship. In the 1960s Portugal faced economic stagnation at home and rebellion in her colonies. Goa was seized by India in 1961. War raged in the African colonies. There was a coup on 25 April 1974, establishing a junta of National Salvation. During 1974–75 most of the Portuguese overseas possessions, notably the African colonies, gained independence.

Following an attempted revolt on 11 March 1975, the junta was dissolved and a Supreme Revolutionary Council formed which ruled until 25 April 1976 when constitutional government was resumed. The transit to full civilian government was completed in 1982 when the constitution was revised to reduce the powers of the president.

Macao, Portugal's colony on the coast of China, was handed back to China on 20 Dec. 1999.

TERRITORY AND POPULATION

Mainland Portugal is bounded in the north and east by Spain and south and west by the Atlantic Ocean. The Atlantic archipelagoes of the Azores and of Madeira form autonomous but integral parts of the republic, which has a total area of 91,905 sq. km. Population (2001 census, provisional), 10,318,304 (5,330,024 females).

Mainland Portugal is divided into five regions, with estimated 1999 populations: North (3,585,400); Central (1,709,800); Lisbon and Tagus Valley (3,329,700); Alentejo (508,000); Algarve (349,200). Population of the Azores (245,500); Madeira, 261,000. Density (1999), 107 per sq. km (North, 169; Central, 72; Lisbon and Tagus Valley, 279; Alentejo, 19; Algarve, 70; Azores, 105; Madeira, 335).

The UN gives a projected population for 2010 of 10·08m.

In 1999, 62·7% of the population lived in urban areas. Portugal has a higher percentage of its population living in rural areas than any other European country. The populations of the districts and Autonomous Regions (2001 census, provisional):

The chief cities are Lisbon (the capital; 1999 population, 3,754,000), Oporto (1,615,000 in 1995), Amadora, Setúbal and Coimbra.

Lisbon: Located 17 km from the Atlantic coast, Lisbon lies on the North Bank of the River Tagus. It covers an area of 226 sq. km and is Portugal's largest city. It has been the capital since its integration into the kingdom of Portugal in 1147. In 1755 it suffered a devastating earthquake. Some traces of mediaeval architecture can still be seen in the older districts of which Alfalma, near St George's Castle, is the oldest. Its name derives from the Arab word Alhama, meaning 'good water' or 'hot fountain'.

The national language is Portuguese.

The Azores islands lie in the mid-Atlantic Ocean, between 1,200 and 1,600 km west of Lisbon. They are divided into three widely separated groups with clear channels between, São Miguel (759 sq. km) together with Santa Maria (97 sq. km) being the most easterly; about 160 km northwest of them lies the central cluster of Terceira (382 sq. km), Graciosa (62 sq. km), São Jorge (246 sq. km), Pico (446 sq. km) and Faial (173 sq. km); still another 240 km to the northwest are Flores (143 sq. km) and Corvo (17 sq. km), the latter being the most isolated and undeveloped of the islands. São Miguel contains over half the total population of the archipelago.

Madeira comprises the island of Madeira (745 sq. km), containing the capital, Funchal; the smaller island of Porto Santo (40 sq. km), lying 46 km to the northeast of Madeira; and two groups of uninhabited islets, Ilhas Desertas (15 sq. km), being 20 km southeast of Funchal and Ilhas Selvagens (4 sq. km), near the Canaries.

CONSTITUTION AND GOVERNMENT

A new Constitution, replacing that of 1976, was approved by the Assembly of the Republic (by 197 votes to 40) on 12 Aug. 1982 and promulgated in Sept. It abolished the (military) Council of the Revolution and reduced the role of the President under it. Portugal is a sovereign, unitary republic. Executive power is vested in the *President*, directly elected for a five-year term (for a maximum of two consecutive

terms). The President appoints a Prime Minister and, upon the latter's nomination, other members of the Council of Ministers.

The 230-member *National Assembly* is a unicameral legislature elected for four-year terms by universal adult suffrage under a system of proportional representation. Women did not have the vote until 1976.

Portugal's first referendum, on whether to ease abortion restrictions, was held on 28 June 1998. Turn-out was just 32%, but the result would have had legal force only if more than half the electorate had voted. 51% of voters favoured keeping most abortions a crime, against 49%in favour of permitting the procedure on demand.

ECONOMY

Agriculture accounted for an estimated 3·9% of GDP in 1998, industry 35·2% and services 60·9%.

Overview. A reform of the tax system is a priority. Tax evasion is high but there are low and lightly enforced penalties. Portugal needs more public investment to close its development gap with the rest of the EU, but also needs to cut its budget deficit. This will require increased tax revenues. In 2001 the trade balance worsened. Low interest rates have encouraged domestic companies to invest abroad. Foreign investment has slowed and with low-cost manufacturing locations in central and eastern Europe, Portugal can no longer rely on low wages to attract foreign investment. The privatization programme has been ambitious, although no major enterprises have been privatized since 1999.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Portugal; irrevocable conversion rate 200·482 escudos to 1 euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. There are seven euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and eight coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. On the introduction of the euro there was a 'dual circulation' period before the escudo ceased to be legal tender on 28 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €10·6bn.

Inflation in 2001 was 4·4%. Gold reserves were 19·51m. troy oz in June 2002 and foreign exchange reserves US$10,125m. Total money supply was €7,091m. in June 2002.

Budget. Budget revenue and expenditure (in 1bn. escudos):

	1994	*1995*	*1996*	*1997*	*1998*
Revenue	5,016·5	5,456·7	5,759·9	6,391·8	6,984·7
Expenditure	6,137·9	6,613·6	6,974·5	7,242·2	7,795·1

Under the previous socialist government the budget deficit was 4·1% of GDP in 2001, above the EU growth and stability pact's 3% limit.

The standard rate of VAT is 19·0%.

Performance. In both 1999 and 2000 real GDP growth was 3·4%, falling to 1·9% in 2001. In the years since Portugal joined the European Union its GDP per head has risen from being 53% of the EU average to being 75% in 2000. Portugal's total GDP in 2001 was US$108·5bn.

Banking and Finance. The central bank and bank of issue is the Bank of Portugal, founded in 1846 and nationalized in 1974. Its *Governor* is Vítor Manuel Ribeiro Constâncio.

On 31 Dec. 1998 there were 81 banks, 6 savings institutions and 160 mutual agricultural credit institutions. The largest Portuguese bank is the state-owned Caixa Geral de Depósitos, which held 21% of all deposits at the end of 1998. There were 19 branches of foreign credit institutions operating in Portugal in 1998.

There are stock exchanges in Lisbon and Oporto.

KEY HISTORICAL EVENTS

Qatar embraced Islam in the 7th century AD, and since then it has been noted regularly in the accounts of Arab historians and writers. Like all countries in the area, it came under Turkish rule for several centuries. Ottoman power was nominal, with real power being in the hands of local sheikhs and tribal leaders. In 1915 the Turks withdrew, and on 3 Nov. 1916 Qatar signed a protection treaty with Britain. The dominant economic activity had traditionally been pearl diving, but around 1930 the pearl market collapsed. In 1939 oil was discovered. Although the Second World War delayed progress, exporting began in 1949. This was to change Qatar dramatically. Qatar declared its independence from Britain on 3 Sept. 1971, ending the Treaty of 1916 which was replaced by a treaty of friendship between the two countries.

TERRITORY AND POPULATION

Qatar is a peninsula running north into the Arabian Gulf. It is bounded in the south by the United Arab Emirates. The UN gives a projected population for 2010 of 653,000.

KEY HISTORICAL EVENTS

The foundation of the feudal 'Danubian Principalities' of Wallachia and Moldavia in the late 13th and early 14th centuries marks the beginning of modern Romania. The nobility acted as the Turks' agents until 1711 when, suspected of pro-Russian sentiments, they were replaced by Greek merchant adventurers, the Phanariots. The Phanariot period of ruthless extortion and corruption was ameliorated by Russian influence. Between 1829 and 1834 the foundations of the modern state were laid but Russian interference soon became repressive. The Moldavian and Wallachian assemblies were fused in 1862. In 1866 Carol of Hohenzollern came to the throne and a constitution adopted based on that of Belgium of 1831. Romania was formally declared independent by the Treaty of Berlin of 1878.

This was a period of expansion for an economy controlled by land-owners and nascent industrialists. The condition of the peasantry remained miserable and the rebellion of 1907 was an expression of their discontent. Romania joined the First World War on the allied side in 1916. The spoils of victory brought Transylvania (with large Hungarian and German populations), Bessarabia, Bukovina and Dobrudja into the union with the 'Old Kingdom'. Hit by the world recession, Romania was drawn into Germany's economic orbit. Against this background the fascist Iron Guard assassinated the Liberal leader in 1934. Carol II adopted an increasingly totalitarian rule. Following Nazi and Soviet annexations of Romanian territory in 1940, he abdicated in favour of his son Michael. The government of the fascist Ion Antonescu declared war on the USSR on 22 June 1941. On 23 Aug. 1944 Michael, with the backing of a bloc of opposition parties, deposed Antonescu and switched sides.

The armistice of Sept. 1944 gave the Soviet army control of Romania's territory. This, and the 'spheres of influence' diplomacy of the Allies, predetermined the establishment of communism in Romania. Transylvania was restored to Romania (although it lost Bessarabia and Southern Dobrudja), and large estates were broken up for the benefit of the peasantry. Elections in Nov. 1946 were held in an atmosphere of intimidation and fraudulence. Michael was forced to abdicate and a people's republic was proclaimed. The communist leader, Gheorghe Gheorghiu-Dej, purged himself of his fellow leaders in the early 1950s. Under his successor, Nicolae Ceauşescu, Romania took a relatively independent stand in foreign affairs while becoming increasingly repressive and impoverished domestically.

An attempt by the authorities on 16 Dec. 1989 to evict a Protestant pastor, László Tökés, from his home in Timişoara, provoked a popular protest which escalated into a mass demonstration against the government. A state of emergency was declared but the Army went over to the rebels and Nicolae and Elena Ceauşescu fled the capital. A dissident group which had been active before the uprising, the National Salvation Front (NSF), proclaimed itself the provisional government. The Ceauşescus were captured and after a secret two hour trial by military tribunal, summarily executed on 25 Dec. The following day Ion Iliescu, leader of the National Salvation Front, was sworn in as President. But the Iliescu-led administration, while committed to reform, was inhibited by its communist origins. The economy stalled and the debts piled up. Iliescu was voted out of office and his government replaced by a four-party coalition led by President Emil Constantinescu. Iliescu returned as president in 2000. The economy continued to struggle but in 2002 Romania was invited to join NATO in 2004 and was given a target date of 2007 for EU membership.

There is a 3% threshold for admission to either house. Votes for parties not reaching this threshold are redistributed.

Health. In 2000 there were 439 hospitals, 166,817 hospital beds and 47,354 doctors (including 4,983 dentists).

Welfare. In Dec. 2002 pensioners comprised 3,096,000 old age and retirement, 1,620,000 retired farmers, 719,900 disability, 650,300 survivor allowance and 5,800 social assistance. These drew average monthly pensions ranging from 565,631 lei to 2,060,203 lei. The social security spending in 2002 was 10·4% of GDP.

CULTURE

Broadcasting. A National Audiovisual Council was established in 1992, and is the only authority which is permitted to grant broadcasting audiovisual licences to private stations. Between 1992 and Nov. 1999 it granted 2,046 cable licences, 217 television broadcasting licences, 341 radio broadcasting licences, 14 licences for satellite television stations and nine licences for satellite radio stations. The public radio and TV stations have broadcasts in Romanian, and in Hungarian and German as well as other minority languages in Romania. The public television station also broadcasts by satellite in its programme *TVR International*. The public radio stations broadcast three radio programmes on medium wave and FM. Radio receivers, 1997, 7·2m.; TV (colour by SECAM H), 5·25m.

Cinema. In 1999 there were 306 cinemas (excluding private ones), with 109,000 seats. Nine full-length films were made in 1995.

Press. There were, in 1999, 100 daily papers and 2,200 periodicals, including 200 periodicals in minority languages.

8,000 book titles were published in 1999.

Tourism. In 1999 there were 3,209,000 foreign tourists, bringing revenue of US$254m.

Libraries. In 1997 there were 3,246 public libraries, 48 National libraries and 339 Higher Education libraries; they held a combined 92,382,000 volumes. There were 1,994,000 registered public library users in 1997.

KEY HISTORICAL EVENTS

Archaeological evidence points to the influence of Arabic and Turkish cultures prior to the 4th century AD. Avar, Goth, Hun and Magyar occupations punctuated the development of the East Slavs over the next five centuries, while trade with Germanic, Scandinavian and Middle Eastern regions began in the 8th century.

In 882 the Varangian prince Oleg of Novgorod made Kyiv the capital of Kievan Rus, the first unified state of the East Slavs. During the 10th century, trade was extended between the Baltic and Black Seas forming Kyiv's main economy. Successful campaigns against the Varangians, the Khazars and the Bulgars consolidated the East Slav State. The political structure was developed by Vladimir the Great, religion and culture by his successor Yaroslav, but inter-tribal struggles led to Kyiv's demise at the end of the 11th century.

In 1223 Genghis Khan's grandson, Batu Khan, conquered Kievan Rus beginning the Mongols' rule of the 'Golden Horde' area. Trade and cities flourished until internal struggles forced the break-up of the empire in the 15th century. Moscow was then consolidated under Ivan III, the empire strengthened and expanded by Vasily III and reformed by Vasily's successor Ivan 'the Terrible' (1547–84). He led a bloody and suppressive rule although the empire was further expanded. In a fit of pique Ivan murdered his son in 1581 leaving a hereditary gap. The following chaotic period brought various contenders for the throne, dividing Russia and its foreign supporters (such as Poland and Sweden) in their fight for control of the realm. Eventually some stability was restored under Tsar Mikhail Fyodorovich Romanov (the first in a dynasty that would rule until 1917).

Peter the Great's rule (1689–1725) signalled a new era for Russia and established the empire as the leading Baltic power. Administrative reforms and military and industrial expansion were introduced, although peasants' rights were abolished and serfdom began. The capital was transferred from Moscow to the newly built St Petersburg (1712). His daughter Elizabeth I's reign (1741–62) consolidated Peter's reforms and Western culture and literature flourished. The politically ambitious wife of Elizabeth's successor, Catherine the Great, claimed the throne in 1762. She led an aggressive expansion plan that fortified Russia's status as the leading European power.

Russia's position declined over the 19th century with military defeats to France, Turkey and Britain. Some modernization included the partial emancipation of the serfs in 1861, although harsh labour reforms and neglect of agricultural policy under Alexander III resulted in widespread famine in 1891. At the turn of the 20th century, industrial growth and appalling working conditions fuelled revolutionary feelings among the working class while Socialism grew among the middle classes. An unpopular war with Japan (1904) exacerbated public discontent. The massacre of protesting factory workers by Tsar Nicholas II's troops in 1905 caused a countrywide strike, violence and rebellion. World War I temporarily unified Russians in the war effort, but depleting military resources and social hardship led to a succession of anti-tsar demonstrations.

The revolution of 8 March 1917 led to the abdication of Tsar Nicholas II and the proclamation of a republic. However, a political struggle went on between the supporters of the Provisional Government—the Mensheviks and the Socialist Revolutionaries—and the Bolsheviks. When they had won majorities in the Soviets of the principal cities and of the armed forces on several fronts, the Bolsheviks organized an insurrection through a Military-Revolutionary Committee of the

Petrograd Soviet. On 7 Nov. 1917 the Committee arrested the Provisional Government and transferred power to the second All-Russian Congress of Soviets. This elected a new government, the Council of People's Commissars, headed by Lenin. From about 1929 Joseph Stalin's authority was supreme. Resistance to agricultural collectivization was ruthlessly suppressed. A series of Five-Year Plans (1928, 1933, 1937, 1946 and 1951) transformed the USSR into a powerful industrial state. Opposition in party and government was crushed by the purges of 1933 and 1936–38. In Sept. 1939 (under a secret clause of the ten-year non-aggression signed with Nazi Germany on 23 Aug. 1939) Soviet troops occupied eastern Poland. After Hitler invaded Russia, Stalin allied himself with the USA and Britain while extending his power in Central and Eastern Europe. Following the death of Stalin in 1953, Nikita Khrushchev condemned his regime. This encouraged a liberalizing of the Russian-backed communist regimes of Hungary and Poland, and later Czechoslovakia (1968) which the USSR crushed.

A policy of 'peaceful co-existence' with the West, especially after the war scare with the USA in 1962 over Cuban missiles, led to years of strained relations with China. After 1985, with Mikhail Gorbachev as Secretary-General of the Communist Party, a new period of *glasnost* (openness) and *perestroika* (reconstruction) was inaugurated. On 19 Aug 1991 hardliners in the Kremlin attempted to overthrow President Gorbachev, and tanks were sent on to the streets as it was announced that Gorbachev had in effect been deposed. Russian President Boris Yeltsin orchestrated the opposition to the coup, and after three days it ended in failure. This was followed by declarations of independence by the various constituent republics which made up the Soviet Union.

After the dissolution of the USSR in Dec. 1991, Russia became one of the founding members of the Commonwealth of Independent States. Boris Yeltsin was elected Russian President in June 1991. A period of confrontation in 1992–93 between President Yeltsin and parliament climaxed when thousands of armed anti-Yeltsin demonstrators assembled on 3 Oct. and were urged to seize the Kremlin and television centre. On 4 Oct. troops took the parliament building by storm after a 10-hour assault in which 140 people died. Vice-President Rutskoi and Speaker Khasbulatov were arrested.

Russian troops were sent to the breakaway region of Chechnya in 1994, the war lasting for two years. Boris Yeltsin was re-elected president in 1996. Many took this as a signal of confidence in the new, democratic Russia. But the reality was a state in which democratic institutions were weakened to the point of impotence by racketeering and bureaucratic dead-weight. Russia defaulted on its debt, the rouble halved in value, imports fell by 45% and oil revenues slumped. On 17 Aug. 1998 the government freed the rouble, in effect devaluing it, imposed currency controls and froze the domestic debt market.

In Aug. 1999 Boris Yeltsin appointed as prime minister Vladimir Putin, who had been a KGB colonel and director of the KGB's successor organization, the FSB. A series of bomb blasts hit Moscow and one of Putin's first tasks was to send in troops to Chechnya once more, receiving much popular support from Russians despite criticism abroad. On 31 Dec. 1999 Yeltsin resigned the presidency, nominating Putin as his *ad interim* successor, a job he retained after a clear-cut victory in the presidential election of March 2000.

As president, Putin has achieved a certain level of political stability and reform. One of his primary aims has been to reduce the power of the oligarchs behind Yeltsin's success and fight corruption. Tax cuts have been introduced, and in 2000 his programme of regional reform divided Russia's 89 regions into seven new districts run by Kremlin representatives.

Putin has proposed a sweeping reform of Russia's justice system. Headway has also been made in defence policy, with America and Russia agreeing on the Anti-Ballistic Missile treaty. The war in Chechnya remains a cause for humanitarian concern, with reports of atrocities and thousands of refugees.

Following the terror attacks on New York and Washington of 11 Sept. 2001 President Putin made clear his support for the war on terrorism. In Oct. 2002 a group of Chechen rebels took control of a Moscow theatre and held hostage 800 people for three days, before Russian troops stormed the building. An anaesthetic gas, used to combat the rebels, also killed many of the hostages. The

rebels had been demanding that Russia end the war in Chechnya. The new relationship with the USA has faltered as a result of the war with Iraq which Russia has opposed.

TERRITORY AND POPULATION

Russia is bounded in the north by various seas (Barents, Kara, Laptev, East Siberian) which join the Arctic Ocean, and in which is a fringe of islands, some of them large. In the east Russia is separated from the USA (Alaska) by the Bering Strait; the Kamchatka peninsula separates the coastal Bering and Okhotsk Seas. Sakhalin Island, north of Japan, is Russian territory. Russia is bounded in the south by North Korea, China, Mongolia, Kazakhstan, the Caspian Sea, Azerbaijan, Georgia, the Black Sea and Ukraine, and in the west by Belarus, Latvia, Estonia, the Baltic Sea and Finland. Kaliningrad (the former East Prussia) is an exclave on the Baltic Sea between Lithuania and Poland in the west. Russia's area is 17,075,400 sq. km and it has 11 time zones. Its 1989 census population was 147,021,869 (53·3% female), of whom 81·5% were Russians, 3·8% Tatars, 3% Ukrainians, 1·2% Chuvash, 0·9% Bashkir, 0·8% Belorussians, and 0·7% Mordovians. Chechens, Germans, Udmurts, Mari, Kazakhs, Avars, Jews and Armenians all numbered 0·5m. or more. Population estimate, 1998, 147,100,000 (female, 53%); density, 9 per sq. km.

In 1999, 77·3% of the population lived in urban areas.

The UN gives a projected population for 2010 of 136·98m.

The two principal cities are Moscow, the capital, with a 1999 population of 8·30m. and St Petersburg (formerly Leningrad), with 4·66m. (also 1999). Other major cities (with 1999 populations) are: Novosibirsk (1·40m.), Nizhny Novgorod (1·35m.), Yekaterinburg (1·26m.), Samara (1·16m.) and Omsk (1·15m.). In May 2000 President Putin signed a decree dividing Russia into seven federal districts, replacing the previous structure of 89 regions. The new districts, with their administrative centres in brackets, are: Central (Moscow), North-Western (St Petersburg), North Caucasus (Rostov-on-Don), Volga (Nizhny Novgorod), Ural (Yekaterinburg), Siberian (Novosibirsk) and Far-Eastern (Khaborovsk).

Moscow: A settlement area since pre-historic times, Moscow is Russia's political, economic and transport centre. Having developed radially from its historic centre it is a city that has preserved its traditional structure. Moscow has a significant cultural framework and a lucrative tourist industry that has thrived since the end of the Cold War.

The national language is Russian.

SOCIAL STATISTICS

1999 births, 1,214,689; deaths, 2,144,316; marriages, 911,162; divorces, 532,533. Rates, 1999 (per 1,000 population): birth, 8·3; death, 14·7: marriage, 6·3; divorce, 3·7. At the beginning of the 1970s the death rate had been just 9·4 per 1,000 population. The annual abortion rate, at approximately 70 per 1,000 women aged 15–44, ranks among the highest in the world. Infant mortality, 1999 (per 1,000 live births), 17·1. The divorce rate, which rose to 5·3 per 1,000 population in 2001, is also among the highest in the world. The most popular age range for marrying in 1995 was 20–24 for both males and females. Expectation of life at birth, 1999, was 60·1 years for males and 72·5 years for females. With a difference of 12·4 years, no other country has a life expectancy for females so high compared to that for males. The low life expectancy (down from 64·6 years for males and 74 years for females in the USSR as a whole in 1989) and the low birth rate (down from 17·6 per 1,000 population in the USSR in 1989) is causing a demographic crisis, with the population declining by approximately 750,000 a year. If current trends continue, the population could fall by nearly 40m. in the first half of the 21st century. Disease, pollution, poor health care and alcoholism are all contributing to the dramatic decline in the population. In 2000, 35% of Russians were living below the poverty line, up from 21% in 1997. Annual population growth rate, 1990–99, –0·1%; fertility rate, 1999, 1·4 births per woman. The suicide rate, at 35·3 per 100,000 population in 1998, is one of the highest in the world. Among males it was 62·6 per 100,000 population in 1998.

CONSTITUTION AND GOVERNMENT

The Russian Soviet Federative Socialist Republic (RSFSR) adopted a constitution in April 1978. In June 1990, pending the promulgation of a new constitution, it adopted a declaration of republican sovereignty by 544 votes to 271. It became a founding member of the CIS in Dec. 1991, and adopted the name 'Russian Federation'. A law of Nov. 1991 extended citizenship to all who lived in Russia at the time of its adoption and to those in other Soviet republics who requested it.

There is a 19-member *Constitutional Court*, whose functions under the 1993 Constitution include making decisions on the constitutionality of federal laws, presidential and government decrees, and the constitutions and laws of the subjects of the Federation. It is governed by a Law on the Constitutional Court, adopted in July 1994. Judges are elected for non-renewable 12-year terms.

At a referendum on 25 April 1993 the electorate was 107·3m.; turn-out was 69·2m. Four questions were put: confidence in President Yeltsin (58·7% of votes cast); approval of economic reforms (53% of votes cast); early presidential elections (31·7% of the electorate); early parliamentary elections (43·1% of the electorate). This referendum had no constitutional effect, however.

Voting was held on 12 Dec. 1993 on the adoption of a new constitution and the election of a new parliament for a two-year term. The electorate was 106,170,335; turn-out was 54·8%. The constitution was approved by 58·4% of votes cast, and came into effect on 24 Dec. 1993.

According to the 1993 Constitution the Russian Federation is a 'democratic federal legally-based state with a republican form of government'. The state is a secular one, and religious organizations are independent of state control. Individuals have freedom of movement within or across the boundaries of the Federation; there is freedom of assembly and association, and freedom to engage in any entrepreneurial activity not forbidden by law. All citizens have a right to housing, to free medical care, and to a free education. The state itself is based upon a separation of powers and upon federal principles, including a Constitutional Court. The most important matters of state are reserved for the federal government, including socio-economic policy, the budget, taxation, energy, foreign affairs and defence. Other matters, including the use of land and water, education and culture, health and social security, are for the joint management of the federal and local governments, which also have the right to legislate within their spheres of competence. A central role is accorded to the *President*, who defines the 'basic directions of domestic and foreign policy' and represents the state internationally. The President is directly elected for a four-year term, and for not more than two consecutive terms; he or she must be at least 35 years old, a Russian citizen, and a resident in Russia for at least the previous ten years. 1m. signatures are needed to validate a presidential candidate, no more than 7% of which may come from any one region or republic. The President has the right to appoint the prime minister, and (on his nomination) to appoint and dismiss deputy prime ministers and ministers, and may dismiss the government as a whole. In the event of the death or incapacity of the President, the Prime Minister becomes head of state.

Parliament is known as the *Federal Assembly.* The 'representative and legislative organ of the Russian Federation', it consists of two chambers: the *Council of the Federation* and the *State Duma.* The Council of the Federation, or upper house, consists of 178 deputies. The Federation is made up of 21 republics, 1 autonomous region, 10 autonomous areas, 6 territories, 49 regions and 2 federal cities. The State Duma, or lower house, consists of 450 deputies chosen for a four-year term. 225 of these are elected from single-member constituencies on the first-past-the-post system, the remainder from party lists by proportional representation. To qualify for candidacy an individual must obtain signatures from at least 1% of voters in the

constituency; a party or electoral alliance must obtain a minimum of 100,000 supporting signatures from at least seven regions, but not more than 15% from any one region. There is a 5% threshold for the party-list seats. Parties which gain at least 35 seats may register as a faction, which gives them the right to join the Duma Council and chair committees. Any citizen aged over 21 may be elected to the State Duma, but may not at the same time be a member of the upper house or of other representative bodies, and all deputies work on a 'permanent professional basis'. Both houses elect a chair, committees and commissions. The Council of the Federation considers all matters that apply to the Federation as a whole, including state boundaries, martial law, and the deployment of Russian forces elsewhere. The Duma approves nominations for Prime Minister, and adopts federal laws (they are also considered by the Council of the Federation, but any objection may be overridden by a two-thirds majority; objections on the part of the President may be overridden by both houses on the same basis). The Duma for its part can reject nominations for Prime Minister, but after the third such rejection it is automatically dissolved. It is also dissolved if it twice votes a lack of confidence in the government as a whole, or if it refuses to express confidence in the government when the matter is raised by the Prime Minister.

National Anthem. In Dec. 2000 the Russian parliament, on President Putin's initiative, decided that the tune of the anthem of the former Soviet Union should be reintroduced as the Russian national anthem. Written by Alexander Alexandrov in 1943, the anthem was composed for Stalin. New words were written by Sergei Mikhalkov, who had written the original words for the Soviet anthem in 1943. The new anthem is 'Rossiya—svyashennaya nasha derzhava, Rossiya—lyubimaya nasha strana' ('Russia—our holy country, Russia—our beloved country'). Boris Yeltsin had introduced a new anthem during his presidency—'Patriotic Song', from an opera by Mikhail Glinka and arranged by Andrei Petrov.

RECENT ELECTIONS

Vladimir Putin became President for a four-year term at the elections of 26 March 2000, gaining 52·6% of the votes cast against ten opponents and thus avoiding a second round. His nearest opponent was Gennadiy Zyuganov, the Communist Party candidate, who won 29·3% of the vote. Turn-out was around 70%.

Elections for the State Duma were held on 19 Dec. 1999. The Communist Party gained 113 seats with 24·3% of the vote; Inter-Regional Unity Movement, 72 (23·3%); Fatherland All Russia, 66 (13·3%); Union of Right Forces, 29 (8·5%); Yabloko (Apple), 21 (5·9%); Zhironovsky Blok (Liberal Democrat Party of Russia), 17 (6·0%); Our Home is Russia, 7 (1·2%); All Russian Political Movement in Support of the Army, 2 (0·6%); Pensioners' Party, 1 (2·0%); Congress of Russian Communities and Movement of Y. Boldurev, 1 (0·6%); Russian Socialist Party, 1 (0·2%). Non-partisans claimed 106 seats.

Parliamentary elections are scheduled to take place on 14 Dec. 2003.

DEFENCE

The President of the Republic is C.-in-C. of the armed forces. Conscription was raised from 18 months to two years in April 1995. There are plans to end conscription by 2005.

The START 2 nuclear arms cutting treaty was ratified by the Duma in April 2000, seven years after it had been signed. This obliged both Russia and the USA to reduce their stocks of strategic weapons from some 6,000 nuclear warheads to 3,500. At the height of the Cold War each side had possessed over 10,000.

A presidential decree of Feb. 1997 ordered a cut in the armed forces of 200,000 men, reducing them to an authorized strength of 1,004,100 in 1999. This figure included 200,000 staff at the Ministry of Defence and 478,000 paramilitary troops (including 196,000 border troops).

Military expenditure totalled US$63,684m. in 2001 (US$440 per capita), representing 4·3% of GDP. Only the USA spent more on defence in 2001.

Nuclear Weapons. Russia's warhead count is now shrinking and stood at 4,951 in Jan. 2002 according to the Stockholm International Peace Research Institute. Shortfalls in planned investments to replace current systems as they reach the end of their service lives means the number of strategic warheads will decline rapidly over the next decade. Current plans are to cut stockpiles to between 2,000 and 2,500, but President Putin has proposed that the target for both Russia and the USA should be 1,500, with even further reductions to follow. On 24 May 2002 the USA and Russia signed an arms control treaty to reduce the number of US and Russian warheads, from between 6,000 and 7,000 each to between 1,700 and 2,200 each, over the next ten years. Russia has pledged to dismantling its biological and chemical weapons programme and to destroy its stockpiles of such weapons, believed to be the largest in the world.

Army. A Russian Army was created by presidential decree in March 1992. In 2002 forces numbered 321,000 (190,000 conscripts). There were estimated to be around 20,000,000 reserves (all armed forces) of whom 2,400,000 had seen service within the previous five years. There were around 17,000 Russian troops stationed outside Russia (including 7,800 in Tajikistan and 4,000 in Georgia) in 2002, the majority in various states of the former USSR.

The Army is deployed in six military districts and one Operational Strategic Group. Equipment includes some 13,870 main battle tanks (including T-55, T-62, T-64A/-B, T-72L/-M, T-80/-U/UD/UM and T-90s) plus 150 light tanks (PT-76). In addition 8,000 main battle tanks were in store.

The Army air element has some 2,300 attack helicopters in the inventory (of which 600 in store) including Mi-24s and Ka-50s. Funding shortages have reduced serviceability drastically.

Strategic Nuclear Ground Forces. In 2002 there were four rocket armies, each with launcher groups, 10 silos and one control centre. Inter-continental ballistic missiles numbered 735. Personnel, 100,000 (50,000 conscripts).

Navy. The Russian Navy continues to reduce steadily and levels of sea-going activity remain very low with activity concentrated on a few operational units in each fleet. The safe deployment and protection of the reduced force of strategic missile-firing submarines remains its first priority; and the defence of the Russian homeland its second. The strategic missile submarine force operates under command of the Strategic Nuclear Force commander whilst the remainder come under the Main Naval Staff in Moscow, through the Commanders of the fleets.

The Northern and Pacific fleets count the entirety of the ballistic missile submarine force, all nuclear-powered submarines, the sole operational aircraft carrier and most major surface warships. The Baltic Fleet organization is based in the St Petersburg area and in the Kaliningrad exclave. Some minor war vessels have been ceded to the Baltic republics. The Black Sea Fleet was for some years the object of wrangling between Russia and Ukraine. Russia eventually received

four-fifths of the Black Sea Fleet's warships, with Ukraine receiving about half of the facilities. It was agreed that Russia would rent three harbours for warships and two airfields for a period of 20 years, for a payment of approximately US$100m. annually. The small Caspian Sea flotilla, formerly a sub-unit of the Black Sea Fleet, has been divided between Azerbaijan (25%), and Russia, Kazakhstan and Turkmenistan, the littoral republics (75%).

The material state of all the fleets is suffering from continued inactivity and lack of spares and fuel. The nuclear submarine refitting and refuelling operations in the Northern and Pacific Fleets remain in disarray, given the large numbers of nuclear submarines awaiting defuelling and disposal. The strength of the submarine force has now essentially stabilized, but there are still large numbers of decommissioned vessels awaiting their turn for scrapping in a steadily deteriorating state. In Jan. 2003 it was announced that up to a fifth of the fleet was to be scrapped.

The aircraft carrier *Admiral Kuznetsov* is now operational, albeit with a limited aviation capability, and she deployed to the Mediterranean in Dec. 1995.

In 2002 there were 13 operational nuclear-fuelled ballistic-missile submarines, constituted as follows:

Class	*No.*	*Missiles*	*Total no. of missiles*
Delta-IV	6	16 SS-N-23	96
Delta-III	5	16 SS-N-18	80
Typhoon	2	20 SS-N-20	40
			216

The attack submarine fleet comprises a wide range of classes, from the enormous 16,250 tonne 'Oscar' nuclear-powered missile submarine to diesel boats of around 2,000 tonnes. The inventory of tactical nuclear-fuelled submarines comprises 6 'Oscar II', 1 former strategic 'Yankee'-class, 9 'Akula'-class, 1 'Sierra'-class and 5 'Victor III'-class submarines.

The diesel-powered 'Kilo' class, of which the Navy operates nine, is still building at a reduced rate mostly for export. There are a further four diesel submarines on the active list.

Cruisers are divided into two categories; those optimized for anti-submarine warfare (ASW) are classified as 'Large Anti-Submarine Ships' and those primarily configured for anti-surface ship operations are classified 'Rocket Cruisers'. The principal surface ships of the Russian Navy include the following classes:

Aircraft Carrier. The *Admiral Kuznetsov* of 67,500 tonnes was completed in 1989. It is capable of embarking 20 aircraft and 15–17 helicopters. All other aircraft carriers have been decommissioned or scrapped.

Cruisers. The ships of this classification are headed by the two ships of the Kirov-class, the largest combatant warships, apart from aircraft carriers, to be built since the Second World War. There are, in addition, 3 Slava-class, 1 of the Nikolaev ('Kara') class and 1 Kynda class ship in operation.

Destroyers. There are 7 Udaloy-class, the first of which entered service in 1981, 1 Udaloy II-class and 4 Sovremenny-class guided missile destroyers in operation. In addition there is a single remaining 'modified Kashin'-class ship and a further one unmodified 'Kashin' also in operation.

Frigates. There are 10 frigates in operation including the first of a new class, the 'Neustrashimy', 7 Krivak I-class and 2 Krivak II-class ships.

The Russian Naval Air Force operates some 217 combat aircraft including 45 Tu-22M bombers and 52 Su-24, 10 Su-25 and 52 Su-27 fighters. There were an additional 102 armed helicopters in operation.

Total Naval personnel in 2002 numbered 171,500, of whom an estimated 16,000 were conscripts. Some 11,000 serve in the strategic submarine force, 35,000 in naval aviation, 9,500 naval infantry/coastal defence troops.

Air Force. The Air Force (VVS) and Air Defence Troops (PVO) amalgamated in March 1998 under one Air Force command. Personnel is estimated at 185,000 and comprises some 1,736 combat aircraft but no aircraft.

The Air Force is organized into three main Commands: Long-Range Aviation, Tactical Aviation and Military Transport Aviation.

Long-Range Aviation comprised in 2002 (numbers in brackets) Tu-160 (15), Tu-22M (117) and Tu-95 (63) bombers, some equipped to carry nuclear weapons.

Tactical Aviation comprised in 2002 (numbers in brackets) Su-24 (371) and Su-25 (235) fighter-bombers and MiG-29 (255), MiG-31 (256) and Su-27 (392) fighters. In addition MiG-25 and Su-24s are used for reconnaissance missions.

INTERNATIONAL RELATIONS

Russia is a member of the UN (Security Council), BIS, the NATO Partnership for Peace, CIS, the Council of Europe, OSCE, Council of the Baltic Sea States, BSEC, Danube Commission, APEC and the Antarctic Treaty. On 16 May 1997 NATO ratified a 'Fundamental Act on Relations, Co-operation and Mutual Security' with Russia. Although not a member of the World Trade Organization, President Putin has made it a stated goal. Russian officials think that the country could join the WTO by the end of 2003.

ECONOMY

Agriculture accounted for 7·3% of GDP in 1998, industry 35·3% and services 57·4%.

In Oct. 1991 a programme was launched to create a 'healthy mixed economy with a powerful private sector'. The prices of most commodities were freed on 2 Jan. 1992.

Privatization, overseen by the State Committee on the Management of State Property, began with small and medium-sized enterprises. A state programme of privatization of state and municipal enterprises was approved by parliament in June 1992, and vouchers worth 10,000 roubles each began to be distributed to all citizens in Oct. 1992. These could be sold or exchanged for shares. Employees have the right to purchase 51% of the equity of their enterprises. 25 categories of industry (including raw materials and arms) remain in state ownership. The voucher phase of privatization ended on 30 June 1994. A post-voucher stage authorized by presidential decree of 22 July 1994 provides for firms to be auctioned for cash following the completion of the sale of up to 70% of manufacturing industry for vouchers. By Dec. 1997 a total of 127,000 enterprises had been privatized; 59% of these were in trade, public catering and personal services, 33% in manufacturing, construction, transport and communications and 2·4% in agriculture. While there is still widespread corruption and a reluctance in some sectors to loosen state control, there are encouraging signs of an economy pulling into shape.

Overview. In the late 1990s the Asian crisis, the weakening of capital flows to emerging markets and the collapse of oil prices all hurt the economy. It has since benefited from improved oil revenues and tighter fiscal management. The transition from the centrally planned system to one based mainly on markets disrupted the economy and the collection of data. Much of the private sector goes unrecorded owing to tax avoidance. Goskomstat (the State Statistic Committee) adjusts figures upward on the basis that an estimated 25% of production is informal. The 1999 Tax Code limits the number and type of taxes employed at various levels of government.

Currency. The unit of currency is the *rouble* (RUR), of 100 *kopeks*. In Jan. 1998 the rouble was redenominated by a factor of a thousand. Foreign exchange reserves were US$39,838m. and gold reserves 12·44m. troy oz in June 2002. In 1997 the rouble was tied to the US dollar on a sliding scale ranging from US$1 = 5,500–6,100 roubles on 1 Jan. 1997 to 6 roubles on 31 Jan. 1998. Inflation, which was 879% in 1993, stood at 20·7% in 2001. In 1995 the total external debt was US$120,461m., most of it inherited from the Soviet Union. Total money supply in June 2002 was 1,254·51bn. roubles. In Nov. 2000 President Putin and President Lukashenka of Belarus agreed the introduction of a single currency, with the Russian rouble to be introduced in Belarus by 2005 and a single currency in 2008. The draft agreement has to be ratified by the parliaments of the two countries.

Budget. In 2000 revenue totalled 1,843,958m. roubles (of which tax 1,522,364m. roubles) and expenditure 1,672,353m. roubles. In 1997 the budget deficit was 6·1% of GDP. The current account surplus was US$3,336m.

Performance. GDP grew by 0·9% in 1997, the first expansion since the Soviet Union's collapse in 1991; but many economists believe that the booming informal economy adds over 25% to the value of GDP. With oil revenues well down and a

collapse of the rouble in 1998, Russia defaulted on its debt. In 1998 real GDP growth was –4·9%. There was then a highly impressive turnaround, with growth of 5·4% in 1999 and a record 9·0% in 2000. In 2001 there was growth of 5·0%, in spite of the world economic slowdown and the effects of the attacks on New York and Washington of 11 Sept. 2001. GDP declined by 17% between 1992 and 1997 and GDP per person by 25% over the same period. Total GDP was US$310·0bn. in 2001.

Banking and Finance. The central bank and bank of issue is the State Bank of Russia (*Governor*, Sergey Mikhailovich Ignatiev). The Russian Bank for Reconstruction and Development and the State Investment Company were created in 1993 to channel foreign and domestic investment. Foreign bank branches have been operating since Nov. 1992.

By 1995 the number of registered commercial banks had increased to around 5,000 but following the Aug. 1997 liquidity crisis, owing to the ensuing bankruptcies, mergers and the Central Bank's revoking of licences, the number fell to 2,500. Approximately 80% of the commercial banks were state-owned through ministries or state enterprises. At the end of 2000 the leading banks were Sberbank (assets of 551·8bn. roubles), Vneshtorgbank (111·5bn. roubles) and Gazprombank (82·3bn. roubles).

In the wake of one of the worst financial crises which Russia's market economy had experienced, the central bank tripled interest rates to 150% in May 1998 in an effort to restore stability to the financial system. In 2002 the banking sector in Russia was healthier than at any time since the collapse of the former Soviet Union.

There are stock exchanges in St Petersburg and Vladivostok.

Russia was one of 15 countries and territories named in a report in June 2000 as failing to co-operate in the fight against international money laundering. The Financial Action Task Force on Money Laundering was set up by the G7 group of major industrialized nations.

Weights and Measures. The metric system is in use. The Gregorian Calendar was adopted as from 14 Feb. 1918.

ENERGY AND NATURAL RESOURCES

Environment. Russia's carbon dioxide emissions in 1998 accounted for 6·3% of the world total (the third highest after the USA and China), and according to the *World Bank Atlas* were equivalent to 9·8 tonnes per capita. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked Russia 72nd in the world, with 49·1%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

Electricity. Installed capacity was 206m. kW in 1997. Production in 1998 was 771·95bn. kWh and consumption per capita 3,937 kWh. The dominant electricity company is United Energy Systems (52% state-owned), which controls 80% of Russia's generating capacity. There were 30 nuclear plants in use in 2001.

Oil and Gas. Oil and gas companies account for around a quarter of the Russian economy. In Feb. 2003 British Petroleum (BP) announced a US$6·75bn. investment in the Russian oil industry. The programme aims to create a new company producing 1·2m. bbls. of crude oil per day.

In 2001 there were proven crude petroleum reserves of 48·6bn. bbls., enough to last until 2021. In 1999 production of crude petroleum was 303m. tonnes. Russia is one of the world's leading oil producers and a major exporter. In 1996 there were 63,000 km of pipeline for crude petroleum. In 2002 a deal to supply oil from the Ural region to the US West Coast was agreed. A deepwater port at Murmansk is being planned. Russia is also looking to secure American investment in its oil industry. Work on a new 3,700-km long oil pipeline stretching to Nakhodka, on Russia's eastern coast, is set to commence during 2003.

Output of natural gas in 1999 was 589,484m. cu. metres, making Russia the world's largest producer. Russia also has the largest reserves of natural gas—in 2000 it had proven reserves of 48,100bn. cu. metres.

Minerals. Russia contains great mineral resources: iron ore, coal, gold, platinum, copper, zinc, lead, tin and rare metals. Output, 1997 (in tonnes): coal, 261m.; nickel,

260m.; chrome ore, 151m.; lignite (1997), 88·6m.; iron ore, 70·8m.; molybdenum, 8·5m.; tin, 7·5m.; bauxite, 3·3m.; gold (2000), 155. Salt production, 1997 estimate: 2·1m. tonnes. Diamond production, 2000: 20·5m. carats. Only Australia and Botswana produce more diamonds. Annual uranium production is 2,000 tonnes.

Agriculture. A presidential decree of Dec. 1991 authorized the private ownership of land on a general basis; a further decree of March 1996 authorized its free sale. Collective and state farms which wish to start private farming are required to re-register as co-operatives or share companies. Members of collectives may withdraw with a certificate of land ownership and a share of the collective's equipment or compensation in lieu; members may also elect to remain in co-operatives voluntarily. The decree permits foreign nationals to own land through joint ventures.

In Jan. 1995 there were 26,900 agricultural enterprises including 6,000 collective farms, 3,600 state farms and 17,300 commercial farms; 6·4m. were employed in agriculture, and output was valued at 38,491,000m. roubles. In 1995, 220·8m. ha were in cultivation, of which 105·1m. ha were in the hands of companies and co-operatives, 32·2m. ha in collective farms, 18·5m. ha in state farms, 10·1m. ha in commercial farms and 5·7m. ha in individual private plots. By 1997 there were 126·0m. ha of arable land and 1·94m. ha of permanent crops. In 2001 nearly 90% of Russia's agricultural land was privately owned.

Output in 2000 (in 1,000 tonnes) included: wheat, 36,000; potatoes, 35,297; sugarbeets, 14,041; barley, 13,266; oats, 5,500; rye, 5,300; cabbages, 4,500; sunflower seeds, 3,900; tomatoes, 1,985; maize, 1,800; carrots, 1,605; onions, 1,320; apples, 1,200. Russia is the world's largest producer of oats and the second largest producer of potatoes and sunflower seeds.

Livestock, 2000: cattle, 27·5m.; pigs, 18·3m; sheep, 14·0m.; poultry, 342m. Livestock products in 2000 (in tonnes): meat, 4·3m.; milk, 31·8m.; eggs, 1·9m.; cheese, 364,000.

Forestry. Russia has the largest area covered by forests of any country in the world, with 7,635,000 sq. km in 1995 (45·2% of the land area). In 1999 timber production was 111m. cu. metres, down from 228·52m. in 1992. In 1999 Russia was the world's largest exporter of roundwood with 27% of the world total.

Fisheries. Total catch in 1999 was 4,141,157 tonnes (up from 3,705,081 tonnes in 1994, but down from 8,211,516 tonnes in 1989). Approximately 93% of the fish caught are from marine waters.

The leading companies by market capitalization in Russia, excluding banking and finance, in Jan. 2002 were: NK Yukos OAO (438bn. roubles), an oil and gas company; Gazprom OAO (428bn. roubles), a gas company; and Surgutneftegas OAO (357bn. roubles), an oil and gas field construction company.

Output in 1994 (in tonnes) included: crude steel (1999), 51·5m.; cast iron, 36·5m.; rolled iron, 35·9m.; cement (1997), 26·7m.; cellulose (1995), 4·1m.; steel pipe, 3·6m.; paper and paperboard (1998), 3·3m.; confectionery, 1·5m.; sugar, 1·37m.; caustic soda, 1·1m.; soap, washing powder and detergents (1997), 435,000; synthetic fibre, 198,000; (in sq. metres) glass, 58·6m.; (in units) bricks, 14,700m.; tractors, 28,700; combine harvesters, 12,100; bulldozers, 2,200; tins of food, 2,817m.; personal computers, 82,100; watches, 25·9m.; televisions (1997), 327,000; refrigerators (1997), 1·11m.; motor vehicles (1997), 1,264,000; cigarettes (1997), 140·1bn.; mineral water (1997), 411m. litres; vodka and liquors (1995), 1,220m. litres; and beer (1997), 2,610m. litres. Total output in physical terms in 1994 was 79% of the 1993 total, and 51% of 1990.

Labour. In 1997 the subsistence minimum was estimated at 393,600 roubles; 22% of the population fell below it. In Jan. 1997 the official monthly minimum wage was 83,490 roubles; the average monthly wage was 870,000 roubles. The state Federal Employment Service was set up in 1992. Unemployment benefits are paid for 15 months: three months at full salary, three months at 75% and a final nine months at a progressively reducing rate. Annual paid leave is 24 working days. The workforce was 72·52m. in 1998, of which 16·76m. worked in services, 14·15m. in mining, manufacturing and public utilities, 8·90m. in trade, 8·28m. in agriculture, 5·41m. in construction, 5·04m. in transport and communications, and 2·57m., in

public administration and defence. Unemployment in June 2001 stood at 8%. In 1996, 4,007 man-days were lost through strikes. In 1996, 84·3m. people were of working age and 30·5m. people were above working age. Retirement age is 55 years for women, 60 for men.

Trade Unions. The Federation of Independent Trade Unions (founded 1990) is the successor to the former Communist official union organization. In 1993 it comprised 77 regional and 46 sectoral trade unions, with a total membership of 60m. There are also free trade unions.

INTERNATIONAL TRADE

Foreign debt was US$160,300m. in 2000, a figure exceeded only by Brazil. Most CIS republics have given up claims on Soviet assets in return for Russia assuming their portion of foreign debt. A Foreign Investment Agency was set up in Dec. 1992. In Jan. 1994 there were 6,359 joint enterprises in operation, employing 304,000 and accounting for 8% of foreign trade. Following an agreement to supply oil to the US West Coast in 2002, Russia is looking to secure American investment in its oil industry.

Imports and Exports. Trade in US$1m.:

	1996	*1997*	*1998*	*1999*	*2000*
Imports f.o.b.	68,093	71,982	58,014	39,537	44,862
Exports f.o.b.	90,564	89,008	74,883	75,666	105,565

In 2000 Germany accounted for 9·0% of exports, USA 7·7%, Italy 7·0%, Belarus 5·4% and China 5·1%. Germany provided 11·5% of imports in 2000, Belarus 11·1%, Ukraine 10·8%, the USA 8·0% and Kazakhstan 6·5%. In 1998, of exports, 36·4% by value were fuels and lubricants, 19·3% metals, and 9·2% machinery and transport equipment. Of imports, 23·9% by value was machinery and transport equipment, 17·5% foodstuffs and 10·3% chemical products.

COMMUNICATIONS

Roads. In 1997 there were 570,719 km of roads, of which 80% were hard surfaced; in 1995, 22,817m. passengers were carried by bus services, 8,547m. by trolley buses and 7,564m. by trams. 40% of villages cannot be reached by road. There were 17,631,600 passenger cars in 1997 (119·8 per 1,000 inhabitants) and 4,905,900 trucks and vans. There were 29,021 road deaths in 1998 (1,286 deaths per 1m. vehicles).

Rail. Length of railways in 1996 was 87,000 km of 1,520 mm gauge (of which 44% were electrified). Passenger-km travelled in 1996 came to 168·7bn. and freight tonne-km to 1,131·0bn. There are metro services in six cities. It is estimated that 10% of all railways are in some way defective.

Civil Aviation. The main international airports are at Moscow (Sheremetevo) and St Petersburg (Pulkovo). The national carrier is Aeroflot International Russian Airlines, which is 51% state- and 49% employee-owned. Pulkovo, Siberia, Trasaero and Vnukovo Airlines also operate internationally.

In 1999 Aeroflot carried 4,438,900 passengers (3,275,800 on international flights) and flew 164·2m. km; Pulkovo Airlines carried 1,337,800 passengers (464,900 on international flights) and flew 29·1m. km. Moscow Sheremetevo handled 10,764,000 passengers in 2000 (7,825,000 on international flights) and 102,100 tonnes of freight. Moscow Vnukovo is mainly used for internal flights and was the second busiest airport in 2000, handling 3,451,000 passengers (2,802,000 on domestic flights) and 44,000 tonnes of freight. St Petersburg was the third busiest in 2000 for passengers (2,568,304) and for freight (19,101 tonnes).

Shipping. In 1998 the merchant fleet comprised 4,723 vessels (including 340 tankers) totalling 11,090,000 GRT. In 1995, 236 vessels (24% of tonnage) were registered under foreign flags. In 1994, 155m. tonnes of freight (about two-thirds was building materials) and 40m. passengers were carried on the 94,000 km of inland waterways. Kaliningrad was opened to shipping in May 1991. In 1996, 14,120,000 tonnes of freight were loaded and 1,423,000 tonnes were unloaded at Russian docks.

Telecommunications. Russia had 32,070,000 main telephone lines in 2000, or 218·3 for every 1,000 persons, but 7·8m. people were on the waiting list for a line in 1998—the highest number anywhere in the world. There were 6·3m. PCs in use in 2000 (42·9 per 1,000 persons) and 106,000 fax machines in 1997. Russia had 18·0m. Internet users in Dec. 2001 and 16·6m. mobile phone subscribers in Dec. 2002.

Postal Services. In mid-1995 there were 51,800 post offices (35,400 in rural areas).

SOCIAL INSTITUTIONS

Justice. The Supreme Court is the highest judicial body on civil, criminal and administrative law. The Supreme Arbitration Court deals with economic cases. The KGB, and the Federal Security Bureau which succeeded it, were replaced in Dec. 1992 by the Federal Counter-Intelligence Service. The legal system is, however, crippled by incompetence and corruption.

A new civil code was introduced in 1993 to replace the former Soviet code. It guarantees the inviolability of private property and includes provisions for the freedom of movement of capital and goods.

12-member juries were introduced in a number of courts after Nov. 1993, but in the years that followed jury trials were not widely used. However, on 1 Jan. 2003 jury trials began to be phased in nationwide. A new criminal code came into force on 1 Jan. 1997, based on respect for the rights and freedoms of the individual and the sanctity of private property. A further new code that entered force on 1 July 2002 introduced new levels of protection for defendants and restrictions on law enforcement officials. The death penalty is retained for five crimes against the person. It is not applied to minors, women or men over 65.

In 1998 there were 33,553 murders, giving a rate of 22·9 per 100,000 population. In 1994, 924,600 sentences were passed, of which 36% involved imprisonment. In 1996 there were 140 executions (86 in 1995; 1 in 1992). President Yeltsin placed a moratorium on capital punishment in 1996 when Russia joined the Council of Europe, but parliament has refused to abolish the death penalty. Organized crime groups control up to 40,000 commercial organizations. In 1998 there were 1,007,000 prisoners, or 685 prisoners per 100,000 population, among the highest rates in the world.

Religion. The Russian Orthodox Church, represented by the Patriarchate of Moscow, had, in 1997, an estimated 24m. adherents. In 1996 there were over 14,000 parishes, 136 monasteries, and 26 secondary and higher educational institutions. There are still many Old Believers, whose schism from the Orthodox Church dates from the 17th century. The Russian Church is headed by the Patriarch of Moscow and All Russia (Metropolitan Aleksi II of St Petersburg and Novgorod, b. 1929; elected June 1990), assisted by the Holy Synod, which has seven members—the Patriarch himself and the Metropolitans of Krutitsy and Kolomna (Moscow), St Petersburg and Kiev *ex officio*, and three bishops alternating for six months in order of seniority from the three regions forming the Moscow Patriarchate. The Patriarchate of Moscow maintains jurisdiction over 119 eparchies, of which 59 are in Russia; there are parishes of Russian Orthodox abroad, in Belarus, Ukraine, Kazakhstan, Moldova, Uzbekistan, the Baltic states, and in Damascus, Geneva, Prague, New York and Japan. There is a spiritual mission in Jerusalem, and a monastery at Mt Athos in Greece. There are Jewish communities, primarily in Moscow and St Petersburg, that numbered 590,000 in 2001; there were also 10,980,000 Muslims and 1,320,000 Protestants. The *Grand Mufti* is Talgat Tadschuddin.

Education. Adult literacy rate in 1999 was 99·5% (male, 99·7%; female, 99·4%). In 1998 there were 23·97m. pupils in 72,169 primary and secondary day schools; 3·60m. students in 914 higher educational establishments (including correspondence students); and in 1995, 3·6m. students in 6,800 technical colleges of all kinds (including correspondence students); and 5·6m. children in 68,600 pre-school institutions. In 1994–95 there were 822 grammar schools and 505 *lycées* with a combined total of 1m. students. In addition there were 447 private schools with 40,000 pupils.

In 1957 a Siberian branch of the Academy of Sciences was organized. Pre-dating the foundation of a Russian Academy of Sciences, St Petersburg and Urals branches

were founded in 1990 and 1991 respectively. The Soviet became the Russian Academy of Sciences in Dec. 1991. There were 3,968 scientific institutes, of which 2,166 are independent research institutes.

In 1995 total expenditure on education came to 3·5% of GNP.

A survey for the 1999 *World Competitiveness Yearbook* showed that well-educated people in Russia are the most likely of any country in the world to emigrate—87 out of every 100 well-educated Russians go abroad to live and work.

Health. Doctors in 1998 numbered 682,000, and hospital beds 1·73m. In 1995 the doctor/inhabitant ratio was 1:235 and in 1994 hospital bed provision was 119 for every 10,000 persons. There were 12,300 hospitals. At the end of 1999 there were 130,000 people living with HIV/AIDS. In 1999 and 2000 Russia experienced the highest rate of growth of HIV cases in the world. In 1998, 48% of Russians aged 15 and over smoked—the highest percentage of any country. An estimated 280,000 people died in 1995 from tobacco use. This represented 18% of all deaths.

Welfare. Vouchers are issued to cover basic health care and pensions contributions. These may be topped up to buy better services. A transition from state-financed to insurance-based health care is taking place.

There were 37·1m. pensioners in 1996. A lump sum of 2,700 roubles was payable in 1992 to parents on the birth of a child. From Dec. 1996 the minimum pension was 75,900 roubles a month. The average monthly pension in June 1995 was 201,874 roubles.

Personal pensions conferred by the former Communist regime conferring special benefits on party or state personnel or awarded for services rendered were abolished in 1992.

Over 80m. Russians live in areas where concentrations of air pollutants are well in excess of permissible levels. 30–40% of children's diseases are caused by air pollution; respiratory diseases such as asthma have increased sixfold since the early 1990s.

CULTURE

Broadcasting. In 1997 there were 57·3m. television receivers. Television broadcasting is still largely state-controlled. In Nov. 2001 a court ordered that the parent company of TV6, the last independent station, be liquidated. It was closed down in Jan. 2002. There are two major channels, ORT (Russian Public Television) and RTR (Russian Television). Colour is by SECAM H. In 1994, 98·8% of the population could receive TV broadcasts. There are also local city channels. Access to cable TV varies with locality; satellite TV reached about 5% of the population in 1993. As well as state radio, 24% of the population in 1995 could receive commercial broadcasts. In 1997 there were 61·5m. radio receivers.

Cinema. There were 2,016 cinemas in 1995; attendances in the year totalled 140·1m. 46 long films were made.

Press. In 1996 there were 285 daily newspapers with a combined circulation of 15,517,000 (105 per 1,000 population). In the same year there were 4,596 non-daily newspapers with a combined circulation of 98,558,000 (665 per 1,000 population). A presidential decree of 22 Dec. 1993 brought the press agencies ITAR-TASS and RIA-Novosti under state control. In 1996, 30,200 titles (books and brochures) were published. Russia's media is becoming relatively independent, but press freedom has suffered setbacks since Vladimir Putin became president.

Tourism. There were 18,496,000 foreign visitors in 1999 bringing in revenue of US$7·77bn.

Libraries. In 1995 there were two National Libraries and 96,177 public libraries, which held 983,356,000 volumes for 54,201,300 registered users.

Theatre and Opera. In 1995 there were 470,000 theatres.

Museums and Galleries. Russia had 1,725 museums in 1995.

THE REPUBLICS

Status

The 21 republics that with Russia itself constitute the Russian Federation were part of the RSFSR in the Soviet period. On 31 March 1992 the federal government concluded treaties with the then 20 republics, except Checheno-Ingushetia and Tatarstan, defining their mutual responsibilities. The *Council of the Heads of the Republics* is chaired by the Russian President and includes the Russian Prime Minister. Its function is to provide an interaction between the federal government and the republican authorities.

President: Hazret Sovmen.

Chief industries are timber, woodworking, food processing and there is some engineering and gas production. Agriculture consists primarily of crops (beets, wheat, maize), on partly irrigated land. Industrial output was valued in 1993 at 112,000m. roubles, agricultural output at 68,000m. roubles.

In 1994–95 there were 174 schools with 67,000 pupils, 3 technical colleges with 5,200 students and 2 higher educational institutions with 6,200 students.

In 1995 the rates of doctors and hospital beds per 10,000 population were 32·7 and 113 respectively.

ALTAI

Part of Altai Territory. Area, 92,600 sq. km (35,740 sq. miles); population (1996), 202,000. Capital, Gorno-Altaisk (1996 population, 48,300). Established 1 June 1922 as Oirot Autonomous Region; renamed 7 Jan. 1948; granted republican status in 1991 and renamed in 1992.

BASHKORTOSTAN

Area 143,600 sq. km (55,430 sq. miles), population (1998), 4,096,000. Capital, Ufa (1996 population, 1,096,400). Bashkiria was annexed to Russia in 1557. It was constituted as an Autonomous Soviet Republic on 23 March 1919. A declaration of republican sovereignty was adopted in 1990, and a declaration of independence on 28 March 1992. A treaty of Aug. 1994 with Russia preserves the common legislative

framework of the Russian Federation while defining mutual areas of competence. The population, census 1989, was 39·3% Russian, 28·4% Tatar, 21·9% Bashkir, 3·0% Chuvash and 2·7% Mari.

President: Murtaza Gubaidullovich Rakhimov. *Prime Minister:* Rafael Baidavletov.

Industrial production was valued at 4,188,000m. roubles in 1993, agricultural output at 617,000m. roubles. The most important industries are oil and oil products; there are also engineering, glass and building materials enterprises. Agriculture specializes in wheat, barley, oats and livestock.

In 1994–95 there were 658,000 pupils in 3,317 schools. There is a state university and a branch of the Academy of Sciences with eight learned institutions (511 research workers). There were 59,800 students in 75 technical colleges and 49,800 in 11 higher educational establishments.

Capital, Ulan-Ude (1996 population, 368,100). The population (1989 census) was 69·9% Russian, 24·0% Buryat, 2·2% Ukrainian, 1·0% Tatar and 0·5% Belorussian.

There is a 65-member parliament, the *People's Hural.*

In 1994–95 there were 615 schools with 196,000 pupils, 20 technical colleges with 13,400 students and four higher educational institutions with 19,300 students. A branch of the Siberian Department of the Academy of Sciences had four institutions with 281 research workers.

In 1995 the rates of doctors and hospital beds per 10,000 population were 37·4 and 114 respectively.

CHECHNYA

The area of the former Checheno-Ingush Republic was 19,300 sq. km (7,350 sq. miles); population (1997), around 500,000. Capital, Dzhohar (since March 1998; previously known as Grozny). The Chechens and Ingushes were conquered by Russia in the late 1850s. In 1918 each nationality separately established its 'National Soviet' within the Terek Autonomous Republic, and in 1920 (after the Civil War) were constituted areas within the Mountain Republic. The Chechens separated out as an Autonomous Region on 30 Nov. 1922 and the Ingushes on 7 July 1924. In Jan. 1934 the two regions were united, and on 5 Dec. 1936 constituted as an Autonomous Republic. This was dissolved in 1944 and the population was deported en masse, allegedly for collaboration with the German occupation forces. It was reconstituted on 9 Jan. 1957: 232,000 Chechens and Ingushes returned to their homes in the next two years. The population (1989

census) included 70·7% Chechens and Ingushes, 23·1% Russians, 1·2% Armenians and 1% Ukrainians.

In 1991 rebel leader Jokhar Dudayev seized control of Chechnya and called elections for Oct. 1991, which he won. In Nov. 1991 he declared an independent Chechen Republic. (A separate Ingush Republic was declared in June 1993).

In April 1993 President Dudaev dissolved parliament. Hostilities continued throughout 1994 between the government and forces loosely grouped under the 'Provisional Chechen Council'. The Russian government, which had never recognized the Chechen declaration of independence of Nov. 1991, moved troops and armour into Chechnya on 11 Dec. 1994 'to re-establish constitutional order'. Grozny was bombed and attacked by Russian ground forces at the end of Dec. 1994 and the presidential palace was captured on 19 Jan. 1995, but fighting continued. On 30 July 1995 the Russian and Chechen authorities signed a ceasefire. On 8 Dec. 1995 an agreement between the Russian and Chechen prime ministers amnestied insurgents who laid down their arms. However, hostilities, raids and hostage-taking continued. The Chechen President was killed during fighting in April 1996. A further ceasefire was concluded on 30 Aug. 1996. On 23 Nov. 1996 the Russian President decreed the withdrawal of all Russian troops by the end of 1996. Fighting broke out again, however, in Sept. 1999 as Russian forces launched attacks on what it described as 'rebel bases'. The Russian defence ministry said that the attacks would continue until all Islamic militants in the breakaway republic were 'wiped out'. In the months that followed fighting intensified, with civilian casualties through bombing raids. More than 200,000 civilians were forced to flee their homes, most of them heading for neighbouring Ingushetia. After Russia seized Gudermes, the second largest town, in Nov. 1999 the Kremlin announced that it would henceforth be the new capital. By Feb. 2000 much of Grozny had been reduced to a heap of rubble. Wary of a possible counterstrike by rebels, the Russians closed the city. In June 2000 Vladimir Putin declared direct rule, postponing elections indefinitely. In April 2001 Grozny was restored as the capital. The war continues, with estimates of the number of deaths varying from 6,500 to 15,000. Over 4,000 Russian soldiers have been killed. However, in Oct. 2001 the Russian envoy to Chechnya, Viktor Kazantsev, announced that talks to end the war would begin imminently, and on 18 Nov. 2001 the first official meeting between negotiators for the Russian government and Chechen separatists took place. In Oct. 2002 a group of Chechen rebels took control of a Moscow theatre and held hostage 800 people for three days, before Russian troops stormed the building. An anaesthetic gas, used to combat the rebels, also killed many of the hostages. The rebels had been demanding that Russia end the war in Chechnya. On 23 March 2003 a referendum was held on a new constitution that would keep Chechnya within Russia but give it greater autonomy, and provide a new president and parliament for the republic. Although 96% of votes cast were in favour of the new constitution there was criticism of the conduct of the referendum, with human rights organizations questioning the legitimacy of holding a vote in conditions of war.

Presidential and a first round of parliamentary elections were held on 27 Jan. 1997. The electorate was 513,000. There were 14 presidential candidates. There were some 150 foreign observers, including 72 from OSCE. The second round of parliamentary elections was declared invalid because turn-out failed to reach the necessary 50%. A third round was held in May 1997.

President: Aslan Maskhadov. *Prime Minister:* Anatoly Popov.

Ingush desire to separate from Chechnya led to fighting along the Chechen-Ingush border and a deployment of Russian troops. An agreement to withdraw was reached between Russia and Chechnya on 15 Nov. 1992. The separation of Chechnya and Ingushetia was formalized by an amendment of Dec. 1992 to the Russian Constitution.

In 1992 it was decided to revert to the Roman alphabet (which had replaced Arabic script in 1927 and been itself replaced by Cyrillic in 1938).

Checheno-Ingushetia had a major oilfield, and a number of engineering works, chemical factories, building materials works and food canneries. There was a timber, woodworking and furniture industry. Industrial output in the two republics was valued at 213,000m. roubles in 1993, agricultural output at 79,000m. roubles.

There were, in the Chechen and Ingush republics in 1993–94, 548 schools with 251,000 pupils, 12 technical colleges with 8,700 students and three places of higher education with 13,100 students.

In 1995 the rates of doctors and hospital beds in the Chechen and Ingush republics per 10,000 population were 21·1 and 91 respectively.

DAGESTAN

Area, 50,300 sq. km (19,416 sq. miles); population (1998), 2,060,000. Capital, Makhachkala (1995 population, 340,200). Over 30 nationalities inhabit this republic apart from Russians (9·2% at 1989 census); the most numerous are Dagestani nationalities (80·2%), Azerbaijanis (4·2%), Chechens (3·2%) and Jews (0·5%). Annexed from Persia in 1723, Dagestan was constituted an Autonomous Republic on 20 Jan. 1921. In 1991 the Supreme Soviet declared the area of republican, rather than autonomous republican, status. Many of the nationalities who live in Dagestan have organized armed militias, and in May 1998 rebels stormed the government building in Makhachkala. In Aug. 1999 Dagestan faced attacks from Islamic militants who invaded from Chechnya. Although Russian troops tried to restore order and discipline, the guerrilla campaign continued.

Chairman of the State Council, Head of the Republic: Magomedali Magomedovich Magomedov. *Prime Minister:* Khizri Shikhsaidov.

There are engineering, oil, chemical, woodworking, textile, food and other light industries. Agriculture is varied, ranging from wheat to grapes, with sheep farming and cattle breeding. Industrial output was valued at 136,000m. roubles in 1993, agricultural output at 155,000m. roubles.

In 1995 the rates of doctors and hospital beds per 10,000 population were 36·5 and 88 respectively.

INGUSHETIA

The history of Ingushetia is interwoven with that of Chechnya (*see above*). Ingush desire to separate from Chechnya led to fighting along the Chechen-Ingush border and a deployment of Russian troops. The separation of Ingushetia from Chechnya was formalized by an amendment of Dec. 1992 to the Russian Constitution. On 15 May 1993 an extraordinary congress of the peoples of Ingushetia adopted a declaration of state sovereignty within the Russian Federation. Skirmishes between Ingush refugees and local police broke out in Aug. 1999 and tensions remained high with the danger of further outbreaks of fighting. The Russian attacks on neighbouring Chechnya in Sept. 1999 led to thousands of Chechen refugees fleeing to Ingushetia.

The capital is Magas (since 1999; formerly Nazran).

Area, 3,600 sq. km (1,390 sq. miles) (to be confirmed); estimated population, 1997, 301,900.

There is a 27-member parliament. On 27 Feb. 1994 presidential elections and a constitutional referendum were held. Turn-out was 70%. At the referendum 97% of votes cast approved a new constitution stating that Ingushetia is a democratic law-based secular republic forming part of the Russian Federation on a treaty basis.

President: Murat Zyazikov. *Prime Minister:* Viktor Aleksentsev.

A special economic zone for Russian residents was set up in 1994, and an ‘offshore’ banking tax haven in 1996.

In 1995 the rates of doctors and hospital beds per 10,000 population were 19·6 and 59 respectively.

KABARDINO-BALKARIA

Area, 12,500 sq. km (4,825 sq. miles); population (1997), 800,000. Capital, Nalchik (1996 population, 237,100). Kabarda was annexed to Russia in 1557. The republic was constituted on 5 Dec. 1936. Population (1989 census) included Kabardinians (48·2%), Balkars (9·4%), Russians (31·9%), Ukrainians (1·7%), Ossetians (1·3%) and Germans (1·1%).

A treaty with Russia of 1 July 1994 defines their mutual areas of competence within the legislative framework of the Russian Federation.

President: Valeri Kokov.

Main industries are ore-mining, timber, engineering, coal, food processing, timber and light industries, building materials. Grain, livestock breeding, dairy farming and wine-growing are the principal branches of agriculture. Industrial output was valued at 176,000m. roubles in 1993, agricultural output at 113,000m. roubles.

In 1994–95 there were 252 schools with 139,000 pupils, 6,900 students in 8 technical colleges and 12,900 students at 3 higher educational establishments.

In 1995 the rates of doctors and hospital beds per 10,000 population were 44·8 and 120 respectively.

KALMYKIA

Area, 76,100 sq. km (29,382 sq. miles); population (1997), 320,000. Capital, Elista (1996 population, 96,200). The population (1989 census) was 45·4% Kalmyk, 37·7% Russian, 2·6% Chechen, 1·9% Kazakh and 1·7% German.

The Kalmyks migrated from western China to Russia (Nogai Steppe) in the early 17th century. The territory was constituted an Autonomous Region on 4 Nov. 1920, and an Autonomous Republic on 22 Oct. 1935; this was dissolved in 1943. On 9 Jan. 1957 it was reconstituted as an Autonomous Region and on 29 July

1958 as an Autonomous Republic once more. In Oct. 1990 the republic was renamed the Kalmyk Soviet Socialist Republic; it was given its present name in Feb. 1992.

President: Kirsan Nikolaevich Ilyumzhinov.

In April 1993 the Supreme Soviet was dissolved and replaced by a professional parliament consisting of 25 of the former deputies. On 5 April 1994 a specially-constituted 300-member constituent assembly adopted a 'Steppe Code' as Kalmykia's basic law. This is not a constitution and renounces the declaration of republican sovereignty of 18 Oct. 1990. It provides for a *President* elected for five-year terms with the power to dissolve parliament, and a 27-member parliament, the *People's Hural*, elected every four years. It stipulates that Kalmykia is an equal member and integral part of the Russian Federation, functioning in accordance with the Russian constitution.

Main industries are fishing, canning and building materials. Cattle breeding and irrigated farming (mainly fodder crops) are the principal branches of agriculture. Industrial output was valued at 35,600m. roubles in 1993, agricultural output at 89,000m. roubles.

In 1994–95 there were 59,000 pupils in 252 schools, 4,200 students in 6 technical colleges and 5,100 in higher education.

In 1995 the rates of doctors and hospital beds per 10,000 population were 48·8 and 151 respectively.

KARACHAI-CHERKESSIA

Area, 14,300 sq. km (5,521 sq. miles); population (1997), 440,000. Capital, Cherkessk (1996 population, 119,900). A Karachai Autonomous Region was established on 26 April 1926 (out of a previously united Karachaevo-Cherkess Autonomous Region created in 1922), and dissolved in 1943. A Cherkess Autonomous Region was established on 30 April 1928. The present Autonomous Region was re-established on 9 Jan. 1957. The Region declared itself a Soviet Socialist Republic in Dec. 1990. Tension between the two ethnic groups increased after the first free presidential election in April 1999 was won by Vladimir Semyonov, an ethnic Karchayev. Despite numerous allegations of fraud the result was upheld by the Supreme Court. There were subsequently fears that the ethnic Cherkess opposition would attempt to set up breakaway government bodies.

President: Vladimir Semyonov.

There are ore-mining, engineering, chemical and woodworking industries. The Kuban-Kalaussi irrigation scheme irrigates 200,000 ha. Livestock breeding and grain growing predominate in agriculture. Industrial output was valued at 114,000m. roubles in 1993, agricultural output at 92,000m. roubles.

In 1994–95 there were 74,000 pupils in 188 secondary schools, 6 technical colleges with 4,800 students and two institutes with 6,200 students.

In 1995 the rates of doctors and hospital beds per 10,000 population were 29 and 102 respectively.

KARELIA

The Karelian Republic, capital Petrozavodsk (1996 population, 282,200), covers an area of 172,400 sq. km, with a population of 800,000 (1997). Karelians represent 10% of the population, Russians 73·6%, Belorussians 7% and Ukrainians 3·6% (1989 census).

Karelia (formerly Olonets Province) became part of the RSFSR after 1917. In June 1920 a Karelian Labour Commune was formed and in July 1923 this was transformed into the Karelian Autonomous Soviet Socialist Republic (one of the

autonomous republics of the RSFSR). On 31 March 1940, after the Soviet-Finnish war, practically all the territory (with the exception of a small section in the neighbourhood of the Leningrad area) which had been ceded by Finland to the USSR was added to Karelia, and the Karelian Autonomous Republic was transformed into the Karelo-Finnish Soviet Socialist Republic as the 12th republic of the USSR. In 1946, however, the southern part of the republic, including its whole seaboard and the towns of Viipuri (Vyborg) and Keksholm, was attached to the RSFSR, reverting in 1956 to autonomous republican status within the RSFSR. In Nov. 1991 it declared itself the 'Republic of Karelia'.

Head of the Republic: Sergei Leonidovich Katanandov.

KEY HISTORICAL EVENTS

In 1959 an uprising of the Hutu destroyed the Tutsi feudal hierarchy and overthrew the monarchy. Elections and a referendum under the auspices of the UN in Sept. 1961 resulted in an overwhelming majority for the republican party. The republic proclaimed by the Parmehutu on 28 Jan. 1961 was recognized by the Belgian administration in Oct. 1961. The Republic of Rwanda became independent on 1 July 1962.

Conflict between the Hutu and Tutsi was renewed with much bloodshed in 1972–73. A coup on 5 July 1973 led to a military government. There was gradual return to civilian rule and in 1978 a new constitution was accepted by a national referendum. In Oct. 1990 rebel Tutsi forces of the Rwandan Patriotic Front (RPF) invaded from Uganda. A peace agreement was signed on 4 Aug. 1993 at Arusha (Tanzania). On 5 Oct. the UN Security Council decided to send a peacekeeping force but rebel Tutsi forces of the RPF began an attack from the north of the country. Most UN forces were withdrawn during the fighting and massacres of April 1994 but following a UN Security Council resolution of 17 May 1994 a new force of 5,500 was sent in. On 22 June 1994 the UN Security Council approved France's dispatch of 2,000 troops on a humanitarian mission. The French forces maintained a 'safe zone' for refugees in the southwest of Rwanda until their withdrawal on 21 Aug. 1994. It is estimated that more than 1m. Rwandans were killed in 1994 through genocide and the civil war, and that more than 2m. were forced to flee to neighbouring countries. UN forces left Rwanda on 8 March 1996, and although progress has been made since then, the civil strife between the two factions continues, particularly in the northwest of the country. In Sept. 1998 Jean Kambanda, the former Prime Minister, was sentenced to life imprisonment for his part in the 1994 genocide.

TERRITORY AND POPULATION

Rwanda is bounded south by Burundi, west by the Democratic Republic of the Congo, north by Uganda and east by Tanzania. A mountainous state of 26,338 sq. km (10,169 sq. miles), its western third drains to Lake Kivu on the border with the Democratic Republic of the Congo and thence to the Congo river, while the rest is drained by the Kagera river into the Nile system.

The population was 7,164,994 at the 1991 census, of whom over 90% were Hutu, 9% Tutsi and 1% Twa (pygmy). Estimate (1996) 5,100,000; density, 193·6 per sq. km.

The UN gives a projected population for 2010 of 9·43m.

In 1998 the percentage of the population considered as urban was the lowest of any country in the world, at 6·1% (93·9% rural).

The areas and populations of the ten prefectures are:

The Arusha Agreement of Aug. 1994 provided for a transitional 70-member National Assembly, which began functioning in Nov. 1994. The seats won by the MRNDD (formerly MRND) were taken over by other parties on the grounds that the MRNDD was culpable of genocide.

KEY HISTORICAL EVENTS

The islands of St Kitts (formerly St Christopher) and Nevis were discovered and named by Columbus in 1493. They were settled by Britain in 1623 and 1628 respectively, but ownership was disputed with France until 1783. In Feb. 1967 the colonial status was replaced by an 'association' with Britain, giving the islands full internal self-government. St Kitts and Nevis became fully independent on 19 Sept. 1983. In Oct. 1997 the five-person Nevis legislature voted to end the federation with St Kitts. However, in a referendum held on 10 Aug. 1998 voters rejected independence, only 62% voting for secession when a two-thirds vote in favour was needed. In Sept. 1998 Hurricane Georges caused devastation, leaving 25,000 people homeless, with some 80% of the houses in the islands damaged.

TERRITORY AND POPULATION

The two islands of St Kitts and Nevis are situated at the northern end of the Leeward Islands in the eastern Caribbean. Nevis lies 3 km to the southeast of St Kitts. Population, census (1991) 40,618. Estimate, 1997, 44,000 (9,000 on Nevis). In 1998, 66·0% of the population were rural.

KEY HISTORICAL EVENTS

St Vincent was discovered by Columbus on 22 Jan. (St Vincent's Day) 1498. British and French settlers occupied parts of the islands after 1627. In 1773 the Caribs recognized British sovereignty and agreed to a division of territory between themselves and the British. Resentful of British rule, the Caribs rebelled in 1795, aided by the French, but the revolt was subdued within a year. On 27 Oct. 1969 St Vincent became an Associated State with the UK responsible only for foreign policy and defence, while the islands were given full internal self-government. On 27 Oct. 1979 the colony gained full independence as St Vincent and the Grenadines.

SAMOA

O le Malo Tutoatasi o Samoa
(Independent State of Samoa)

Capital: Apia
Population estimate, 2000: 159,000
GDP per capita, 2000: (PPP$) 5,041
HDI/world rank: 0·715/101

KEY HISTORICAL EVENTS

Polynesians settled in the Samoan group of islands in the southern Pacific from about 1000 BC. Although probably sighted by the Dutch in 1722, the first European visitor was French in 1768. Treaties were signed between the Chiefs and European nations in 1838–39. Continuing strife among the chiefs was compounded by British, German and US rivalry for influence. In the Treaty of Berlin 1889 the three powers agreed to Western Samoa's independence and neutrality. When unrest continued, the treaty was annulled and Western Samoa became a German protectorate until in 1914 it was occupied by a New Zealand expeditionary force. The island was administered by New Zealand from 1920 to 1961. On 1 Jan. 1962 Western Samoa became an independent sovereign state. In July 1997 the country renamed itself the Independent State of Samoa.

TERRITORY AND POPULATION

Samoa lies between 13° and 15° S. lat. and 171° and 173° W. long. It comprises the two large islands of Savai'i and Upolu, the small islands of Manono and Apolima, and several uninhabited islets lying off the coast. The total land area is 1,093 sq. miles (2,830·8 sq. km), of which 659·4 sq. miles (1,707·8 sq. km) are in Savai'i, and 431·5 sq. miles (1,117·6 sq. km) in Upolu; other islands, 2·1 sq. miles (5·4 sq. km). The islands are of volcanic origin, and the coasts are surrounded by coral reefs. Rugged mountain ranges form the core of both main islands. The large area laid waste by lava-flows in Savai'i is a primary cause of that island supporting less than one-third of the population of the islands despite its greater size than Upolu.

Population at the 1991 census, 161,298. The population at the 1991 census was 116,248 in Upolu (including Manono and Apolima) and 45,040 in Savai'i. The capital and chief port is Apia in Upolu (population 38,000 in 1999). In 1999, 78·5% of the population lived in rural areas.

SAN MARINO

Repubblica di San Marino

Capital: San Marino
Population estimate, 2000: 27,000
GDP per capita: not available

KEY HISTORICAL EVENTS

San Marino is a small republic situated on the Adriatic side of central Italy. According to tradition, St Marinus and a group of Christians settled there to escape persecution. By the 12th century San Marino had developed into a commune ruled by its own statutes and consul. Unsuccessful attempts were made to annex the republic to the papal states in the 18th century and when Napoleon invaded Italy in 1797 he respected the rights of the republic and even offered to extend its territories. In 1815 the Congress of Vienna recognized the independence of the republic. On 22 March 1862 San Marino concluded a treaty of friendship and co-operation, including a *de facto* customs union, with the Kingdom of Italy, thus preserving its independence although completely surrounded by Italian territory.

KEY HISTORICAL EVENTS

The islands of São Tomé and Príncipe off the west coast of Africa were colonized by Portugal in the fifteenth century. There may have been a few African inhabitants or visitors earlier but most of the population arrived during the centuries when the islands served as an important slave-trading depot for South America. In the 19th century the islands became the first parts of Africa to grow cocoa. Although in 1876 Portugal abolished slavery in name, in practice it continued thereafter with many Angolans, Mozambicans and Cape Verdians being transported to work on the cocoa plantations. Because the slave-descended population was cut off from African culture, São Tomé had a higher proportion than other Portuguese colonies of *assimilados* (Africans acquiring full Portuguese culture and certain rights). São Tomé saw serious riots against Portuguese rule in 1953. From 1960 a Movement for the Liberation of São Tomé e Príncipe operated from neighbouring African territories. In 1970 Portugal formed a 16-member legislative council and a provincial consultative council. Following the Portuguese revolution of 1974 a transitional government was formed. Independence came on 12 July 1975. Independent São Tomé e Príncipe officially proclaimed Marxist-Leninist policies but maintained a non-aligned foreign policy and has received aid from Portugal.

TERRITORY AND POPULATION

The republic, which lies about 200 km off the west coast of Gabon, in the Gulf of Guinea, comprises the main islands of São Tomé (845 sq. km) and Príncipe and several smaller islets including Pedras Tinhosas and Rolas. Areas and populations of the two provinces:

Province	*Sq. km*	*Census 1991*	*Estimate 1995*	*Chief town*	*Census 1991*

universal suffrage for one or two (only) five-year terms. He or she is also head of government and appoints a Council of Ministers. The 55-member *National Assembly* is elected for four years.

KEY HISTORICAL EVENTS

The Kingdom of Saudi Arabia is a union of two regions, Nejd and Hejaz. In the 18th century, Nejd was an autonomous region governed from Diriya, the stronghold of the Wahhabis, a puritanical Islamic sect. It subsequently fell under Turkish rule but in 1913 Abdulaziz Ibn Abdul Rahman Al-Saud defeated the Turks and also captured the Turkish province of al Hasa. In 1920 he captured the Asir and in 1921 he added the Jebel Shammar territory of the Rashid family. In 1925 he completed the conquest of the Hejaz. Great Britain recognized Abdulaziz as an independent ruler by the Treaty of Jeddah on 20 May 1927. The name was changed to the Kingdom of Saudi Arabia in Sept. 1932. Although commencing before the Second World War, oil exploitation developed strongly with the support of the USA after 1945.

TERRITORY AND POPULATION

Saudi Arabia, which occupies nearly 80% of the Arabian peninsula, is bounded in the west by the Red Sea, east by the Arabian/Persian Gulf and the United Arab Emirates, north by Jordan, Iraq and Kuwait and south by Yemen and Oman. The Neutral Zone (3,560 sq. miles, 5,700 sq. km), jointly owned and administered by Kuwait and Saudi Arabia from 1922 to 1966, was partitioned between the two countries in 1966, but the exploitation of the oil and other natural resources continues to be shared.

Performance. Real GDP growth was 1·2% in 2001. Total GDP in 2000 was US$173·3bn. The current account surplus stood at US$254m. in 1997.

Banking and Finance. The Saudi Arabian Monetary Agency (*Governor*, Hamad Saud Al-Sayari, appointed 1983), established in 1953, functions as the central bank and the government's fiscal agent. There were ten commercial banks with 1,196 branches in 1999. The leading banks are National Commercial Bank (assets in 1999 of US$22,895m.), Saudi-American (US$20,520m.) and Riyad Bank (US$17,167m.). Sharia (the religious law of Islam) forbids the charging of interest; Islamic banking is based on sharing clients' profits and losses and imposing service charges. In 1999 total assets of commercial banks were 415,227m. rials.

A number of industry sectors are closed to foreign investors, including petroleum exploration, defence-related activities and financial services.

There is a stock exchange.

Calendar. Saudi Arabia follows the Islamic *hegira* (AD 622, when Mohammed left Mecca for Medina), which is based upon the lunar year of 354 days. The Islamic year 1424 corresponds to 5 March 2003–21 Feb. 2004, and is the current lunar year.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* Saudi Arabia's carbon dioxide emissions in 1998 were the equivalent of 14·4 tonnes per capita. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002

ranked Saudi Arabia 138th in the world out of the 142 countries analysed, with 34·2%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

Electricity. By 1995 over 100 electricity producers had been amalgamated into four companies. Installed capacity was 20·2m. kW in 1999. All electricity is thermally generated. Production was 105·6bn. kWh in 1999; consumption per capita was 4,692 kWh in 1998.

Oil and Gas. Proven oil reserves (2001) 261·8bn. bbls. (the highest of any country and around 25% of world resources). Oil production began in 1938 by Aramco, which is now 100% state-owned and accounts for about 99% of total crude oil production. Saudi crude output in 1999 totalled 426m. tonnes and accounted for 12·4% of the world total oil output.

Production comes from 14 major oilfields, mostly in the Eastern Province and offshore, and including production from the Neutral Zone. The Ghawar oilfield, located between Riyadh and the Persian gulf, is the largest in the world, with estimated reserves of 70bn. bbls.

Saudi Arabia is dependent on oil earnings for over 70% of budget revenues. In 1998 oil export revenues were US$33bn., rising to US$41bn. in 1999 and US$70bn. in 2000, before falling to US$56bn. in 2001. Oil reserves are expected to run out in approximately 2085.

In 2000 natural gas reserves were 5,800bn. cu. metres; output in 1999 was 46·2bn. cu. metres. The gas sector has been opened up to foreign investment.

Water. Efforts are under way to provide adequate supplies of water for urban, industrial, rural and agricultural use. Most investment has gone into sea-water desalination. In 1996, 33 plants produced 1·9m. cu. metres a day, meeting 70% of drinking water needs. Total annual consumption was 18,200m. cu. metres in 1995. Irrigation for agriculture consumes the largest amount, from fossil reserves (the country's principal water source), and from surface water collected during seasonal floods. In 1996 there were 183 dams with a holding capacity of 450m. cu. metres. Treated urban waste water is an increasing resource for domestic purposes; in 1996 there were two recycling plants in operation.

Minerals. Production began in 1988 at Mahd Al-Dahab gold mine, the largest in the country, which produces 170,000 oz of gold a year. In 1997 production totalled 7,530 kg. Deposits of iron, phosphate, bauxite, uranium, silver, tin, tungsten, nickel, chrome, zinc, lead, potassium ore and copper have also been found.

Agriculture. Since 1970 the government has spent substantially on desert reclamation, irrigation schemes, drainage and control of surface water and of moving sands. Undeveloped land has been distributed to farmers and there are research and extension programmes. Large scale private investment has concentrated on wheat, poultry and dairy production.

In 1998 there were 3·7m. ha of arable land and 130,000 ha of permanent cropland. In 1995, 13·9% of the economically active population were engaged in agriculture.

About 200,000 tonnes of barley are produced annually as animal fodder. Production of other crops, 2000 (in 1,000 tonnes): wheat, 2,046; dates, 712; melons and watermelons, 426; potatoes, 394; tomatoes, 277; sorghum, 204; cucumbers and gherkins, 125; grapes, 116; onions, 95.

Forestry. The area under forests was 222,000 ha (0·1% of the land area) in 1995.

Fisheries. In 1999 the total catch was 46,897 tonnes, entirely from sea fishing.

INDUSTRY

According to the Financial Times Survey (FT 500), the largest companies in Saudi Arabia by market capitalization on 28 March 2002 were SABIC (Saudi Basic Industries), at US$12,139·4m., and the Saudi American Bank (US$10,132·8m.).

The government encourages the establishment of manufacturing industries. Its policy focuses on establishing industries that use petroleum products,

petrochemicals and minerals. Petrochemical and oil-based industries have been concentrated at eight new industrial cities, with the two principal cities at Jubail and Yanbu. In 1996 there were 15 major plants and other industrial facilities, a dedicated desalination plant, a vocational training institute and a college at Jubail, and three major refineries, a petrochemical complex and many manufacturing and support enterprises at Yanbu. Products include chemical, plastics, industrial gases, steel and other metals. In 1995 there were 2,234 factories employing 196,000 workers.

Labour. The labour force in 1997 totalled 6,187,000. In 1999 females constituted 15% of the labour force—only the United Arab Emirates had a lower percentage of females in its workforce. In 1995, 32·3% of the economically active population were engaged in community and personal services, 15·5% in construction and 15·1% in trade. Less than 1% worked in the oil sector. There are 6m. foreign workers, including over 1m. Egyptians and over 1m. Indians. Unemployment, which was less than 8% in 1999, reached 12% in 2002.

INTERNATIONAL TRADE

Other specialized courts or committees include one dealing exclusively with labour and employment matters; the Negotiable Instruments Committee, which deals with cases relating to cheques, bills of exchange and promissory notes; and the Board of Grievances, whose preserve is disputes with the government or its agencies and which also has jurisdiction in trademark-infringement cases and is the authority for enforcing foreign court judgements.

KEY HISTORICAL EVENTS

While in the mid-1400s the Portuguese were the first Europeans to reach the area around the Senegal river estuary, in succeeding centuries the French became the dominant Europeans on the coast in that area, except for The Gambia, where the British were installed. The French founded Saint-Louis in 1659 and also occupied the island of Goree, an important slave-trading depot. In the 19th century French rule, interrupted earlier by occasional British occupation, was confirmed over Saint-Louis and Goree. Free Africans received the vote in 1833 and the franchise was further extended in 1848 when slavery was abolished in all French colonies. The Africans in Saint-Louis and Goree, and also in Dakar and Rufisque, were called the *originaires* and had the rights of French citizens. They elected a deputy to the French national Assembly and voted for local *communes*.

From the late 1870s France began a sustained push up the river and into the interior. Here, groundnuts were already being grown for export to France but African monarchs still ruled and there was strong resistance. French rule was established by the mid-1890s, while the British consolidated their rule inland in The Gambia. On 4 April 1959 Senegal joined with French Sudan to form the Federation of Mali, which achieved independence on 20 June 1960. On 22 Aug. Senegal withdrew from the Federation and became a separate independent republic. Senegal was a one-Party state from 1966 until 1974, when a pluralist system was re-established.

TERRITORY AND POPULATION

Senegal is bounded by Mauritania to the north and northeast, Mali to the east, Guinea and Guinea-Bissau to the south and the Atlantic to the west with The Gambia forming an enclave along that shore. Area, 196,190 sq. km; population (census, 1988), 6,982,084; estimate, 1996: 9·09m. (53·3% urban in 1999). Population density, 40·5 per sq. km. Age structure: 1–14 years, 48%; 15–64, 49%; 65 and over, 3%.

The UN gives a projected population for 2010 of 12·05m.

The areas, populations and capitals of the ten regions:

Region	*Area (in sq. km)*	*1994 estimate*	*Capital*
Dakar	550	1,869,000	Dakar

Fatick	7,935	569,000	Fatick
Kaolack	16,010	948,000	Kaolack
Kolda	21,011	689,000	Kolda

The head of state is the *President*, elected by universal suffrage for not more than two five-year terms (previously two seven-year terms). The *President* has the power to dissolve the National Assembly, without the agreement, as had been the case, of a two-thirds majority. The new constitution also abolished the upper house (the Senate), confirmed the status of the prime minister and for the first time gave women the right to own land. For the unicameral, 140-member National Assembly, 70 members are elected in multi-seat and single-seat constituencies and 70 by proportional representation, all for a five-year term.

(*Time*, 10 July 2000).

KEY HISTORICAL EVENTS

The assassination of Archduke Franz Ferdinand of Austria in Sarajevo on 28 June 1914 precipitated the First World War. In the winter of 1915–16 the Serbian army was forced to retreat to Corfu, where the government aimed at a centralized, Serb-run state. But exiles from Croatia and Slovenia wanted a South Slav federation. This was accepted by the victorious Allies as the basis for the new state. The Croats were forced by the pressure of events to join Serbia and Montenegro on 1 Dec. 1918. From 1918–29 the country was known as the Kingdom of the Serbs, Croats and Slovenes.

A constitution of 1921 established an assembly but the trappings of parliamentarianism could not bridge the gulf between Serbs and Croats. The Croat peasant leader Radić was assassinated in 1928; his successor, Vlatko Maček, set up a separatist assembly in Zagreb. On 6 Jan. 1929 the king suspended the constitution and established a royal dictatorship, redrawing provincial boundaries without regard for ethnicity. In Oct. 1934 he was murdered by a Croat extremist while on an official visit to France.

During the regency of Prince Paul, the government pursued a pro-fascist line. On 25 March 1941 Paul was induced to adhere to the Axis Tripartite Pact. On 27 March he was overthrown by military officers in favour of the boy king Peter. Germany invaded on 6 April. Within ten days Yugoslavia surrendered; king and government fled to London. Resistance was led by a royalist group and the communist-dominated partisans of Josip Broz, nicknamed Tito. Having succeeded in liberating Yugoslavia, Tito instituted a Soviet-type constitution. He was too independent for Stalin, who sought to topple him. But Tito made a *rapprochement* with the west and it was the Soviet Union under Khrushchev which had to extend the olive branch in 1956. Yugoslavia evolved its ‘own road to socialism’. Collectivization of agriculture was abandoned; and Yugoslavia became a champion of international ‘non-alignment’. A collective presidency came into being with the death of Tito in 1980.

Dissensions in Kosovo between Albanians and Serbs, and in parts of Croatia between Serbs and Croats, reached crisis point after 1988. On 25 June 1991 Croatia and Slovenia declared independence. Fighting began in Croatia between Croatian forces and Serb irregulars from Serb-majority areas of Croatia. On 25 Sept. the UN Security Council imposed a mandatory arms embargo on Yugoslavia. Slovenia and Croatia declared their independence from the Yugoslav federation on 8 Oct, after a three-month moratorium agreed at EU peace talks on 30 June had expired. After 13 ceasefires had failed, a fourteenth was signed on 23 Nov. under UN auspices. Fighting, however, continued. On 15 Jan. 1992 the EU recognized Croatia and Slovenia as independent states. Bosnia-Herzegovina was recognized on 7 April 1992 and the former Yugoslav Republic of Macedonia on 8 April 1993. A UN delegation began monitoring the ceasefire on 17 Jan. and the UN Security Council on 21 Feb. voted to send a 14,000-strong peace-keeping force to Croatia and Yugoslavia. On 27 April 1992 Serbia and Montenegro created a new federal republic of Yugoslavia. On 30 May, responding to further Serbian military activities in Bosnia and Croatia, the UN Security Council voted to impose sanctions. In mid-1992 NATO committed air, sea and eventually land forces to

enforce sanctions and protect humanitarian relief operations in Bosnia. Following the Bosnian-Croatian-Yugoslav (Dayton) agreement all UN sanctions were lifted in Nov. 1995.

In 1998 unrest in Kosovo, with its largely Albanian population, led to a bid for outright independence. Violence flared resulting in what a US official described as 'horrendous human rights violations', including massive shelling of civilians and destruction of villages. A US-mediated agreement, accepted in principle by President Slobodan Milošević, allowed negotiations to proceed and lifted the immediate threat of NATO air strikes. The sticking point on the Serbian side was the international insistence on having 28,000 NATO-led peacemakers in Kosovo to keep apart the warring factions. Meanwhile, the scale of Serbian repression in Kosovo persuaded the NATO allies to take direct action. On the night of 24 March 1999 NATO aircraft began a bombing campaign against Yugoslavian military targets. Further Serbian provocation in Kosovo caused hundreds of thousands of ethnic Albanians to seek refuge in neighbouring countries. On 9 June after 78 days of air attacks NATO and Yugoslavia signed an accord on the Serb withdrawal from Kosovo, and on 11 June NATO's peacekeeping force, KFOR, entered Kosovo.

The general election held on 24 Sept. 2000 resulted in a victory for the opposition democratic leader Vojislav Koštunica, but President Milošević demanded a second round of voting. A strike by miners at the Kolubara coal mine on 29 Sept. led to a relatively peaceful revolution centred on Belgrade on 5 Oct. On 6 Oct. Slobodan Milošević accepted defeat. He was arrested on 1 April 2001 and on 28 June he was handed over to the United Nations War Crimes Tribunal in The Hague.

On 14 March 2002 Serbia and Montenegro agreed to remain part of a single entity called Serbia and Montenegro, thus relegating the name Yugoslavia to history. The agreement was ratified in principle by the federal parliament and the republican parliaments of Serbia and Montenegro on 9 April 2002. The new union came into force on 4 Feb. 2003. Most powers in this loose confederation are divided between the two republics. After 4 Feb. 2006 Serbia and Montenegro will have the right to vote for independence. The final status of Kosovo, which is legally part of Serbia, remains unresolved.

REPUBLICS AND PROVINCES

In Feb. 2003 the new Union of Serbia and Montenegro comprised the two republics of Montenegro and Serbia, and the two provinces of Kosovo and Metohija, and Vojvodina within Serbia.

MONTENEGRO

KEY HISTORICAL EVENTS

Montenegro emerged as a separate entity on the break-up of the Serbian Empire in 1355. Owing to its mountainous terrain, it was never effectively subdued by Turkey. It was ruled by Bishop Princes until 1851, when a royal house was founded. The Treaty of Berlin (1828) recognized the independence of Montenegro and doubled the size of the territory. The remains of King Nicholas I, who was deposed in 1918, were returned to Montenegro for reburial in Oct. 1989. As part of the Yugoslav federation, Montenegro holds jealously to its independence and tries to keep its political distance from Serbia.

On 14 March 2002 Montenegro and Serbia agreed to a new structure for the Yugoslav federation. Following European Union-brokered talks it was agreed that they would remain part of a single entity called Serbia and Montenegro, thus relegating the name Yugoslavia to history. The parliaments of both Montenegro and Serbia ratified the agreement on 9 April 2002. The new entity came into being on 4 Feb. 2003.

TERRITORY AND POPULATION

Montenegro is a mountainous region which opens to the Adriatic in the southwest. It is bounded in the west by Croatia, northwest by Bosnia-Herzegovina, in the northeast by Serbia and in the southeast by Albania. The capital is Podgorica (population, 1997 estimate, 162,172). Some capital functions are to be transferred to Cetinje, the historic capital of the former kingdom of Montenegro. Its area is 13,812 sq. km. Population at the 1991 census was 615,035, of which the predominating ethnic groups were Montenegrins (380,467), Muslims (89,614), Serbs (57,453) and Albanians (40,415). Population density per sq. km, 44·5. Estimate, 1998, 650,000; density, 47·1 per sq. km.

CONSTITUTION AND GOVERNMENT

There is an 75-member single-chamber National Assembly.

A referendum was held on 29 Feb.–1 March 1992 to determine whether Montenegro should remain within a common state, Yugoslavia, as a sovereign republic. The electorate was 412,000, of whom 66% were in favour. President Milo Djukanović had pledged a referendum on independence in May 2002, but this was postponed with the announcement of the creation of the new entity of Serbia and Montenegro, which came into being on 4 Feb. 2003. After 4 Feb. 2006 Montenegro will be empowered to hold a referendum on independence.

RECENT ELECTIONS

Parliamentary elections were held on 20–21 Oct. 2002. President Milo Djukanović's pro-independence Democratic List for a European Montenegro (including the Democratic Socialist Party) won 39 out of 75 seats with 44·8% of votes cast; the 'Together for Changes' coalition won 30 with 35·9%; the Liberal Alliance, 4 with 5·4%; and the 'Albanians Together' Democratic Coalition, 2 with 2·3%. Turn-out was 77·5%.

In presidential elections held on 22 Dec. 2002 acting president Filip Vujanović won 83·9% of the vote but the result was not valid because the turn-out was less than the required 50%. A follow-up election on 9 Feb. 2003 also failed with a turn-out of 47·7%. Parliament's subsequent amendment of the law on turn-out allowed Vujanović to claim victory on 11 May 2003 with 63·3% against Miodrag Zivković with 30·8% and Dragan Hajduković with 3·9%. Turn-out was 48·5%.

SERBIA

KEY HISTORICAL EVENTS

The Serbs received Orthodox Christianity from the Byzantines in 891, but shook off the latter's suzerainty to form a prosperous state, firmly established under Stevan Nemanja (1167–96). A Serbian Patriarchate was established at Peć during the reign of Stevan Dušan (1331–55). Dušan planned the conquest of Constantinople, but he was forestalled by incursions of Turks. After he died many Serbian nobles accepted Turkish vassalage; the reduced Serbian state under Prince Lazar received the coup de grace at Kosovo on St Vitus day, 1389. Turkish preoccupations with a Mongol invasion and wars with Hungary, however, postponed the total incorporation of Serbia into the Ottoman Empire until 1459.

The Turks permitted the Orthodox church to practise, though the Patriarchate was abolished in 1776. The native aristocracy was eliminated and replaced by a system of fiefdoms held in return for military or civil service. Local self-government based on rural extended family units (*zadruga*) continued. In its heyday the Ottoman system probably bore no harder on the peasantry than the Christian feudalism it had replaced, but with the gradual decline of Ottoman power, corruption, oppression and reprisals led to economic deterioration and social unrest.

In 1804 murders carried out by mutinous Turkish infantry provoked a Serbian rising under Djordje Karadjordje. The Sultan's army disciplined the mutineers, but was then defeated by the intransigent Serbs. By the Treaty of Bucharest (1812), however, Russia agreed that Serbia, known as Servia until 1918, should remain Turkish. The Turks reoccupied Serbia with ferocious reprisals. A new rebellion broke out in 1815 under Miloš Obrenović which, this time with Russian support, won autonomy for Serbia within the Ottoman empire. Obrenović had Karadjordje murdered in 1817. In 1838 he was forced to grant a constitution establishing an appointed state council, and abdicated in 1839. In 1842 a coup overthrew the Obrenovićs and Alexander Karadjordjević was elected as ruler. He was deposed in 1858.

During the reign of the western-educated Michael Obrenović (1860 until his assassination in 1868) the foundations of a modern centralized and militarized state were laid, and the idea of a 'Great Serbia', first enunciated in Prime Minister Garašanin's *Draft Programme* of 1844, took root. Milan Obrenović, adopting the title of king, proclaimed formal independence in 1882. He suffered defeats against Turkey (1876) and Bulgaria (1885) and abdicated in 1889. Alexander Obrenović was assassinated in 1903, and replaced by Peter Karadjordjević, who brought in a period of stable constitutional rule.

In its foreign policy, Serbia's striving for an outlet to the sea was consistently thwarted by Austria. Annexing Bosnia in 1908, Austria forced the Serbs to withdraw from the Adriatic after the first Balkan war (1912).

Following the break-up of Yugoslavia, in March 1998 a coalition government was formed between the Socialist Party of Slobodan Milošević and the ultra-nationalist Radical Party.

On 14 March 2002 Serbia and Montenegro agreed to a new structure for the Yugoslav federation. Following European Union-brokered talks it was agreed that they would remain part of a single entity called Serbia and Montenegro, thus relegating the name Yugoslavia to history. The parliaments of both Serbia and Montenegro ratified the agreement on 9 April 2002. The new entity came into being on 4 Feb. 2003. On 12 March 2003 Serb prime minister Zoran Djindjić was assassinated.

TERRITORY AND POPULATION

Serbia is bounded in the northwest by Croatia, in the north by Hungary, in the northeast by Romania, in the east by Bulgaria, in the south by Macedonia and in the west by Albania, Montenegro and Bosnia-Herzegovina. It includes the two provinces (formerly autonomous) of Kosovo and Metohija in the south and Vojvodina in the north. With these Serbia's area is 88,361 sq. km; without, 55,968 sq. km. The capital is Belgrade (population estimate, 1997, 1,597,599). Population at the 1991 census was (with Kosovo and Vojvodina) 9,778,991, of which the predominating ethnic group was Serbs (6,446,595). Population density per sq. km, 110·7; (without Kosovo and Vojvodina), population estimate 5,808,906, of which the predominating ethnic group was Serbs (5,108,682). Population density per sq. km, 103·8. 1997 estimate (with Kosovo and Vojvodina), 9,956,662; density, 112·7 per sq. km; (without) 5,791,643; density, 103·5 per sq. km.

CONSTITUTION AND GOVERNMENT

In Sept. 1990 a new constitution was adopted by the National Assembly. It defined Serbia as a 'democratic' instead of a 'socialist' republic, laid down a framework for multi-party elections, and described Serbia as 'united and sovereign on all its territory', thus stripping Kosovo and Vojvodina of the attributes of autonomy granted by the 1974 federal constitution.

There is a 250-member single-chamber National Assembly. The *President* is elected by universal suffrage for not more than two five-year terms.

RECENT ELECTIONS

In the first round of presidential elections held on 29 Sept. 2002 Yugoslav President Vojislav Koštunica won 30·9% of votes cast, with 27·4% of the vote going to Miroljub Labus and 23·2% for Vojislav Seselj, the favoured candidate of former premier Slobodan Milošević. Turn-out was 55·5%. A run-off between Koštunica and Labus took place on 13 Oct. 2002 but was declared invalid owing to a turn-out of 45·5%—less than the legally-required 50%. A further attempt to hold a new election on 8 Dec. 2002 again failed when fewer than 50% of the electorate voted.

Elections to the Serbian Parliament were held on 3 Dec. 2000. Reformers of the Democratic Opposition of Serbia (DOS) alliance won 64·1% of the vote and 176 of 250 seats, the Socialist Party of Serbia (SPS) 13·8% and 37 seats, and the Radical Party 8·5% and 23 seats. Turn-out was 57·7%.

KOSOVO AND METOHIJA

KEY HISTORICAL EVENTS

Kosovo has a large ethnic Albanian majority. Following Albanian-Serb conflicts, the Kosovo and Serbian parliaments adopted constitutional amendments in March 1989 surrendering much of Kosovo's autonomy to Serbia. Renewed Albanian rioting broke out in 1990. The Prime Minister and six other ministers resigned in April 1990 over ethnic conflicts. In July 1990, 114 of the 130 Albanian members of the National Assembly voted for full republican status for Kosovo but the Serbian National Assembly declared this vote invalid and unanimously voted to dissolve the Kosovo Assembly. Direct Serbian rule was imposed causing widespread violence. Western demands for negotiations in granting Kosovo some kind of special status were rejected. Ibrahim Rugova, the leader of the main Albanian party, the Democratic League of Kosovo (LDK), declared himself 'president' demanding talks on independence. In 1998 armed conflict between Yugoslavia and the Kosovo Liberation Army led to 200,000 people, or a tenth of the population of the whole province, fleeing the fighting. Further repression by Serbian forces led to the threat of NATO direct action. Air strikes against Yugoslavian military targets began on 24 March 1999. Retaliation against Albanian Kosovars led to a massive exodus of refugees. On 9 June after 78 days of air attacks NATO and Yugoslavia signed an

accord on the Serb withdrawal from Kosovo, and on 11 June NATO's peacekeeping force, KFOR, entered Kosovo. In Nov. 2001 the Organization for Security and Co-operation in Europe mounted elections for a provincial assembly that were deemed fair and democratic.

TERRITORY AND POPULATION

Area: 10,887 sq. km. The capital is Priština. The 1991 census was not taken. Population estimate of Kosovo and Metohija, 1991, 1,956,196 (1,596,072 Albanians, 194,190 Serbs); density, 179·7 per sq. km. The population in 1998 was 2,190,000 (84% Albanians, 9% Serbs and 7% others). By Sept. 1999 the population had declined to 1,506,000. Although the number of Albanians had dropped by over 430,000, the breakdown of the population had changed to 93% Albanians, 5% Serbs and 2% others. Population estimate of Priština, 1997, 242,000.

VOJVODINA

KEY HISTORICAL EVENTS

After the Battle of Kosovo in 1389 Turkish attacks on the Balkans led to mass migrations of Serbian people to Vojvodina. Turkish rule ended after their 1716–18 war with Austria and the Požarevac peace agreement. In exchange for acting as frontier protectors, the Austrians granted the people of Vojvodina freedom of confession and religious autonomy. However, by 1848 discontent had brewed and a short-lived revolution occurred, in which the Serbs formed an alliance with the Croats, and Vojvodina was briefly declared as an independent dukedom. After the First World War Vojvodina became part of the first Yugoslav state. In 1974 President Tito granted autonomy to Vojvodina, but this status was brought into question after Vojvodina's largely anti-Milošević provincial assembly resigned their positions in 1988. In 1989 the Serbian government, led by Slobodan Milošević, stripped Vojvodina of most of its autonomous rights and secured Serbian control. Politicians and citizens made frequent demands for autonomy to be reinstated during the Milošević era, and since his fall in Oct. 2000 there have again been movements for increased autonomy. However, the Assembly of Vojvodina has now only very limited powers.

KEY HISTORICAL EVENTS

The Seychelles were colonized by the French in 1756 to establish spice plantations to compete with the Dutch monopoly. The islands were captured by the English in 1794. Subsequently, Britain offered to return Mauritius and its dependencies which included the Seychelles to France if that country would renounce all claims to her possessions in India. France refused and the Seychelles were formally ceded to Britain as a dependency of Mauritius. In Nov. 1903 the Seychelles archipelago became a separate British Crown Colony. Internal self-government was achieved on 1 Oct. 1975 and independence as a republic within the British Commonwealth on 29 June 1976.

The first president, James Mancham, was deposed in a coup on 5 June 1977. Under the new constitution, the Seychelles People's Progressive Front became the sole legal party. There were several attempts to overthrow the regime, but in 1979 and 1984 Albert René was the only candidate in the presidential elections. Under the new constitution approved in June 1993, President René was re-elected against two opponents.

TERRITORY AND POPULATION

The Seychelles consists of 115 islands in the Indian Ocean, north of Madagascar, with a combined area of 175 sq. miles (455 sq. km) in two distinct groups. The Granitic group of 40 islands cover 92 sq. miles (239 sq. km); the principal island is Mahé, with 59 sq. miles (153 sq. km) and 75,876 inhabitants at the 1997 census, the other inhabited islands of the group being Praslin, La Digue, Silhouette, Fregate and North, which together had 7,100 inhabitants.

The Outer or Coralline group comprises 75 islands spread over a wide area of ocean between the Mahé group and Madagascar, with a total land area of 83 sq. miles (214 sq. km) and a population of about 450 at the 1997 census. The main islands are the Amirante Isles (including Desroches, Poivre, Daros and Alphonse), Coetivy Island and Platte Island, all lying south of the Mahé group; the Farquhar, St Pierre and Providence Islands, north of Madagascar; and Aldabra, Astove, Assumption and the Cosmoledo Islands, about 1,000 km southwest of the Mahé group. Aldabra (whose lagoon covers 55 sq. miles), Farquhar and Desroches were transferred to the new British Indian Ocean Territory in 1965, but were returned by Britain to the Seychelles on the latter's independence in 1976. Population, 76,400 (1996); 56·9% urban (1998). Victoria, the chief town, had an estimated population of 28,000 in 1999.

The official languages are Creole, English and French but 95% of the population speak Creole.

CONSTITUTION AND GOVERNMENT

Under the 1979 Constitution the Seychelles People's Progressive Front (SPPF) was the sole legal Party. There is a unicameral People's Assembly consisting of 33 seats, of which 25 are directly elected and eight are allocated on a proportional basis, and an executive president directly elected for a five-year term. A constitutional amendment of Dec. 1991 legalized other parties. A commission was elected in July 1992 to draft a new constitution. The electorate was some 50,000; turn-out was 90%. The SPPF gained 14 seats on the commission, the Democratic Party, 8; the latter, however, eventually withdrew. At a referendum in Nov. 1992 the new draft constitution failed to obtain the necessary 60% approval votes. The commission was reconvened in Jan. 1993. At a further referendum on 18 June 1993 the constitution was approved by 73·6% of votes cast.

SIERRA LEONE

Republic of Sierra Leone

Capital: Freetown
Population estimate, 2000: 4·41m.
GDP per capita, 2000: (PPP$) 490
HDI/world rank: 0·275/173

KEY HISTORICAL EVENTS

The Colony of Sierra Leone originated in 1787 when English settlers bought a piece of land intended as a home for natives of Africa who were waifs in London. The land was later used as a settlement for Africans rescued from slave-ships. The hinterland was declared a British protectorate on 21 Aug. 1896. Sierra Leone became independent as a member state of the British Commonwealth on 27 April 1961. In a general election in March 1967, Dr Siaka Stevens' All People's Congress came to power and was installed despite a military coup to prevent his taking office. Sierra Leone became a republic on 19 April 1971 with Dr Siaka Stevens as executive president. Following a referendum in June 1978, a new constitution was instituted under which the ruling All People's Congress became the sole legal party.

A military coup on 29 April 1992 deposed the president and set up a National Provisional Ruling Council whose chairman was in turn deposed in a military coup on 16 Jan. 1996. Presidential and parliamentary elections in Feb.–March 1996 resulted in a new government led by President Ahmed Tejan Kabbah. He was ousted in May 1997 by a group of junior officers. In Feb. 1998 a Nigerian-led intervention force launched an air and artillery offensive against the military junta. For the first time a group of African states joined together to restore a democratically-elected president. On 10 March President Kabbah returned from exile in Guinea, promising a 'new beginning'. But in Jan. 1999 the country again erupted into civil war. Nigeria sent troops to support President Kabbah but having lost control of the diamond fields and with no other resources, the government was powerless. The war, which continued for nearly ten years, has reduced Sierra Leone to one of the poorest countries in the world.

The government reached an agreement with the rebel movement in July 1999 to bring the civil war to an end. Under the terms of the accord the Revolutionary United Front (RUF) was to gain four key government posts along with effective control of the country's mineral resources. In return the RUF was to surrender its weapons. However, civil war broke out again in early 2000. Responding to a government appeal British forces were sent to back up the UN peacekeeping force (UNMASIL). Foday Sankoh, rebel leader of the RUF, was captured and handed over to UN forces in May 2000. In July 2001 the RUF announced that it was formally recognizing the civil government under President Ahmed Tejan Kabbah. By Sept. 2001 there were signs that the civil war might be at an end, and in Jan. 2002 President Kabbah declared the war over. He was re-elected in a presidential election in May 2002 and has been at the forefront of the fight against corruption. Both the UN and the International Monetary Fund have praised the 'remarkable progress' made in Sierra Leone.

KEY HISTORICAL EVENTS

Singapore Island became part of the Javanese Majapahit Empire in the 14th century. The Portuguese took control of the area in the 16th century, followed by the Dutch a hundred years later. In 1819 Sir Thomas Stamford Raffles, the British East India Administrator, established a trading settlement. The lease to the British East India Company by the Sultan of Johore was followed by the treaty of 2 Aug. 1824 ceding the entire island in perpetuity to the company. In 1826 Penang, Malacca and Singapore were combined as the Straits Settlements. With the opening of the Suez Canal in 1869 and the advent of the steamship, an era of prosperity began for Singapore. Growth continued with the export of tin and rubber from the Malay peninsula.

Singapore fell to the Japanese in 1942 whose occupation continued until the end of the Second World War. In 1945 Singapore became a Crown Colony, being separated from Penang and Malacca. In June 1959 the state was granted internal self-government. When the Federation of Malaysia was formed in Sept. 1963, Singapore became one of the 14 states of the newly created country. On 7 Aug. 1965, by agreement with the Malaysian government, Singapore left the Federation of Malaysia and became an independent sovereign state.

TERRITORY AND POPULATION

The Republic of Singapore consists of Singapore Island and some 63 smaller islands. Singapore Island is situated off the southern extremity of the Malay peninsula, to which it is joined by a 1·1 km causeway carrying a road, railway and water pipeline across the Strait of Johor and by a 1·9 km bridge at Tuas, opened on 2 Jan. 1998. The Straits of Johor between the island and the mainland are 914 metres wide. The island is 682·3 sq. km in area, including the offshore islands.

Census of population (2000): Chinese residents 2,505,379 (76·8%), Malays 453,633 (13·9%), Indians 257,791 (7·9%) and others 46,406 (1·45%); resident population, 3,263,209. Total population in June 2001 was 4,131,200. The population is 100% urban. Population density, 6,055 per sq. km.

The UN gives a projected resident population for 2010 of 4·60m.

CONSTITUTION AND GOVERNMENT

Singapore is a republic with a parliamentary system of government. The organs of state—the executive, the legislature and the judiciary—are provided for by a written constitution. The Constitution is the supreme law of Singapore and any law enacted

after the date of its commencement, which is inconsistent with its provisions, is void.

The Head of State is the President. The administration of the government is vested in the Cabinet headed by the Prime Minister. The Prime Minister and the other Cabinet Members are appointed by the President from among the Members of Parliament (MPs). The Cabinet is collectively responsible to Parliament.

Parliament is unicameral consisting of 83 elected members and 1 Non-Constituency MP (NCMP), elected by secret ballot from single-member and group representation constituencies as well as nine Nominated Members of Parliament (NMPs) who are appointed for a two-year term on the recommendation of a Special Select Committee of Parliament. With the customary exception of those serving criminal sentences, all citizens over 21 are eligible to vote. Voting in an election is compulsory. Group representation constituencies may return up to six Members of Parliament (four before 1996), one of whom must be from the Malay community, the Indian or other minority communities. To ensure representation of parties not in the government, provision is made for the appointment of three (or up to a maximum of six) NCMPs. The number of NCMPs is reduced by one for each opposition candidate returned. There is a common roll without communal electorates.

A Presidential Council to consider and report on minorities' rights was established in 1970. The particular function of this council is to draw attention to any Bill or to any subsidiary legislation which, in its opinion, discriminates against any racial or religious community.

National Anthem. 'Majulah Singapura' ('Onward Singapore'); words and tune by Zubir Said.

RECENT ELECTIONS

A parliamentary election was scheduled to take place on 3 Nov. 2001, but the ruling People's Action Party (PAP) won by default as it was unopposed in 55 of the 84 seats when nominations for the election closed. Nevertheless, voting did take place as a formality, and following the election and the appointment of members by the president the PAP held 82 of the 90 seats.

Presidential elections were scheduled for 24 Aug. 1999. However, these were cancelled after S. R. Nathan emerged as the only candidate who satisfied the requirements of the certificate of eligibility. He thus gained the presidency unopposed.

KEY HISTORICAL EVENTS

The Czechoslovak State came into existence on 28 Oct. 1918 after the dissolution of Austria-Hungary. Two days later the Slovak National Council declared its wish to unite with the Czechs. The Treaty of St Germain-en-Laye (1919) recognized the Czechoslovak Republic, consisting of the Czech lands (Bohemia, Moravia, part of Silesia) and Slovakia. In March 1939 the German-sponsored Slovak government proclaimed Slovakia independent and Germany incorporated the Czech lands into the Reich as the 'Protectorate of Bohemia and Moravia'. A government-in-exile, headed by Dr Edvard Beneš, was set up in London. Liberation by the Soviet Army and US Forces was completed by May 1945. Territories taken by the Germans, Poles and Hungarians were restored to Czechoslovak sovereignty. Elections were held in May 1946 following which a coalition government under a Communist Prime Minister, Klement Gottwald, remained in power until 20 Feb. 1948, when 12 of the non-Communist ministers resigned in protest against infiltration of Communists into the police. In Feb. a predominantly Communist government was formed by Gottwald. In May 1948 elections resulted in an 89% majority for the government and President Beneš resigned.

In 1968 pressure for liberalization culminated in the overthrow of the Stalinist leader, Antonín Novotný, and his associates. Under Alexander Dubček's leadership the 'Prague Spring' began to take shape and the outlines of a new political system described as 'socialism with a human face' began to appear as the Communist Party introduced an 'Action Programme' of far-reaching reforms. Soviet pressure to abandon this programme was exerted between May and Aug. 1968 and finally Warsaw Pact forces occupied Czechoslovakia on 21 Aug. The Czechoslovak government was compelled to accept a policy of 'normalization' (*i.e.*, abandonment of most reforms) and the stationing of Soviet forces.

Mass demonstrations demanding political reform began in Nov. 1989. After the authorities' use of violence to break up a demonstration on 17 Nov., the Communist leader resigned. On 30 Nov. the Federal Assembly abolished the Communist Party's sole right to govern, and a new Government was formed on 3 Dec. The protest movement continued to grow and on 10 Dec. another Government was formed. Gustáv Husák resigned as President and was replaced by Václav Havel on the unanimous vote of 323 members of the Federal Assembly on 29 Dec.

At the June 1992 elections the Movement for Democratic Slovakia led by Vladimír Mečiar campaigned on the issue of Slovak independence, and on 17 July the Slovak National Council adopted a declaration of sovereignty by 113 to 24 votes. President Havel resigned as Federal president on 20 July. On 1 Sept. 1992 the Slovak National Council adopted, by 114 votes to 16 with 4 abstentions (and a boycott by the Hungarian deputies), a Constitution for an independent Slovakia to come into being on 1 Jan. 1993. Economic property was divided between Slovakia and the Czech Republic in accordance with a Czechoslovakian law of 13 Nov. 1992. Government real estate became the property of the republic in which it was located. Other property was divided by specially-constituted commissions in the proportion of two (Czech Republic) to one (Slovakia) on the basis of population size. Military material was divided on the two:one principle. Regular military personnel were invited to choose which armed force they would serve in.

In Oct. 2002 Slovakia was one of ten countries included in plans for EU enlargement scheduled for 2004, and one of seven invited to join NATO in the same year.

INTERNATIONAL RELATIONS

Slovakia is a member of the UN, WTO, BIS, NATO Partnership for Peace, Council of Europe, OSCE, OECD, CEFTA, CERN, CEI, Danube Commission, IOM and an associate partner of the WEU. An application to join the EU was made in June 1995. A referendum on whether Slovakia should apply to join NATO took place on 23–24 May 1997. Turn-out was 9·8% and the results were declared invalid. 55% of votes cast were against participation. Following the Sept. 1998 general election interest in joining NATO increased and Slovakia was added to the list of aspirant members. At the European Union's Helsinki Summit in Dec. 1999 Slovakia, along with five other countries, was invited to begin full negotiations for membership in Feb. 2000, and is scheduled to become a member on 1 May 2004.

Slovakia has had a long-standing dispute with Hungary over the Gabčíkovo-Nagymaros Project, involving the building of dam structures in both countries for the production of electric power, flood control and improvement of navigation on the Danube as agreed in a treaty signed in 1977 between Czechoslovakia and Hungary. In late 1998 Slovakia and Hungary signed a protocol easing tensions between the two nations and settling differences over the dam.

ECONOMY

Agriculture accounted for 4·4% of GDP in 1998, industry 31·6% and services 64·0%.

Overview. New economic policy in 1998 had the key aims of the substantial reduction of the fiscal deficit, an increase in regulated prices towards international levels and the acceleration of the restructuring of state-owned banks and enterprises. Following Rudolf Schuster's victory in the presidential election in May 1999 hopes were high that Slovakia would begin accession negotiations with the European Union. By mid-1999 approximately 85% of the economy was in private hands, but

although 1,000 sell-offs of state assets had been approved over the previous four years, only three had been bought by foreign investors.

Legislation of July 1995 ended privatization by vouchers, which became exchangeable instead against state securities. At the end of 1995 the private sector share of total GDP reached 64·9%.

Currency. The unit of currency is the *Slovak koruna* or crown (SKK) of 100 *haliers*, introduced on 8 Feb. 1993. The koruna was revalued 4% in May 1995. Foreign exchange reserves were US$4,420m. and gold reserves 1·13m. troy oz in June 2002. Inflation was 6·5% in 2001. Total money supply in Dec. 2001 was 225,566m. koruny.

Budget. Government revenue and expenditure (in 1m. koruny):

	1996	*1997*	*1998*	*1999*	*2000*
Revenue	239,659	252,953	261,492	301,349	307,596
Expenditure	251,963	277,834	293,421	303,360	350,601

VAT, personal and company income tax, real estate taxes and inheritance taxes came into force in Jan. 1993. VAT is 23%, with a reduced rate of 10%.

Performance. In 1998 real GDP growth was 4·1%, but then just 1·9% in 1999. In 2000 the rate was 2·2%, rising to 3·3% in 2001. Slovakia's total GDP in 2001 was US$20·5bn.

Banking and Finance. The central bank and bank of issue is the Slovak National Bank, founded in 1993 (*Governor,* Marian Jusko). It has an autonomous statute modelled on the German Bundesbank, with the duties of maintaining control over monetary policy and inflation, ensuring the stability of the currency, and supervising commercial banks. However, it is now proposed to amend the central bank law to allow the government to appoint half the members of the board and force the bank to increase its financing of the budget deficit.

In Oct. 1998 the Slovak National Bank abandoned its fixed exchange rate system, whereby the crown's value was fixed within a fluctuation band against a number of currencies, and chose to float the currency.

Decentralization of the banking system began in 1991, and private banks began to operate. The two largest Slovak banks were both privatized in 2001. Erste BankÖsterreich bought an 87·18% stake in Slovenská Sporiteľňa (Slovak Savings Bank) and the Italian bank IntesaBci bought a 94·47% stake in Všeobecná úverová banka (General Credit Bank). In 2000 Slovenská Sporiteľňa had assets of US$3·3bn. and Všeobecná úverová banka US$2·8bn.

Foreign direct investment in Slovakia in 2000 totalled US$1,986·9m., more than the total amount in the previous seven years of the country's existence.

There is a stock exchange in Bratislava.

An agreement of Dec. 1992 with the Czech Republic, Hungary and Poland abolishes tariffs on raw materials and goods where exports do not compete directly with locally-produced items, and envisaged tariff reductions on agricultural and industrial goods in 1995–97.

SOCIAL INSTITUTIONS

Justice. The post-Communist judicial system was established by a federal law of July 1991. This provided for a unified system of four types of court: civil, criminal, commercial and administrative. Commercial courts arbitrate in disputes arising from business activities. Administrative courts examine the legality of the decisions of state institutions when appealed by citizens. In addition, there are military courts which operate under the jurisdiction of the Ministry of Defence. There is a Supreme Court, and a hierarchy of courts under the Ministry of Justice at republic, region and district level. District courts are courts of first instance. Cases are usually decided by senates comprising a judge and two associate judges, although occasionally by a single judge. (Associate judges are citizens in good standing over the age of 25 who are elected for four-year terms). Regional courts are courts of first instance in more serious cases and also courts of appeal for district courts. Cases are usually decided by a senate of two judges and three associate judges, although again occasionally by a single judge. The Supreme Court interprets law as a guide to other courts and functions also as a court of appeal. Decisions are made by senates of three judges. The judges of the Supreme Court are nominated by the President; other judges are appointed by the National Council.

The population in penal institutions in Jan. 1998 was 7,511 (140 per 100,000 of national population).

Religion. A federal Czechoslovakian law of July 1991 provides the basis for church-state relations and guarantees the religious and civic rights of citizens and churches. Churches must register to become legal entities but operate independently of the state. A law of 1993 restored confiscated property to churches and religious communities unless it had passed into private hands, co-operative farms or trading companies. An estimated 68·9% of the population are Roman Catholic, 6·9% members of the Evangelical Church of the Augsburg Confession, 4·1% Greek Catholic and 2·0% Calvinist.

KEY HISTORICAL EVENTS

The lands originally settled by Slovenes in the 6th century were steadily encroached upon by Germans. Slovenia developed as part of Austria-Hungary, after the defeat of the latter in the First World War becoming part of the Kingdom of the Serbs, Croats and Slovenes (Yugoslavia) on 1 Dec. 1918.

In Oct. 1989 the Slovene Assembly voted a constitutional amendment giving it the right to secede from Yugoslavia. On 2 July 1990 the Assembly adopted a 'declaration of sovereignty' and a referendum was held on 23 Dec. 1990 in which 88·5% of participants voted for independence. On 25 June 1991 Slovenia declared independence but agreed to suspend this for three months at peace talks sponsored by the EU. Federal troops moved into Slovenia on 27 June to secure Yugoslavia's external borders, but after some fighting withdrew by the end of July. After the agreed three-month moratorium Slovenia (and Croatia) declared their independence from the Yugoslav Federation on 8 Oct. 1991. In 2002 Slovenia was nominated as one of ten countries eligible for EU membership in 2004. In the same year it was invited to join NATO. At a referendum in March 2003, EU entry won 89·6% support.

TERRITORY AND POPULATION

Slovenia is bounded in the north by Austria, in the northeast by Hungary, in the southeast and south by Croatia and in the west by Italy. The length of coastline is 47 km. Its area is 20,273 sq. km. The capital is Ljubljana: June 2002 population, 253,785. Maribor (population of 95,875 in 2002) is the other major city. In 2002 the census population was 1,948,250 (provisional). Population (30 June 2002), 1,995,718 (females, 1,019,607); density per sq. km, 98·4. In 1999, 50·3% of the population lived in urban areas.

The UN gives a projected population for 2010 of 1·95m.

The official language is Slovene.

KEY HISTORICAL EVENTS

The Solomon Islands were discovered by Europeans in 1568 but 200 years passed before contact was made again. The southern Solomon Islands were placed under British protection in 1893; the eastern and southern outliers were added in 1898 and 1899. Santa Isabel and the other islands to the north were ceded by Germany in 1900. Full internal self-government was achieved on 2 Jan. 1976 and independence on 7 July 1978.

In June 2000 there was a coup by rebels from the island of Malaita. Prime Minister Bartholomew Ulufa'alu was held at gunpoint for two days. The conflict between the so-called Malaita Eagles and the Isatabu Freedom Movement threatens civil war.

TERRITORY AND POPULATION

The Solomon Islands lie within the area 5° to 12° 30' S. lat. and 155° 30' to 169° 45' E. long. Guadalcanal has the largest land area and the greatest amount of flat coastal plain. Population (1997 estimate), 426,900; density per sq. km, 15·0. In 1998, 81·4% of the population lived in rural areas.

The UN gives a projected population for 2010 of 619,000.

The islands are administratively divided into a Capital Territory and nine provinces. Area and population:

KEY HISTORICAL EVENTS

The origins of the Somali people can be traced back 2,000 years when they displaced an earlier Arabic people. They converted to Islam in the 10th century and were organized in loose Islamic states by the 19th century. The northern part of Somaliland was created a British protectorate in 1884. The southern part belonged to two local rulers who, in 1889, accepted Italian protection for their lands. The Italian invasion of Ethiopia in 1935 was launched from Somaliland and in 1936 Somaliland was incorporated with Eritrea and Ethiopia to become Italian East Africa. In 1940 Italian forces invaded British Somaliland but in 1941 the British, with South African and Indian troops, recaptured this territory as well as occupying Italian Somaliland. After the Second World War British Somaliland reverted to its colonial status and ex-Italian Somaliland became the UN Trust Territory of Somaliland, administered by Italy.

The independent Somali Republic came into being on 1 July 1960 as a result of the merger of the British Somaliland Protectorate, which first became independent on 26 June 1960, and the Italian Trusteeship Territory of Somaliland. On 21 Oct. 1969 Maj.-Gen. Mohammed Siyad Barre took power in a coup. Various insurgent forces combined to oppose the Barre regime in a bloody civil war. Barre fled on 27 Jan. 1991 but interfactional fighting continued. In Aug. 1992 a new coalition government agreed a UN military presence to back up relief efforts to help the estimated 1·5–2m. victims of famine. On 11 Dec. 1992 the leaders of the two most prominent of the warring factions, Ali Mahdi Muhammad and Muhammad Farah Aidid, agreed to a peace plan under the aegis of the UN and a pact was signed on 15 Jan. 1993. At the end of March, the warring factions agreed to disarm and form a 74-member National Transitional Council. On 4 Nov. 1994 the UN Security Council unanimously decided to withdraw UN forces; the last of these left on 2 March 1995.

The principal insurgent group in the north of the country, the Somali National Movement, declared the secession of an independent **'Somaliland Republic'** on 17 May 1991, based on the territory of the former British protectorate, with a capital at Hargeysa and a port at Berbera. The Somalian government rejected the secession and Muhammad Aidid's forces launched a campaign to reoccupy the 'Republic' in Jan. 1996. Muhammad Farah Aidid was assassinated in July 1996 and succeeded by his son Hussein Aidid. In July 1998 leaders in the northeast of Somalia proclaimed an 'autonomous state' named **Puntland.** Neither Somaliland nor Puntland has received international recognition.

Peace efforts in neighbouring Djibouti culminated in July 2000 in the establishment of a power-sharing agreement and a national constitution to see Somalia through a three-year transitional period. The election of members of parliament and a civilian government followed in Aug. 2000, and in Oct. the new government moved from Djibouti back to Somalia.

TERRITORY AND POPULATION

Somalia is bounded north by the Gulf of Aden, east and south by the Indian ocean, and west by Kenya, Ethiopia and Djibouti. Total area 637,657 sq. km (246,201 sq. miles). In 1987 the census population was 7,114,431. Estimated population (1998): 8,206,000; density, 12·9 per sq. km. Population counting is complicated owing to large numbers of nomads and refugee movements as a result of famine and clan warfare.

The UN gives a projected population for 2010 of 13·07m.

In 1995 an estimated 74·4% of the population were rural.

The country is administratively divided into 18 regions (with chief cities): Awdal (Saylac), Bakol (Xuddur), Bay (Baydhabo), Benadir (Mogadishu), Bari (Boosaso), Galgudug (Duusa Marreeb), Gedo (Garbahaarrey), Hiran (Beledweyne), Jubbada Dexe (Jilib), Jubbada Hoose (Kismayo), Mudug (Gaalkacyo), Nogal (Gaarowe), Woqooyi Galbeed (Hargeysa), Sanaag (Ceerigabo), Shabeellaha Dhexe (Jawhar), Shabeellaha Hoose (Marka), Sol (Las Anod), Togder (Burao). Somaliland comprises the regions of Awdal, Woqooyi Galbeed, Togder, Sanaag and Sol. Puntland consists of Bari, Nogal and northern Mudug.

The capital is Mogadishu (1999 population, 1,162,000). Other large towns are (with 1990 estimates) Hargeysa (90,000), Kismayo (90,000), Berbera (70,000) and Marka (62,000).

The national language is Somali. Arabic is also an official language and English and Italian are spoken extensively.

CONSTITUTION AND GOVERNMENT

The Constitution of 1984 authorized a sole legal party, the Somali Revolutionary Socialist Party. There was an elected President and People's Assembly.

A conference of national reconciliation in July 1991 and again in March 1993 allowed for the setting up of a transitional government charged with reorganizing free elections, but inter-factional fighting and anarchy have replaced settled government.

In Aug. 2000 the country's first parliament for nine years was inaugurated in neighbouring Djibouti. Under an agreed charter the transitional assembly was to elect a president who in turn was to form a government. However, ongoing wrangling between Somalia's rival factions continues. In Nov. 2002 leaders of the Somali factions met in order to begin the process of drawing up a new federal constitution.

National Anthem. No words, tune by G. Blanc.

RECENT ELECTIONS

For nearly ten years Somalia had no functioning government as such, but on 25 Aug. 2000 Abdiqassim Salad Hassan was elected president by the interim government. He defeated Abdillahi Ahmed Adow in a third ballot by 145 votes to 92.

On 28 Oct. 2001, after only 13 months rule, Prime Minister Ali Khalif Galaid's government was defeated by a no-confidence motion. Out of 174 votes cast, 141 voted against Galaid. He was replaced on 12 Nov. 2001 by Hassan Abshir Farah.

KEY HISTORICAL EVENTS

The Dutch first established a trading post at the Cape in 1652. The hinterland was then inhabited by the Khoisan peoples and, further east and north, by Bantu-speaking peoples. There was some white settlement over the next century. During the Napoleonic Wars, Britain took possession of the Cape and later many Boer (Dutch) settlers migrated northeast in the Great Trek. In the mid-19th century Britain ruled the Cape Colony and Natal along the coast of southern Africa, while in the interior the Afrikaners or Boers, descendants of Dutch settlers, established their own independent republics in the Transvaal and the Orange Free State. Some Bantu African peoples remained unconquered, notably the Xhosas east of the Cape Colony and, north of Natal, the Zulus. Meanwhile, British settlers emigrated to Cape Colony and Natal in the 19th century, and from the 1860s many Indians were brought to Natal as indentured labourers on the sugar plantations. The population of the Cape Colony included many Afrikaners as well as the 'Coloured' community, descendants of Dutch settlers and indigenous Khoisan women and of Malay slaves. Most coloureds spoke Afrikaans, the offshoot of Dutch spoken by the Boers.

Britain annexed the Transvaal in 1877, and fought in 1879 with the Zulus who, under King Ketshwayo, won a victory at Isandhlwana but were then defeated at Ulundi. Britain restored independence to the Transvaal (South African Republic) in 1884 and annexed Zululand in 1887. Both the British and the Boers fought African resistance for many years, the last major rising being in Natal in 1906. However, the British and Boers were also rivals for supremacy, especially after the discovery of diamonds at Kimberley in 1867 and of gold in the Transvaal in 1884. This led to an economic boom and wealth for many, of whom Cecil Rhodes, for a time prime minister of the Cape, was the dominant entrepreneurial figure.

In the South African War of 1899–1902 the British defeated and annexed the Boer republics. The Boer republics were given self-government again in 1907 and on 31 May 1910 Cape Colony, Natal, the Transvaal and the Orange Free State combined to form the Union of South Africa, a self-governing dominion under the British Crown. The Union's economy was based on gold and diamond mining, for which there was organized recruitment of migrant African labourers from Union territory and other parts of Africa. Pass Laws were in operation, controlling Africans' movements in the towns and industrial areas, where they were regarded officially as temporary residents and segregated in 'townships'. By an Act of 1913, 87% of the land was reserved for white ownership only, much of it being owned by white farmers, while Africans farmed as tenants or squatters. African protests at segregation and lack of political rights were led by the African National Congress (ANC).

African rights were further suppressed after the coming to power in 1924 of the Afrikaner Nationalist Party, led by J. B. Hertzog. Hertzog's government secured recognition of full independence for South Africa by the Statute of Westminster on 11 Dec. 1931. It also promoted the status of the Afrikaans language and introduced new segregation measures. From 1948 the National Party government reinforced the segregation system, developing it into the system of Apartheid. The shooting by police of protesters against the Pass Laws at Sharpeville on 21 March 1960 led to a major crisis from which, however, the government emerged only stronger. The ANC and the Pan African Congress were banned, and the leaders forced to operate

from exile after internal ANC leaders, including Nelson Mandela, were jailed in 1964. On 31 May 1961 South Africa became a Republic outside the Commonwealth.

On 16 June 1976 thousands of students demonstrated in Soweto, an African township outside Johannesburg, against mandatory schooling in Afrikaans. Many died when police broke up the demonstration and rioting spread throughout the country. When P. W. Botha became prime minister in 1978, elements of the Apartheid system were modified. Africans were allowed to form legal trade unions and the Acts banning marriage and sexual relations between people of different races were repealed.

A new constitution, approved in a referendum of white voters on 2 Nov. 1983 and in force from 3 Sept. 1984, created a new three-part parliament, with a House of Assembly for the Whites, a House of Representatives for the Coloureds and a House of Delegates for the Indians; Africans remained without representation. From late 1984 Blacks in the cities and industrial areas staged large-scale protests. In June 1986 a state of emergency was imposed. Foreign condemnation of this led to the first economic sanctions against South Africa, imposed by a number of countries including the USA.

By 1989 a start had been made on dismantling Apartheid, and the government announced its willingness to consider the extension of Black South Africans' political rights. In Feb. 1990 a 30-year ban on the African National Congress (ANC) was lifted; its leader, Nelson Mandela, was released from prison on 11 Feb. 1990. At the Whites-only referendum on 17 March 1992, on the granting of constitutional equality to all races, 1,924,186 (68·7%) votes were in favour; 875,619 against.

On 22 Dec. 1993 parliament approved (by 237 votes to 45) a Transitional Constitution paving the way for a new multi-racial parliament which was elected on 26–29 April 1994, and South Africa rejoined the Commonwealth. On 9 May 1994 Nelson Mandela was elected President. He was succeeded by Thabo Mbeki on 16 June 1999.

TERRITORY AND POPULATION

South Africa is bounded in the north by Namibia, Botswana and Zimbabwe, northeast by Mozambique and Swaziland, east by the Indian Ocean, and south and west by the South Atlantic, with Lesotho forming an enclave. Area: 1,219,090 sq. km. This area includes the uninhabited Prince Edward Island (41 sq. km) and Marion Island (388 sq. km), lying 1,900 km southeast of Cape Town and taken possession of in Dec. 1947 after the British Government had decided to give them to South Africa in order to prevent their falling into hostile hands. In 1994 Walvis Bay was ceded to Namibia, and Transkei, Bophuthatswana, Venda and Ciskei were re-integrated into South Africa.

At the census of 1996 the population was 40,583,573 (21,062,685 females), consisting of: African/Black, 31,127,631 (76·7% of total population); White, 4,434,697 (10·9%); Coloured, 3,600,446 (8·9%); Indian/Asian, 1,045,596 (2·6%). It was declared a city in 1931 and became the administrative capital of the Republic of South Africa in 1961. Often called the Jacaranda City owing to the number of Jacaranda trees, it is also known as Tshwane. The Union Buildings are the home of the South African Government and was the site of the swearing in of President Nelson Mandela on 10 May 1994 and President Thabo Mbeki on 16 June 1999.

Cape Town: Situated on the southwest coast of Africa, Cape Town is home to South Africa's Parliament. The city is dominated by Table Mountain, over 1,000 metres high. Table Mountain was declared a National Monument in 1998 and is a World Heritage site. Robben Island (Seal Island), a former asylum and leper colony before becoming a prison, is also a National Monument.

There were 3,053 immigrants in 2000 and 10,262 emigrants (8,402 in 1999). An estimated 20% of skilled South Africans have left the country and up to 70% of those who remain consider emigrating.

KwaZulu-Natal had the lowest rate (166 per 100,000), in part owing to unregistered customary and traditional marriages occurring mostly in this largely rural province. Of the total marriages officially recorded in 1999, 70,544 (45·3%) were solemnized in magistrates' courts and 52,630 in religious ceremonies. 32,633 were classed under 'unspecified'. CONSTITUTION AND GOVERNMENT

An Interim *Constitution* came into effect on 27 April 1994 and was in force until 3 Feb. 1997. Under it, the National Assembly and Senate formed a Constitutional Assembly which had the task of drafting a definitive Constitution. This was signed into law in Dec. 1996 and took effect on 4 Feb. 1997. The 1996 Constitution defines the powers of the President, Parliament (consisting of the National Assembly and the new National Council of Provinces—NCOP), the national executive, the judiciary, public administration, the security services and the relationship between the three spheres of government. It incorporates a Bill of Rights pertaining to, *inter alia*, education, housing, food and water supply, and security, in addition to political rights. All legislation must conform to the Constitution and the Bill of Rights. The Constitution was amended in 2001 to provide that Constitutional Court judges are appointed for a non-renewable 12-year term of office, or until they reach the age of 70 years, except where an Act of Parliament extends the term of office of a Constitutional Court judge. This Constitution Amendment Act also made the head of the Constitutional Court the Chief Justice. The head of the Supreme Court of Appeal is now the President of that Court.

A *Constitutional Court*, consisting of a president, a deputy president and nine other judges, was inaugurated in Feb. 1995. The Court's judges are appointed by the President of the Republic from a list provided by the Judicial Service Commission, after consulting the President of the Constitutional Court (now the Chief Justice) and the leaders of parties represented in the National Assembly.

Parliament is the legislative authority and has the power to make laws for the country in accordance with the Constitution. It consists of the National Assembly and the NCOP. Parliamentary sittings are open to the public.

The *National Assembly* consists of no fewer than 350 and no more than 400 members directly elected for five years, 200 from a national list and 200 from provincial lists in the following proportions: Eastern Cape, 28; Free State, 14; Gauteng, 44; KwaZulu-Natal, 42; Limpopo, 25; Mpumalanga, 11; Northern Cape, 4; North-West, 12; Western Cape, 20. In terms of the 1993 Constitution, which still regulated the 1999 elections, the nine provincial legislatures are elected at the same time and candidates may stand for both. If elected to both, they have to choose between sitting in the national or provincial assembly. In the former case, the runner-up is elected to the Provincial Assembly.

The *National Council of Provinces* (NCOP) consists of 54 permanent members and 36 special delegates and aims to represent provincial interests in the national sphere of government. Delegations from each province consist of ten representatives. Bills (except finance bills) may be introduced in either house but must be passed by both. A finance bill may only be introduced in the National Assembly. If a bill is rejected by one house it is referred back to both after consideration by a joint National Assembly-NCOP committee called the Mediation Committee. Bills relating to the provinces must be passed by the NCOP. By Aug. 2002, 703 bills had been passed since 1994.

The Constitution mandates the establishment of *Traditional Leaders* by means of either provincial or national legislation. The National House of Traditional Leaders was established in April 1997. Each provincial House of Traditional Leaders nominated three members to be represented in the National House. The National House advises national government on the role of traditional leaders and on customary law. During 2001 all appointed traditional leaders were granted powers to become commissioners of oaths, bringing justice services closer to communities, particularly in rural areas.

National Anthem. A combination of shortened forms of 'Die Stem van Suid-Afrika'/'The Call of South Africa' (words by C. J. Langenhoven; tune by M. L. de Villiers) and the ANC anthem 'Nkosi sikelel' iAfrika'/'God bless Africa' (words and tune by Enos Santonga).

RECENT ELECTIONS

Parliamentary elections were held on 2 June 1999. The electorate was 22·7m.; turn-out, 89%. Of the 19 parties which took part in the elections, 13 are represented in Parliament, based on the election results. The African National Congress (ANC) won 266 seats in Parliament's National Assembly with 66·35% of votes cast, the

Democratic Party (DP) 38 with 9·56%, the Inkatha Freedom Party (IFP) 34 with 8·58%, the New National Party (NNP) 28 with 6·87%, the United Democratic Movement (UDM) 14 with 3·42%, the African Christian Democratic Party (ACDP) 6 with 1·43%, the Freedom Front (FF) 3 with 0·8%, the United Christian Democratic Party (UCDP) 3 with 0·78%, the Pan-Africanist Congress (PAC) 3 with 0·71%, the Freedom Alliance (FA) 2 with 0·54%, the Minority Front (MF) 1 with 0·3%, the Afrikaner Eenheidsbeweging (AEB) 1 with 0·29% and the Azanian People's Organization (AZAPO) 1 with 0·17%.

DEFENCE

There are four Services constituting the South African National Defence Force (SANDF), namely the SA Army, the SA Air Force, the SA Navy and the SA Military Health Service (SAMHS). SAMHS personnel at the end of 2000 totalled 7,328 (3,900 women) and 725 reserves. The final strength of the SANDF is still under discussion although reduction in total force strength is envisaged.

Defence expenditure totalled US$1,912m. in 2000 (equivalent to US$47 per capita), and represented 1·6% of GDP. Defence expenditure in 1985 was US$4,256m. (US$127 per capita and 2·7% of GDP).

Army. Personnel of the SA Army Regular Force in 2000 totalled 38,942 (including 6,032 civilian personnel); Reserve Force personnel totalled 85,074.

Navy. Navy personnel in 2000 totalled 5,000 uniformed, 2,500 civilian and 1,000 active reserve members. The fleet is based at the naval bases at Simon's Town on the west coast and Durban on the east and includes six *Warrior* class fast attack craft (missile) and two *Daphne* class submarines (to be supplemented from 2005 with three submarines on order from the German Submarine Consortium).

Air Force. Personnel in 2000 totalled 11,574. 12 attack and reconnaissance helicopters are scheduled to be based at Air Force Base Bloemspruit.

INTERNATIONAL RELATIONS

South Africa is a member of the UN, BIS, the Commonwealth (except during 1961–94), the African Union, the Southern African Development Community, the Non-Aligned Movement, the African Development Bank, the Antarctic Treaty and is an ACP member state of the ACP-EU relationship. South Africa played an active role in negotiating and drafting the Lusaka Ceasefire Agreement, signed on 10 July 1999. On 1 Dec. 1999 the eighth Regional Summit appointed Nelson Mandela facilitator of the Arusha peace process.

ECONOMY

Overview. To control inflation the central bank has adopted tight macro-economic policies. Strong public finances sustain a competitive exchange rate and low interest rates, while monetary policy contains inflationary pressures. However, economic and employment growths remain slow. In Aug. 2001 the rand fell to its weakest level ever, a rate of 8·43 to the US dollar. Since the apartheid era the government has focused on controlling the deficit while increasing spending on social programmes to combat inequality. The government's Medium Term Expenditure Framework focuses on education, health, welfare, police and justice. Foreign debt relative to GDP declined in 2001. HIV/AIDS, in addition to human costs, hampers economic and social progress.

Currency. The unit of currency is the *rand* (ZAR) of 100 *cents*. A single free-floating exchange rate replaced the former two-tier system on 13 March 1995. The year-on-year rate of increase in the CPIX—the new measure of consumer price inflation for inflation targeting purposes, which excludes home mortgage rates from the overall consumer price index for metropolitan and other urban areas—was 8·2% in Aug. 2000, 5·9% in Oct. 2001 and 12·5% in Oct. 2002. The inflation target is 3 to 6% for the annual average of CPIX inflation for the years 2002 and 2003. The official inflation rate or the 12-month rate of change in the consumer price index (CPI) fell from 7·8% in Feb. 2001 to 4·0% in Oct. 2001.

Foreign exchange reserves were US$5,673m. and gold reserves 5·72m. troy oz in June 2002. Total money supply was R339,233m. in June 2002.

Budget. The central government's State Revenue Account in R1bn.:

	1998–99	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
Revenue	184·0	198·2	215·6	248·1	265·2
Expenditure	201·4	214·8	233·9	262·6	287·9

The 2002 budget provided for expenditure of 26·6% of GDP; revenue, 24·5% of GDP. South Africa's deficit is revised to 2·1% in 2002–03 and is projected to decline to 1·7% by 2004–05. About R47·5bn. or 4·4% of GDP is spent on debt servicing.

VAT has remained at 14% since 1993. Corporate taxes were reduced to 30% in 1999. A tiered corporate tax was introduced in 2000 with taxes for small businesses reduced by half. R9·9bn. was returned to taxpayers in reduced personal income tax for all income groups but particularly for lower and middle income groups. The marginal tax rate for high-income earners was cut to 42% from 45%. A capital gains tax was introduced from 1 April 2001 and became effective on 1 Oct. 2001.

Performance. Economic growth averaged 2·7% annually between 1994–2000. The emerging market financial crisis led to a slowdown in growth in 1998 and a marked depreciation of the rand. Uncertainty in emerging markets combined with the Zimbabwean land seizures contributed to the heightened depreciation of the rand.

In the late 1990s the budget deficit was steadily reduced to less than 3% of GDP. In 2001–02 a deficit of 1·4% was achieved. The government's Medium Term Expenditure Framework prioritizes spending on education, health and welfare, while also providing for stronger police and justice expenditure. The high prevalence of HIV/AIDS is another threat to the resources of the South African economy.

Total GDP in 2001 was US$113bn. while the growth in real GDP for 2000 was 3·1%. For the first nine months of 2002 it was 3·1% year-on-year. Gross international reserves were about US$7·9bn. in Dec. 2002.

Banking and Finance. The central bank and bank of issue is the South African Reserve Bank (established 1920), which functions independently. Its *Governor* is Tito Mboweni. The Banks Act, 1990 governs the operations and prudential requirements of banks. As at 31 Oct. 2001 the minimum capital adequacy requirement was 10%.

As at 31 Dec. 2001, 53 banks, including 14 branches of foreign banks and 2 mutual banks, were registered with the Office of the Registrar of Banks. 55 foreign banks have authorized representative offices in South Africa. The registered banking institutions collectively had 120,527 employees at 10,437 branches and agencies; their combined assets amounted to R970·9bn. (31 Oct. 2001).

The stock exchange, the JSE Securities Exchange, is based in Johannesburg. Foreign nationals have been eligible for membership since Nov. 1995.

Weights and Measures. The metric system is in use.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* South Africa's carbon dioxide emissions in 1998 were the equivalent of 8·3 tonnes per capita.

Electricity. South African households use over 25% of the country's energy. Coal supplies 75% of primary energy requirements, followed by oil (20·7%), nuclear (3·0%) and natural gas (1·3%). There is 1 nuclear power station (Koeberg) with 2 reactors, 2 gas turbine generators, 2 conventional hydroelectric plants and 2 pumped storage stations. Nuclear energy is being investigated as a future potential energy source and alternative to coal. The government has announced it is to sell off Eskom, the *parastatal* or government-related organization. Eskom generates 95% of the country's electricity (as well as two-thirds of the electricity for the African continent) and owns and operates the national transmission system.

The energy sector contributes about 15% to GDP and employs about 250,000 people. Because of South Africa's large coal deposits, the country is one of the four cheapest electricity suppliers in the world. Residential use is characterized by poor access to facilities and inefficient or hazardous energy sources, such as fuel wood and paraffin being used. An estimated 7·12m. (66%) of South Africa's 10·77m. households had electricity at the end of 2001; 2·17m. rural and 1·48m. urban households remain without electrical power.

Oil and Gas. South Africa has no significant oil reserves and relies on coal for most of its oil production. It has a highly developed synthetic fuels industry, as well as small deposits of oil and natural gas. Sasol Oil and Petro SA are the two major players in the synthetic fuel market. Synfuels meet approximately 40% of local demand. The prospects for natural gas production have increased by the discovery of offshore reserves close to the Namibian border in 2000. Production will commence in 2004 and will be channelled to regulate electricity production. Petro SA is responsible for exploration of both offshore natural gas and onshore coal-bed methane. South Africa is one of the major oil refining nations in Africa with a crude refining capacity of 543,000 bbls. per day.

Water. Rivers are the main source of water in South Africa. Ninety per cent of all water used in the country is abstracted from surface water and 10% from ground water. Average annual rainfall is a little less than 500 mm compared to the world average of about 860 mm. On average, only some 9% of rainfall reaches the rivers. 65% of the country receives less than 500 mm, which is generally accepted as the minimum required for successful dryland farming. 21% of the country, mainly in the arid west, receives less than 200 mm annually. On average only some 8% of rainfall reaches the rivers. The resultant surface water run-off is estimated to be about 50,000m. cu. metres, including that flowing out of Lesotho.

Irrigation and stock watering accounts for about 61% of the water used; 2% for stock watering, 2% for rural domestic, 15% for urban domestic, 7% for municipal, 8% for industry, 3% for mining and 2·3% for power generation. During 2000–01 over 1m. people were provided with basic water, reaching a total of 7m. since 1994.

On 1 July 2001 the Free Basic Water Policy was implemented, allowing every household to receive 6,000 litres of free water every month.

In 1998 a new National Water Act came into effect with the nation's water resources becoming a national resource belonging to the nation as a whole. Water availability is distributed poorly in relation to regions of economic growth and, as a result, major inter-basin water transfer schemes are a feature of the South African infrastructure. The latest such scheme, the first phase of which has been completed, is the Lesotho Highlands Water Project. This diverts the Orange River headwaters within Lesotho through tunnels into the Vaal River System, which serves an area where about 60% of the GDP of the country is generated. Lesotho receives royalties in exchange.

Minerals. Total value of all minerals sold, 1999: R76,387·1m.

Mineral production (in tonnes), 2001: coal, 223·5m.; silver, 109·6; iron ore, 34·8m.; limestone, 18·8m.; chrome ore, 5·5m.; manganese, 3·3m.; aluminium, 662,000; copper, 141,000; nickel, 36,400; platinum-group metals, 28,747; diamonds, 11,162,630 carats. South African gold production continued to slide in 1999, with output falling 4·5% to 443 tonnes, while total revenue increased by 3·5% to R25·1bn. Owing to the accelerated weakening of the rand, the average rand price of gold improved by 21% from R1,932·50 per oz in 2000 to R2,338·20 per oz in 2001. In 2001, 749 mines and quarries employed 407,154 people.

Agriculture. Much of the land suitable for mechanized farming has unreliable rainfall. Of the total farming area, natural pasture occupies 81% (69·6m. ha) and planted pasture 2·3% (2m. ha). About 13% of South Africa's surface area can be used for crop production. High potential arable land comprises only 22% of the total arable land. Annual crops and orchards are cultivated on 9·9m. ha of dry land and 1·4m. ha under irrigation. Primary agriculture contributes about 2·9% to GDP and almost 9% of formal employment.

Production (2001, in 1,000 tonnes): sugarcane, 21,156; maize, 7,772; wheat, 2,467; potatoes, 1,655; oranges, 1,268; sunflower seeds, 690; apples, 567; table grapes, 239; groundnuts, 222; sorghum, 206.

Livestock, in 1,000 (2002): 13,437 cattle, 29,034 sheep, 6,692 goats, 1,570 pigs; chickens, 61,000 (2000).

The 2002 production of red meat was 807,000 tonnes; poultry meat, 949,000 tonnes; wool (2001), 43,101 tonnes; eggs, 330,000 tonnes; milk, 2·4m. tonnes.

The value of agricultural imports increased by 13·9% and the value of exports increased by 37·6% for 2001 compared to 2000. Based on 2001 export values, sugar (R2,703m.), wine (R1,963m.), citrus fruit (R1,799m.), grapes (R1,327m.), and preserved fruit and nuts (R990m.) were the most important export products. Rice (R954m.), oil-cake (R762m.), undenatured ethyl alcohol (R602m.), tobacco (R456m.) and palm oil (R455m.) were the most important import products. During 2001 the UK, the Netherlands, Japan and Mozambique were the largest export destinations.

In 1999 the gross value of agricultural production was R43,647m. (field crops, R14,302m.; livestock products, R17,669m.; horticulture, R11,676m.). Primary agriculture contributes about 3·2% to GDP and almost 9% of formal employment. South Africa is one of the largest exporters in the world of avocados, grapes, citrus and deciduous fruit and, for the past five years, agricultural exports have contributed on average approximately 8% (7% in 2000) of total exports.

Forestry. South Africa has developed one of the largest man-made forestry resources in the world. Production from these plantations approached 16m. cu. metres valued at R2·3bn. in 1998–99. Together with the products processed from it, the total industry turnover in 2000–01 was around R11·8bn. (R19bn. in 1998–99). Collectively, the industry employs more than 135,000 people both in primary production and primary wood processing operations. The forest products industry exported R8·7bn. worth of products in 2000 making it a net exporter to the value of more than R5bn. in that year. Raw material exports (e.g. logs) made up only 1·6% of these exports. The forestry industry currently ranks among the top exporting industries in the country, contributing some 9% to the overall export of manufactured goods in 2000.

Indigenous high forest covers only about 534,000 ha or 0·4% of the country's surface. The private sector owns 971,098 ha of exotic plantations (especially pine, eucalyptus and wattle) or 66% of the total plantation area, as well as virtually all the processing plants in the country. In 2000–01 there were 1,280 registered private timber growers and more than 14,000 unregistered growers, the latter being small emergent black timber growers.

Fisheries. The commercial marine fishing industry is valued at more than R3bn. annually and employs 28,000 people directly. It is an important employer because it pays a relatively high average individual income (approximately R36,000) to its employees, of whom the majority are semi-skilled. In 2000 the commercial fishing fleet consisted of 4,477 vessels licensed by the Department of Environmental Affairs and Tourism. Line-fishing vessel permits numbered 2,731 and 480 tuna permits were

issued to 5,150 fishers. The total catch in 1999 was 588,001 tonnes, 99% of which came from marine fishing. Deep sea hake amounts to over half of the total catch and an estimated 35% of fish is exported.

INDUSTRY

The leading companies by market capitalization in South Africa, excluding banking and finance, in Jan. 2002 were: Anglo Amercian Platinum Corp. Ltd (R108bn.), the world's primary platinum group metals producer; Sasol Ltd (R73bn.), a coal, oil and gas producer; and AngloGold Ltd (R63bn.), the world's leading gold producer.

Net value of sales of the principal groups of industries (in R1m.) in 1999: food and food products, 57,136; chemicals and products, 45,353; vehicles and vehicle parts, 42,719; basic iron and steel products, 25,867; fabricated metal products except machinery, 23,536; beverages, 20,653; petroleum products, 20,464; paper and products, 20,400. Total net value including other groups, R397,320m. Manufacturing contributed R108,470m. towards GDP of R544,654m. in 1999, and thus accounted for 20% of the total.

Labour. The Employment Equity Act, 1998 signalled the beginning of the final phase of transformation in the job market, which began with the implementation of the Labour Relations Act. It aims to avoid all discrimination in employment. The Basic Conditions of Employment Act, 1997 applies to all workers except for the South African National Defence Force (SANDF), the South African Secret Service (SASS) and the National Intelligence Agency (NIA). The new provisions include a reduction in the maximum hours of work from 46 to 45 hours per week (however, the Act includes a process for the progressive reduction of working hours to 40 per week).

The number of those who are economically active—both the employed and the unemployed—was 16·1m. in Feb. 2002. The number of unemployed rose from 1·8m. in 1995 to 3·2m. in 1999. In Feb. 2001 the unemployment rate was 26·4% (26·7% in Feb. 2000).

Trade Unions. At the end of 2000 there were 464 registered trade unions with 3·6m. members. The most important trade union groups or federations are Federation of Trade Unions of South Africa (FEDUSA), National Council of Trade Unions (NACTU) and Congress of South African Trade Unions (COSATU). The three largest trade unions are the National Union of Mineworkers (NUM), the National Union of Metalworkers of South Africa (NUMSA), both COSATU affiliates, and the Public Servants Association, an affiliate of FEDUSA. Employers also have the right to associate with employer organizations and register their organizations with the Department of Labour. In Jan. 2000 there were 242 registered employer organizations and 10 federations of employer organizations. The Labour Court has been operating since Nov. 1996.

INTERNATIONAL TRADE

Since 1994 the (rand) value of both exports and imports in manufactured goods has more than doubled. South Africa's four main trading partners in 1999 were the UK, US, Germany and Japan. In regional terms Europe is the leading trading partner, taking more than one third of exports, followed by Asia (18·5%), Africa (13·6%) and North America (13·2%). In 1999 approximately 30% of exports were destined for Africa. Trade with the Southern African Development Community (SADC) has increased significantly from R16bn. in 1998 to R22bn. in 2000. In 1999 merchandise exports represented 86% (R148·9bn.) of total exports (merchandise plus net gold exports and excluding receipts for services).

A Trade, Co-operation and Development Agreement with the European Union was signed by the EU and South Africa in 1999 which will result in the abolition of tariffs on more than 90% of trade, currently worth in excess of R10bn. annually, between the 15 EU countries and South Africa within 12 years. Trade and development co-operation agreements worth R635m. were signed by South Africa and the EU in April 1999. EU grants made between 1995 and 1998 exceeded R3bn.

Total foreign debt in 2000 was US$24,861m. Total net gold exports in 1999 amounted to R24·2bn. During 1999 the value of merchandise imports was R150·3bn.

In Oct. 1998 a transshipment facility for containers opened at Kidatu, southwest of Dar es Salaam, Tanzania, providing a link between the 1,067 mm gauge railways of the southern part of Africa and the 1,000 mm gauge lines of the north. With the opening up of new markets for South Africa elsewhere in the continent, it will help to boost trade and facilitate the shipment of cargo to countries to the north.

COMMUNICATIONS

The public company Transnet Limited was established on 1 April 1990. Annually, Transnet handles 180m. tonnes of rail freight, 2·1m. tonnes of road freight, 2·5m. passengers by road, 194m. tonnes through the harbours; and 15,400m. litres are pumped through its petrol pipelines. The company flies 6·1m. domestic, international and regional passengers per year. In total, Transnet is worth R58·5bn. in fixed assets and has a workforce of some 80,000 employees.

Transnet consists of eight divisions—Spoornet, Port Authority, Port Operations, Freight Dynamics, Petronet, Metrorail, Propnet and Transtel, as well as South African Airways and a number of related and support businesses. For the financial year ended 31 March 2001 Transnet reported a profit of R3,287m. (compared to a net loss of R779m. for 2000).

Roads. The total length of the road network is 754,200 km, which includes 7,200 km of national roads, 357,333 km of provincial roads, 221,000 km of un-proclaimed roads and 168,000 km of metro, municipal and other roads. Toll-roads cover about 1,900 km. The network includes 1,400 km of dual-carriage freeways, 440 km of single-carriage freeways and 5,436 km of single-carriage main roads with restricted access. South Africa has the longest motorway network of any country in Africa. As at 31 Dec. 2002 there were 6·99m. registered motor vehicles, more than 4m. of which were motor cars. In 1999 there were 452,915 road accidents with 10,523 fatalities.

Rail. The South African Rail Commuter Corporation Limited (SARCC), an agency of the Department of Transport, is responsible for the provision of commuter rail services. It owns all commuter rail assets and property worth R5bn. SARCC contracts Metrorail (a division of Transnet) to provide services on its behalf. Metrorail carries more than 2·2m. passengers daily, serves 470 stations and operates one of the longest tracks in the world, covering 2,400 km through five metropolitan areas. Spoornet provides cargo transport and some long-distance passenger transport, including the luxurious Blue Train.

Civil Aviation. Responsibility for civil aviation safety and security lies with the South African Civil Aviation Authority (SACAA). The Airports Company South Africa (ACSA) owns and operates South Africa's principal airports—Johannesburg, Cape Town and Durban international airports, and the airports at Kimberley, Port Elizabeth, Bloemfontein, George, East London and Upington. Together, the nine

airports handle more than 196,000 aircraft landings and 10m. departing passengers annually. Johannesburg is expected to deal with 13·5m. passengers a year by 2005. ACSA also has a 35-year concession to operate Pilanesberg International Airport near Sun City in North-West Province.

South African Airways (SAA), Comair, SA Express and SA Airlink operate scheduled international air services. 13 independent operators provide internal flights which link up with the internal network of SAA, Comair and SA Express.

In 2000 Johannesburg handled 11,187,948 passengers (5,981,562 on domestic flights) and 439,994 tonnes of freight. Cape Town handled 4,654,000 passengers (3,645,000 on domestic flights). Durban handled 2,501,999 passengers (2,440,929 on domestic flights) and 14,737 tonnes of freight.

Shipping. The South African Maritime Safety Authority (SAMSA) was established on 1 April 1998 as the authority responsible for ensuring the safety of life at sea and the prevention of sea pollution from ships. The National Ports Authority supervises 16 of South Africa's ports. The largest ports include the deep water ports of Richards Bay, with its multi-product dry bulk handling facilities, multi-purpose terminal and the world's largest bulk coal terminal, and Saldanah featuring a bulk ore terminal adjacent to a bulk oil jetty with extensive storage facilities. Durban, Cape Town and Port Elizabeth provide large container terminals for deep-sea and coastal container traffic. East London, the only river port, has a multi-purpose terminal and dry dock facilities. Mossel Bay is a specialized port serving the south coast fishing industry and offshore gas fields.

In 1998 the merchant fleet totalled 631,059,096 GRT. During 1998 the major ports handled a total of 187,008,889 tonnes of cargo, and a total of 13,559 ships' calls were registered.

Telecommunications. In July 2000 there were 1·8m. PC and Internet users (42 per 1,000 population) and 150,000 fax machines. South Africa has approximately 5·3m. installed telephones and 4·3m. installed exchange lines, representing 39% of total lines installed in Africa.

Telkom SA, the national operator, was awarded a five-year licence in May 1997 giving the company the exclusive right to provide telecommunications services. It was required to install 2·8m. new lines, including 120,000 payphones in the five years to March 2002. Over the same period it was required to provide first-time telephone services for over 3,000 villages, install more than 20,000 new lines for priority customers such as schools and hospitals and replace around 1,200m. analogue lines with digital technology. The transmission network is almost wholly digital.

South Africa, with the operators Vodacom and MTN, is the fourth fastest-growing GSM (Global Systems for Mobile Communications) market in the world. It is currently worth R13bn. and will grow to around R20bn. by 2004. The third operator, Cell C, started operating in Nov. 2001. There were 11·2m. mobile phone users in Jan. 2002; there are forecast to be 21m. by 2006.

Postal Services. By March 2001 the Post Office had 2,680 postal outlets and 26 mail processing centres throughout the country and delivered 8m. letters daily. Public Information Terminals (PiTs) offer government information and an e-mail service, Internet browsing, business sections and educational services. By Sept. 2001, 100 kiosks had been installed in post offices.

SOCIAL INSTITUTIONS

Justice. All law must be consistent with the Constitution and its Bill of Rights. Judgments of courts declaring legislation, executive action, or conduct to be invalid are binding on all organs of state and all persons. The common law of the Republic was based on Roman-Dutch law—that is the uncodified law of Holland as it was at the date of the cession of the Cape to the United Kingdom in 1806. South African law has, however, developed its own unique characteristics since then. All courts so as to promote the spirit, purport and objects of the Bill of Rights must now develop it.

The Judicial authority of the Republic is vested in the courts. The higher courts are presided over by Judges. Judges hold office until they attain the age of 70 years, or if they have not served for 15 years, until they have completed 15 years of service

or have reached the age of 75, when they are discharged from active service. A judge discharged from active service has to be available to perform service for an aggregate of three months a year until the age of 75. The Chief Justice of South Africa, the Deputy Chief Justice, the President of the Supreme Court of Appeal and the Deputy President of the Supreme Court of Appeal are appointed by the President after consulting the Judicial Service Commission. In the case of the Chief Justice and Deputy Chief Justice, the President must also consult the leaders of parties represented in the National Assembly. The President on the advice of the Judicial Service Commission (JSC) appoints all other judges. No judge may be removed from office unless the JSC finds that the judge suffers from incapacity, is grossly incompetent or is guilty of gross misconduct, and the National Assembly calls for that judge to be removed by a resolution supported by at least two thirds of its members.

The higher courts include the following: 1) *The Constitutional Court* (CC), which consists of the Chief Justice of South Africa, the Deputy Chief Justice of South Africa and nine other judges. It is the highest court in all matters in which the interpretation of the Constitution or its application to any law, including the common law, is relevant; 2) *The Supreme Court of Appeal*, consisting of a President, a Deputy President and the number of judges of appeal determined by an Act of Parliament. It is the highest court of appeal in all other matters; 3) *The High Courts*, which may decide constitutional matters other than those which are within the exclusive jurisdiction of the Constitutional Court, and any other matter other than one assigned by Parliament to a court of a status similar to that of a High Court. Each High Court is presided over by a Judge President who may divide the area under his jurisdiction into circuit districts. In each such district there shall be held at least twice in every year and at such times and places determined by the Judge President, a court which shall be presided over by a judge of the High Court. Such a court is known as the circuit court for the district in question; 4) *The Land Claims Court*, established under the Restitution of Land Rights Act of 1994 deals with claims for restitution of rights in land to persons or communities dispossessed of such rights after 1913 as a result of past racially discriminatory laws or practices. It has jurisdiction throughout the Republic and the power to determine such claims and related matters such as compensation and rights of occupation; 5) *The Labour Court*, established under the Labour Relations Act, 1995 deals with labour disputes. It is a superior court that has authority, inherent powers and standing in relation to matters under its jurisdiction, equal to that the High Court has in relation to matters under its jurisdiction. Appeals from decisions of the Labour Court lie to the Labour Appeal Court which has authority in labour matters equivalent to that of the Supreme Court of Appeal in other matters.

The lower courts are called Magistrates' Courts. The nine provinces are divided into 370 magisterial districts each with a magistrates court having a prescribed civil and criminal jurisdiction. There are 746 magistrates court offices. From the magistrates court there is an appeal to the High Court having jurisdiction in that area, and then to the Supreme Court of Appeal. In cases involving constitutional matters there is a further appeal to the Constitutional Court. Sentences imposed by district magistrates above a prescribed limit are in most cases subject to automatic review by a judge.

All criminal and civil cases are dealt with by judges (in the high courts) and magistrates (in the lower courts). A limited civil and criminal jurisdiction is also conferred upon courts of traditional leaders. In addition to civil jurisdiction at magisterial and high court level, there are currently 140 small claims courts, which have been introduced since 1984. These courts (where Commissioners preside) have jurisdiction only, limited by the quantum of damages and the nature of the claim. The current limit for claims in the Small Claims Courts is R3,000.

The death penalty was abolished in June 1995 and no executions have taken place since 1989.

In 1999 there were 24,210 murders, a rate of 56·2 per 100,000 persons (1994: 26,832 murders, representing a rate of 69·5 per 100,000 persons). South Africa has one of the highest murder rates in the world. Spending on police, prisons and justice services amounted to R23·5bn. in 1999.

Religion. Almost 80% of the population in South Africa professes the Christian faith. Other major religious groups are the Hindus, Muslims and Jews. A sizeable minority of the population does not belong to any of the major religions but regard themselves as traditionalists or of no specific religious affiliation. Freedom of worship is guaranteed by the Constitution and official policy is one of non-interference in religious practices. In 1992 the Anglican Church of Southern Africa voted by 79% of votes cast for the ordination of women.

Education. The South African Schools Act, 1996 became effective on 1 Jan. 1997 and provides for: compulsory education for students between the ages of 7 and 15 years of age, or students reaching the ninth grade, whichever occurs first. Curriculum 2005, the brand name of the new national curriculum framework for schools, is based on the concept of outcomes-based education (OBE), the focus being on what students should know and do. The new learning programmes are being introduced in phases.

In 2002–03 education was allocated a budget of R59,669m., with R7,469m. allocated to universities and technikons, and R50,865m. to college and school education. During 2000 around 76,100 students benefited from the Government's National Student Financial Aid Scheme for universities and technikons (R443·5m.); R500m. was earmarked for 2002–03.

There are more than 11·6m. school pupils, 26,789 primary and secondary schools with 348,362 educators. There were 22 universities in 2002 (407,401 students enrolled in 2002), two of which are mainly non-residential institutions offering distance tuition; and 15 technikons (202,730 students enrolled, 2002). During 1999 provincial education departments reached 300,000 Adult Basic Education and Training (ABET) students. Expenditure on ABET increased from R160m. in the 1995–96 financial year to R343m. in 1998–99.

The University of South Africa (UNISA) is the oldest and largest university in South Africa and one the largest distance education institutions in the world. There were 130,347 students and 1,168 teaching and research staff in 2001.

According to the *State of South Africa's Population Report 2000,* 18·3% of the population over 20 years of age has had no schooling. The adult literacy rate in 1999 was 84·9% (85·7% for males and 84·2%, females). The female literacy rate is the highest in Africa.

Health. Some 40% of South Africans live in poverty and 75% of these live in rural areas where they are deprived of access to health services. An estimated 29,927 doctors, including doctors working for the State, doctors in private practice and specialists, were registered with the Health Profession Council of South Africa (HPCSA) in Dec. 2001. Doctors train at the medical schools of eight universities. The majority of doctors practise privately.

In Dec. 2001 a total of 4,503 dentists, 381 dental and oral specialists (2000), 849 oral hygienists and 347 dental therapists were registered with the HPSCA. In Dec. 2001, 10,782 pharmacists were registered with the South African Pharmacy Council; there were 172,338 registered and enrolled nurses and enrolled nursing auxiliaries.

A network of mobile clinics run by the Government form the main role of primary and preventive health care. Clinics are being built or expanded throughout the country. By April 1999, 168 private medical schemes had been registered in terms of the provisions of the Medical Schemes Act, 1967.

In Oct. 1998 the first traditional hospital was opened in Mpumalanga—the Samuel Traditional Hospital. There are about 350,000 traditional healers in South Africa providing services to between 60% and 80% of their communities.

Approximately 4·7m. South Africans are HIV-infected, the highest number in the world (equivalent to nearly 11% of the population of South Africa and nearly 12% of all the people believed to be infected worldwide).

Welfare. As of Dec. 2002 the Department of Social Development was disbursing grants through its provincial offices to more than 4·8m. beneficiaries at a monthly cost of R2·5bn. Recipients are means-tested to determine their eligibility. The primary beneficiaries are 2m. older persons (women aged 60 and above, men aged 65 and above), who receive an Old Age Grant of R640 per month. A further 1·8m. children aged less than seven receive a R140 Child Support Grant (CSG) per month. The number of children in payment has increased steadily since the introduction of

the CSG in March 1998. Other benefits paid are the Disability, Foster Child, Care Dependency and War Veteran's Grants as well as Institutional Grants and Grants in Aid.

The total budget allocation for the payment of social assistance by the provincial departments of social development was R18,798bn. in 2000–01.

CULTURE

Broadcasting. The South African Broadcasting Corporation (SABC), the country's public broadcaster, provides six television channels in 11 languages. Four are free-to-air, namely SABC1, SABC2, SABC3 and Bop-TV, while Africa2Africa and SABC Africa are pay-television channels, broadcast by satellite.

There are more than 4m. licensed television households. About 50% of all programmes transmitted are produced in South Africa.

M-Net, the country's first private subscription television service, was launched in 1986 and today has over 1·23m. subscribers in 41 countries across Africa. On 15 Nov. 1999 a new Afrikaans television channel—KykNET—was launched on M-Net's digital satellite television (DStv) service.

SABC has 19 radio stations, attracting 20m. listeners daily. Its external service, launched in 1966 as Radio South Africa and now known as Channel Africa, broadcasts to Africa and the Indian Ocean Islands. It offers an all-African radio service providing programmes with a specifically African content. Channel Africa is in the process of commercialization and expansion, turning it into a commercial enterprise, with R28m. budgeted for this purpose. The UK's BBC World Service and the SABC announced details of a new working agreement between the two corporations in Oct. 1999. In June 2000 the IBA licensed XK-FM, the first SABC community radio station.

The following private radio stations have been granted licences by the ICASA: Classic FM in Gauteng; Punt Geselsradio, operating in Gauteng and the Western Cape; Cape Talk MW in the Western Cape; P4 in Cape Town and Durban; Kaya FM, in Gauteng; Y-FM, broadcasting in Johannesburg in IsiZulu, Sesotho and English; Radio KFM; Radio Algoa; Radio Oranje; Highveld Stereo; Radio 702 in Gauteng; East Coast Radio; and Radio Jacaranda. More than 80 community radio stations have been licensed since 1995.

In Sept. 1999, 85% of the population was able to receive a television signal (colour by PAL).

Press. The major press groups are Independent Newspapers, Nasionale Media, Perskor and Times Media (TML). Other important media players are Primedia, Nail (New Africa Investments Limited) and Kagiso Media. The flagship publication of New Africa Media is the biggest English daily in South Africa, *Sowetan* (circulation Jan.–June 2000, 209,855).

The only truly national newspapers are the three Sundays: *Sunday Times* (circulation, Jan.–June 2000, 504,845), *Rapport* (340,023) and *The Sunday Independent* (42,653), and the weekly newspaper *City Press*. *Die Burger Saterdag* (Cape Town) is the largest Afrikaans daily (109,728 in 2000). There are 16 dailies and 11 weekly newspapers.

Tourism. South Africa has one of the fastest-growing tourist industries in the world, contributing R25bn. to the economy in 2000 (about 4·9% of GDP). It has gone from a world ranking of fifty-fifth in 1990 to twenty-fifth in 1998, attracting more tourists than any other country in Africa. The number of foreign tourists is growing by around 12% a year. In 2001 arrivals from outside the continent continued to grow by 2·7% despite the global slowdown. Tourism employs an estimated 7% of the country's workforce and it is projected that more than 1·2m. people will be employed (directly and indirectly) in tourism by 2010. Tourism is the fourth-largest industry in South Africa, supporting some 700 hotels, 2,800 guest houses and bed-and-breakfast establishments and 10,000 restaurants.

Festivals. Best-known arts festivals: the Klein Karoo Festival (Oudtshoorn, Western Cape), which has a strong Afrikaans component, is held in April; the Grahamstown Arts Festival in Eastern Cape province is held in June/July; the Manguang African Cultural Festival (Macufe) is held in Sept. in Bloemfontein; and the Potchefstroom Arts Festival, in North-West province, is held in Oct.

Libraries. There are two national libraries (in Cape Town and Pretoria) and hundreds of public (municipal) libraries, special libraries, government libraries, and university and college libraries.

The Legal Deposit Act, 1997 came into effect in July 1998. There are now five places of legal deposit—the National Library of South Africa (Cape Town as well as Pretoria), the Library of Parliament, the Bloemfontein Public Library, the Natal Society Library and the National Film, Video and Sound Archives.

Theatre and Opera. The four regional performing arts councils are obliged to ensure that they become representative of the full diversity of South African culture. A national arts council (NAC), which is broadly representative of all South Africans, has been established to address the promotion and development of all South African art forms on a national level. The main theatres are the Artscape in Cape Town, the Playhouse Company in Durban, the Performing Arts Centre in Bloemfontein and the State Theatre in Pretoria.

Museums and Galleries. More than 300 of the approximately 1,000 museums in Africa are situated in South Africa. The newest national museum is the Robben Island Museum which includes the cell in which former President Nelson Mandela was imprisoned. The largest museums are situated in Johannesburg, Pretoria, Cape Town, Durban, Pietermaritzburg and Bloemfontein. Art galleries include: South African National Gallery, Cape Town; Johannesburg Art Gallery; Pretoria Art Museum; William Humphreys Art Gallery, Kimberley.

There are several open-air museums which show the black cultures of the country including Tsongakraal near Letsitele, Limpopo; the Ndebele Museum at Middelburg, Mpumalanga; the Bakhoni (Northern Sotho) Museum at Pietersburg, Limpopo; and the South Sotho Museum at Witsieshoek, Free State.

SOUTH AFRICAN PROVINCES

In 1994 the former provinces of the Cape of Good Hope, Natal, the Orange Free State and the Transvaal, together with the former 'homelands' or 'TBVC countries' of Transkei, Bophuthatswana, Venda and Ciskei, were replaced by nine new provinces. Transkei and Ciskei were integrated into Eastern Cape, Venda into Northern Province (now Limpopo), and Bophuthatswana into Free State, Mpumalanga and North-West.

The administrative powers of the provincial governments in relation to the central government are set out in the 1999 Constitution after a revision of the original text demanded by the Constitutional Court in 1996.

FREE STATE

TERRITORY AND POPULATION

The Free State lies in the centre of South Africa and is situated between the Vaal River in the north and the Orange River in the south. It borders on the Northern Cape, Eastern Cape, North-West, Mpumalanga, KwaZulu-Natal and Gauteng Province and shares a border with Lesotho. The area is 129,480 sq. km, 10·62% of South Africa's total surface area. The province is the third largest in South Africa but has the second smallest population and the second lowest population density (22 persons per sq. km). The population at the Oct. 1996 census was 2,633,504. Of that number: female, 1,335,156; African/Black, 2,223,940 (84% of the population); White, 316,459 (12%); Coloured, 79,038 (3%); Indian/Asian, 2,805 (0·1%). 63% of the population are between 15 and 64. At least 69% of the population lived in urban areas (in 1911, 80% lived in rural areas). Annual population growth rate: 1–2%. Estimated population at 30 June 2000 was 2,826,076; density, 22 per sq. km. Life expectancy at birth, 1996, was 52·8 years. KEY HISTORICAL EVENTS

The modern Spanish state was founded in 1469 with the marriage of Isabel and Fernando to the crowns of Castile and Aragón. Under their joint reign Spain recovered Granada, the last Islamic territory in the Iberian peninsula and sponsored the modern discovery of America, both events in 1492. After 1700 the French Bourbon dynasty was enthroned, with Felipe V as its first king; the present monarch, Juan Carlos I, installed in 1975, is his direct descendant.

Queen Isabel II, who came to the throne in 1833, was deposed in 1868. The Cortes (Parliament) approved a new constitution and the deputies chose as the new king Amadeo I of the then reigning Italian dynasty of Savoy. Unable to adapt to Spanish politics, he abdicated on 11 Feb. 1873. The Cortes immediately proclaimed a republic. The first brief republican experience saw great instability. On 29 Dec. 1874 a coup restored the Bourbon monarchy, with Alfonso XII, the son of the exiled Queen Isabel II, as king. A general election took place early in 1876 and the new Cortes approved a constitution which was effective until 1923. During this period, known as the Restoration, Spain still had a backward economy and low standards of living. At the same time Spain was embroiled in external conflicts, with wars in northern Morocco and in the remaining colonies of Cuba and the Philippines. US intervention led to the cession of Philippines, Puerto Rico and Guam, and also of Cuba which formally became independent in 1901.

Spain was neutral in the First World War, leading to a boom in industry and trade. A new industrial working class was then emerging, amidst a climate of industrial unrest which also showed itself in opposition to conscription for the war in Morocco. In Sept. 1923 Gen. Primo de Rivera led a coup and abolished the 1876 constitution, closed down the Cortes and governed by decree until his resignation in Jan. 1930. An interim period followed until the municipal elections of 12 April 1931, which were won by a republican-socialist coalition in Madrid, provincial capitals and other urban areas. Two days later Alfonso XIII exiled himself and the republic was proclaimed a second time. An election in Feb. 1936 gave power to the Popular Front, a coalition of all left parties, including the then tiny Communist party. On 18 July 1936 the colonial army in northern Morocco, led by Gen. Francisco Franco, rebelled against the government. The rebellion was crushed in Madrid, Barcelona and Valencia but the rural regions were easily controlled by the rebels who received substantial help from Germany, Italy and Portugal. Franco's forces overcame all resistance and the war ended on 1 April 1939. As chief of state till his death on 20 Nov. 1975, Franco modelled his regime on those of the Axis countries. Nevertheless, Spain did not take part in the Second World War.

A nominal monarchy existed from 1947 but with a vacant throne until 1969 when the francoist state accepted the future succession in favour of Juan Carlos de Borbón, grandson of Alfonso XIII. Franco recognized the independence of Morocco in 1956. On 22 Nov. 1975, following Gen. Franco's death, Juan Carlos was proclaimed king. A referendum held in Dec. 1976 endorsed some key reforms making possible a free election on 15 June 1977. The elected bicameral Cortes drafted a new constitution which came into force on 29 Dec. 1978. On 23 Feb. 1981 there was an attempted fascist coup, when for 18 hours the deputies of the lower house of Parliament and the Cabinet were held hostage. This was the last attempt to put the clock back. A vigorous democracy has been matched by a thriving economy.

In the Basque region terrorist activity by the separatist organization ETA has brought a reaction from the local population in the form of a strong peace movement. ETA announced an indefinite ceasefire in Sept. 1998. However, in Dec. 1999 the

ceasefire was called off and ETA announced that it would restart its campaign of terror. In Aug. 2002 Batasuna, the political wing of ETA, was accused of providing logistical support for terrorist attacks in Spain and was banned by the Spanish parliament.

[1]Ceuta and Melilla gained limited autonomous status in 1994.

The capitals of the autonomous communities are: *Andalusia*: Seville; *Aragón*: Zaragoza (Saragossa); *Asturias*: Oviedo; *Baleares*: Palma de Mallorca; *Basque Country*: Vitoria; *Canary Islands*, dual capitals, Las Palmas and Santa Cruz de Tenerife; *Cantabria*: Santander; *Castilla-La Mancha*: Toledo; *Castilla y León*: Valladolid; *Catalonia*: Barcelona; *Extremadura:* Mérida; *Galicia*: Santiago de Compostela; *Madrid*: Madrid; *Murcia*: Murcia (but regional parliament in Cartagena); *Navarra*: Pamplona; *La Rioja*: Logroño; *Valencian Community*: Valencia.

The capitals of the provinces are the towns from which they take the name, except in the cases of Álava (capital, Vitoria), Guipúzcoa (San Sebastián) and Vizcaya (Bilbao).

The islands which form the Balearics include Majorca, Minorca, Ibiza and Formentera. Those which form the Canary Archipelago are divided into two provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas de Gran Canaria. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, La Palma, Gomera and Hierro; that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos.

Places under Spanish sovereignty in Africa (Alhucemas, Ceuta, Chafarinas, Melilla and Peñón de Vélez) constitute the two provinces of Ceuta and Melilla.

Madrid: The capital city of Spain, Madrid is located on a plateau in the centre of the country on the River Manzanares. The hub of the country's transport network and financial dealings, Madrid cedes status as Spain's cultural centre to Barcelona despite possessing a proliferation of 17th and 18th century baroque and neo-classical buildings, famed art galleries and the national library.

Languages. The Constitution states that 'Castilian is the Spanish official language of the State', but also that 'All other Spanish languages will also be official in the corresponding Autonomous Communities'. At the last census (1991) Catalan (an official EU language since 1990) was spoken in Catalonia by 68% of people, Baleares (66·9%), Valencian Community (51%, where it is frequently called Valencian), and in Aragón, a narrow strip close to the Catalonian and Valencian Community boundaries. Galician, a language very close to Portuguese, was spoken by a majority of people in Galicia (91%); Basque by a significant and increasing minority in the Basque Country (26·3%), and by a small minority in northwest

Navarra (12%). It is estimated that one-third of all Spaniards speaks one of the other three official languages as well as standard Castilian. In bilingual communities, both Castilian and the regional language are taught in schools and universities.

Most of Spain has a form of Mediterranean climate with mild, moist winters and hot, dry summers, but the northern coastal region has a moist, equable climate, with rainfall well distributed throughout the year, mild winters and warm summers, and less sunshine than the rest of Spain. The south, in particular Andalusia, is dry and prone to drought.

CONSTITUTION AND GOVERNMENT

Following the death of General Franco in 1975 and the transition to a democracy, the first democratic elections were held on 15 June 1977. A new Constitution was approved by referendum on 6 Dec. 1978, and came into force 29 Dec. 1978. It established a parliamentary monarchy.

The reigning king is **Juan Carlos I**, born 5 Jan. 1938. The eldest son of Don Juan, Conde de Barcelona, Juan Carlos was given precedence over his father as pretender to the Spanish throne in an agreement in 1954 between Don Juan and General Franco. Don Juan, who resigned his claims to the throne in May 1977, died on 1 April 1993. King (then Prince) Juan Carlos married, in 1962, Princess Sophia of Greece, daughter of the late King Paul of the Hellenes and Queen Frederika. *Offspring:* Elena, born 20 Dec. 1963, married 18 March 1995 Jaime de Marichalar (*Offspring:* Froilán, b. 17 July 1998; Victoria, b. 9 Sept. 2000); Cristina, born 13 June 1965, married 4 Oct. 1997 Iñaki Urdangarín (*Offspring:* Juan, b. 29 Sept. 1999; Pablo, b. 6 Dec. 2000); Felipe, Prince of Asturias, heir to the throne, born 30 Jan. 1968.

The King receives an allowance, part of which is taxable, approved by parliament each year. In 1997 it was 990m. pesetas. There is no formal court; the (private) *Diputación de la Grandeza* represents the interests of the aristocracy.

Legislative power is vested in the *Cortes Generales*, a bicameral parliament composed of the Congress of Deputies (lower house) and the Senate (upper house). The *Congress of Deputies* has not less than 300 nor more than 400 members (350 in the general election of 2000) elected in a proportional system under which electors choose between party lists of candidates in multi-member constituencies.

The *Senate* has 259 members of whom 208 are elected by a majority system: the 47 mainland provinces elect four senators each, regardless of population; the larger

islands (Gran Canaria, Mallorca and Tenerife) elect three senators and each of the smaller islands or groups of islands (Ibiza-Formentera, Menorca, Fuerteventura, Gomera, Hierro, Lanzarote and La Palma) elect one senator. To these each self-governing community appoints one senator, and an additional senator for every million inhabitants in their respective territories. Currently 51 senators are appointed by the self-governing communities. Deputies and senators are elected by universal secret suffrage for four-year terms. The Prime Minister is elected by the Congress of Deputies.

The *Constitutional Court* is empowered to solve conflicts between the State and the Autonomous Communities; to determine if legislation passed by the Cortes is contrary to the Constitution; and to protect the constitutional rights of individuals violated by any authority. Its 12 members are appointed by the monarch. It has a nine-year term, with a third of the membership being renewed every three years.

DEFENCE

Conscription was abolished in 2001. The government had begun the phased abolition of conscription in 1996. In 2002 the armed forces became fully professional. However, a shortfall in recruitment in Spain has meant that descendants of Spanish migrants, many of whom have never been to Europe, are now joining. Since 1989 women have been accepted in all sections of the armed forces.

In 2001 defence expenditure totalled US$6,938m. (US$174 per capita), representing 1·2% of GDP.

Army. A Rapid Reaction Force is formed from the Spanish Legion and the airborne and air-portable brigades. There is also an Army Aviation Brigade consisting of 153 helicopters (28 attack).

Strength (2002) 118,000 (including 6,600 women). Of these 4,450 are stationed on the Balearic Islands, 8,600 on the Canary Islands and 8,100 in Ceuta and Melilla. There were 265,000 army reservists in 2002.

Guardia Civil. The paramilitary *Guardia Civil* numbers 72,600.

The Naval Air Service operates 17 combat aircraft and 37 armed helicopters. Personnel numbered 700 in 2002. There are 5,600 marines.

Main naval bases are at Ferrol, Rota, Cádiz, Cartagena, Palma de Mallorca, Mahón and Las Palmas (Canary Islands).

Air Force. The Air Force is organized as an independent service, dating from 1939. It is administered through four operational commands. These are geographically oriented following a reorganization in 1991 and comprise Central Air Command, Strait Air Command, Eastern Air Command and Air Command of the Canaries.

INTERNATIONAL RELATIONS

Spain is a member of the UN, WTO, BIS, the Council of Europe, NATO, OECD, WEU, the EU, OSCE, CERN, Inter-American Development Bank, Asian Development Bank and the Antarctic Treaty, and is a signatory to the Schengen Accord, which abolishes border controls between Spain, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal and Sweden.

Spain is the largest net recipient of EU development aid, receiving €5·1bn. in 2000.

ECONOMY

Agriculture accounted for an estimated 3% of GDP in 1997, industry 33% and services 63%.

According to the anti-corruption organization *Transparency International*, Spain ranked equal 20th in the world in a 2002 survey of the countries with the least corruption in business and government. It received 7·1 out of 10 in the annual index.

Overview. The core factor determining Spain's economic growth has been EU membership. In 2002 downturn in GDP growth was blamed on the economic slowdown in the euro area, the main destination of exports. Interest rates are low and credit growth has remained rapid owing to higher inflation than in most euro-area countries. Fiscal policies are focused on raising the medium-term efficiency in the use of public and private resources. A stability bill has been introduced to establish fiscal discipline in a country that is among the most decentralized in the OECD. Corporate income tax reforms aim to boost investment.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Spain; irrevocable conversion rate 166·386 pesetas to 1 euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. There are seven euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and eight coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. On the introduction of the euro there was a 'dual circulation' period before the peseta ceased to be legal tender on 28 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €68·6bn.

Foreign exchange reserves were US$28,939m. in June 2002 (US$65,773m. in Feb. 1998) and gold reserves 16·83m. troy oz. Inflation in 2000 was 3·4%, rising to 3·6% in 2001. Total money supply was €34,255m. in June 2002.

Budget. A Convergence Plan covering 1997–2000 envisaged an annual GDP growth of 3·2%, a reduction of public debt to 1·6% of GDP, the limitation of inflation to below 2·5%, and the creation of 1m. jobs by deregulating and increasing the flexibility of the economy and redistributing taxes. Spain's current account balance in 1998 was US$–1·1bn (US$2·5bn. in 1997).

Performance. The *OECD Economic Survey* of Jan. 2000 reports: 'Spain is enjoying the third year of strong growth... Interest rates eased considerably prior to entry into EMU, boosting economic activity in 1998 and 1999, while moderate wage claims and progress in reforming the labour market have bolstered job creation. Inflation has slowed to historically low levels, though it has remained above the euro average. The good performance has also been underpinned by important progress in critical areas of structural reform... The privatization process, one of the most ambitious in the OECD, has been further stepped up... As a result of sustained growth, Spain's per capita GDP has come closer to the EU average. However, despite a sharp decline, the unemployment rate still remains the highest in the OECD.'

Real GDP growth was 4·1% in 2000 and 2·8% in 2001. Total GDP (2001): US$577·5bn.

Banking and Finance. The central bank is the Bank of Spain (*Governor*, Jaime Caruana) whichgained autonomy under an ordinance of 1994. Its Governor is appointed for a six-year term. The Banking Corporation of Spain, *Argentaria*, groups together the shares of all state-owned banks, and competes in the financial market with private banks. In 1993 the government sold 49·9% of the capital of Argentaria; the remainder in two flotations ending on 13 Feb. 1998.

Spanish banking is dominated by two main banks—BSCH (Banco Santander Central Hispano) and BBVA (Banco Bilbao Vizcaya Argentaria). In Sept. 1999 BSCH had assets of 40·7trn. pesetas (US$260·7bn.) and BBVA 37·7trn. pesetas (US$241·4bn.).

There are stock exchanges in Madrid, Barcelona, Bilbao and Valencia.

In Oct. 2000 Endesa SA and Iberdrola SA, the country's two largest electricity companies, announced merger plans. The new company would have been in charge of 80% of Spain's electricity output. However, in Feb. 2001 the two

companies shelved the proposed merger. In 2001 there were nine nuclear reactors in operation.

Oil and Gas. Spain is heavily dependent on imported oil; Mexico is its largest supplier. Crude oil production (1996), 554,000 tonnes.

The government sold its remaining stake in the oil, gas and chemicals group Repsol in 1997. Natural gas production (2001) totalled 509m. cu. metres. Ever increasing consumption means that Spain has to import large quantities of natural gas, primarily from Algeria.

Wind. Spain is one of the world's largest wind-power producers, with an installed capacity of 4,830 MW at the end of 2002.

Minerals. Spain has a relatively wide range of minerals; the mining sector accounted for 1% of GDP in 1994. Coal production (1996), 13·61m. tonnes; other principal minerals (1992, in 1,000 tonnes): anthracite, 6,177; lignite (1997), 12,587; salt (1995), 4,776; iron ore (1993), 1,166; potassium salts, 594; pyrites, 406; zinc, 205; fluorspar (1997), 120; lead, 30; (1992, in tonnes) uranium, 862; tin, 7. In 1999 part-time work accounted for less than 8% of all employment in Spain—the lowest percentage in any major industrialized country.

Spain has the highest unemployment rate among EU member countries, although after reaching a peak of nearly 25% in 1994 the rate was down to 11·2% in May 2002 before rising again to 12·1% in Jan. 2003. The unemployment rate among women is double that among men. Between 1996 and early 2000 Spain created as many new jobs as were created in the rest of the EU put together—the number of people in employment has risen by 15% since José María Aznar became Prime Minister in 1996. In spite of the high unemployment rate, by 2000 there were labour shortages in agriculture and construction, as a result of which the government reached an agreement with Morocco to import temporary contract labour.

Between 1989 and 1998 strikes cost Spain an average of 346 days per 1,000 employees a year, compared to the EU average of 85 per 1,000. Spain's figure was the highest in the EU.

SOCIAL INSTITUTIONS

Justice. Justice is administered by Tribunals and Courts, which jointly form the Judicial Power. Judges and magistrates cannot be removed, suspended or transferred except as set forth by law. The Constitution of 1978 established the *General Council of the Judicial Power*, consisting of a President and 20 magistrates, judges, attorneys and lawyers, governing the Judicial Power in full independence from the state's legislative and executive organs. Its members are appointed by the *Cortes Generales*. Its President is that of the Supreme Court (*Tribunal Supremo*), who is appointed by the monarch on the proposal of the General Council of the Judicial.

The Judicature is composed of the Supreme Court; 17 Higher Courts of Justice, 1 for each autonomous community; 52 Provincial High Courts; Courts of First Instance; Courts of Judicial Proceedings, not passing sentences; and Penal Courts, passing sentences.

The Supreme Court consists of a President, and various judges distributed among 7 chambers: 1 for civil matters, 3 for administrative purposes, 1 for criminal trials, 1 for social matters and 1 for military cases. The Supreme Court has disciplinary faculties; is court of appeal in all criminal trials; for administrative purposes decides in first and second instance disputes arising between private individuals and the State; and in social matters makes final decisions.

A new penal code came into force in May 1996, replacing the code of 1848. It provides for a maximum of 30 years imprisonment in specified exceptional cases, with a normal maximum of 20 years. Sanctions with a rehabilitative intent include fines adjusted to means, community service and weekend imprisonment. The death penalty was abolished by the 1978 Constitution. The prison population in 1997 was 42,827 (110 per 100,000 of national population); 110,844 criminal sentences were passed in 1996. A jury system commenced operating in Nov. 1995 in criminal cases (first trials in May 1996). Juries consist of nine members.

A juvenile criminal law of 1995 lays emphasis on rehabilitation. It raised the age of responsibility from 12 to 14 years. Criminal conduct on the part of children under 14 is a matter for legal protection and custody. 14- and 15-year-olds are classified as 'minors'; 16- and 17-year-olds as 'young persons'; and the legal majority for criminal offences is set at 18 years. Persons up to the age of 21 may, at the courts' discretion, be dealt with as juveniles.

The *Audiencia Nacional* deals with terrorism, monetary offences and drug-trafficking where more than one province is involved. Its president is appointed by the General Council of the Judicial Power.

In Sept. 1997 a joint declaration with trade unions, parents' and schools' associations was signed in support of a new finance law guaranteeing that spending on education will reach 6% of GDP within five years, thus protecting it from changes in the political sphere. In 1996 expenditure on education came to 5·0% of GNP and 11·0% of total government spending.

A new compulsory secondary education programme has replaced the Basic General Education programme which was in force since 1970. In addition, university entrance exams underwent reform in 1997, resulting in greater emphasis now being placed on the teaching of Humanities at secondary level.

KEY HISTORICAL EVENTS

In the 18th century the central kingdom, Kandy, was the only surviving independent state on the island of Ceylon. The Dutch, who had obtained their first coastal possessions in 1636, had driven out the Portuguese to become the dominant power in the island. In 1796 the British East India Company sent a naval force to Ceylon (as the British then called it). The Dutch surrendered their possessions, which left the British in control of the maritime areas surrounding Kandy. These areas were at first attached to the Madras Presidency of India but in 1802 they were constituted a separate colony under the Crown. Once the British began to develop their new territory they came to see Kandy as a threat. The Kandyan Convention of 1815 annexed Kandy to British Ceylon while recognizing most of the traditional rights of the chiefs. However, in 1817 the chiefs rebelled. The rebellion was suppressed and the rights established by the Convention were abolished.

Ceylon was then united for the first time since the 12th century. The British built up a plantation economy. Coffee was dominant until an outbreak of *Hoemilia vastatrix* fungus destroyed the plants in 1870. Spices, cocoa and rice all followed but tea became the main cash crop after successful experiments in the 1880s. Foreign rule served to subdue the traditional hostility between northern Tamils and southern Sinhalese. The Ceylon National Congress, formed in 1919, contained both Sinhalese and Ceylon Tamil groups. (The Indian Tamils brought in as a labour force for the tea estates were a separate community.) Tamil national feeling, however, was expressed over the issue of the use of Tamil languages in schools. As early as 1931 a general election took place under universal suffrage, just two years after the first one in the UK. On 4 Feb. 1948 Ceylon became a Dominion of the Commonwealth. In 1956 Solomon Bandaranaike became prime minister at the head of the People’s United Front, advocating neutral foreign policy and the promotion of Sinhalese national culture at home. In Sept. 1959 he was murdered; his widow Sirimavo Bandaranaike succeeded him in July 1960 at the head of an increasingly socialist government. In May 1972 Ceylon became a republic and adopted the name Sri Lanka. In July 1977 the United National Party (dominant until 1956) returned to power and in 1978 a new constitution set up a presidential system. The problem of communal unrest remained unsolved and Tamil separatists were active. In 1983 the Tamil United Liberation Front members of parliament were asked to renounce their objective for a separate Tamil state in the north and the east of the country. They refused and withdrew from parliament. Militant Tamils then began armed action which developed into civil war. A state of emergency ended on 11 Jan. 1989, but violence continued.

President Ranasinghe Premadasa was assassinated on 1 May 1993. A ceasefire was signed on 3 Jan. 1995, but fighting broke out again in April. The ‘Liberation Tigers of the Tamil Eelam’ stronghold of Jaffna in the far north of the country was captured by government forces in Dec. 1995 and by mid-1997 was under government control. In April 2000 the Tamil Tigers captured a military garrison at Elephant Pass, the isthmus that links Jaffna to the rest of Sri Lanka, increasing the possibility that they might re-take the Jaffna peninsula. A month-long ceasefire began in Dec. 2001 amid signs that the Tigers might be willing to engage in peace talks, and on 22 Feb. 2002 the government and Tamil Tiger leaders agreed to an internationally-monitored ceasefire, paving the way to the first full-scale peace talks for seven years. An

estimated 61,000 people died during the 19-year long conflict. In Sept. 2002 the ban on the Tamil Tigers was formally lifted and they subsequently abandoned their ambitions for a separate state, settling instead for regional autonomy.

KEY HISTORICAL EVENTS

In 1821 the area that is now Sudan was conquered by the Egyptians. In 1881 Muhammad Ahmad, proclaiming himself the Mahdi, led an uprising and gained control until, in 1899, an Anglo-Egyptian army defeated the Mahdi and established an Anglo-Egyptian condominium.

On 1 Jan. 1956 Sudan was proclaimed a sovereign independent republic. In 1958 a coup led to a military government until the end of 1964 when a civilian government was re-established. The government was faced with constant difficulties from the southern provinces which considered themselves dominated by the north. Rebellions began in 1965. On 25 May 1969 the government was taken over by a ten-man Revolutionary Council. The Council was dissolved in 1972, legislative power was placed with a National Assembly, an elected body, and some measure of self-government was granted to the southern provinces. However, discontent continued and in April 1985 a Military Council was set up prior to the promised re-establishment of civilian rule. Elections were held, although they were suspended in parts of the southern provinces, in April 1986. On 30 June 1989 Brig.-Gen. (later Lieut.-Gen.) Omar Hassan Ahmad al-Bashir overthrew the civilian government in a military coup.

The rebel Sudan People's Liberation Army (SPLA), consisting of non-Muslim southerners, maintains guerrilla activities in the south while the National Democratic Alliance (NDA), northern Muslims opposed to the ruling National Islamic Front, and non-Muslim southerners of the SPLA fight on in the north. Fighting also erupted in Jan. 1997 along the border with Ethiopia. On 9 July 1997 at a meeting attended by representatives of Djibouti, Eritrea, Ethiopia, Kenya and Uganda the Sudanese government accepted a 'Declaration of Principles' as a framework for negotiations to end the civil war, including the separation of state and religion and self-determination for the Christian and animist south of Sudan. After 18 years Sudan's civil war has killed nearly 2m. people and reduced the south to a level barely above subsistence. It is among the most devastating wars in African history. In Dec. 1999 President al-Bashir dissolved the National Assembly, declaring a state of national emergency. In July 2002 peace talks were held between the government and the SPLA, leading to a framework deal on ending the civil war. Although fighting continues there are hopes that a peace agreement may soon be signed.

TERRITORY AND POPULATION

Sudan is bounded in the north by Egypt, northeast by the Red Sea, east by Eritrea and Ethiopia, south by Kenya, Uganda and the Democratic Republic of the Congo, west by the Central African Republic and Chad, and northwest by Libya. Its area is 967,500 sq. miles (2,505,815 sq. km). In 1993 the census population was 25·6m. Population estimate (2000), 29·82m., giving a density of 11·9 per sq. km. In 1999, 64·9% of the population were rural.

The UN gives a projected population for 2010 of 38·67m.

In Feb. 1994 the former nine regions were subdivided to form 26 federal states as follows:

Former region	*New states*
Khartoum	Khartoum
Bahr al-Ghazal	Western Bahr al-Ghazal; Northern Bahr al-Ghazal; Warab
Central	Gezira; White Nile; Sinnar; Blue Nile
Darfur	Northern Darfur; Southern Darfur; Western Darfur
Eastern	Red Sea; Gedaref; Kassala
Equatoria	Eastern Equatoria; Western Equatoria; Bahr al-Jabal
Kurdufan	Northern Kurdufan; Southern Kurdufan; Western Kurdufan
Northern	Nile; Northern State
Upper Nile	Upper Nile; Unity State; Jonglei; Buheyrat

The capital, Khartoum, had a population of 2,628,000 in 1999. Other major cities, with 1993 populations, are Port Sudan (305,385), Kassala (234,270), Nyala (228,778), al-Obeid (228,096), Wadi Medani (218,714), al-Qadarif (189,384).

The northern and central thirds of the country are populated by Arab and Nubian peoples, while the southern third is inhabited by Nilotic and Bantu peoples. Sudan has more internally displaced people (4m. in 2000) than any other country.

Arabic, the official language, is spoken by 60% of inhabitants. English is the second language.

SOCIAL STATISTICS

1997 births, 1,323,000; deaths, 365,000. Rates, 1997 estimates (per 1,000 population); births, 40·6; deaths, 11·2. Infant mortality, 1999 (per 1,000 live births), 67. CLIMATE

Lying wholly within the tropics, the country has a continental climate and only the Red Sea coast experiences maritime influences. Temperatures are generally high for most of the year, with May and June the hottest months. Winters are virtually cloudless and night temperatures are consequently cool. Summer is the rainy season inland, with amounts increasing from north to south, but the northern areas are virtually a desert region. On the Red Sea coast, most rain falls in winter. Khartoum, Jan. 64°F (18·0°C), July 89°F (31·7°C). Annual rainfall 6" (157 mm). Juba, Jan. 83°F (28·3°C), July 78°F (25·6°C). Annual rainfall 39" (968 mm). CONSTITUTION AND GOVERNMENT

The constitution was suspended after the 1989 coup and a 12-member Revolutionary Council then ruled. A 300-member Provisional National Assembly was appointed in Feb. 1992 as a transitional legislature pending elections. These were held in March 1996. The President is elected for a five-year term by the people. The National Assembly (*Majlis Watani*), currently suspended, normally has 400 members, 275 of whom are directly elected for four years in single-seat constituencies, 125 indirectly elected by national conference.

On 26 May 1998 President Omar Hassan Ahmad al-Bashir approved a new constitution. Notably this lifted the ban on opposition political parties, although the government continued to monitor and control criticism until the constitution legally came into effect.

RECENT ELECTIONS

Presidential elections were held from 13–22 Dec. 2000. President Omar Hassan Ahmed al-Bashir was re-elected by 86·5% of votes cast, with his nearest rival, former president Gaafar Nimeiry, gaining 9·6%. The main opposition groups and most of the electorate boycotted the polls. At the National Assembly elections held at the same time the ruling National Congress Party (NCP) won 355 of the 360 seats.

SOCIAL INSTITUTIONS

Justice. The judiciary is a separate independent department of state, directly and solely responsible to the President of the Republic. The general administrative supervision and control of the judiciary is vested in the High Judicial Council.

Civil Justice is administered by the courts constituted under the Civil Justice Ordinance, namely the High Court of Justice—consisting of the Court of Appeal and Judges of the High Court, sitting as courts of original jurisdiction—and Province Courts—consisting of the Courts of Province and District Judges. The law administered is 'justice, equity and good conscience' in all cases where there is no special enactment. Procedure is governed by the Civil Justice Ordinance.

Justice for the Muslim population has always been administered by the Islamic law courts, which form the Sharia Divisions of the Court of Appeal, High Courts and Kadis Courts; President of the Sharia Division is the Grand Kadi. In Dec. 1990 the government announced that Sharia would be applied in the non-Muslim southern parts of the country as well.

Criminal Justice is administered by the courts constituted under the Code of Criminal Procedure, namely major courts, minor courts and magistrates' courts. Serious crimes are tried by major courts, which are composed of a President and two members and have the power to pass the death sentence. Major Courts are, as a rule, presided over by a Judge of the High Court appointed to a Provincial Circuit or a Province Judge. There is a right of appeal to the Chief Justice against any decision or order of a Major Court, and all its findings and sentences are subject to confirmation by him.

Lesser crimes are tried by Minor Courts consisting of three Magistrates and presided over by a Second Class Magistrate, and by Magistrates' Courts.

The population in penal institutions in 1997 was 32,000 (115 per 100,000 of national population).

Religion. Islam is the state religion. In 1992 there were 21·9m. Sunni Muslims, concentrated in the north, and 2·4m. Christians and some 5m. traditionalist animists in the south.

KEY HISTORICAL EVENTS

The first Europeans to reach the area were the Spanish in 1499 but it was the British who established a colony in 1650. At the peace of Breda (1667), Suriname was assigned to the Netherlands in exchange for the colony of New Netherland in North America. Suriname was twice in British possession during the Napoleonic Wars, in 1799–1802 and 1804–16, when it was returned to the Netherlands.

On 25 Nov. 1975 Suriname gained full independence. On 25 Feb. 1980 the government was ousted in a coup and a National Military Council (NMC) established. A further coup on 13 Aug. replaced several members of the NMC and the State President. Other attempted coups took place in 1981 and 1982, with the NMC retaining control. In Oct. 1987 a new constitution was approved by referendum. Following elections in Nov. Suriname returned to democracy in Jan. 1988 but on 24 Dec. 1990 a further military coup deposed the government. There was a peace agreement with rebel groups in Aug. 1992 and elections were held in May 1996.

KEY HISTORICAL EVENTS

The Swazi migrated into the country to which they have given their name in the last half of the 18th century. In 1894 the South African Republic was given powers of protection and administration. In 1902, after the conclusion of the Boer War, a special commissioner took charge, and under an order-in-council in 1903 the Governor of the Transvaal administered the territory. Swaziland became independent on 6 Sept. 1968. A state of emergency imposed in 1973 is still in force. On 25 April 1986 King Mswati III was installed as King of Swaziland.

KEY HISTORICAL EVENTS

Sweden was organized as an independent unified state in the 10th century when the Swedes in the north of the country and the Goths in the south were united by Olof. Finland was acquired in the 13th century. In the 14th century Sweden was joined with Norway and Denmark in the Kalmar Union; however, under Gustavus Vasa Sweden regained her independence in 1523. Under Gustavus Adolphus (1611–32) Sweden became a first rank military power and, at the close of the Thirty Years War in 1648, was in possession of Pomerania and of extensive territories on the eastern shores of the Baltic. But war with Russia and her allies in the early 18th century ended disastrously for Sweden. By the treaty of Nystad (1721) Sweden lost her Baltic empire. In 1810 the French marshal, Bernadotte, was made crown prince. With the fall of Napoleon, Norway was taken from Denmark and attached to Sweden. Bernadotte became King in 1818. Sweden became a constitutional monarchy in 1809, in which year she also ceded Finland to Russia. Norway became independent in 1905. Sweden remained neutral during the two world wars of 1914–18 and 1939–45.

From 1932 to 1976 Sweden was governed by the Social Democratic Party which set the model for welfare reform, combined with rapid economic growth. But high taxation brought a reaction in the 1970s when the Centre Party (representing chiefly small farmers and traders) and the Conservatives staged a comeback which brought them to power in coalition with the Liberal Party in 1976. However, in 1981 the Social Democrat leader, Olof Palme, became prime minister with support from the Communist Party. On 28 Feb. 1986 Olof Palme was assassinated in Stockholm by unknown assailants. In 1991 a Conservative-led coalition took over the government at a time of recession. Austerity measures helped in the revival of the Social Democrats who returned to power in 1994 but with a commitment to economic stringency. Although the Social Democrats won the 1998 election, they saw their support fall to its lowest level since the First World War. Sweden joined the EU on 1 Jan. 1995 and is likely soon to hold a referendum on adopting the euro.

Under the 1975 Constitution Sweden is a representative and parliamentary democracy. The King is Head of State, but does not participate in government. Parliament is the single-chamber *Riksdag* of 349 members elected for a period of four years in direct, general elections.

The manner of election to the *Riksdag* is proportional. The country is divided into 29 constituencies. In these constituencies 310 members are elected. The remaining 39 seats constitute a nationwide pool intended to give absolute proportionality to parties that receive at least 4% of the votes. A party receiving less than 4% of the votes in the country is, however, entitled to participate in the distribution of seats in a constituency, if it has obtained at least 12% of the votes cast there.

A parliament, the *Sameting*, was instituted for the Sami (Lapps) in 1993.

National Anthem. 'Du gamla, du fria' ('Thou ancient, thou free'); words by R. Dybeck; folk-tune.

DEFENCE

The Supreme Commander is, under the government, in command of the three services. The Supreme Commander is assisted by the Swedish Armed Forces HQ. There is also a Swedish Armed Forces Logistics Organization.

The conscription system consists of 7½–18 months of military service for males. Females have the possibility to serve on a voluntary basis.

In 2002 military expenditure totalled US$4·8bn. (US$540 per capita), representing an estimated 1·98% of GDP. Sweden's national security policy is currently undergoing a shift in emphasis. Beginning with the decommissioning of obsolete units and structures, the main thrust of policy is the creation of contingency forces adaptable to a variety of situations.

The government stressed that Sweden's membership of the EU (in 1995) did not imply any change in Sweden's traditional policy of non-participation in military alliances, with the option of staying neutral in the event of war in its vicinity.

Sweden has modern air raid shelters with capacity for some 7m. people. Since this falls short of providing protection for the whole population, evacuation and relocation operations would be necessary in the event of war.

The National Board of Psychological Defence, whose main task is to safeguard the free, undisrupted transmission of news, has also made preparations for 'psychological defence' in wartime. This is regarded as the best possible antidote against enemy propaganda, disinformation and rumour-mongering of the kind that can be expected in times of war.

Army. The Army consists of 1 division HQ and divisional units, 6 army brigade command and control elements, and 54 battalions. Army strength, Jan. 2003, 20,000 (10,769 conscripts). The Army can mobilize a reserve of approximately 200,000 of whom 85,000 are Home Guard and 11,100 reservists.

The Home Guard is part of the army. Its main task is to protect important local installations against sabotage.

Navy. The Navy has 2 surface warfare flotillas, 1 mine warfare flotilla, 1 submarine flotilla and 1 amphibious brigade.

The personnel of the Navy in Jan. 2003 totalled 5,600 (active manpower, including 2,600 conscripts). Strength available for mobilization, 20,000 (includes 2,500 reservists).

Air Force. The Air Force consists of 3 fighter control and air surveillance battalions, 8 air-base battalions, 8 fighter squadrons, 2 air transport squadrons (central) and 2 air transport squadrons (regional).

Strength (Jan. 2003) 6,500 (2,000 conscripts), plus 16,000 available for mobilization (including 1,670 reservists).

During peacetime all the helicopters of the Swedish Armed Forces are organized into a detached organization directly under the Swedish Armed Forces Headquarters.

INTERNATIONAL RELATIONS

Sweden is a member of the UN, WTO, BIS, NATO Partnership for Peace, BIS, OECD, EU, Council of Europe, OSCE, CERN, Nordic Council, Council of the Baltic Sea States, Inter-American Development Bank, Asian Development Bank, IOM and the Antarctic Treaty. Sweden is a signatory to the Schengen Accord, which abolishes border controls between Sweden, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal and Spain.

ECONOMY

Services accounted for 73% of GDP in 2001, industry 25% and agriculture 2%.

According to the anti-corruption organization *Transparency International*, in 2002 Sweden ranked equal 5th in the world in a survey of the countries with the least corruption in business and government. It received 9·3 out of 10 in the annual index.

Overview. Sweden combines an extensive welfare state with a market economy. Expenditure ceilings and a target for the cyclically adjusted budget surplus have governed fiscal policy sine 1997. In 2002 an expansionary fiscal policy and competitive exports contributed to sound economic developments. Fiscal stimulus for 2002 has targeted household expenditure. As the fiscal position is expected to deteriorate in 2003, the government could breach its self-imposed ceilings on public expenditure. Monetary policy has targeted a 2% inflation rate since 1993, but in 2001 inflation was 2·7% before dropping to 2% in May 2002. In Sept. 2003 the government will hold a referendum on adopting the euro.

Currency. The unit of currency is the *krona* (SEK), of 100 *öre*. The annual inflation rate was 2·9% in Jan. 2002 (1·7% in Jan. 2001 and 0·8% in Jan. 2000). Foreign exchange reserves were US$14,967m. and gold reserves 5·96m. troy oz in June 2002.

Budget. Revenue of 725·0bn. kr. and expenditure of 716·6bn. kr is estimated for the total budget (Current and Capital) for financial year 2002.

VAT is 25% (reduced rate, 12% and 6%). In 2001 tax revenues were 54·2% of GDP (the highest percentage of any developed country).

Performance. Real GDP growth was 3·6% in 1998, 4·6% in 1999 and 4·4% in 2000, but only 0·8% in 2001. Sweden's total GDP in 2001 was US$210·1bn.

The OECD reported in 2001 that 'Sweden is now profiting from macroeconomic and structural reforms undertaken in the wake of the severe recession of the early 1990s. Output has been growing at around 4% per year, while inflation has been lower than in almost all other OECD countries.' But even with healthy external and fiscal balances, the economy is still growing faster than can be sustained in the medium term. Higher interest rates are expected to start to relieve the pressure. The OECD report concludes: 'Sweden is well placed to maintain admirable economic outcomes and to achieve an even higher standard of living as long as it continues pursuing macroeconomic policies and satisfactorily addresses its remaining structural weaknesses.'

In 2001 the state debt amounted to 1,154bn. kr.

Banking and Finance. The central bank and bank of issue is the *Sveriges Riksbank*. The bank has 11 trustees, elected by parliament, and is managed by a directorate, including the governor, appointed by the trustees. In Jan. 2003 a new *Governor*, Lars Heikensten, was appointed for a six-year term. On 31 Dec. 2000 there were 48 commercial banks. Their total deposits amounted to 1,104,570m. kr.; advances to the public amounted to 975,212m. kr. In April 2003 there were 77 savings banks and 20 branches of foreign banks. The largest banks are Nordea Bank AB (previously MeritaNorbanken, formed in 1997 when Nordbanken of Sweden merged with Merita of Finland), Svenska Handelsbanken, Skandinavska Enskilda Banken and FöreningsSparbanken. In April 2000 MeritaNordbanken acquired Denmark's Unidanmark, thereby becoming the Nordic region's biggest bank in terms of assets. It became Nordea Bank AB in Dec. 2001. By Oct. 2000 approximately 27% of the Swedish population were using e-banking.

In 1999 Sweden received US$60bn. worth of foreign direct investment, equivalent to 25·1% of its GDP—the highest percentage of any country in the world.

There is a stock exchange in Stockholm.

Weights and Measures. The metric system is obligatory.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* Sweden's carbon dioxide emissions in 1998 were the equivalent of 5·5 tonnes per capita. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked Sweden third in the world, with 72·6%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

Electricity. Sweden is rich in hydro-power resources. Installed capacity was 34,080 MW in 1999, of which 16,433 MW was in hydro-electric plants, 10,076 MW in nuclear plants and 7,375 MW in thermal plants. Electricity production in 2000 was 144,966m. kWh; consumption was 160,203 kWh. In 1998 consumption per capita was 13,955 kWh. A referendum of 1980 called for the phasing out of nuclear power by 2010. In Feb. 1997 the government began denuclearization by designating one of the 12 reactors for decommissioning. The state corporation Vattenfall was given the responsibility of financing and overseeing the transition to the use of non-fossil fuel alternatives. In 2001 there were 11 nuclear reactors in operation.

Minerals. Sweden is a leading producer of iron ore with around 2% of the world's total output. It is the largest iron ore exporter in Europe. There are also deposits of copper, lead, zinc and alum shale containing oil and uranium. Iron ore produced, 1998, 20·9m. tonnes; copper ore, 270,000 tonnes; zinc concentrates, 297,000 tonnes.

The mining industry accounts for 1·0% of the market value of Sweden's total industrial production and employs 0·5% of the total industrial labour force.

Agriculture. In 1999 the total area of land given over to farms of 2 ha or more was 7,630,720 ha, of which 2,746,929 ha was arable land; 447,149 was natural pasture; 3,734,193 was forest; and 702,449 other. Of the land used for arable farming, 2–5 ha holdings covered a total area of 43,524 ha; 5·1–10 ha holdings covered 114,858 ha; 10·1–20 ha, 244,007; 20·1–30 ha, 230,210; 30·1–50 ha, 448,199; 50·1–100 ha, 762,368 and holdings larger than 100 ha covered 903,765 ha. There were 80,119

agricultural enterprises in 1999 compared to 150,014 in 1971 and 282,187 in 1951. Around 40% of the enterprises were between 5 and 20 ha. Figures compiled by the Soil Association, a British organization, show that in 1999 Sweden set aside 268,000 ha (11·2% of its agricultural land—one of the highest proportions in the world) for the growth of organic crops.

Agriculture accounts for 5·8% of exports and 7·9% of imports. The agricultural sector employs 3% of the workforce.

Forestry. Forests form one of the country's greatest natural assets. The growing stock includes 46% Norway spruce, 36% Scots pine, 12% birch and 6% other. In the period 1995–99 forests covered 22,740,000 ha (55% of the land area). The state owns only 5% of productive forest lands. During 1993 most government-owned timberland was transferred to a forest production corporation (AssiDomän) in which the state owns 51% of shares, and the remaining 49% are quoted on the stock exchange. Public ownership accounts for 8% of the forests, limited companies own 37%, the state 5% and the remaining 50% is in private hands. Of the 58·7m. cu. metres of wood felled in 1999, 30·3m. cu. metres were sawlogs, 21·5m. cu. metres pulpwood, 5·9m. cu. metres fuelwood and 1·0 cu. metres other.

Fisheries. In 2000 the total catch was 332,408 tonnes, worth 955·1m. kr.

INDUSTRY

The leading companies by market capitalization in Sweden, excluding banking and finance, in Jan. 2002 were: Telefonaktiebolaget LM Ericsson (385bn. kr); H & M—Hennes & Mauritz AB (157bn. kr), a clothing and cosmetics company; Telia AB (131bn. kr), a telecommunications company. Telia AB has in the meantime merged with the Finnish company Sonera to become TeliaSonera.

Manufacturing is mainly based on metals and forest resources. Chemicals (especially petro-chemicals), building materials and decorative glass and china are also important.

The unemployment rate in Jan. 2003 was 5·3%. In 1999, 74·8% of men and 70·9% of women between the ages of 15 and 64 were in employment. No other major industrialized nation has such a small gap between the employment rates of the sexes.

In 2000 a total of 272 working days were lost through strikes, compared to 733,284 in 1995.

Trade Unions. At 31 Dec. 2000 the Swedish Trade Union Confederation (LO) had 18 member unions with a total membership of 2,016,208; the Central Government Organization of Salaried Employees (TCO) had 18, with 1,244,589; the Swedish Confederation of Professional Associations (SACO) had 26, with 492,706; the Central Organization of Swedish Workers (SAC) had 8,203 members.

In March 1997 employers' organizations and trade unions signed an agreement on the conduct of wage negotiations in 1998. The agreement involved 0·8m. workers, and provided for the establishment of an Industrial Committee to promote the development of industry.

COMMUNICATIONS

Roads. In 2001 there were 212,000 km of roads open to the public of which 98,173 km were state-administered roads (main roads, 15,079 km; secondary roads, 83,094 km). A total of 77·2% were surfaced. There were also 1,499 km of motorway. Motor vehicles in 2000 included 3,999,000 passenger cars, 374,000 lorries, 14,000 buses and 310,000 motorcycles and mopeds. Sweden has one of the lowest death rates in road accidents of any industrialized country, at 6·7 deaths per 100,000 people. 591 people were killed in traffic accidents in 2000.

Rail. Total length of railways at 31 Dec. 2000 was 11,041 km (7,507 km electrified). In 2000, 132m. passengers and 56·7m. tonnes of freight were carried. There is a metro in Stockholm (108 km), and tram/light rail networks in Stockholm, Göteborg (81 km) and Norrköping.

Civil Aviation. The main international airports are at Stockholm (Arlanda), Göteborg (Landvetter) and Malmö (Sturup). The principal carrier is Scandinavian Airlines System (SAS), of which SAS Sverige AB is the Swedish partner (SAS Denmark A/S and SAS Norge ASA being the other two). SAS has a joint paid-up capital of 14,241m. Sw. kr. Capitalization of SAS Sverige AB, 5,560m. Sw. kr., of which 50% is owned by the government and 50% by private enterprises.

In 1997 the total distance flown was 109·0m. km; passenger-km, 8,893·7m.; goods, 294·7m. tonne-km. These figures represent the Swedish share of the SAS traffic (Swedish domestic and three-sevenths of international traffic). Malmö Aviation and Skyways AB, both Sweden-based carriers, operate some international as well as domestic flights.

In 2000 Stockholm (Arlanda) handled 18,263,926 passengers (11,503,799 on international flights) and 120,535 tonnes of freight. Göteborg (Landvetter) was the second busiest airport, handling 4,205,541 passengers (2,841,619 on international flights) and 57,510 tonnes of freight. GRT) while passenger ferries numbered 85,861 (772·48m. GRT). The number of cargo vessels leaving Swedish ports in 2000 totalled 27,419 (190·90m. GRT) and the number of passenger ferries leaving was 85,932 (772·81m. GRT).

The busiest port is Göteborg. In 2000 a total of 33·26m. tonnes of goods were loaded and unloaded there (29·8m. tonnes unloaded from and loaded to foreign ports). Other major ports are Brofjorden, Trelleborg, Helsingborg and Luleå.

Telecommunications. There were 6,056,800 main telephone lines in 2000, or 682·0 per 1,000 population. In June 2000 the state sold off a 30% stake in the Swedish telecommunications operator Telia. In Dec. 2002 Telia and the Finnish telecommunications operator Sonera merged to become TeliaSonera. The Swedish state owns 46% and the Finnish state 19%. 5·58m. mobile phones were in use in Nov. 2000. More than 57% of Swedes are mobile phone subscribers—one of the highest penetration rates in the world. There were 4·5m. PCs in 2000 (506·7 per 1,000 population) and 450,000 fax machines in 1996. In Sept. 2002 there were 6·02m. Internet users, or 67·81% of the total population (the second highest percentage in the world, after Iceland).

Sweden has been one of the most active countries in the adoption of information technology. Kista Science Park, in the northwest of Stockholm, was ranked second equal in the world behind Silicon Valley by *Wired Magazine* in 2000 in a listing of the most significant locations for IT research and development.

Postal Services. There were 1,741 post offices at the end of 2000. In the meantime many traditional post offices have closed down and have been replaced by up to 3,000 new postal service outlets in locations such as shops and petrol stations. A total of 5,555m. pieces of mail were processed in 1999, equivalent to 627 per person.

SOCIAL INSTITUTIONS

Justice. Sweden has two parallel types of courts—general courts that deal with criminal and civil cases and general administrative courts that deal with cases related

to public administration. The general courts have three instances: 23 county administrative courts, 4 administrative courts of appeal and the Supreme Administrative Court. There are 72 district courts, of which 25 also serve as real estate courts. In addition, a number of special courts and tribunals have been established to hear specific kinds of cases and matters.

Every district court, court of appeal, county administrative court and administrative court of appeal has a number of lay judges. These take part in the adjudication of both specific concrete issues and matter of law; each has the right to vote.

Criminal cases are normally tried by one judge and three lay judges. Civil disputes are normally heard by a single judge or three judges. In the courts of appeal, criminal cases are determined by three judges and two lay judges. Civil cases are tried by three or four judges. In the settlement of family cases, lay judges take part in the proceedings in both the district court and in the court of appeal. Proceedings in the general administrative courts are in writing; i.e. the court determines the case on the basis of correspondences between the parties. Nevertheless, it is also possible to hold a hearing. The cases are determined by a single judge or one judge and three lay judges. In the administrative court of appeal, cases are normally heard by three judges or three judges and two lay judges.

Those who lack the means to take advantage of their rights are entitled to legal aid. Everyone suspected of a serious crime or taken into custody has the right to a public counsel (advocate). The title advocate can only be used by accredited members of the Swedish Bar Association. Qualifying as an advocate requires extensive theoretical and practical training. All advocates in Sweden are employed in the private sector.

The control over the way in which public authorities fulfil their commitments is exercised by the Parliamentary Ombudsmen and the Chancellor of Justice. In 2000–01 the Ombudsmen received 4,664 cases altogether, of which 133 were instituted on their own initiative. Sweden has no constitutional court. However, in each particular case the courts do have a certain right to ascertain whether a statute meets the standards set out by superordinate provisions.

On average, approximately 4,000 people are held in prison every day. There are 55 prisons spread throughout the country.

There were 166 reported murders in 2001 (121 in 1990 and 175 in 2000).

Religion. The Swedish Lutheran Church was disestablished in 2000. It is headed by Archbishop Karl Gustaf Hammar (b. 1943) and has its metropolitan see at Uppsala. In 1996 there were 13 bishoprics and 2,544 parishes. The clergy are chiefly supported from the parishes and the proceeds of the church lands. Around 87% of the population, equivalent to 7·7m. people, belong to the Church of Sweden. Other denominations, in 2000: Pentecostal Movement, 89,670 members; The Mission Covenant Church of Sweden, 66,082; InterAct, 28,964; Salvation Army, 24,109; Örebro Missionary Society (1996), 22,801; Swedish Evangelical Mission, 17,551; The Baptist Union of Sweden, 17,942; Swedish Alliance Missionary Society, 12,833; Holiness Mission (1996), 6,393. There were also 158,000 Roman Catholics (under a Bishop resident at Stockholm). The Orthodox and Oriental churches number around 98,500 members.

There were around 18,000 Jews and 250,000 Muslims in Sweden in 1998.

Education. In 2000–01 there were 728,872 pupils in primary education (grades 1–6 in compulsory comprehensive schools); secondary education at the lower stage (grades 7–9 in compulsory comprehensive schools) comprised 323,057 pupils. In secondary education at the higher stage (the integrated upper secondary school), there were 305,270 pupils in Oct. 2000 (excluding pupils in the fourth year of the technical course regarded as third-level education). The folk high schools, ‘people’s colleges’, had 29,060 pupils on courses of more than 15 weeks in the autumn of 2000.

In municipal adult education there were 227,634 students in 2000.

There are also special schools for pupils with visual and hearing handicaps (807 pupils in 2000) and for those who are intellectually disabled (18,623 pupils).

In 1999–2000 there were in integrated institutions for higher education 319,0911 students enrolled for undergraduate studies. The number of students enrolled for postgraduate studies in 2000 was 18,162.

In 1997 total expenditure on education came to 7·65% of GDP. The adult literacy rate is at least 99%. In an OECD literacy survey carried out between 1994 and 1999, analysing prose literacy, document literacy and quantitative literacy, Sweden led the world, ahead of Denmark and Norway.

Health. In 2000 there were 24,500 doctors, 4,400 dentists, 77,700 nurses and midwives and in 2000 there were 31,765 hospital beds. In 1996 the total cost of healthcare was 128bn. kr., representing 7·6% of GNP.

The Swedes smoked an average of 992 cigarettes per person in 1994.

Welfare. Social insurance benefits are granted mainly according to uniform statutory principles. All persons resident in Sweden are covered, regardless of citizenship. All schemes are compulsory, except for unemployment insurance. Benefits are usually income-related. Most social security schemes are at present undergoing extensive discussion and changes. Recent proposals include the introduction of a new pension scheme.

Type of social insurance scheme	*Payments 2000 (in 1m. kr.)*
Old-age pension	163,488
Sickness insurance	84,559
Unemployment insurance	27,872
Child allowance	18,878
Parental insurance	16,488
Survivor's pension	13,806
Housing supplement	9,641
Work injury insurance	7,343

In 1996, 34·8% of GNP was spent on social security—the highest percentage of any EU-member country.

Under a Pension Reform Plan Sweden is one of the world's leaders in the shift to private pension systems. In the new system each worker's future pension will be based on the amount of money accumulated in two separate individual accounts. The bulk of retirement income will come from a notional account maintained by the government on behalf of the individual, but a significant portion of retirement income will come from a completely private individual account. There are two types of pension—the income pension and the premium pension. The income pension comes under a pay-as-you-go system, with the premium pension being a scheme where contributions are invested in a fund chosen by the insured person.

KEY HISTORICAL EVENTS

The history of Switzerland can be traced back to Aug. 1291 when the Uri, Schwyz and Unterwalden entered into a defensive league. In 1353 the league included 8 members and in 1515, 13. In 1648 the league became formally independent of the Holy Roman Empire. No addition was made to the number of cantons until 1798 in which year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss and in 1803 Napoleon granted a new constitution and increased the number of cantons to 19. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, France, Great Britain, Portugal, Prussia, Spain and Sweden, and the Federal Pact, which included three new cantons, was accepted by the Congress of Vienna. In 1848 a new constitution was approved. The 22 cantons set up a federal government (consisting of a federal parliament and a federal council) and a federal tribunal. This constitution, in turn, was on 29 May 1874 superseded by the present constitution, which also combines the federal principle with a national and local use of referendums. Female franchise dates only from Feb. 1971. In a national referendum held in Sept. 1978, 69·9% voted in favour of the establishment of a new canton, Jura, which was established on 1 Jan. 1979.

Switzerland was neutral in both world wars. After the First World War, it joined the League of Nations, which was based in Geneva. But after the Second World War neutrality was thought to conflict with membership of the UN, though Switzerland participates in its agencies, and since 1948 has been a contracting party to the Statute of the International Court of Justice. In March 2001 a referendum on whether to begin immediate talks on joining the European Union was rejected, with 76·7% of voters against. But in a referendum in March 2002 Switzerland did vote to join the UN, with 54·6% of voters in favour of membership.

In 1999 there were 3,663,700 females and 1,406,600 resident foreign nationals. In 2000 foreign nationals made up 19·3% of the population, one of the highest proportions in western Europe. In 1999, 67·7% of the population lived in urban areas. Population density in 1997 was 172 per sq. km. The population at the 2000 census was 7,288,010.

The UN gives a projected population for 2010 of 7·07m.

German, French and Italian are the official languages; Romansch (spoken mostly in Graubünden), hitherto a national language, was upgraded to 'semi-official' in 1996. German is spoken by the majority of inhabitants in 19 of the 26 cantons, French in Fribourg, Vaud, Valais, Neuchâtel, Jura and Geneva, and Italian in Ticino. At the 1990 census 63·6% of the population gave German as their mother tongue, 19·2% French, 7·6% Italian, 0·6% Romansch and 8·9% other languages. 1997 statistics were 65% German, 18·4% French, 9·8% Italian and 0·8% Romansch.

At the end of 2001 the five largest cities were Zürich (340,900); Geneva (176,000); Basle (164,900); Berne (122,500); Lausanne (115,600). At the end of 1999 the population figures of conurbations were: Zürich, 943,400; Geneva, 457,500; Basle, 401,600; Berne, 319,100; Lausanne, 288,100; other towns, 1999 (and their conurbations), Winterthur, 88,000 (119,700); St Gallen, 69,800 (132,500); Lucerne, 57,000 (181,400); Biel, 48,800 (84,200).

CLIMATE

The climate is largely dictated by relief and altitude, and includes continental and mountain types. Summers are generally warm, with quite considerable rainfall; winters are fine, with clear, cold air. Berne, Jan. 32°F (0°C), July, 65°F (18·5°C). Annual rainfall 39·4" (986 mm).

CONSTITUTION AND GOVERNMENT

A new Constitution was accepted on 18 April 1999 in a popular vote and came into effect on 1 Jan. 2000, replacing the constitution dating from 1874. Switzerland is a

republic. The highest authority is vested in the electorate, i.e., all Swiss citizens over 18. This electorate, besides electing its representatives to the Parliament, has the voting power on amendments to, or on the revision of, the Constitution as well as on Switzerland joining international organizations for collective security or supranational communities (mandatory referendum). It also takes decisions on laws and certain international treaties if requested by 50,000 voters or eight cantons (facultative referendum), and it has the right of initiating constitutional amendments, the support required for such demands being 100,000 voters (popular initiative). The Swiss vote in more referendums—three or four a year—than any other nation. A mandatory referendum and a Constitutional amendment demanded by popular initiative require a double majority (a majority of the voters and a majority of the cantons voting in favour of the proposal) to be accepted while a facultative referendum is accepted if a majority of the voters vote in favour of the proposal. Between 1971 and 2000, 85 initiatives were put to the vote but only five were adopted. Turn-out had dropped from a peak of 80·5% in 1933 to 43·8% in 2000.

The Federal government is responsible for legislating matters of foreign relations, defence (within the framework of its powers), professional education and technical universities, protection of the environment, water, public works, road traffic, nuclear energy, foreign trade, social security, residence and domicile of foreigners, civil law, banking and insurance, monetary policy and economic development. It is also responsible for formulating policy concerning statistics gathering, sport, forests, fishery and hunting, post and telecommunications, radio and television, private economic activity, competition policy, alcohol and gambling.

The legislative authority is vested in a parliament of two chambers: the Council of States (*Ständerat/Conseil des États*) and the National Council (*Nationalrat/Conseil National*). The Council of States is composed of 46 members, chosen and paid by the 23 cantons of the Confederation, two for each canton. The mode of their election and the term of membership depend on the canton. Three of the cantons are politically divided—Basle into Town and Country, Appenzell into Outer-Rhoden and Inner-Rhoden, and Unterwalden into Obwalden and Nidwalden. Each of these 'half-cantons' sends one member to the State Council. The Swiss parliament is a militia/semi-professional parliament.

The National Council has 200 members directly elected for four years, in proportion to the population of the cantons, with the proviso that each canton or half-canton is represented by at least one member. The members are paid from federal funds. The parliament sits for at least four ordinary three-week sessions annually. Extraordinary sessions can be held if necessary and if demanded by the Federal Council, 25% of the National Council or five cantons.

The 200 seats are distributed among the cantons according to population size:

Zürich	34	Thurgau (Thurgovie)	6
Berne	27	Graubünden (Grisons)	5
Vaud (Waadt)	17	Neuchâtel (Neuenburg)	5
Aargau (Argovie)	15	Schwyz	3
St Gallen (St Gall)	12	Zug	3
Geneva	11	Schaffhausen (Schaffhouse)	2
Lucerne	10	Appenzell Outer-Rhoden	2

Solothurn (Soleure)	7	Uri	1
Basel-Country (Bâle-C.)	7	Obwalden	1
Valais (Wallis)	7	Nidwalden	1
Basel-Town (Bâle-V.)	6	Glarus	1
Fribourg (Freiburg)	6	Appenzell Inner-Rhoden	1

A general election takes place by ballot every four years. Every citizen of the republic who has entered on his 18th year is entitled to a vote, and any voter may be elected a deputy. Laws passed by both chambers may be submitted to direct popular vote, when 50,000 citizens or eight cantons demand it; the vote can be only 'Yes' or 'No'. This principle, called the *referendum*, is frequently acted on.

The chief executive authority is deputed to the *Bundesrat*, or Federal Council, consisting of seven members, elected for four years by the *United Federal Assembly*, i.e., joint sessions of both chambers, such as to represent both the different geographical regions and language communities. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling

or business. In the Federal Parliament legislation may be introduced either by a member, or by either chamber, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible to become a member of the executive.

The *President* of the Federal Council (called President of the Confederation) and the Vice-President are the first magistrates of the Confederation. Both are elected by the United Federal Assembly for one calendar year from among the Federal Councillors, and are not immediately re-eligible to the same offices. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

The seven members of the Federal Council act as ministers, or chiefs of the seven administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities.

National Anthem. 'Trittst im Morgenrot daher'/'Sur nos monts quand le soleil'/'Quando il ciel' di porpora' ('Step into the rosy dawn'); German words by Leonard Widmer, French by C. Chatelanat, Italian by C. Valsangiacomo, tune by Alberik Zwyssig.

RECENT ELECTIONS

In the parliamentary elections of 24 Oct. 1999 the Social Democratic Party of Switzerland (SPS) won 51 seats (22·5% of the vote), the Swiss People's Party/Democratic Centre Union (SPPDCU) won 44 seats (22·6%), the Radicals (FDP) 43 seats (19·9%), the Christian Democratic People's Party (CDP) 35 (15·8%) and the Greens 9 (5%). There were ten other parties with six seats or fewer. In the Council of States, the Radicals held 18 seats, the Christian Democratic People's Party 15, the Swiss People's Party/Democratic Centre Union 7 and the Social Democratic Party of Switzerland 6.

At the presidential election held in the United Federal Assembly on 4 Dec. 2002 Pascal Couchepin was elected president.

Parliamentary elections are scheduled to take place on 19 Oct. 2003.

DEFENCE

There are fortifications in all entrances to the Alps and on the important passes crossing the Alps and the Jura. Large-scale destruction of bridges, tunnels and defiles are prepared for an emergency.

In 2000 military expenditure totalled US$2,900m. (US$393 per capita), representing 1·2% of GDP.

Army. There are about 2,000 regular soldiers, but some 380,000 conscripts undergo training annually (15 weeks recruit training at 20; 10 refresher courses of 19 days every two years between 21 and 42). Proposals ('Army 95') implemented in 1995 envisaged an Armed Forces based on the three areas of promoting peace, defence and general civil affairs support. Troop levels will gradually be cut to 120,000. The Swiss Army Bicycle Brigade is scheduled for abolition before the end of 2003.

The administration of the Swiss Army is partly in the hands of the Cantonal authorities, who can promote officers up to the rank of captain. In peacetime the Army has no general; in time of war the Federal Assembly in joint session of both Houses appoints a general.

In 1999 for the first time a small Swiss contingent was deployed outside the country, in Kosovo, but without arms and under the protection of Austrian troops.

Navy. The Army includes a Marine force with patrol boats.

Air Force. The air force has three flying regiments. The fighter squadrons are equipped with Swiss-built F-5E Tiger IIs and Mirage IIIS/RS. Personnel (1999), 30,200 on mobilization, with 150 combat aircraft.

INTERNATIONAL RELATIONS

Switzerland is a member of the UN, WTO, BIS, OECD, the Council of Europe and the NATO Partnership for Peace, OSCE, EFTA, CERN, Inter-American Development Bank, Asian Development Bank, IOM, Antarctic Treaty and the International Organization of the Francophonie. In a referendum in 1986 the electorate voted against UN membership, but in a further referendum on 4 March 2002, 54·6% of votes cast were in favour of joining. Switzerland officially became a member at the UN's General Assembly in Sept. 2002. An official application for membership of the EU was made in May 1992, but in Dec. 1992 the electorate voted against joining the European Economic Area. At a referendum in March 2001, 76·7% of voters rejected membership talks with the EU, with just 23·3% in favour; turn-out was 55·1%. However, the government reaffirmed plans to begin entry talks by 2007.

ECONOMY

Agriculture accounted for 2% of GDP in 1998, industry 31% and services 67%.

According to the anti-corruption organization *Transparency International*, Switzerland ranked equal 12th in the world in a 2002 survey of the countries with the least corruption in business and government. It received 8·5 out of 10 in the annual index.

Overview. Switzerland is a small but open economy with one of the highest living standards in the world. Owing to a lack of raw materials, prosperity is built on labour skills and technological expertise. Earnings from services include tourism and banking. High labour costs and product market rigidities in the sheltered economy pose problems of competitiveness. In 2000 the National Bank introduced a monetary policy framework, aiming at keeping inflation below 2%. Monetary independence is crucial to Switzerland, as it permits lower interest rates than those prevailing in the euro zone to give Swiss companies a competitive advantage.

Currency. The unit of currency is the *Swiss franc* (CHF) of 100 *centimes* or *Rappen*. Foreign exchange reserves were US$33,309m. and gold reserves 66·24m. troy oz in June 2002 (83·28m. troy oz in March 2000). Inflation was 1·0% in 2001. Total money supply in June 2002 was 171,584m. Swiss francs.

Budget. Government revenue and expenditure in millions of Swiss francs, years ending 31 Dec.:

	1995	1996	1997	1998	1999
Revenue	84,627	87,080	87,946	94,153	93,293
Expenditure	96,791	101,469	103,528	107,454	107,526

VAT is 7·6%, with reduced rates of 3·6% and 2·4%.

Performance. Total GDP was US$247·4bn. in 2001. Real GDP growth in 1999 was 1·5%, but in 2000 growth reached 3·2%, the highest for ten years. For 2001 growth of 0·9% was recorded. In 1999 the current account surplus was 44,996m. Swiss francs. Switzerland's current account surplus is nearly 13% of GDP.

Banking and Finance. The National Bank, with headquarters divided between Berne and Zürich, opened on 20 June 1907. It has the exclusive right to issue banknotes. The *Chairman* is Jean-Pierre Roth.

On 31 Dec. 2000 there were 375 banks with total assets of 2,124,880m. Swiss francs. They included 24 cantonal banks, 3 big banks, 103 regional and saving banks, 1 *Raiffeisen* (consisting of 537 member banks) and 244 other banks. The number of banks has come down from over 495 in 1990. In 2001 the largest banks in order of capitalization were UBS (US$60·4bn.) and Crédit Suisse Groupe (US$52·3bn.), ranked third and sixth in Europe by market capitalization respectively. Banking and finance is one of Switzerland's most successful industries,

and contributes 7·1% of the country's GDP and 11·2% of the GDP's added values (1998). Switzerland is the capital of the offshore private banking industry. It is reckoned that a third of the internationally invested private assets worldwide are managed by Swiss banks.

Money laundering was made a criminal offence in Aug. 1990. Complete secrecy about clients' accounts remains intact, but anonymity was abolished in July 1991.

The stock exchange system has been reformed under federal legislation of 1990 on securities trading and capital market services. The four smaller exchanges have been closed and activity concentrated on the major exchanges of Zürich, Basle and Geneva, which harmonized their operations with the introduction of the Swiss Electronic Exchange (EBS) in Dec. 1995. Zürich is a major international insurance centre.

In Aug. 1998 Crédit Suisse and UBS AG agreed a deal to pay US$1·25bn. (£750m.) to Holocaust survivors over a three-year-period in an out-of-court settlement. The deal brought to an end the issue of money left in Holocaust victims' Swiss Bank accounts which were allowed to remain dormant after the war.

Weights and Measures. The metric system is legal.

ENERGY AND NATURAL RESOURCES

Environment. In 1998, according to the *World Bank Atlas,* carbon dioxide emissions were the equivalent of 5·9 tonnes per capita. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked Switzerland fifth in the world, with 66·5%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

Switzerland is the world leader in recycling. In 1998, 52% of all household waste was recycled, including 91% of glass and 89% of aluminium cans (in both cases the highest percentage of any country).

Electricity. The Energy 2000 programme aims to stabilize consumption. Installed capacity was 16·4m. kW in 1999. Production was 166·7bn. kWh in 1999. 35·6% of energy produced was nuclear, 35·9% hydro-electric from storage power stations, 25·6% hydro-electric from turbine power stations and 3·8% from conventional thermal. In Sept. 1990, 54% of citizens voted for a ten-year moratorium on the construction of new nuclear plants. There are currently five nuclear reactors in use. Consumption per capita in 1998 was 7,148 kWh.

Minerals. Approximately 6,000 people work in mining and quarrying. Salt production, 1997: 400,000 tonnes.

Agriculture. The country is self-sufficient in wheat and meat. Agriculture is protected by subsidies, price guarantees and import controls. Farmers are guaranteed an income equal to industrial workers. Agriculture occupied 5·9% of the total workforce in 1996. In 1999 there were 293,949 ha of open arable land, 115,933 ha of cultivated grassland and 608,798 ha of natural grassland and pastures. In 1999 there were 12,921 ha of vineyards. In 1999 there were 73,591 farms (41% in mountain or hill regions), of which 5,258 were under 1 ha, 18,154 over 20 ha, and 23,300 in part-time use (1996). Approximately 7·8% of all agricultural land is used for organic farming—one of the highest proportions in the world.

Area harvested, 1999 (in 1,000 ha): cereals, 182; coarse grains, 89; sugarbeets, 17; potatoes, 14. Production, 2000 (in 1,000 tonnes): sugarbeets, 1,410; potatoes, 584; wheat, 548; barley, 273; maize, 209; carrots, 56; rapeseed, 39. Fruit production (in 1,000 tonnes) in 2000 was: apples, 380; grapes, 165; pears, 130. Wine is produced in 25 of the cantons. In 2000 vineyards produced 128,000 tonnes of wine.

Livestock, 2000: cattle, 1,600,000; pigs, 1,450,000; horses, 45,000; sheep, 450,000; goats, 65,000; chickens, 7m. Livestock products, 2000 (in 1,000 tonnes): meat, 415; milk, 3,910; cheese, 155.

Forestry. The forest area was 1,212,570 ha in 1997 (29·4% of the land area). In 1999, 5·0m. cu. metres of roundwood were cut.

Fisheries. Total catch, 2000, 1,659 tonnes, exclusively freshwater fish.

INDUSTRY

The leading companies by market capitalization in Switzerland, excluding banking and finance, in Jan. 2002 were: Novartis AG (160bn. Swiss francs,), a pharmaceuticals company; Nestlé SA (146bn. Swiss francs,), a world leader in food and beverages; and Roche AG (97bn. Swiss francs,), a healthcare company.

There were 347,500 firms in 1991, of which 84·9% employed fewer than 10 persons. The chief food producing industries, based on Swiss agriculture, are the manufacture of cheese, butter, sugar and meat. Among the other industries, the manufacture of textiles, clothing and footwear, chemicals and pharmaceutical products, the production of machinery (including electrical machinery and scientific and optical instruments) and watch and clock making are the most important.

Labour. KEY HISTORICAL EVENTS

Syria was under Turkish control from the 12th century and part of the Ottoman Empire from the 16th century until the First World War. Following the defeat of the Turks, the League of Nations granted France a mandate for Syria from 1920. On 27 Sept. 1941 Gen. Catroux, the Free French C.-in-C., proclaimed the independence of Syria. The evacuation of all foreign troops in April 1946 marked the complete independence of Syria, but the political situation was unsettled and military coups were staged in Dec. 1949 and in Feb. 1954. Syria merged with Egypt to form the United Arab Republic from 2 Feb. 1958 until 29 Sept. 1961, when Syrian independence was resumed following a coup. Following the fifth coup of the decade, Lieut.-Gen. Hafiz al-Assad became prime minister on 13 Nov. 1970 and assumed the presidency on 22 Feb. 1971. A new constitution, approved by plebiscite on 12 March 1973, confirmed the Arab Socialist Renaissance (Ba'ath) Party as the 'leading party in the state and society'.

TERRITORY AND POPULATION

Syria is bounded by the Mediterranean and Lebanon in the west, by Israel and Jordan in the south, by Iraq in the east and by Turkey in the north. The frontier between Syria and Turkey was settled by the Franco-Turkish agreement of 22 June 1929. The area is 185,180 sq. km (71,498 sq. miles). The census of 1994 gave a population of 13,782,000. Estimate (1997), 14,972,000 (54·0% urban, 1999); density, 81 per sq. km.

The UN gives a projected population for 2010 of 20·78m.

Area and population (1996 estimate, in 1,000) of the 14 districts *(mohafaza)*:

The government is formed by the Ba'ath.

The president is appointed by the Parliament and is confirmed for a seven-year term in a referendum. At a referendum on 10 July 2000 Bashar Al-Assad (b. 1965) was confirmed as *President* following the death of his father, who had been president since 1971.

KEY HISTORICAL EVENTS

The Tajik Soviet Socialist Republic was formed from those regions of Bokhara and Turkestan where the population consisted mainly of Tajiks. It was admitted as a constituent republic of the Soviet Union on 5 Dec. 1929. In Aug. 1990 the Tajik Supreme Soviet adopted a declaration of republican sovereignty and in Dec. 1991 the republic became a member of the CIS. After demonstrations and fighting, the Communist government was replaced by a Revolutionary Coalition Council on 7 May 1992. Following further demonstrations, President Nabiev was ousted on 7 Sept. Civil war broke out, and the government resigned on 10 Nov. On 30 Nov. it was announced that a CIS peacekeeping force would be sent to Tajikistan. A state of emergency was imposed in Jan. 1993. On 23 Dec. 1996 a ceasefire was signed. A further agreement on 8 March 1997 provided for the disarmament of the Islamic-led insurgents, the United Tajik Opposition, and their eventual integration into the regular armed forces. A peace agreement brokered by Iran and Russia was signed in Moscow on 27 June 1997 stipulating that the opposition should have 30% of ministerial posts in a Commission of National Reconciliation. The country's first multi-party parliamentary election was held in Feb. 2000, although it was criticized by observers for failing to meet democratic standards. President Rakhmonov, first elected in 1994, won a second term in 1999.

Ethnic conflict and terrorist attacks continue to plague Tajikistan, with Russia offering military support. Fighting in the Fergana Valley, particularly by the Islamist Movement of Uzbekistan, is a cause for concern for all Central Asian governments.

KEY HISTORICAL EVENTS

At the end of the 17th century the inhabitants of Zanzibar drove out the Portuguese with the assistance of the Arabs of Oman. In 1887 the Sultan of Zanzibar handed over the administration of his possessions to the north of Vanga on the African continent to the British East Africa Association. These territories eventually passed to the British government and are now part of Kenya. In 1888 a similar concession was granted to the German East Africa Association of the Sultan's mainland territories between the River Umba and Cape Delgado. German East Africa was conquered by the Allies in the First World War and subsequently divided between the Belgians, the Portuguese and the British. The country was administered as a League of Nations mandate until 1946, and then as a UN trusteeship territory until 9 Dec. 1961.

Tanganyika (Tanzania) achieved responsible government in Sept. 1960 and full self-government on 1 May 1961. On 9 Dec. 1961 Tanganyika became a sovereign independent member state of the Commonwealth of Nations. On 9 Dec 1962 the country adopted a republican form of government (still within the British Commonwealth) and Dr Nyerere was elected as the first president.

On 24 June 1963 Zanzibar became an internal self-governing state which achieved independence on 9 Dec. 1963. On 12 Jan. 1964 her sultanate was overthrown by a revolt of the Afro-Shirazi Party leaders who established the People's Republic of Zanzibar. Also in Jan. 1964 there was an attempted coup against Nyerere who had to seek British military help. On 26 April 1964 Tanganyika, Zanzibar and Pemba combined to form the United Republic of Tanzania. The first multi-party elections were held in 1995.

KEY HISTORICAL EVENTS

The Thais migrated to the present territory from Nan Chao in the Yunnan area of China in the 8th and 9th centuries. Thailand's leading general, Chao Phraya Chakkri, assumed the throne in 1782, thus establishing the dynasty which still heads the Thai state. Siam, as Thailand was called until 1939, remained an independent state ruled by an absolute monarchy until 24 June 1932. Discontented with the social, political and economic stagnation of the country, a group of rebels calling themselves the People's Party precipitated a bloodless coup. The rebels seized control of the army and persuaded the king to accept the introduction of constitutional monarchy. When, the following year, the king tried to dissolve the newly appointed General Assembly, the army moved to prevent him, thus becoming the dominant force behind the government, which they have remained ever since. Nationalism dominated political life through the 1930s. In 1939 Field Marshal Pibul Songgram became premier and embarked on a pro-Japanese policy that brought Thailand into the Second World War on Japan's side.

After 1945 political life was characterized by periods of military rule interspersed with short attempts at democratic, civilian government. Democratic government was reintroduced for a short time after 1963 and again from 1969 to 1971 when another successful military coup was staged, aimed at checking the high crime rate and the growth of Communist insurgence. A new, moderately democratic constitution was introduced in 1978.

On 23 Feb. 1991 a military junta seized power in the most recent of 17 coups since 1932. Following the appointment of Gen. Suchinda Kraprayoon as prime minister on 17 April 1992 there were massive anti-government demonstrations over several weeks in the course of which many demonstrators were killed. Gen. Suchinda resigned and in May the legislative assembly voted that future prime ministers should be elected by its members rather than appointed by the military. The 1995 election was fought against a background of political and financial corruption. After the 1996 election a new constitution was drafted allowing for the separation of the executive, legislative and judicial branches of government.

TERRITORY AND POPULATION

Thailand is bounded in the west by Myanmar, north and east by Laos and southeast by Cambodia. In the south it becomes a peninsula bounded in the west by the Indian Ocean, south by Malaysia and east by the Gulf of Thailand. Area is 513,115 sq. km (198,114 sq. miles).

At the 2000 census the population was 60,617,200 (30,767,100 females); density, 118 per sq. km. 20,759,900 lived in the Northeastern region, 11,367,800 in the Northern region, 14,101,500 in the Central region, 8,067,800 in the Southern region and 6,320,200 in Bangkok. In 1999, 78·8% of the population lived in rural areas.

The UN gives a projected population for 2010 of 69·68m.

Thailand is divided into 4 regions, 76 provinces and Bangkok, the capital. Population of Bangkok (1999), 7,133,000. Other towns (1993 estimates): Nonthaburi (261,355), Nakhon Ratchasima (188,171), Chiangmai (170,397), Hat Yai (148,632).

Thai is the official language, spoken by 53% of the population as their mother tongue. 27% speak Lao (mainly in the northeast), 12% Chinese (mainly in urban areas), 3·7% Malay (mainly in the south) and 2·7% Khmer (along the Cambodian border).

Bangkok: Situated on the Chao Phraya river, 40 km from the Gulf of Thailand, Bangkok was established as the capital of Thailand, then called Siam, in 1782 by

King Rama I, the founder of the Chakkri dynasty. The city has since grown, combining traditions such as the building of Wats (temples), with modern industry, to become one of Asia's busiest and most important commercial and industrial centres.

SOCIAL STATISTICS

1995 births, 1,013,000; deaths, 373,000. 1995 birth rate per 1,000 population, 17·4; death rate, 6·4. Annual population growth rate, 1990–99, 1·0%. Of the total population in 1997, 25% were under 15 years, 69% between 15 and 64 years, and 6% aged 65 and over. Expectation of life (1999): 67·0 years for men; 72·9 years for women. Infant mortality, 1999, 26 per 1,000 live births; fertility rate, 1999, 1·7 births per woman.

CLIMATE

The climate is tropical, with high temperatures and humidity. Over most of the country, three seasons may be recognized. The rainy season is June to Oct., the cool season from Nov. to Feb. and the hot season is March to May. Rainfall is generally heaviest in the south and lightest in the northeast. CONSTITUTION AND GOVERNMENT

The reigning King is **Bhumibol Adulyadej,** born 5 Dec. 1927. King Bhumibol married on 28 April 1950 Princess Sirikit, and was crowned 5 May 1950 (making him currently the world's longest-reigning monarch). *Offspring:* Princess Ubol Ratana (born 5 April 1951, married Aug. 1972 Peter Ladd Jensen); Crown Prince Vajiralongkorn (born 28 July 1952, married 3 Jan. 1977 Soamsawali Kitiyakra); Princess Maha Chakri Sirindhorn (born 2 April 1955); Princess Chulabhorn (born 4 July 1957, married 7 Jan. 1982 Virayudth Didyasarin).

Parliament consists of a 200-member *Senate*, fully elected for the first time in 2000, and a 500-member *House of Representatives*, elected for four-year terms by universal suffrage of citizens over 17 years, with 400 constituency MPs and 100 from party lists. The present constitution dates from 1997. It is Thailand's 16th since 1932 and the first to emerge from public consultation rather than a military coup. It particularly tries to eradicate vote-buying. It introduced proportional representation for some seats, established an independent election commission, and required that votes be counted away from the polling stations. The constitution further required all cabinet members to resign their parliamentary seats.

The *Prime Minister* is elected by the House of Representatives.

National Anthem. 'Prathet Thai ruam nua chat chua Thai' ('Thailand, cradle of Thais wherever they may be'); words by Luang Saranuprapan, tune by Phrachen Duriyang.

Thai Rak Thai has since merged with both New Aspiration and a second party, giving them a total of 296 seats.

There were elections to the Senate on 4 March, 29 April and 4 June 2000. 200 members were elected in single-seat constituencies. Only non-partisans were allowed to stand. A number of members were disqualified amid allegations of vote fraud.

INTERNATIONAL RELATIONS

Thailand is a member of the UN, WTO, BIS, Asian Development Bank, ASEAN, the Colombo Plan, APEC, the Mekong Group and IOM.

ECONOMY

In 1998 agriculture accounted for 11·2% of GDP, industry 41·2% and services 47·6%.

Thailand's 'shadow' (black market) economy is estimated to constitute approximately 70% of the country's official GDP, one of the highest percentages of any country in the world.

Overview. The financial crisis that spread across southeast Asia in 1997 started as a result of the devaluation of the baht (the Thai currency) in July and hit Thailand with particular force. Over 50 finance companies suspended business and the Thai stock exchange lost 82% of its 1995 peak value. An IMF rescue package of US$17·2bn. gained time to put reforms in place, including tighter budgetary control, the merging of banks and the restructuring of the country's outmoded financial system.

In May 1998 the government agreed to adopt a strategy for the eventual privatization of the four commercial banks nationalized earlier in the year.

Currency. The unit of currency is the *baht* (THB) of 100 *satang*. After being pegged to the US dollar, the baht was devalued and allowed to float on 2 July 1997. It was the devaluation of the baht that sparked the financial turmoil that spread throughout the world over the next year. Foreign exchange reserves were US$35,985m. and gold reserves 2·50m. troy oz in June 2002. Inflation was 1·7% in 2001. Total money supply in May 2002 was 598,378m. baht.

Its assets and liabilities in Dec. 1991 were 580,844·5m. baht. Its *Governor* is Pridiyathorn Devakula. In 1997 there were 21 domestic commercial banks, 14 foreign banks with branch licences and 22 foreign banks with representative offices. KEY HISTORICAL EVENTS

Europeans, beginning with the Portuguese who first visited the area in 1471–72, traded on the coast for centuries, especially in slaves. In the 19th century palm oil exports flourished at Anecho, Agoue and Porto Seguro, where British, French and German traders operated. Several prominent Togolese families of partly Brazilian or Portuguese origin, still important among the coastal African élite, arose at that time. Despite the important rival influences of Britain and France in the area, it was Germany that established colonial rule on the coast in 1884. German control was then extended inland but encountered strong resistance and only in 1912 was the colony fully subdued.

German Togo was overrun by the Allies in 1914. It was partitioned in 1919 into British and French Mandated Territories under the League of Nations. After the Second World War French Togo and British Togoland became Trust Territories under the United Nations. In British Togoland a referendum was held on 9 May 1956, in which a majority voted for union with Gold Coast, although most people in the south voted for union with French Togo. The whole territory was merged with what soon afterwards became independent Ghana, but many Togolese objected. In French Togo partial self-government was granted in 1956. On 27 April 1960 the country became independent.

On 13 Jan. 1963 President Olympio was murdered by soldiers. His successor was deposed in a bloodless military coup in Jan. 1967 and on 14 April 1967 Gen. (then Col.) Gnassingbé Eyadéma assumed the Presidency. A new constitution was approved in 1992.

TERRITORY AND POPULATION

Togo is bounded in the west by Ghana, north by Burkina Faso, east by Benin and south by the Gulf of Guinea. The area is 56,785 sq. km. The population of Togo in 1981 (census) was 2,700,982; 1997 (estimate) 4·32m.; density, 76 per sq. km.

The UN gives a projected population for 2010 of 5·83m.

In 1999, 67·3% of the population lived in rural areas, and in 1997, 46% were below the age of 15. The capital is Lomé (population in 1999, 790,000), other towns being Sokodé (51,000), Lama-Kara (35,000), Kpalimé (30,000), Atakpamé (30,000), Bassar (22,000), Dapaong (22,000) and Mango (20,000).

Area, population and chief town of the five regions:

Region	*Area in sq. km*	*Population (1981 census)*	*Population (1989 estimate)*	*Chief town*
Centrale	13,182	269,174	339,000	Sokodé
De La Kara	11,630	432,626	531,500	Lama-Kara

There are 37 ethnic groups. The south is largely populated by Ewe-speaking peoples (forming 44% of the population) and related groups, while the north is mainly inhabited by Hamitic groups speaking Kabre (27%), Gurma (14%) and Tem (4%). The official language is French but Ewe and Kabre are also taught in schools.

CONSTITUTION AND GOVERNMENT

A referendum on 27 Sept. 1992 approved a new constitution by 98·11% of votes cast. Under this the *President* and the *National Assembly* were directly elected for five-year terms. Initially the president was allowed to be re-elected only once. However, on 30 Dec. 2002 parliament approved an amendment to the constitution lifting the restriction on the number of times that the president may be re-elected. The National Assembly has 81 seats and is elected for a five-year term in single-seat constituencies.

National Anthem. 'Terre de nos aïeux' ('Land of our forefathers').

RECENT ELECTIONS

In the presidential elections held on 21 June 1998 it was clear that the chief opposition candidate Gilchrist Olympio, son of the country's first president, was going to win, but the paramilitary police intervened and prevented the count in the capital city, Lomé, from being completed; it was also reported that ballot boxes were seized and burnt. The head of the electoral commission resigned in protest along with four of its members and the EU and American observers declared the election to be fraudulent. The interior minister pronounced Gen. Gnassingbé Eyadéma the winner, enabling him to continue as the country's ruler, having already been in power since 1967.

At the parliamentary elections on 27 Oct. 2002 the main opposition parties to the Togolese People's Assembly (RPT, the former sole party) boycotted the election, protesting a lack of transparency in the voting process. Turn-out was put at around 60% and preliminary results showed the RPT had won 72 of the available 81 seats, down 7 on its 1999 showing.

Kingdom of Tonga

Capital: Nuku'alofa
Population estimate, 2000: 100,000
GDP per capita: not available
GNP per capita: $1,730

KEY HISTORICAL EVENTS

The Tongatapu group of islands in the south western Pacific Ocean were discovered by Tasman in 1643. The Kingdom of Tonga attained unity under Taufa'ahau Tupou (George I) who became ruler of his native Ha'apai in 1820, of Vava'u in 1833 and of Tongatapu in 1845. By 1860 the kingdom had become converted to Christianity. In 1862 the king granted freedom to the people from arbitrary rule of minor chiefs and gave them the right to the allocation of land for their own needs. These institutional changes, together with the establishment of a parliament of chiefs, paved the way towards a democratic constitution. By the Anglo-German Agreement of 14 Nov. 1899, the Tonga Islands became a British protectorate. The protectorate was dissolved on 4 June 1970 when Tonga, the only ancient kingdom surviving from the pre-European period in Polynesia, achieved independence within the Commonwealth.

TERRITORY AND POPULATION

The Kingdom consists of some 169 islands and islets with a total area of 289 sq. miles (748 sq. km; including inland waters), and lies between 15° and 23° 30' S. lat and 173° and 177° W. long, its western boundary being the eastern boundary of the Fiji Islands. The islands are split up into the following groups (reading from north to south): the Niuas, Vava'u, Ha'apai, Tongatapu and 'Eua. The three main groups, both from historical and administrative significance, are Tongatapu in the south, Ha'apai in the centre and Vava'u in the north. Census population (1996) 97,446; density, 130 per sq. km. In 1995, 59% of the population lived in rural areas.

KEY HISTORICAL EVENTS

When Columbus visited Trinidad in 1498 the island was inhabited by Arawak Indians. Tobago was occupied by the Caribs. Trinidad remained a neglected Spanish possession for almost 300 years until it was surrendered to a British naval expedition in 1797. The British first attempted to settle Tobago in 1721 but the French captured the island in 1781 and transformed it into a sugar-producing colony. In 1802 the British acquired Tobago and in 1899 it was administratively combined with Trinidad. When slavery was abolished in the late 1830s, the British subsidized immigration from India to replace plantation labourers. Sugar and cocoa declined towards the end of the 19th century. Oil and asphalt became the dominant sources of income. On 31 Aug. 1962 Trinidad and Tobago became an independent member of the Commonwealth. A Republican Constitution was adopted on 1 Aug. 1976.

TERRITORY AND POPULATION

The island of Trinidad is situated in the Caribbean Sea, about 12 km off the northeast coast of Venezuela; several islets, the largest being Chacachacare, Huevos, Monos and Gaspar Grande, lie in the Gulf of Paria which separates Trinidad from Venezuela. The smaller island of Tobago lies 30·7 km further to the northeast. Altogether, the islands cover 5,124 sq. km (1,978 sq. miles), of which Trinidad (including the islets) has 4,828 sq. km (1,864 sq. miles) and Tobago 303 sq. km (116 sq. miles). In 1990 the census population was 1,169,572. The population in 1995 was 1,259,972 (Trinidad, 1,208,625; Tobago, 51,347). Estimate, 1999, 1,285,700; density, 250 per sq. km.

KEY HISTORICAL EVENTS

Settled by the Phoenicians, the area became a powerful state under the dynasty of the Berber Hafsids (1207–1574). Tunisia was nominally a part of the Ottoman Empire from the end of the 17th century and descendants of the original Ottoman ruler remained Beys of Tunis until the modern state of Tunisia was established. A French protectorate since 1883, Tunisia saw considerable anti-French activity in the late 1930s. However, Tunisia supported the Allies in the Second World War and was the scene of heavy fighting. France granted internal self-government in 1955 and Tunisia became fully independent on 20 March 1956. A constitutional assembly was established and Habib Bourguiba became prime minister. A republic was established in 1957, the Bey deposed and the monarchy was abolished; Bourguiba became president. In 1975 the constitution was changed so that Bourguiba could be made President-for-life. Bourguiba was overthrown in a bloodless coup in 1987. His successor as president, Zine El Abidine Ben Ali, introduced democratic reforms but a long running struggle with Islamic fundamentalists has been marked by sporadic violence and the suspension of political rights.

TERRITORY AND POPULATION

Tunisia is bounded in the north and east by the Mediterranean Sea, west by Algeria and south by Libya. The area is 154,530 sq. km. In 1994 the census population was 8,785,364. CONSTITUTION AND GOVERNMENT

The Constitution was promulgated on 1 June 1959 and reformed in 1988. The office of President-for-life was abolished and Presidential elections were to be held every five years. The *President* and the *National Assembly* are elected simultaneously by direct universal suffrage for a period of five years. On 27 May 2002 a referendum was held in which 99% of votes cast were in favour of abolishing the three-term limit on the presidency and on raising the age limit for incumbent presidents from 70 to 75 years. The results were viewed with scepticism by human rights groups and opposition figures, who saw the referendum as an attempt by President Zine El Abidine Ben Ali to retain power. Ben Ali was due to retire in 2004 after his third presidential term.

The National Assembly has 163 seats, 144 directly elected by the first-past-the-post system and 19 distributed nationally by proportional representation to parties that fail to win seats under the first-past-the-post system.

KEY HISTORICAL EVENTS

The area of modern Turkey equates to the ancient region of Anatolia (Asia Minor). There is evidence of human habitation in Anatolia around 7500 BC. Between 1900 and 1600 BC the area came under Hittite rule, vying for power with Egypt and eventually extending into Syria. Anatolia was regularly invaded by forces from the Greek islands and was overrun by invading Persians in the 6th century BC.

Alexander the Great defeated the Persians around 330 BC. After his death there was a long civil war between the Seleucids and the Ptolemies, while the kingdoms of Galatia, Armenia, Pergamum, Cappadocia, Bithynia and Pontus all established footholds in the region. Rome gained dominance around the 2nd century BC and brought stability, prosperity and, eventually, Christianity. In AD 324 the Emperor Constance began construction of what would become Constantinople. Constantinople became the centre of the Byzantine (Eastern Roman) Empire, which reached its pinnacle under Justinian in the mid-6th century.

Islamic troops attacked Constantinople during the 670s and there ensued several centuries of warfare and rivalry between Islamic forces and Byzantium. The Great Seljuk Empire established dominance over an area that encompassed modern Turkey during the 11th century. They came under threat during the Crusades and from the Mongols but fell to the Ottomans (an alliance of Turkish warriors who emerged in the 13th century). The Ottomans, under Mehmet, seized Constantinople in 1453. Under the rule of Suleiman the Magnificent (1494–1566) the empire expanded to its fullest extent (including an area from Morocco to Persia and westwards into the Balkans) and Constantinople developed into a centre of cultural and intellectual excellence.

From the late 16th century, however, the Empire began to decline, its power weakening rapidly in the 19th century. The Kingdom of Greece broke away from Ottoman rule in 1832, with Serbs, Romanians, Armenians, Albanians, Bulgarians and Arabs demanding independence soon afterwards. Attempts by Turkey to re-define itself were further hindered in the 20th century by World War I, during which it sided with Germany. In fighting with Greece over disputed territory from 1920–22, the Turkish National Movement was led by Mustafa Kemal (Atatürk: 'Father of the Turks'), who wanted a republic based on a modern secular society. Turkey became a republic on 29 Oct. 1923. Islam ceased to be the official state religion in 1928 and women were given the franchise.

On 27 May 1960 the Turkish Army overthrew the government and party activities were suspended. A new constitution was approved in a referendum held on 9 July 1961 and general elections held the same year. On 12 Sept. 1980 the Turkish armed forces again drove the government from office. A new constitution was enforced after a national referendum on 7 Nov. 1982. In the face of mounting Islamicization of government policy, the Supreme National Security Council reaffirmed its commitment to the secularity of the state. On 6 March 1997 Prime Minister Neçmettin Erbakan, leader of the pro-Islamist Welfare Party, promised to combat Muslim fundamentalism but in June he was forced to resign by a campaign led by the Army.

There are quarrels with Greece over the division of Cyprus, oil rights under the Aegean and ownership of uninhabited islands close to the Turkish coast. Kurdish rebels have for many years been active in the southeast, occupying a large part of the Turkish army. However, in Feb. 2000 the Kurdish Workers' party (PKK) formally abandoned its 15-year rebellion and adopted the democratic programme urged by its imprisoned leader, Abdullah Öçalan. The conflict has cost nearly 40,000 lives.

TERRITORY AND POPULATION

Turkey is bounded in the west by the Aegean Sea and Greece, north by Bulgaria and the Black Sea, east by Georgia, Armenia and Iran, and south by Iraq, Syria and the Mediterranean. The area (including lakes) is 780,580 sq. km (301,382 sq. miles). At the 1990 census the population was 56,473,035. The most recent census took place in Oct. 2000, by when the population had increased to 67,844,903. In 1999, 74·1% of the population lived in urban areas.

The UN gives a projected population for 2010 of 75·15m.

Turkish is the official language. Kurdish and Arabic are also spoken.

Some 12m. Kurds live in Turkey. In Feb. 1991 limited use of the Kurdish language was sanctioned, and in Aug. 2002 parliament legalized Kurdish radio and television broadcasts.

There is a *Constitutional Court* consisting of 15 regular and 5 alternating members.

INTERNATIONAL RELATIONS

In Oct. 1998 Turkish troops mobilized on the border with Syria in protest against Syrian support for Kurdish rebels operating from its territory.

Following the terror attacks on New York and Washington of 11 Sept. 2001 Turkey expressed support for the USA, later becoming the first Muslim country to send soldiers to Afghanistan, to help train anti-Taliban fighters and to administer aid. The decision may have been influenced by Turkey's application to join the European Union.

Turkey is a member of the UN, WTO, BIS, OECD, NATO, Council of Europe, OSCE, BSEC, Asian Development Bank, ECO, OIC and an Associate Member of the WEU, and has applied to join the EU. At the European Union's Helsinki Summit in Dec. 1999 Turkey was awarded candidate status, although talks on membership will not take place for some years.

ECONOMY

Agriculture accounted for 17·6% of GDP in 1998, industry 25·4% and services 57·0%.

Overview. Privatization is co-ordinated by the Public Participation Fund. The pace of economic reform is likely to accelerate as Turkey gets closer to EU membership.

Currency. The unit of currency is the *Turkish lira* (TRL) notionally of 100 *kuruş*. Gold reserves were 3·73m. troy oz in June 2002 and foreign exchange reserves US$22,238m. In 2001 inflation was running at an annualized rate of 65%. Total money supply in Dec. 2001 was TL5,188,070bn.

Budget. The fiscal year is the calendar year. Revenue and expenditure in TL1trn.:

Revenue	6,327·0	12,657·0	19,798·3	35,425·8
Expenditure	8,616·9	16,762·4	29,467·3	49,134·2

Tax revenues were TL9,232trn. in 1998.

Performance. Real GDP growth was negative in 1999, at –5·0%, but in 2000 there was growth of 7·5%. In 2001, however, the economy shrank again, by 9·4%—the worst performance since the Second World War. Total GDP was US$147·6bn. in 2001.

At the end of 1998 it held nearly 18% of all bank deposits. Foreign investment in 1995 was US$1·1bn. compared to US$150m. in 1985. In Sept. 2000 a Banking Regulation and Audit Board was established to serve as an independent banking regulator. In Dec. 2000 the IMF gave Turkey an emergency loan of US$7·5bn. as the country experienced a financial crisis after ten banks were placed in receivership. The economic crisis continued as the *lira* was floated on the international market and lost 30% of its value against the US dollar in the space of 12 hours in Feb. 2001. Within a week the lira had been devalued by approximately 40%. In April 2001 Turkey secured a further US$10bn. loan from the IMF and the World Bank. This was followed in Feb. 2002 with a three-year US$16bn. loan from the IMF, taking total loans paid or pledged to USS$31bn.

KEY HISTORICAL EVENTS

Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan. The Khan of Khiva was deposed in Feb. 1920 and a People's Soviet Republic was set up. In Aug. 1920 the Emir of Bokhara suffered the same fate. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921. In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute their territories on a nationality basis. The redistribution was completed in May 1925 when the new states of Uzbekistan, Turkmenistan and Tadzhikistan were accepted into the USSR as Union Republics. Following the break-up of the Soviet Union, Turkmenistan declared independence in Oct. 1991. Saparmurad Niyazov was elected president and founded the Democratic Party of Turkmenistan, the country's only legal party. Also prime minister and Supreme Commander of the armed forces, parliament proclaimed him head of state for life in Dec. 1999. He holds the official title of 'Turkmenbashi', leader of all Turkmen. In July 2000 President Niyazov introduced a law requiring all officials to speak Turkmen.

TERRITORY AND POPULATION

Turkmenistan is bounded in the north by Kazakhstan, in the north and northeast by Uzbekistan, in the southeast by Afghanistan, in the southwest by Iran and in the west by the Caspian Sea. In 1999, 55·3% of the population lived in rural areas.

The UN gives a projected population for 2010 of 5·65m.

There are five administrative regions (*velayaty*): Ahal, Balkan, Dashoguz, Lebap and Mary, comprising 42 rural districts, 15 towns and 74 urban settlements. The capital is Ashgabat (formerly Ashkhabad; 1999 population, 525,000); other large towns are Turkmenabat (formerly Chardzhou), Mary (Merv), Balkanabad (Nebit-Dag) and Dashoguz.

KEY HISTORICAL EVENTS

Formerly known as the Ellice Islands, Tuvalu is a group of nine islands in the western central Pacific. Joining the British controlled Gilbert Islands Protectorate in 1916, they became the Gilbert and Ellice Islands colony.

After the Japanese occupied the Gilbert Islands in 1942, US forces occupied the Ellice Islands. A referendum held in 1974 produced a large majority in favour of separation from the Ellice Islands. Independence was achieved on 1 Oct. 1978. Early in 1979 the USA signed a treaty of friendship with Tuvalu and relinquished its claim to the four southern islands in return for the right to veto any other nation's request to use any of Tuvalu's islands for military purposes.

TERRITORY AND POPULATION

Tuvalu lies between 5° 30' and 11° S. lat. and 176° and 180° E. long. and comprises Nanumea, Nanumaga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti (administrative centre; 2000 estimated population, 4,483), Nukulaelae and Niulakita. Population (census 1991) 9,043, excluding an estimated 1,500 who were working abroad, mainly in Nauru and Kiribati. Estimate, 2000, 10,781. Area approximately 10 sq. miles (26 sq. km). Density, 2000, 415 per sq. km.

In 2002 an estimated 52·9% of the population lived in rural areas. The population is of a Polynesian race.

Both Tuvaluan and English are spoken.

SOCIAL STATISTICS

2000 births, 229; deaths, 109; rates, (per 1,000 population): births, 21; deaths, 10; infant mortality (per 1,000 live births), 35. Expectation of life: males, 64 years; females, 71. Annual population growth rate, 1990–99, 2·8%; fertility rate, 2000, 2·9 births per woman.

Although the islands are north of the recognized hurricane belt they were badly hit by hurricanes in the 1990s, raising fears for the long-term future of Tuvalu as the sea level continues to rise.

KEY HISTORICAL EVENTS

The Luo (a Nilotic-speaking people) invaded the territory of present-day Uganda in the late 15th and 16th centuries founding several kingdoms of which the most prominent was Buganda. Uganda became a British Protectorate in 1894, the province of Buganda being recognized as a native kingdom under its Kabaka. In 1961 Uganda was granted internal self-government with federal status for Buganda. Uganda became an independent member of the Commonwealth on 9 Oct. 1962 and a republic on 8 Sept. 1967. President Milton Obote set about returning land given to the Buganda by the British in 1900 to its original Bunyoro owners. He also abolished Buganda's federal status and autonomy in the country. A rebellion by Buganda was quelled but in 1971 Obote was overthrown by troops under Gen. Idi Amin. Amin's rule was characterized by widespread repression and, in 1972, the expulsion of Asian residents. In April 1979 a force of the Tanzanian Army and Ugandan exiles advanced into Uganda, taking Kampala on 11 April. Amin fled into exile. In Dec. 1980, following elections, Dr Obote again became president, but on 27 July 1985 was overthrown.

TERRITORY AND POPULATION

Uganda is bounded in the north by Sudan, in the east by Kenya, in the south by Tanzania and Rwanda, and the west by the Democratic Republic of the Congo. Total area 241,547 sq. km, including inland waters.

The 2002 census population was 24,748,977 (12,124,761 males, 12,624,216 females); density, 102 per sq. km. The largest city is Kampala, the capital (population of 1,208,544 in 2002). Other major towns are Jinja, Mbale, Masaka, Gulu, Entebbe, Soroti and Mbarara.

The projected population for 2010 is 32·59m.

An estimated 86·2% of the population lived in rural areas in 1999.

The country is administratively divided into 56 districts, which are grouped in four geographical regions (which do not have administrative status). Area and estimated population of the regions in 2002:

Region	*Area in sq. km*	*Population in 1,000*
Central Region	61,352	6,683·9
Eastern Region	39,524	6,301·7
Western Region	55,278	6,417·4
Northern Region	85,392	5,346·0

The official language is English, but Kiswahili is used as a *lingua franca*. About 70% of the population speak Bantu languages; Nilotic languages are spoken in the north and east.

Uganda is host to around 500,000 refugees from a number of neighbouring countries, and internally displaced people. Probably in excess of 100,000 southern Sudanese fled to Uganda during 1996.

SOCIAL STATISTICS

Births, 1995, 1,004,000; deaths, 421,000. Rates per 1,000 population, 1995: birth, 51·0; death, 21·4. Uganda's life expectancy at birth in 1999 was 42·5 years for males and 43·8 years for females, down from an average of 47 years in 1985. The sharp decline is largely attributed to the huge number of people in the country with HIV. Annual population growth rate, 1990–99, 2·8%. Infant mortality, 1999, 83 per 1,000 live births; fertility rate, 1999, 7·0 births per woman.

CLIMATE

Although in equatorial latitudes, the climate is more tropical, because of its elevation, and is characterized by two distinct rainy seasons, March–May and

Sept.–Nov. June–Aug. and Dec.–Feb. are comparatively dry. Temperatures vary little over the year. Kampala, Jan. 74°F (23·3°C), July 70°F (21·1°C). Annual rainfall 46·5" (1,180 mm). Entebbe, Jan. 72°F (22·2°C), July 69°F (20·6°C). Annual rainfall 63·9" (1,624 mm).

CONSTITUTION AND GOVERNMENT

The *President* is head of state and head of government, and is elected for a five-year term by adult suffrage. The constitution allows the incumbent no more than two consecutive terms.

Having lapsed in 1966, the kabakaship was revived as a ceremonial office in 1993. Ronald Muwenda Mutebi (b. 13 April 1955) was crowned Mutebi II, 36th Kabaka, on 31 July 1993.

Until 1994 the national legislature was the 278-member National Resistance Council, but this was replaced by a 276-member *Constituent Assembly* in March 1994. A new constitution was adopted on 8 Oct. 1995. A referendum on the return of multiparty democracy was held on 29 June 2000, but 88% of voters supported President Museveni's 'no-party' Movement system of government. Turn-out was 51%. In Feb. 2003 President Museveni pledged to lift the ban on political parties.

National Anthem. 'Oh, Uganda, may God uphold thee'; words and tune by G. W. Kakoma.

RECENT ELECTIONS

Presidential elections were held on 12 March 2001. President Museveni was re-elected by 69·3% of votes cast, with his main rival, Kizza Besigye, receiving 27·8% of the vote. Turn-out was 70·3%. Local non-government monitors described the election as flawed.

Parliamentary elections were held on 26 June 2001. 214 non-partisan members were directly elected in single-seat constituencies. 78 other members had been elected earlier in the month from special interest groups (53 District Women Representatives, 10 army representatives, and 5 each to represent the disabled, the trade unions and youth). Turn-out was 70·3%.

Performance. Real GDP growth was 5·0% in 2000 and 5·6% in 2001. In spite of growth rates which averaged 6·4% over 10 years to 1998, per capita income is only just around the level of 1971, when Gen. Idi Amin came to power. Uganda's total GDP in 2001 was US$5·7bn.

Per capita consumption in 1997 was 34 kWh. Only about 5% of the population has access to electricity, and less than 1% of the rural population.

Agriculture. 80% of the workforce is involved with agriculture. In 1998 the agricultural area included 5·06m. ha of arable land and 1·75m. ha of permanent crops. Agriculture is one of the priority areas for increased production, with many projects funded both locally and externally. In 1996 it recorded 24·2% growth. It contributes 90% of exports. Uganda has great potential for timber-processing for export, manufacture of high-quality furniture and wood products, and various packaging materials.

Fisheries. In 1999 fish landings totalled 226,097 tonnes, entirely from inland waters. Fish farming (especially carp and tilapia) is a growing industry. Uganda's fish-processing industry has greatly expanded in recent years, and by 1998 export earnings were in excess of US$100m. per year

KEY HISTORICAL EVENTS

Kyiv (formerly Kiev) was the centre of the Rus principality in the 11th and 12th centuries and is still known as the Mother of Russian cities. The western Ukraine principality of Galicia was annexed by Poland in the 14th century. At about the same time, Kyiv and the Ukrainian principality of Volhynia were conquered by Lithuania before being absorbed by Poland. Poland, however, could not subjugate the Ukrainian cossacks, who allied themselves with Russia. Ukraine, except for Galicia (part of the Austrian Empire, 1772–1919), was incorporated into the Russian Empire after the second partition of Poland in 1793.

In 1917, following the Bolshevik revolution, the Ukrainians in Russia established an independent republic. Austrian Ukraine proclaimed itself a republic in 1918 and was federated with its Russian counterpart. The Allies ignored Ukrainian claims to Galicia, however, and in 1918 awarded that area to Poland. From 1922 to 1932, drastic efforts were made by the USSR to suppress Ukrainian nationalism. Ukraine suffered from the forced collectivization of agriculture and the expropriation of foodstuffs; the result was the famine of 1932–33 when more than 7m. people died. Following the Soviet seizure of eastern Poland in Sept. 1939, Polish Galicia was incorporated into the Ukrainian SSR. When the Germans invaded Ukraine in 1941 hopes that an autonomous or independent Ukrainian republic would be set up under German protection were disappointed. Ukraine was re-taken by the USSR in 1944. The Crimean region was joined to Ukraine in 1954.

On 5 Dec. 1991 the Supreme Soviet declared Ukraine's independence. Ukraine was one of the founder members of the CIS in Dec. 1991. After independence Crimea, which was part of Russia until 1954, became a source of contention between Moscow and Kyiv. The Russian Supreme Soviet laid claim to the Crimean port city of Sevastopol, the home port of the 350-ship Black Sea Fleet, despite an agreement to divide the fleet. There was also conflict between Ukraine and Russia over possession and transfer of nuclear weapons, delivery of Russian fuel to Ukraine and military and political integration within the CIS. Leonid Kuchma was elected president in 1994 and re-elected in 1999. Support for him has dimmed after public demonstrations against maladministration including the accusation that he was responsible for the murder of a radical journalist. Conflicts between the presidential administration and government led to the sacking of reform-minded prime minister Viktor Yushchenko in April 2001, who was replaced by Kuchma loyalist Anatolii Kinakh at the end of May. The Pope's historic visit to Ukraine in June 2001 was accompanied by disturbances, particularly in the capital.

TERRITORY AND POPULATION

Ukraine is bounded in the east by the Russian Federation, north by Belarus, west by Poland, Slovakia, Hungary, Romania and Moldova, and south by the Black Sea and Sea of Azov. Area, 603,700 sq. km (233,090 sq. miles). The 1995 census population was 51·7m., of whom 73% were Ukrainians, 22% Russians, 1% Jews and 4% other—Belarusians, Moldovans, Hungarians, Bulgarians, Poles and Crimean Tatars (most of the Tatars were forcibly transported to Central Asia in 1944 for anti-Soviet activities during the Second World War). In 2001 the census population was 48,416,000, of whom 25,941,000 were female (67·0% urban in 2001); density, 80 per sq. km.

The UN gives a projected population for 2010 of 45·24m.

Ukraine is divided into 24 provinces, 2 municipalities (Kyiv and Simferopol) and the Autonomous Republic of Crimea. Area and populations (2001 census):

The 1996 Constitution made Ukrainian the sole official language. Russian (the language of 22% of the population), Romanian, Polish and Hungarian are also spoken. Additionally, the 1996 Constitution abolished dual citizenship, previously available if there was a treaty with the other country (there was no such treaty with Russia). Anyone resident in Ukraine since 1991 may be naturalized.

SOCIAL STATISTICS

1998 births, 419,238; deaths, 719,954; marriages, 310,504; divorces, 179,688. Rates (per 1,000 population), 1998: births, 8·4; deaths, 14·4. Annual population growth rate, 1990–99, –0·3%. Infant mortality, 1999, 17 per 1,000 live births; fertility rate, 1999, 1·4 births per woman.

CLIMATE

Temperate continental with a subtropical Mediterranean climate prevalent on the southern portions of the Crimean Peninsula. The average monthly temperature in winter ranges from 17·6°F to 35·6°F (–8°C to 2°C), while summer temperatures average 62·6°F to 77°F (17°C to 25°C). The Black Sea coast is subject to freezing, and no Ukrainian port is permanently ice-free. Precipitation generally decreases from north to south; it is greatest in the Carpathians where it exceeds more than 58·5" (1,500 mm) per year, and least in the coastal lowlands of the Black Sea where it averages less than 11·7" (300 mm) per year.

CONSTITUTION AND GOVERNMENT

In a referendum on 1 Dec. 1991, 90·3% of votes cast were in favour of independence. Turn-out was 83·7%.

A new Constitution was adopted on 28 June 1996. It defines Ukraine as a sovereign, democratic, unitary state governed by the rule of law and guaranteeing civil rights. The head of state is the *President*. Parliament is the 450-member unicameral *Supreme Council*, elected by universal suffrage for four-year terms. For an election to be valid, turn-out in an electoral district must reach 50%. The Prime

Minister is nominated by the President with the agreement of more than half the Supreme Council. There is an 18-member *Constitutional Court*, six members being appointed by the President, six by parliament and six by a panel of judges. Constitutional amendments may be initiated at the President's request to parliament, or by at least one third of parliamentary deputies. The Communist Party was officially banned in the country in 1991, but was renamed the Socialist Party of Ukraine. Hard-line Communists protested against the ban, which was rescinded by the Supreme Council in May 1993.

The 1996 Constitution bans the stationing of foreign troops on Ukrainian soil, but permits Russia to retain naval bases. Conscription is for 18 months. On 31 May 1997 the presidents of Ukraine and Russia signed a Treaty of Friendship and Co-operation which provided *inter alia* for the division of the former Soviet Black Sea Fleet and shore installations. Ukraine has received over US$2bn. in US assistance, more than any other former Soviet republic.

ECONOMY

In 1998 services accounted for 51·2% of GDP, industry 34·4% and agriculture 14·4%.

Overview. Ukraine's economy experienced a revival in 2000 and 2001 after eight years of steep decline. This was partly as a result of home market driven growth including expansion of domestic demand, in particular increased household consumption and in-country investment, which was up by more than 20% in 2001, and partly thanks to the rise of export-oriented industries and the expansion of foreign, notably Russian, export markets for Ukrainian products.

Currency. The unit of currency is the *hryvnia* of 100 *kopiykas*, which replaced karbovanets on 2 Sept. 1996 at 100,000 karbovanets = 1 hryvnia. Inflation had been as a high as 4,735% in 1993 but declined to 12·0% in 2001, and in 2002 there was deflation of 0·6%. Foreign exchange reserves in June 2002 were US$3,105m.; gold reserves were 494,000 troy oz (negligible in 1992). 2000 saw the introduction of a floating exchange rate for the hryvnia. Total money supply in June 2002 was 32,530m. hryvnias.

Budget. 2000 budget (in 1m. hryvnias): revenue, 45,591·3; expenditure, 48,074·0.

Sources of revenue in 1997 included: VAT, 8,242·3; profits tax, 5,792·1. Expenditure included: welfare, 15,949·3; population social protection, 5,607·7; administration, 2,974·9; defence, 1,738·9.

Performance. Ukraine's economy has seen some progress in the last two years. Between 1994 and 1998 average annual real GDP growth was –10·0%, and it was still negative in 1999, at –0·2%. In 2000, however, the economy expanded by 5·9% and in 2001 real GDP growth was 9·1%. In 2001 total GDP was US$37·6bn.

Banking and Finance. A National Bank was founded in March 1991. It operates under government control, its Governor being appointed by the President with the approval of parliament. Its *Governor* is Sergiy Tihipko. There were 219 banks in all in 1996.

There is a stock exchange in Kyiv.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* carbon dioxide emissions in 1998 were the equivalent of 7·0 tonnes per capita. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked Ukraine 136th in the world out of the 142 countries analysed, with 35·0%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

Electricity. Installed capacity was 53·9m. kW in 1997. In 1998 production was 171bn. kWh; consumption per capita was 2,350 kWh. A Soviet programme to greatly expand nuclear power-generating capacity in the country was abandoned in the wake of the 1986 accident at Chernobyl. Chernobyl was closed down on 15

Dec. 2000. It is planned that two new reactors will be built to replace it. In 2001 there were 13 nuclear reactors in use, supplying 47% of output.

Oil and Gas. In 1997 output of crude oil and gas concentrate was 4·1m. tonnes; in 1999 production of natural gas was 16·8bn. cu. metres with 1,120bn. cu. metres of proven gas reserves.

Water. In 1997 water consumption totalled 15,623m. cu. metres.

Minerals. Ukraine's industrial economy, accounting for more than a quarter of total employment, is based largely on the republic's vast mineral resources. The Donetsk Basin contains huge reserves of coal, and the nearby iron-ore reserves of Kryvy Rih are equally rich. Among Ukraine's other mineral resources are manganese, bauxite, nickel, titanium and salt. Coal accounts for roughly 30% of the country's energy production. Coal production, 1997, 79·0m. tonnes; iron ore production, 1998, 51m. tonnes; manganese production, 1997, 3·2m. tonnes; salt production, 1997 estimate, 2·5m. tonnes.

Agriculture. Ukraine has extremely fertile black-earth soils in the central and southern portions, totalling nearly two-thirds of the territory. The original vegetation of the area formed three broad belts that crossed the territory of Ukraine latitudinally. Mixed forest vegetation occupied the northern third of the country, forest-steppe the middle portion and steppe the southern third of the country. Now, however, much of the original vegetation has been cleared and replaced by cultivated crops. In 1997 there were 33·1m. ha of arable land and 1·0m. ha of permanent crops.

Output (in 1,000 tonnes) in 2000: sugarbeets, 13,185; potatoes, 13,037; wheat, 10,159; barley, 6,873; maize, 3,840; sunflower seeds, 3,460; apples, 1,325; tomatoes, 1,320; pumpkins and squash, 1,100; cabbages, 1,070. Livestock, 2000: 10,627,000 cattle, 10,073,000 pigs, 10,060,000 sheep, 825,000 goats, 698,000 horses, 94m. chickens, 22m. ducks. Livestock products, 2000 (in 1,000 tonnes): meat, 1,720; milk, 12,562; eggs, 477.

Forestry. The area under forest in Ukraine in 1995 was 9·2m. ha. In 1999, 10·05m. cu. metres of timber were produced. In 1997 there were 24 national parks and reservations with a total area of 761,800 ha.

Fisheries. In 1999 the catch totalled 407,856 tonnes, of which 403,318 tonnes were from sea fishing. The total catch in 1988 had been 1,048,157 tonnes.

INDUSTRY

In 1997 there were 9,989 industrial enterprises. Output, 1997 (in tonnes unless otherwise stated): crude steel (1999), 27·5m.; rolled ferrous metals, 21m.; cement, 5·1m.; mineral fertilizer, 3·9m.; sugar (1998), 2·16m.; milk products, 661,000; processed meats, 558,000; paper and paperboard (1998), 261,000; butter, 117,000; synthetic fibre, 10,600; cigarettes, 54·5bn. units; fabrics, 82m. sq. metres; footwear, 10·4m. pairs; TV sets, 5·0m. units; refrigerators, 380,000 units; lathes, 2,300 units; cars, 2,000 units; tractors, 4,600 units.

The second largest is the Ukrainian Orthodox Church, Kyivan Patriarchate, headed by

Metropolitan Filaret, Patriarch of Kyiv and All Rus-Ukraine, which was created in June 1992. Metropolitan Filaret was excommunicated by the Ukrainian Orthodox Church, Moscow Patriarchate in Feb. 1997. The third faction is the Ukrainian Autocephalous Orthodox Church, headed by Metropolitan Mefodiy (Kudryakov) of Ternopil, which favours the unification of the three bodies. Only the Ukrainian Orthodox Church, Moscow Patriarchate is in communion with world Orthodoxy.

The hierarchy of the Roman Catholic Church (*Primate*, Cardinal Marian Jaworski, Archbishop Metropolitan of Lviv) was restored by the Pope's confirmation of ten bishops in Jan. 1991. CRIMEA

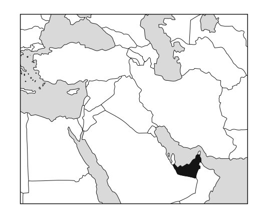
The Crimea is a peninsula extending southwards into the Black Sea with an area of 26,100 sq. km. Population (1991 estimate), 2,549,800 (Ethnic groups, Sept. 1993: Russians, 61·6%; Ukrainians, 23·6%; Tatars, 9·6%). The capital is Simferopol.

It was occupied by Tatars in 1239, conquered by Ottoman Turks in 1475 and retaken by Russia in 1783. In 1921 after the Communist revolution it became an autonomous republic, but was transformed into a province (*oblast*) of the Russian Federation in 1945, after the deportation of the Tatar population in 1944 for alleged collaboration with the German invaders in the Second World War. 46% of the total Tatar population perished during the deportation. Crimea was transferred to Ukraine in 1954 and became an autonomous republic in 1991. About half the surviving Tatar population of 0·4m. had returned from exile by mid-1992.

At elections held in two rounds on 16 and 30 Jan. 1994 Yuri Meshkov was elected *President*. The post of president was abolished by Ukraine after calls for a referendum on Crimean independence.

Parliamentary elections were held on 31 March 2002. Turn-out was around 63%. The Serhii Kunitsyn Block obtained 39 seats, the Leonid Hrach Block 28, Crimean Tatars 5, the Russian Block 5, SDPUo 3 and ind. 20. Serhii Kunitsyn was subsequently appointed *Prime Minister* and Boris Deich *Chairman of Parliament*. The *Speaker* is Leonid Hrach.



On 2 Nov. 1995 parliament adopted a new constitution which defines the Crimea as ‘an autonomous republic forming an integral part of Ukraine’. The status of ‘autonomous republic’ was confirmed by the 1996 Ukrainian Constitution, which provides for Crimea to have its own constitution as approved by its parliament. The Prime Minister is appointed by the Crimean parliament with the approval of the Ukrainian parliament.

The Tatar National Kurultay (Parliament) elects an executive board (*Mejlis*). The *Chairman* is Mustafa Jemilev. In 1993 the Kurultay decided to participate in Ukrainian elections.

KEY HISTORICAL EVENTS

From Sha'am, 35 miles southwest of Ras Musam dam, for nearly 400 miles to Khor al Odeid at the southeastern end of the peninsula of Qatar, the coast, formerly known as the Trucial Coast, of the Gulf (together with 50 miles of the coast of the Gulf of Oman) belongs to the rulers of the 7 Trucial States. In 1820 these rulers signed a peace treaty with the British Government followed by further agreements under which the sheikhs undertook not to enter into any agreement with any power other than the British Government.

British forces withdrew from the Gulf at the end of 1971 and the treaties whereby the UK had been responsible for the defence and foreign relations were replaced by a treaty of friendship. The United Arab Emirates (formed 2 Dec. 1971) consists of the former Trucial States: Abu Dhabi, Dubai, Sharjah, Ajman, Umm al Qaiwain, Ras al-Khaimah (joined in Feb. 1972) and Fujairah. The small state of Kalba was merged with Sharjah in 1952.

TERRITORY AND POPULATION

The Emirates are bounded in the north by the Persian (Arabian) Gulf, northeast by Oman, east by the Gulf of Oman and Oman, south and west by Saudi Arabia, and northwest by Qatar. Their area is approximately 32,300 sq. miles (83,657 sq. km), excluding over 100 offshore islands. The total population at the 1995 census was 2,377,453 (797,710 females). About one-tenth are nomads. Population density, 28 per sq. km. In 1999, 85·5% of the population lived in urban areas. Approximately 88% of the population are foreigners, the highest percentage in any country in the world.

The UN gives a projected population for 2010 of 3·07m.

Populations of the seven Emirates, 1997 estimates (in 1,000): Abu Dhabi, 1,101; Ajman, 137; Dubai, 757; Fujairah, 83; Ras al-Khaimah, 152; Sharjah, 439; Umm al Qaiwain, 39.

The chief cities are Abu Dhabi, the federal capital (population of 904,000 in 1999), Dubai, Sharjah and Ras al-Khaimah. In addition to being the most populous Emirate, Abu Dhabi is also the wealthiest, ahead of Dubai.

The official language is Arabic; English is widely spoken.

KEY HISTORICAL EVENTS

After the withdrawal of the Roman legions, 5th century Celtic Britain was invaded by Scandinavian and Teutonic tribes, collectively called the English. In the course of the next 150 years the English conquered the east and centre of the country, pinning down the Celtic Britons on the higher lands to the west. More than 200 years passed before the prevailing tribes recognized one king.

Then came the Danish invasion, their incomplete defeat by Alfred the Great, the consolidation of the kingdom under Alfred's successors and the Norman Conquest led by William, duke of Normandy, who was crowned king in 1066. When William died in 1087, he left Normandy to his eldest son Robert, thus separating it from England. The French dialect known as Anglo Norman was spoken by the ruling class in England for two centuries after the Conquest.

The Norman heritage was preserved also in the overlap between French and English feudal lords. Henry II, the founder of the Plantagenet dynasty, was feudatory lord of half of France. But most of the French possessions were lost by Henry's son John. Thereafter, the Norman baronage came to regard themselves as English.

The ambitions of Edward III began and those of Henry V renewed the Hundred Years War (1338–1453) with France, which ended with the loss of all the remaining French possessions except Calais.

The dynastic struggle between the rival houses of York and Lancaster culminated in the Tudor ascendancy over political and clerical factions. Henry VII was a unifying monarch preparing the way for Henry VIII who forced the Church to submit to lay rule. Tudor power reached its zenith with Elizabeth I when England, allied with other Protestant powers, humbled the Spanish Armada.

Elizabeth's death brought on a great struggle for supremacy between Crown and Parliament. There followed the Civil War, the execution of Charles I, the rule of Protector Cromwell by military dictatorship, and the restoration of the Stuart monarchy on terms which conceded financial authority and thus decision-making power to Parliament.

The attempt of James II to restore the royal prerogative led to the intervention of William of Orange. James fled the country and the crown was taken by William and his wife Mary as Queen. The accession of William involved England in a protracted war against France but before peace was achieved, the 1688 revolution was confirmed by the Hanoverian succession, and the history of England was merged with that of Great Britain by the union with Scotland in 1707.

The United Kingdom may be said to date from 1707 when the parliaments of England and Scotland were united but the name was not adopted until 1801 when the government of Ireland was incorporated into the United Kingdom of Great Britain and Ireland. With the accession of the Hanoverian George I (1714), the system of Parliamentary party government took hold. Relations between Parliament and Crown went through an unsettled period in the reign of George III, who took the blame for the loss of the American colonies. The War of Independence ended with Britain's recognition of American right to self-government in 1783. The humiliation was softened by economic development at home where the Industrial Revolution was in full swing. In 1793 revolutionary France declared war, and was not finally defeated until 1815. The demands of war stimulated the new, steam-powered industries. After 1815 there was frequent unrest as an increasingly urban

and industrial society found its interests poorly represented by a parliament composed chiefly of landowners. The Reform Act of 1832 improved representation in Parliament, and further acts (1867, 1884, 1918 and 1928) led gradually to universal adult suffrage. The accession of Victoria in 1837 was the beginning of an era of unprecedented material progress. Early industrial development produced great national wealth but its distribution was uneven and the condition of the poor improved slowly. Whereas early Victorian reforms were responses to obvious distress, governments after 1868 were more inclined towards preventive state action.

Abroad, there was war with Russia in the Crimea (1854–56); most wars, however, were fought to conquer or pacify colonies. The 19th-century empire included India, Canada, Australasia, and vast territories in Africa and Eastern Asia. After 1870 the Suez Canal enabled Britain to control the empire more efficiently; she became a 40% shareholder in 1875 and the controlling power in Egypt in 1882.

The most serious imperial wars were the Boer Wars of 1881 and 1899–1902. Britain negotiated a Union of South Africa, by which South Africa enjoyed the same autonomy agreed for Canada (1867), Australia (1901) and later New Zealand (1907). The 'dominion status' of these countries was clarified by the Statute of Westminster (1931).

On 3 Aug. 1914 Germany invaded Belgium. Britain was obliged by treaty to retaliate by declaring war. At this time, a rebellion was staged in Ireland, born of the failure of successive attempts to agree a formula for Irish Home Rule. The issue was complicated by factional disagreement in southern Ireland and the wish of northern Ireland to remain in the United Kingdom. In 1920 after four years' conflict the Government of Ireland Act partitioned the country. The northern six counties remained British, a parliament was created and a Unionist government took office. The southern 26 counties moved by stages to complete independence as the Republic of Ireland.

Germany revived as a military power in the 1930s, and invaded Poland on 1 Sept. 1939. Britain, bound once more by treaty, declared war. The Second World War ended with German and Japanese defeat in 1945. It was a time of great social upheaval. In the 1945 election a Labour government was returned with a large majority, and a socialist programme which emphasized wealth distribution above wealth creation was implemented. Subsequent governments modified but generally accepted the changes. After 1979, however, Conservative governments reversed much of this legislation before Labour regained power in 1997 on a free-market manifesto which promised better economic management and job creation.

Beginning with the independence and partition of India and Pakistan in 1947, there was rapid progress to independence for all the colonies. The new concept was of a Commonwealth of freely associated states, recognizing the British monarch as symbolic Commonwealth head (some states chose to retain the monarch as head of state).

The Second World War all but bankrupted Britain, but the option of joining other European countries in moves towards unity was resisted in favour of a 'special relationship' with the USA. It was not until 1961 that economic reality persuaded Britain of the need to join the European Economic Community. The application was rebuffed by France but a second application was successful in 1973. Membership of the Community was endorsed by referendum in 1975.

[2]The final counts for England and Wales are believed to be over-stated as a result of an error in processing. The preliminary counts presented here rounded to the nearest hundred are thought to be more accurate.
[3]There was a high level of non-enumeration in Northern Ireland during the 1981 census mainly as a result of protests in Catholic areas about the Republican hunger strikes.

London: Located in the southeast of England on the River Thames, London is the third largest city in Europe, after Paris and Moscow, and is a major banking, insurance and commodities centre. With origins dating back to Roman times, London has a rich historical and cultural fabric, which serves to attract swathes of tourists despite a crumbling transport infrastructure.

11 'Standard Regions' (also classified as 'level 1 regions' for EU purposes) are identified in the UK as economic planning regions. They have no administrative significance. They are: Northern Ireland, Scotland, Wales, and eight regions of England (East Anglia, East Midlands, North, North West, South East, South West, West Midlands, Yorkshire and Humberside).

The following table shows the distribution of the urban and rural population of England and Wales (persons present) in 1951, 1961, 1971, and 1981:

[1]As existing at each census.

Urban and rural areas were re-defined for the 1981 and 1991 censuses on a land use basis. In Scotland 'localities' correspond to urban areas. The 1981 census gave the usually resident population of England and Wales as 48,521,596, of which 43,599,431 were in urban areas; and of Scotland as 5,035,315, of which 4,486,140 were in localities.

British Citizenship. Under the British Nationality Act 1981 there are three main forms of citizenship: citizenship for persons closely connected with the UK; British Dependent Territories citizenship; British Overseas citizenship. British citizenship is acquired automatically at birth by a child born in the UK if his or her mother or father is a British citizen or is settled in the UK. A child born abroad to a British

citizen is a British citizen by descent. British citizenship may be acquired by registration for stateless persons, and for children not automatically acquiring such citizenship or born abroad to parents who are citizens by descent; and, for other adults, by naturalization. Requirements for the latter include five years' residence (three years for applicants married to a British citizen). The Hong Kong (British Nationality) Order 1986 created the status of British National (Overseas) for citizens connected with Hong Kong before 1997, and the British Nationality (Hong Kong) Act 1990 made provision for up to 50,000 selected persons to register as British citizens.

Emigration and Immigration. Immigration is mainly governed by the Immigration Act 1970 and Immigration Rules made under it. British and Commonwealth citizens with the right of abode before 1983 are not subject to immigration control, nor are citizens of European Economic Area countries. Other persons seeking to work or settle in the UK must obtain a visa or entry clearance.

Migration statistics are derived from the government's International Passenger Survey, and exclude the Republic of Ireland.

In 2001 there were 106,820 acceptances for settlement in the UK (125,090 in 2000), including from: Asia, 43,340; Africa, 31,430; Europe, 13,795. Main individual countries were: Pakistan, 11,535; Somalia, 8,290; India, 7,280; Nigeria, 5,040; South Africa, 4,755; USA, 4,385; Bangladesh, 4,050; Sri Lanka, 4,040; Turkey, 3,240; Australia, 3,205.

Asylum. In 2001 there were 71,365 applications for asylum (80,315 applications in 2000 but 29,650 in 1996 and 2,905 in 1984). The main countries of origin were Afghanistan, Iraq, Somalia and Sri Lanka. The 2001 figure was the second highest in Europe, after Germany. Applications, excluding dependants, rose in 2002 to 85,865. While respecting its obligations to political refugees under the UN Convention and Protocol relating to the status of Refugees, the government has powers under the Asylum and Immigration Act 1996 to weed out applicants seeking entry for non-political reasons and to designate certain countries as not giving risk of persecution. 24% of applicants were accepted in 1998 (6% in 1995).

SOCIAL STATISTICS

UK statistics, 2001: births, 669,000 (268,000 outside marriage); deaths, 602,268; marriages (2000), 305,912; divorces, 156,814. Great Britain statistics, 2001: births, 647,000; deaths, 587,755; marriages (2000), 298,328; divorces, 154,449; abortions, 188,416. The number of births in 2001 was the lowest since 1977. In 1976, uniquely in British history, deaths in the UK (680,800) exceeded births (675,500). In 1999 lung disease, including pneumonia, lung cancer, tuberculosis and asthma, caused 153,000 deaths, making it the biggest killer, ahead of coronary heart disease, at 132,000, and cancers excluding those linked to the respiratory system, at 119,000. UK life expectancy, 1998–2000: males, 75·1 years; females, 80·0. A World Health Organization report published in June 2000 put Britons in 14th place in a 'healthy life expectancy' list, with an expected 71·7 years of healthy life for babies born in 1999. Annual population growth rate, 1999–2000, 0·2%. In 2000 the suicide rate

was 10 per 100,000 population. The average rate in the European Union as a whole in 1998 was 12 per 100,000. Infant mortality, 2001, 5·5 per 1,000 live births. Fertility rate, 1999, 1·7 births per woman. Of the 669,000 live births in the UK in 2001, 40·1% were to unmarried women, up from 6% in 1961 and 23% in 1987. In 1998 the average age of a woman giving birth was 28·9 years, the highest average age since records began in 1964. In 1999 for the first time there were more births to women in the 30–34 age group than in the 25–29 bracket. UK birth rate (per 1,000 population), 2001, 11·4; death rate, 2001, 10·2. The average age of first marriage in 1997 was 27·5 years for brides and 29·6 years for bridegrooms, compared to 24·3 years and 26·4 years respectively in 1987. 40% of marriages in 1999 were religious and 60% civil, compared to 52% religious and 48% civil in 1981.

In 2001, 15·9% of the total population was over 65, up from 11·7% in 1960. As the ageing population continues to grow, it has been estimated that by 2010 there will be 350,000 more people over the age of 80 than there were at the end of the 20th century. The first decade of the new century is also expected to see a rise of 1·4m., or 23%, in the number of people between 55 and 64. By 2000 the number of centenarians had surpassed 8,000.

In 2000 the average household in Great Britain consisted of 2·4 people, down from 3·1 in 1961. The proportion of single-parent families was 25% in 1998, up from 21% in 1996.

England and Wales statistics (in 1,000), 2001 (and 2000): births, 595 (604); deaths, 530 (536). 2000 (1999) marriages (in 1,000), 268 (264); divorces, 144 (141). The 2001 births total of 595,000 was the lowest since 1977.

Britain has one of the highest rates of drug usage in Europe. Figures released in Nov. 1999 showed that approaching 40% of schoolchildren aged 15 and 16 have tried cannabis, and 9% of adults did so in the previous 12 months. Use of ecstasy, amphetamines and LSD in England and Wales was the highest in the European Union. Drug-related deaths increased by 70% between 1992 and 1999.

A UNICEF report published in 2000 showed that 19·8% of children in Great Britain live in poverty (in households with income below 50% of the national median), compared to just 2·6% in Sweden. The report also showed that the poverty rate of children in lone-parent families was 45·6%, compared to 13·3% in two-parent families.

CLIMATE

The climate is cool temperate oceanic, with mild conditions and rainfall evenly distributed over the year, though the weather is very changeable because of cyclonic influences. In general, temperatures are higher in the west and lower in the east in winter and rather the reverse in summer. Rainfall amounts are greatest in the west, where most of the high ground occurs.

The Queen's legal title rests on the statute of 12 and 13 Will. III, ch. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being Protestants'. By proclamation of 17 July 1917 the royal family became known as the House and Family of Windsor. On 8 Feb. 1960 the Queen issued a declaration varying her confirmatory declaration of 9 April 1952 to the effect that while the Queen and her children should continue to be known as the House of Windsor, her descendants, other than descendants entitled to the style of Royal Highness and the title of Prince or Princess, and female descendants who marry and their descendants should bear the name of Mountbatten-Windsor.

Lineage to the throne. 1) Prince of Wales. 2) Prince William of Wales. 3) Prince Henry of Wales. 4) Duke of York. 5) Princess Beatrice of York. 6) Princess Eugenie of York.

By letters patent of 30 Nov. 1917 the titles of Royal Highness and Prince or Princess are restricted to the Sovereign's children, the children of the Sovereign's sons and the eldest living son of the eldest son of the Prince of Wales.

Provision is made for the support of the royal household, after the surrender of hereditary revenues, by the settlement of the Civil List soon after the beginning of each reign. The Civil List Act of 1 Jan. 1972 provided for a decennial, and the Civil List (Increase of Financial Provision) Order 1975 for an annual review of the List, but in July 1990 it was again fixed for one decade.

The Civil List of 2001–2010 provides for an annuity of £7,900,000 to the Queen; and £359,000 to Prince Philip. These amounts are the same as for the period 1991–2000. The income of the Prince of Wales derives from the Duchy of Cornwall. The Civil List was exempted from taxation in 1910. The Queen has paid income tax on her private income since April 1993.

The supreme legislative power is vested in Parliament, which consists of the Crown, the House of Lords and the House of Commons, and dates in its present form from the middle of the 14th century. A Bill which is passed by both Houses and receives Royal Assent becomes an Act of Parliament and part of statute law.

Parliament is summoned, and a General Election is called, by the sovereign on the advice of the Prime Minister. A Parliament may last up to five years, normally divided into annual sessions. A session is ended by prorogation, and most Public Bills which have not been passed by both Houses then lapse, unless they are subject to a carry over motion. A Parliament ends by dissolution, either by will of the sovereign or by lapse of the five-year period.

Under the Parliament Acts 1911 and 1949, all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the Lords without amendment, may become law without their concurrence within one month of introduction in the Lords. Public Bills, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the Commons in two successive sessions and rejected each time by the Lords, may become law without being passed by the Lords provided that one year has elapsed between Commons second reading in the first session and third reading in the second session, and that the Bill reaches the Lords at least one month before the end of the second session. The Parliament Acts have been used three times since 1949: in 1991 for the War Crimes Act, in 1999 for the European Parliamentary Elections Act and for the Sexual Offences (Amendment) Act in 2000.

Peerages are created by the sovereign, on the advice of the prime minister, with no limits on their number. The following are the main categories of membership: 1) *Lords Spiritual*, comprising two archbishops and the 24 most senior diocesan bishops of the Church of England. They cease to be members when they retire; 2) *Lords Temporal*, comprising *Life Peers*, *Hereditary Peers* and *Lords of Appeal*. Life peers are appointed under the Life Peerages Act 1958 (547 as at 3 Feb. 2003). Most hereditary peers left the House under the terms of the House of Lords Act 1999 on 11 Nov. 1999, except for 92. These consist of 75 elected by their party or Crossbench group, 15 Office holders elected by the whole House and two peers who sit by virtue of holding Royal Office (the Earl Marshal, the Duke of Norfolk; and the Lord Great Chamberlain, the Marquess of Cholmondeley). Lords of Appeal (Law Lords, both active and retired) were granted peerages of life under the Appellate Jurisdiction Act 1876, in order to enable them to hear appeal cases in the House of Lords. As at 3 Feb. 2003 there were 690 members, of whom 113 were women. The average attendance at each sitting of the House for end of session 2001–02 was 370.

The House of Commons consists of members (of both sexes) representing constituencies determined by the Boundary Commissions. Persons under 21 years of age, Clergy of the Church of England and of the Scottish Episcopal Church, Ministers of the Church of Scotland, Roman Catholic clergymen, civil servants, members of the regular armed forces, policemen, most judicial officers and other office-holders named in the House of Commons (Disqualification) Act are disqualified from sitting in the House of Commons. No peer eligible to sit in the House of Lords can be elected to the House of Commons unless he has disclaimed his title, but Irish peers and holders of courtesy titles, who are not members of the House of Lords, are eligible.

The Representation of the People Act 1948 abolished the business premises and University franchises, and the only persons entitled to vote at Parliamentary elections are those registered as residents or as service voters. No person may vote in more than one constituency at a general election. Persons may apply on certain

grounds to vote by post or by proxy. Elections are held on the first-past-the-post system, in which the candidate who receives the most votes is elected.

All persons over 18 years old and not subject to any legal incapacity to vote and who are either British subjects or citizens of Ireland are entitled to be included in the register of electors for the constituency containing the address at which they were residing on the qualifying date for the register, and are entitled to vote at elections held during the period for which the register remains in force.

Members of the armed forces, Crown servants employed abroad, and the wives accompanying their husbands, are entitled, if otherwise qualified, to be registered as ‘service voters’ provided they make a ‘service declaration’. To be effective for a particular register, the declaration must be made on or before the qualifying date for that register. In certain circumstances, British subjects living abroad may also vote.

The Parliamentary Constituencies Act 1986, as amended by the Boundary Commissions Act 1992, provided for the setting up of Boundary Commissions for England, Wales, Scotland and Northern Ireland. The Commissions’ last reports were made in 1995, and thereafter reports are due at intervals of not less than eight and not more than 12 years; and may be submitted from time to time with respect to the area comprised in any particular constituency or constituencies where some change appears necessary. Any changes giving effect to reports of the Commissions are to be made by Orders in Council laid before Parliament for approval by resolution of each House. The Parliamentary electorate of the United Kingdom and Northern Ireland in the register in 2001–02 numbered 44,403,238, of whom 36,991,780 were in England, 2,236,143 in Wales, 3,984,306 in Scotland and 1,191,009 in Northern Ireland. In 1991 it was officially estimated that 7·1% of eligible voters failed to register on the electoral roll.

At the UK general election held in June 2001, 659 members were returned, 529 from England, 72 from Scotland, 40 from Wales and 18 from Northern Ireland. Every constituency returns a single member.

One of the main aspects of the Labour government’s programme of constitutional reform is Scottish and Welsh devolution. In the referendum on Scottish devolution on 11 Sept. 1997, 1,775,045 votes (74·3%) were cast in favour of a Scottish parliament and 614,400 against (25·7%). The turn-out was 60·4%, so around 44·8% of the total electorate voted in favour. For the second question, on the Parliament’s tax-raising powers, 1,512,889 votes were castin favour (63·5%) and 870,263 against (36·5%). This represented 38·4% of the total electorate.

On 18 Sept. 1997 in Wales there were 559,419 votes cast in favour of a Welsh assembly (50·3%) and 552,698 against (49·7%). The turn-out was 51·3%.

In Aug. 1911 provision was first made for the payment of a salary of £400 per annum to members of the Commons, other than those already in receipt of salaries as officers of the House, as Ministers or as officers of Her Majesty’s household. For current salaries *see below*. Members of the House of Lords are unsalaried but may recover expenses incurred in attending sittings of the House within maxima for each day’s attendance of £61·00 for day subsistence, £122·00 for night subsistence and £51·00 for secretarial and research assistance and office expenses. Additionally, Members of the House who are disabled may recover the extra cost of attending the House incurred by reason of their disablement. In connection with attendance at the House and parliamentary duties within the UK, Lords may also recover the cost of travelling to and from home.

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, which is dependent on the support of a majority in the House of Commons. The head of the Cabinet is the *Prime Minister*, a position first constitutionally recognized in 1905. The Prime Minister’s colleagues in the Cabinet are appointed on his recommendation.

Salaries. Members of Parliament receive an annual parliamentary salary of £55,118 (2002–03). The salaries of Ministers who are MPs include this as a component in addition to their ministerial salary. Total salaries accepted for 2002–03: Prime Minister, £171,554; Cabinet Ministers, £69,861 or £124,979 if also members of the House of Commons (Cabinet Ministers in the House of Lords, £94,826); Lord Chancellor, £180,045; Ministers of State, £91,358 (in the Lords £74,040); Parliamentary Under-Secretaries, £82,624 (in the Lords, £64,485); Government Chief Whip, £124,979 (in the Lords, £69,861); Leader of the Opposition, £119,159 (in the Lords, £64,485); Speaker, £124,979; Attorney-General, £99,200; Solicitor-General, £115,989; Advocate-General for Scotland, £115,989. In addition to pay, MPs are entitled to Office Costs, Supplementary London, Additional Costs, Mileage, Temporary Assistance and Winding Up Allowances, reimbursement of costs owing to recall during a recess and a Resettlement Grant. Ministers receive a severance payment of three months' salary. The Prime Minister is entitled to a salary of £116,436 in addition to the parliamentary salary of £55,118. Cabinet ministers are entitled to salaries of £69,861 (Commons) and £94,826 (Lords). Cabinet ministers in the Commons also receive the parliamentary salary, but those in the Lords do not.

The Privy Council. Before the development of the Cabinet System, the Privy Council was the chief source of executive power, but now its functions are largely formal. It advises the monarch to approve Orders in Council and on the issue of royal proclamations, and has some independent powers such as the supervision of the registration of the medical profession. It consists of all Cabinet members, the Archbishops of Canterbury and York, the Speaker of the House of Commons and senior British and Commonwealth statesmen. There are a number of advisory Privy Council committees. The Judicial Committee is the final court of appeal from courts of the UK dependencies, the Channel Islands and the Isle of Man, and some Commonwealth countries.

Local Government. Administration is carried out by four types of bodies: (i) local branches of some central ministries, such as the Departments of Health and Social Security; (ii) local sub-managements of nationalized industries; (iii) specialist authorities such as the National Rivers Authority; and (iv) the system of local government described below. The phrase 'local government' has come to mean that part of the local administration conducted by elected councils. There are separate systems for England, Wales and Scotland.

The Local Government Act 1992 provided for the establishment of new unitary councils (authorities) in England, responsible for all services in their areas, though the two-tier structure of district and county councils remained for much of the country. In 1996 all of Wales and Scotland was given unitary local government systems.

Local authorities have statutory powers and claims on public funds. Relations with central government are maintained through the Department of the Environment, Transport and the Regions in England, and through the Welsh and Scottish Executives. In England the Home Office and the Department of Education and Skills are also concerned with some local government functions. (These are performed by departments within the Welsh and Scottish Offices.) Ministers have powers of intervention to protect individuals' rights and safeguard public health, and the government has power to cap (i.e. limit) local authority budgets.

The chair of the council is one of the councillors elected by the rest. In boroughs and cities his or her title is Mayor. Mayors of cities may have the title of Lord Mayor conferred on them. 53 towns in England and Wales and five in Scotland have the status of city. Brighton and Hove, Wolverhampton and Inverness were

awarded city status in 2000. In 2002 Preston, Newport, Stirling, Lisburn and Newry were given city status to mark Queen Elizabeth II's golden jubilee. This status is granted by the personal command of the monarch and confers no special privileges or powers. In Scotland, the chair of city councils is deemed Lord Provost, and is elsewhere known as Convenor or Provost. In Wales, the chair is called Chairman in counties and Mayor in county boroughs. Any parish or community council can by simple resolution adopt the style 'town council' and the status of town for the parish or community. Basic and other allowances are payable to councillors (except Scottish community councillors).

Functions. Legislation in the 1980s initiated a trend for local authorities to provide services by, or in collaboration with, commercial or voluntary bodies rather than provide them directly. Savings are encouraged by compulsory competitive tendering. In England, county councils are responsible for strategic planning, transport planning, non-trunk roads and regulation of traffic, personal social services, consumer protection, disposal of waste, the fire and library services and, partially, for education. District councils are responsible for environmental health, housing, local planning applications (in the first instance) and refuse collection. Unitary authorities combine the functions of both levels.

Finance. Revenue is derived from the Council Tax, which supports about one-fifth of current expenditure, the remainder being funded by central government grants and by the redistribution of revenue from the national non-domestic rate (property tax). Capital expenditure is financed by borrowing within government-set limits and sales of real estate.

Elections. England: The 36 metropolitan districts are divided into wards, each represented by three councillors. One-third of the councillors are elected each year for three years out of four. All metropolitan districts had an election on 1 May 2003. The 238 district councils and the 47 English unitary authorities are divided into wards. Each chooses either to follow the metropolitan district system, or to have all seats contested once every four years, or to elect by halves every two years. 232 district councils had an election on 1 May 2003. The 34 county councils have one councillor for each electoral division, elected every four years, with elections scheduled for 2005.

In London there are 33 councils (including the City of London), the whole of which are elected every four years. London borough elections will next be held in 2006. The Greater London Authority has a 25-member Assembly, elected using AMS (Additional Member System), and a directly elected mayor, elected by the SV (Supplementary Vote) system. For the election of London Assembly members London is divided into 14 constituencies. Each constituency elects one member, in addition to which there are 11 'London Member' seats. Elections take place every four years, the next being in June 2004.

Wales: The 22 unitary authorities are split between single and multi-member wards, elected every four years. The next elections will be in 2004.

Scotland: The 32 unitary authorities hold elections every four years. The last elections were held on 1 May 2003.

Resident citizens of the UK, Ireland, a Commonwealth country or an EU country may (at age 18) vote and (at age 21) stand for election.

Election Results. Local government elections for 340 councils on 1 May 2003 resulted in the Conservative control of 110 councils, Labour 66, the Liberal Democrats 28, ind. 10, Residents' Associations 2 and the Scottish National Party 1, with no overall control in 123. The Conservatives gained 566 seats (bringing their total to 4,423), Labour lost 833 (total 3,001), the Liberal Democrats gained 193 (total 2,624) and the Scottish Nationalists lost 21 (182).

The first election to provide London with an elected Mayor and a 25-member London Assembly took place on 4 May 2000. Ken Livingstone (ind.) won with 57·92% of the vote after counting second preferences. He gained 776,427 first and second votes (667,877 as first votes), beating Steve Norris (Conservative) into second place. Ken Livingstone took office on 3 July 2000.

National Anthem. 'God Save the Queen' (King) (words and tune anonymous; earliest known printed source, 1744).

RECENT ELECTIONS

At the general election of 7 June 2001, 31,286,284 votes were cast, with a turn-out of 59·2% (the lowest since the war). The Labour Party won 413 seats with 42·0% of votes cast (418 seats with 43·2% in 1997); the Conservative Party 166 with 32·7% (165 with 30·7%); the Liberal Democratic Party 52 with 18·8% (46 with 16·8%); ind. 1 (1). Regional parties (Scotland): the Scottish National Party won 5 seats (6 in 1997); (Wales): Plaid Cymru 4 (4); (Northern Ireland): the Ulster Unionist Party 6 (10); the Democratic Unionist Party 5 (2); the Social and Democratic Labour Party 3 (3); Sinn Féin 4 (2).

Labour gained 146 seats and lost 1; the Conservatives gained no seats and lost 178; the Liberal Democrats gained 30 seats and lost 2.

In Feb. 2002, 17·9% of the seats in parliament were held by women; Sweden had the highest proportion of women MPs, with 43·3%.

European Parliament. The United Kingdom has 87 representatives. At the June 1999 elections turn-out was 24·0%—the lowest in any of the EU member countries. The Conservative Party won 36 seats with 35·8% of votes cast (group in European Parliament: European People's Party); the Labour Party, 29 with 28·0% (Party of European Socialists); the Liberal Democratic Party, 10 with 12·7% (European Liberal, Democrat and Reform Party); UK Independence, 3 with 7·0% (Europe of Democracies and Diversities); the Green Party, 2 with 6·2% (Greens); the Scottish National Party, 2 with 2·7% (European Radical Alliance); Plaid Cymru, 2 with 1·8% (Greens/European Free Alliance). Voting for these parties was on a proportional system, used for the first time in Britain. Voting in Northern Ireland was by the transferable vote system: the Democratic Ulster Unionist Party (non-affiliated), the Social Democrat and Labour Party (Party of European Socialists) and the Official Ulster Union Party (Independents for a Europe of Nations) gained 1 seat each.

DEFENCE

The Defence Council was established on 1 April 1964 under the chairmanship of the Secretary of State for Defence, who is responsible to the Sovereign and Parliament for the defence of the realm. Vested in the Defence Council are the functions of commanding and administering the Armed Forces. The Secretary of State heads the Department of Defence.

Defence policy decision-making is a collective governmental responsibility. Important matters of policy are considered by the full Cabinet or, more frequently, by the Defence and Overseas Policy Committee under the chairmanship of the Prime Minister.

In 2000 there were 20,610 UK armed forces personnel based in Germany, 1,050 based in Brunei, 3,200 based in Cyprus and 330 in Gibraltar. In addition there were 2,700 serving as part of SFOR II in Bosnia, 300 in Iraq/Kuwait (all RAF) and an estimated 3,500 in Yugoslavia.

The ban on homosexuals serving in the armed forces, which had been upheld by a House of Commons vote in May 1996, was suspended in Sept. 1999 after the European Court of Human Rights ruled that the current ban was unlawful.

Defence Budget. The defence budget for 2003–04 is £24,978m. (US$38,918m.), up from £24,198m. (US$37,703m.) in 2002–03 and £23,570m. in 2001–02 (US$36,724m.). Defence spending in 2001 represented 2·5% of GDP, down from 5·2% in 1985. Per capita defence expenditure in 2001 totalled £402 (US$583), compared to £593 (US$852) in 1985. It was announced in July 2002 that the defence budget would rise by £3·5bn. (US$5·4bn.) over three years, the largest sustained increase in planned defence spending in 20 years.

Nuclear Weapons. Having carried out its first test in 1952, there have been 45 tests in all. The nuclear arsenal consisted of approximately 185 warheads in Jan. 2002 according to the Stockholm International Peace Research Institute.

Arms Trade. The UK is a net-exporter of arms and in 2001 was the world's second largest exporter after the USA (with sales worth US$4bn., or 18·8% of the world total).

In 2000 BAE SYSTEMS was the 3rd largest arms producing company in the OECD, behind Lockheed Martin and Boeing. It accounted for US$14·40bn. of arms sales (Lockheed Martin US$18·61bn., Boeing US$16·90bn.). Rolls Royce was the 14th largest producer, accounting for US$2·13bn. of sales.

The UK was the 12th largest recipient of major conventional weapons in the world during the period 1997–2001, spending US$1,247m. in 2001. Only Chnia spent more in 2001.

Army. The Field Army is run from Headquarters Land Command, based at Wilton. The Ministry of Defence retains direct control of units in Northern Ireland, although day-to-day military responsibility is given to the Chief of the General Staff. The Permanent Joint Headquarters, recently formed at Northwood, is responsible for overseas garrisons, which include the Falkland Islands, Cyprus and Brunei.

The established strength of the Regular Army in 2002 was 114,800 which includes soldiers under training and Gurkhas. In addition there were some 4,500

Royal Irish Home Service soldiers. There were 3,800 Gurkhas and 8,050 women in 2002. The strength of the Regular Reserves was 160,800. There were 7,800 soldiers based in Northern Ireland in 2002 in addition to the 4,500 Royal Irish Home Service soldiers.

The role of the Territorial Army (TA) is to act as a general Reserve for the Army by reinforcing it as required, with individuals, sub-units and other units, either in the UK or overseas; and by providing the framework and basis for regeneration and reconstruction to cater for the unforeseen in times of national emergency. The TA also provides a nationwide link between the military and civil communities. Strength, 2002, 40,350. In addition, men who have completed service in the Regular Army normally have some liability to serve in the Regular Reserve. All members of the TA and Regular Reserve may be called out by a Queen's Order in time of emergency of imminent national danger, and most of the TA and a large proportion of the Regular Reserve may be called out by a Queen's Order when warlike operations are in preparation or in progress. The Home Service Battalions of the Royal Irish Regiment are only liable for service in Northern Ireland.

Equipment includes 205 Challenger, 386 Challenger 2 and 3 Chieftain main battle tanks.

Women serve throughout the Army in the same regiments and corps as men. There are only a few roles in which they are not employed such as the Infantry and Royal Armoured Corps.

The Oxford Illustrated History of the British Army. OUP, 1995

Navy. Control of the Royal Navy is vested in the Defence Council and is exercised through the Admiralty Board, chaired by the Secretary of State for Defence.

Changes in management structure, reductions in strength, base closures and rationalization were initiated in 1994. The Chief of Fleet Support and Controller of the Navy are now located in the Bristol area and their various support agencies rationalized. The naval bases at Rosyth and Portland closed in 1995. Although the dockyards at Rosyth and Devonport remain largely committed to naval refit work, both yards have now been sold to commercial operators.

The C.-in-C. Fleet, headquartered at Northwood, is responsible for the command of the fleet, while command of naval establishments in the UK is exercised by the C.-in-C. Naval Home Command from Portsmouth. Main naval bases are at Devonport, Portsmouth and Faslane, with a minor base overseas at Gibraltar.

The Royal Naval Reserve (RNR) and the Royal Marines Reserve (RMR) are volunteer forces which together in 2002 numbered 4,100. The RNR provides trained personnel in war to supplement regular forces. In addition, men who have completed service in the Royal Navy and the Royal Marines have a commitment to serve in the Royal Fleet Reserve, currently 10,300-strong.

The roles of the Royal Navy are first, to deploy the national strategic nuclear deterrent, second to provide maritime defence of the UK and its dependent territories, third to contribute to the maritime elements of NATO's force structure and fourth to meet national maritime objectives outside the NATO area. Personnel strength has reduced steadily over the past five years and is now stabilizing at about 42,350 (including Royal Marines) in 2002, with operational strength at 12 nuclear attack submarines, 2 aircraft carriers (with an additional 1 in refit) and 32 destroyers and frigates.

The strategic deterrent is now borne principally by the four new Trident submarines—*Vanguard, Victorious, Vigilant* and *Vengeance.* They are each capable of deploying 16 US-built Trident II D5 missiles. The last missile submarine of the Resolution class, *Renown*, deploying Polaris missiles, decommissioned in Aug. 1996.

The strength of the fleet's major units in the respective years:

[1]Following government policy, of the three Carriers held, only two are kept in operational status.

The nuclear-powered submarine force numbers 12. The four diesel-electric submarines of the Upholder class were decommissioned in 1994.

The principal surface ships are the Light vertical/short take-off and landing Aircraft Carriers of the Invincible class (*Invincible, Illustrious* and *Ark Royal*) completed 1980–85, embarking an air group including Sea Harrier vertical/short take-off and landing fighters. Two of these ships are maintained in the operational fleet, with the third (currently *Illustrious*) either in refit or reserve. A new Helicopter Carrier, specifically designed for amphibious operations, *HMS Ocean*, has now entered service.

The Fleet Air Arm, 6,200-strong in 2002, has 214 aircraft of which 34 combat aircraft (Sea Harrier vertical/short take-off and landing fighter aircraft) and 120 armed helicopters.

The Royal Marines corps, 6,200-strong in 2002, provides a commando brigade comprising three commando groups. The Special Boat Squadron and specialist defence units complete the operational strength.

The total number of trained naval service personnel was (in 1,000) on 1 April: 1996, 45·6; 1997, 41·7; 1998, 40·5; 1999, 39·3; 2000; 38·9; 2001, 38·5; 2002, 37·5.

Air Force. The Royal Flying Corps was established in May 1912, with military and naval wings, of which the latter became the independent Royal Naval Air Service in July 1914. On 2 Jan. 1918 an Air Ministry was formed, and on 1 April 1918 the Royal Flying Corps and the Royal Naval Air Service were amalgamated, under the Air Ministry, as the Royal Air Force (RAF).

In 1937 the units based on aircraft carriers and naval shore stations again passed to the operational and administrative control of the Admiralty, as the Fleet Air Arm. In 1964 control of the RAF became a responsibility of the Ministry of Defence.

The RAF is administered by the Air Force Board, of which the Secretary of State for Defence is Chairman. Following recommendations in the 1998 Strategic Defence Review, which placed increased emphasis on Joint and Expeditionary operations, the RAF has experienced considerable restructuring. The creation of the tri-service Defence Logistics Organisation (DLO) resulted in the closure of Logistics Command on 31 Oct. 1999 with most of the logistics support functions previously carried out by the Command now subsumed into the new organization. However, those former Logistics Command Units responsible for tasks falling to the RAF rather than DLO have now been passed to the two remaining RAF Commands: Strike Command and Personnel and Training Command.

Strike Command's mission is to deliver and develop air power in the most effective manner to meet the UK's foreign and security policy. It is responsible for all of the RAF's frontline forces. It operates 427 combat aircraft (plus 121 in store) including 217 Tornados, 53 Jaguars and 60 Harriers (used for battlefield support).

As an expeditionary force, the RAF, on an increasing basis, exercises and operates overseas. Current and recent basing/deployments include the Falklands, Cyprus, Italy and the Balkans, Scandinavia, North America, the Middle East and the Far East. Headquarters RAF Strike Command is based at RAF High Wycombe.

Personnel and Training Command, which is based at RAF Innsworth in Gloucestershire, was established in 1994, and exercises responsibility for the RAF Personnel Management Agency (RAF PMA) and Training Group Defence Agency (TGDA). RAF PMA handles career management of RAF Regular and Reserve Forces, whilst the TGDA is responsible for recruitment and training. HQ PTC also provides department of state functions, such as defence policy-making and service to ministers and Parliament, and the career management of civilian personnel worldwide.

RAF personnel, 1 Dec. 2002, 53,040 (including 5,844 women); total trained personnel, 48,493. Since Dec. 1991 women have been eligible to fly combat aircraft. There were also 14,000 Air Force reserves in 2002 including 1,900 volunteers. In addition there were 28,000 ex-RAF personnel with a recall liability, having left the RAF with a service pension.

INTERNATIONAL RELATIONS

The UK is a member of the UN, WTO, NATO, BIS, OECD, EU, the Council of Europe, WEU, OSCE, CERN, the Commonwealth, Inter-American Development Bank, Asian Development Bank, the Pacific Community, IOM and the Antarctic Treaty.

In 2000 the UK gave US$4·5bn. in international aid, representing 0·31% of its GDP. In actual terms this made the UK the 4th most generous country in the world, but as a percentage of GDP only the 9th most generous.

ECONOMY

In 1997 services accounted for 67% of GDP, industry 31·5% and agriculture 1·5%.

According to the anti-corruption organization *Transparency International*, in 2002 the United Kingdom ranked 10th in the world in a survey of the countries with the least corruption in business and government. It received 8·7 out of 10 in the annual index.

Overview. In 1997 the conduct of monetary policy was delegated to the Monetary Policy Committee (MPC) of the Bank of England, which was made independent. After autumn 1999, the risk of the economy overheating called for a tighter monetary policy. However, the 11 Sept. 2001 attacks on New York and Washington led to a relaxation with half a percentage point interest rate cut in Nov. 2001. The Code for Fiscal Stability, introduced in 1998, sets out the fiscal framework—transparency, stability, responsibility, fairness and efficiency. Fiscal policy has tightened since 1997.

Currency. The unit of currency is the *pound sterling* (£; GBP) of 100 *pence* (p.). Before decimalization on 15 Feb. 1971 £1 = 20 shillings (*s*) of 12 pence (*d*). A gold standard was adopted in 1816, the sovereign or twenty-shilling piece weighing 7·98805 grammes 0·916⅔ fine. Currency notes for £1 and 10*s*. were first issued by the Treasury in 1914, replacing the circulation of sovereigns. The issue of £1 and 10*s*. notes was taken over by the Bank of England in 1928. 10*s*. notes were withdrawn in 1970 and £1 notes (in England and Wales) in 1988. Sterling was a member of the exchange rate mechanism of the European Monetary System from 8 Oct. 1990 until 16 Sept. 1992 ('Black Wednesday').

Inflation. Underlying inflation was 1·5% in June 2002, the lowest rate since records began in 1975, before rising to 3·0% in Feb. 2003, the highest rate in nearly five years.

Coinage. Coins in circulation at 31 Dec. 2001: £2, 185m.; £1, 1,306m.; 50p, 634m.; 20p, 1,873m.; 10p, 1,454m.; 5p, 3,265m.; 2p, 5,772m.; 1p, 9,495m. Commemorative coin: 2000 Queen Mother's 100th birthday £5 Crowns, 3·1m.

Banknotes. The Bank of England issues notes in denominations of £5, £10, £20 and £50 up to the amount of the fiduciary issue. Under the provisions of the Currency Act 1983 the amount of the fiduciary issue is limited, but can be altered by direction of HM Treasury on the advice of the Bank of England. Since Nov. 1998 the limit has been £34,300m., although this was temporarily raised to £50,000m. over the millennium period.

All current series Bank of England notes are legal tender in England and Wales. Some banks in Scotland (Bank of Scotland, Clydesdale Bank and the Royal Bank of Scotland) and Northern Ireland (Bank of Ireland, First Trust Bank, Northern Bank and Ulster Bank) have note-issuing powers.

The total amount of Bank of England notes issued at 31 Dec. 2002 was £33,900m., of which £33,897m. represented notes with other banks and the public, and £3m. notes in the Banking Department of the Bank of England.

Foreign exchange reserves were US$34,583m. and gold reserves 10·10m. troy oz in June 2002 (22·98m. troy oz in April 1999).

Budget. According to the April 2003 budget, public sector net borrowing is set to rise from £24bn. in 2002–03 to £27bn. in 2003–04, but then fall to £24bn. in 2004–05, £23bn. in 2005–06 and £22bn. in 2006–07. Public sector net debt as a proportion of gross domestic product will rise from 30·9% in 2002–03 to 32·2% in 2003–04 and 33·8% by 2007–08.

Current spending, which excludes investment, will rise from £395bn. in 2002–03 to £422bn. in 2003–04, £447bn. in 2004–05, £475bn. in 2005–06 and £500bn. in 2006–07. Net investment will rise from £12·2bn. in 2002–03 to £27bn. by 2006–07.

'While the the eyes of the world were on Baghdad, Mr Brown used the least substantial budget of his tenure to hold out the promise of better times around the corner, and let borrowing take the strain instead of tax rises.' (*Financial Times*, 10 April 2003).

The 2003 budget was the first delivered during wartime for half a century. A total of £3bn. was set aside for the conflict in Iraq as was £332m. for domestic counter-terrorism measures.

VAT, introduced on 1 April 1973, is 17·5% (reduced rate, 5·0%).

Performance. In 2001 total GDP was £969,201m. (US$1,406,310m.), the fourth highest in the world after the USA, Japan and Germany.

Economic growth was 2·3% in 1999, rising to 3·0% in 2000 and was 2·2% in 2001 (the fastest rate of any of the Group of Seven leading industrialized countries during the year). However, there was zero growth in the period Oct.–Dec. 2001, the weakest since the recession of the early 1990s. In 2002 the growth rate of 1·6% was the lowest in a decade. Between 1997 and 2000 annual growth averaged 2·7%.

In the 2003 budget the estimated growth rate for the year was cut by 0·5 percentage points to 2·0–2·5%, but the forecast for 2004 remained unchanged at 3·0–3·5%.

In the World Economic Forum's *Global Competitiveness Report 2002–03* the UK was placed 11th in the world in the Growth Competitiveness Ranking and 3rd in the Microeconomic Competitiveness Ranking

Banking and Finance. The Bank of England, Threadneedle Street, London, is the government's banker and the 'banker's bank'. It has the sole right of note issue in England and Wales. It was founded by Royal Charter in 1694 and nationalized in 1946. The capital stock has, since 1 March 1946, been held by HM Treasury. The *Governor* (appointed for five-year terms) is The Rt. Hon Sir Edward George GBE (b. 1938; took office 1993).

The statutory Bank Return is published weekly. End-Dec. figures are as follows (in £1m.):

Major British Banking Groups' statistics at end Dec. 2002: total deposits (sterling and currency), £1,318,734m.; sterling market loans, £263,544m.; market loans (sterling and currency), £420,703m.; advances (sterling and currency), £1,031,825m.; sterling investments, £97,060m.

Britain's largest bank is HSBC, both by assets and market capitalization. It had assets in June 2001 of US$674bn. The Royal Bank of Scotland is the second largest, both by assets and market capitalization.

By Oct. 2000 approximately 5% of the British population were using e-banking.

In May 1997 the power to set base interest rates was transferred from the Treasury to the Bank of England. The government continues to set the inflation target but the Bank has responsibility for setting interest rates to meet the target. Base rates are now set by a nine-member Monetary Policy Committee at the Bank; members include the Governor. Membership of the Court (the governing body) was widened. Responsibility for supervising banks was transferred from the Bank to the Financial Services Authority (FSA). The base rate was lowered from 4·00% to 3·75% on 6 Feb. 2003, the lowest rate since 1955.

There are stock exchanges in Belfast, Birmingham, Glasgow and Manchester which function mainly as representative offices for the London Stock Exchange (called International Stock Exchange until May 1991). In July 1991 the 91 shareholders voted unanimously for a new memorandum and articles of association which devolves power to a wider range of participants in the securities industry, and replaces the Stock Exchange Council with a 14-member board. The FTSE 100 ended 2002 at 3,940·40, down from 5,217·40 at the end of 2001 (representing a drop of 1,277·0 points on the year, or 24·5%—its worst ever annual performance).

In 2000 the UK received a record total of US$111·67bn. worth of foreign direct investment. Investment from Europe increased from US$57·14bn. in 1999 to US$78·31bn. in 2000 while investment from the Americas dropped from US$24·94bn. to US$23·64bn. in the same period.

Weights and Measures. Conversion to the metric system, which replaced the imperial system, became obligatory on 1 Oct. 1995. The use of the pint for milk deliveries and bar sales, and use of miles and yards in road signs, is exempt

indefinitely, and the use of the pound (weight) in selling greengrocery was exempt until 1999.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* the UK's carbon dioxide emissions in 1998 were the equivalent of 9·2 tonnes per capita. The UK's total emission of greenhouse gases is estimated to have fallen from 762m. tonnes in 1990 to 664m. tonnes in 2000. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked the UK 91st in the world out of 142 countries analysed, with 46·1%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

In England and Wales 8% of household waste was recycled in 1998, compared to 52% in Switzerland. The rate in Scotland was under 6%.

Electricity. The Electricity Act of 1989 implemented the restructuring and transfer to the private sector of the electricity supply industry.

(England and Wales)

Generators. Under the 1989 Act, National Power and Powergen took over the fossil fuel and hydro-electric power stations previously owned by the Central Electricity Generating Board, and were privatized in 1991. National Power was split into two companies in 2000, International Power plc and Innogy plc. Nuclear Electric, responsible for operating the 12 nuclear power stations, and Scottish Nuclear were merged as a single holding company in 1996 with two new operating subsidiaries, Magnox Electric and British Energy. Both were privatized in 1996. Under licence, generating companies may also be involved in electricity supply. There were a total of 31 nuclear reactors in use in the UK at 15 nuclear power stations in the UK in Sept. 2002. The UK generation market is now very diverse, with 42 major power producers compared to seven in 1990.

Transmission. The privatized National Grid Transco is responsible for operating the transmission system and for co-ordinating the operation of power stations connected to it. The company also operates the Cross-Channel link with France and the interconnection with the Scottish power system.

Distribution and Supply. The 12 Area Boards were replaced under the 1989 Act by 12 successor companies, which were privatized in 1990. These were: East Midlands Electricity (now Powergen Energy); Eastern Electricity (now part of Powergen); London Electricity (now LE Group); Manweb (now part of ScottishPower); Midlands Electricity (now Aquila Networks Services); Northern Electric (supply business now owned by Innogy); Norweb (now part TXU Europe, part United Utilities); SEEBOARD (now part of LE Group); Southern Electric (now part of Scottish and Southern Energy); SWALEC (renamed Hyder, and now part of Western Power Distribution); South Western Electricity (now part of Western Power Distribution); and Yorkshire Electricity (supply business owned by Innogy, distribution business owned by Northern Electric). The companies are in the main responsible for maintaining their local distribution networks, and have a statutory duty to supply electricity to their tariff customers. However, following a number of mergers and takeovers in the industry, some companies are now responsible only for distribution or supply in their areas. Some of the companies are also involved in the retailing of electrical goods and electrical contracting, and some have diversified into other business activities.

The Electricity Association. The Electricity Association is the trade association of the UK electricity companies, providing a forum for members to discuss matters of common interest, a collective voice for the electricity industry when needed, and specialist research and professional services. It publishes an annual *Electricity Industry Review*, which contains detailed information on the development of the industry during the previous year.

Regulation. The Office of Electricity Regulation *('Offer')* was set up under the 1989 Act to protect consumer interests following privatization. In 1999 it was merged

with the Office of Gas Supply ('*Ofgas*') to form the Office of Gas and Electricity Markets ('*Ofgem*'), reflecting the opening up of all markets for electricity and gas supply to full competition from May that year, with many suppliers now offering both gas and electricity to customers.

Statistics. The electricity industry contributes about 1·3% of the UK's Gross Domestic Product. The installed capacity of all UK power stations in 2001 was 67,965 MW. In 2000 the fuel generation mix was: coal-fired 34%, nuclear 25%, gas 38%, hydro and renewables 2%, and oil 1%. 314,586 GWh were supplied to 28m. customers, of which domestic users took 29%, industrial users 29% and commercial and other users the remaining 42%. The average domestic consumption per capita in 2000 was 4,256 kWh.

Oil and Gas. Production in 1,000 tonnes, in 2001: throughput of crude and process oils, 84,503; refinery use, 5,162. Refinery output: gas/diesel oil, 26,794; motor spirit, 21,455; fuel oil, 9,941; aviation turbine fuel, 5,910; naphtha, 3,428; burning oil, 3,088; propane, butane and other petroleum gases, 1,856; bitumen, 1,707; petroleum coke, 765. Total output of petroleum products, 76,931. Crude oil production (2001), 116·7m. tonnes. The UK's oil production is the second highest in Europe after that of Norway, and is the ninth highest in the world, greater than that of either Kuwait or Libya. The UK had proven oil reserves of 4·9bn. bbls. in Dec. 2000, but reserves are expected to be exhausted by 2007.

In 2000 the total income from sales of oil produced was £16,129m., with the value of net exports of oil and oil products in 2000 equal to £6bn., the highest level seen since the mid-1960s.

The first significant offshore gas discovery was made in 1965 in the North Sea, followed in 1967 by the first oil offshore. Offshore production of gas began in 1967 and oil in 1975.

Oil and gas have played an important part in providing the UK's energy needs. In 2000, either through direct use or as a source of energy to produce electricity, oil and gas accounted for some 73% of total UK energy consumption, with UK-based production supplying some 98% of the gas consumed.

Oil products also provide important contributions to other industries, such as feedstocks for the petro-chemical industry and lubricants for various uses. While the importance of oil as a source of energy for electrical generation and use by industry and commercial operations has declined in recent years with the increasing use of gas, oil still makes up 18% of total industrial uses of energy. Its prime importance is in the transport sector, where it provides 99% of the total energy used.

The United Kingdom usually exports around two-thirds of the oil it produces, with the key export markets being the USA and other EU countries.

The reform of the old nationalized gas industry began with the Gas Act of 1986, which paved the way for the privatization later that year of the British Gas Corporation, and established the Director General of Gas Supply (DGSS) as the independent regulator. This had a limited effect on competition, as British Gas retained a monopoly on tariff (domestic) supply. Competition progressively developed in the industrial and commercial (non-tariff) market.

The Gas Act 1995 amended the 1986 Act to prepare the way for full competition, including the domestic market. It created three separate licences—for Public Gas Transporters who operate pipelines, for Shippers (wholesalers) who contract for gas to be transported through the pipelines, and for Suppliers (retailers) who then market gas to consumers. It also placed the DGSS under a statutory duty to secure effective competition.

The domestic market was progressively opened to full competition from 1996 until May 1998.

In 1997 British Gas took a commercial decision to de-merge its trading business. Centrica plc (a new company) was formed to handle the gas sales, gas trading, services and retail businesses of BG, together with the gas production businesses of the North and South Morecambe Field. The remaining parts of the business, including transportation and storage and the international downstream activities, were contained in BG plc. Subsequent de-merging has led to the creation of the

Lattice Group, owner of Transco, who own and operate the UK's National Gas Transmission System.

In 1998 a new Director General of Gas Supply (Callum McCarthy) was appointed for a five-year term. In recognition of the increasing convergence between the gas and electricity markets, he was also appointed as Director General of Electricity Supply from Jan. 1999.

A European Directive introducing rules for the internal market in natural gas entered into force in Aug. 1998 (98/80/EC). Member states had two years to give effects to its provisions. A pipeline (the Interconnector) linking the UK and European gas grids opened in Oct. 1998. It has an export capacity of 20bn. cu. metres a year and an import capacity of 8·5bn. cu. metres a year.

Proven gas reserves are some 740,000m. cu. metres. Production was 1,258,549 GWh in 2000, 34% of which was used by domestic users and 28% by electricity generators.

The *Office of Gas Supply ('Ofgas')* is the regulator charged with protecting gas consumers' interests.

Wind. In 2001 there were 69 wind farms and 941 turbines with a capacity of 473·6 MW for electricity generation.

Water. Annual average water usage in the UK is just under 2,000 cu. metres per person—less than a ninth of usage in the USA.

Minerals. Legislation to privatize the coal industry was introduced in 1994 and a new Coal Authority has taken over from British Coal. The Coal Authority is the owner of coal reserves; it licenses private coal-mining and deals with claims in former mining areas and disposes of unworked assets. In 1995 there were 15 British Coal collieries and 32 large deep mines in the private sector, employing some 13,500 mineworkers.

Total production from deep mines was 17·3m. tonnes in 2001 (83·8m. tonnes in 1988). Output from opencast sites, 2001, 14·2m. tonnes (1988, 17·9m. tonnes). In 2001 inland coal consumption was 54·5m. tonnes (113·3m. tonnes in 1988).

Output of non-fuel minerals in Great Britain, 2001 (in 1,000 tonnes): sand and gravel, 88,210; limestone, 83,492; igneous rock, 45,053; sandstone, 11,897; clay and shale, 10,426; chalk, 8,205; salt (1999), 5,800; industrial sand, 3,848; china clay, 2,804.

Steel and metals. Steel production in recent years (in 1m. tonnes):

Deliveries of finished steel products from UK mills in 2001 were worth £6bn. in product sales and comprised 6·7m. tonnes to the UK domestic market and 6·3m. tonnes for export. About three-quarters of UK steel exports went to other EU countries. UK steel imports in 2001 were about 6·8m. tonnes. The UK steel industry's main markets are construction (22%), automotive (17%), mechanical engineering (24%) and metal goods (14%). Corus Group (formerly British Steel) is the UK's largest steel producer (and the third largest steel company in the world) and produces about 85% of UK crude steel. The UK steel industry has improved productivity nearly 5-fold over the past 20 years.

Agriculture. Land use in 1996: agriculture, 77%; urban, 10%; forests, 10%; other, 3%. In 2001 (and 2000) agricultural land in the UK totalled (in 1,000 ha) 18,555 (18,311), comprising agricultural holdings, 17,323 (17,083) and common grazing, 1,232 (1,228). Land use of the former (in 1,000 ha): all grasses 6,789 (6,590); crops, 4,454 (4,665); rough grazing, 4,435 (4,445); bare fallow, 43 (37); other, 1,602 (1,346). Area sown to crops (in 1,000 ha): cereals, 3,014 (3,348); other arable crops, 1,102 (979); horticultural crops, 173 (172); fruit, 37 (38).

Figures compiled by the Soil Association show that in April 2002 the area of fully organic farmland in the UK was 458,600 ha. Including land in conversion, 4·3% of

the agricultural land was managed organically. Organic food sales for the UK in 2001–02 totalled £920m., up from £805m. in 2000–01.

Farmers receiving financial support under the EU's Common Agricultural Policy are obliged to 'set-aside' land in order to control production. In 2000 such set-aside totalled 567,000 ha (572,000 ha in 1999). There were 500,000 tractors and 47,000 harvester-threshers in 1998.

The number of workers employed in agriculture was, in 2001, 184,000 (48,500 female) of whom 63,200 were seasonal or casual workers. Of the 120,800 regular workers, 40,900 were part-time. In 1990 the number of workers employed in agriculture had been 273,800. There were some 234,900 farm holdings in 1995, about 66% owner-occupied. Average size of holdings, 72·4 ha.

Total farm incomes dropped from £5·3bn. to £1·5bn. between 1995 and 2000. Food and live animals accounted for 2·9% of exports and 6·4% of imports in 2001, down from 4·5% of exports and 8·6% of imports in 1991.

British beef was widely banned overseas and in March 1996 the European Commission introduced a ban on the export of bovine animals, semen and embryos, beef and beef products and mammalian meat and bonemeal from the UK. The government introduced a number of preventive measures including bans on sales of older meat and the use of meat in animal feed and fertilizer, and compensation schemes. Following inspections, the European Commission allowed for the export of deboned beef and beef products beginning 1 Aug. 1999.

In Feb. 2001 the UK was hit by a major foot-and-mouth disease epidemic for the first time since 1967–68, with 2,030 confirmed cases and 4,050,000 animals being

slaughtered during the months which followed. The last confirmed case was on 30 Sept. 2001. In the 1967–68 epidemic there had been 2,364 cases with approximately 434,000 animals slaughtered.

Forestry. In March 2002 the area of woodland in Britain was 2,716,000 ha, of which the Forestry Commission managed 794,000 ha. There were approximately 29,500 full-time equivalent jobs in the forestry industry and wood-processing industries in 1998–99, of which 11,200 were in wood processing, 5,900 in forest establishment and maintenance, 5,800 in harvesting and haulage, 4,600 in other non-forest activities such as office work research, and 2,000 in other forest activities such as nurseries and road construction. In 2001 a total of 7·23m. cu. metres of roundwood was produced.

New planting (2001–02), 13,194 ha (248 ha, Forestry Commission; 12,946 ha, private woodlands).

In 1993 only 25,245,000 people had been in employment, representing an increase of 2,414,000 in nine years. The fastest-growing job creation sector in Britain has been the call centre, with 500,000 operators working from some 5,000 centres across the country by the end of 2000. It is estimated that 2% of the workforce in 2000 were employed in call centres.

Registered unemployed in UK as at spring (in 1,000; figures not seasonally adjusted): 1997, 2,036 (7·2%); 1998, 1,775 (6·3%); 1999, 1,759 (6·1%); 2000, 1,636 (5·7%); 2001, 1,428 (4·9%)—the lowest rate in more than 20 years; 2002, 1,524 (5·2%). Of the 1,524,000 unemployed people, 909,000 were men and 615,000 women. The number of unemployed people on benefits was 928,500 in Jan. 2003 (giving a rate of 3·1%), the lowest since records began in 1975. The unemployment rate on the International Labour Organization (ILO) definition, which includes all those who are looking for work whether or not claiming unemployment benefits, was 5·1% in Oct.–Dec. 2002.

In 2001 there were 3·7m. businesses in the UK of which 1·6m. were registered at Companies House. Approximately 99% of UK businesses have fewer than 50 employees. There were an estimated 342,000 business start-ups in 2001, with business closures numbering 410,000.

Workers (in 1,000) involved in industrial stoppages (and working days lost): 1998, 93 (0·28m.); 1999, 141 (0·24m.); 2000, 183 (0·50m.); 2001, 180 (0·52m.). In 1975, 6m. working days had been lost through stoppages. Between 1989 and 1998 strikes cost Britain an average of 47 working days per 1,000 employees a year, compared to the EU average of 85 per 1,000. The equivalent figure in France was 37 per 1,000.

The Wages Councils set up in 1909 to establish minimum rates of pay (in 1992 of 2·5m. workers) were abolished in 1993. The Labour government, elected in May

1997, was committed to the introduction of a National Minimum Wage and established a Low Pay Commission to advise on its implementation. It is currently £4·20 an hour. In April 2002 the average gross salary in Britain was £24,603 (£34,762 in London). Average hourly pay excluding overtime in April 2002 in Britain was £11·73 (£12·59 for males and £10·22 for females), ranging from averages of £9·93 in the North-East up to £16·23 in London.

Britons work an average of 43·6 hours a week, the second longest working week in the European Union behind Greece. In 1996, 60% of males and 20% of females put in more than 40 hours a week.

Trade Unions. In Jan. 2003 there were 69 unions affiliated to the Trades Union Congress (TUC) with a total membership of 6·7m. (2·7m. of them women), down from a peak of 12·2m. in 1980. The unions affiliated to the TUC in 2001 ranged in size from UNISON with 1·27m. members to the Sheffield Wool Shear Workers' Union with 15 members. The four largest unions, however, account for more than half the total membership. In 1998, 60% of public-sector employees and 19% of private-sector employees were unionized.

The TUC's executive body, the General Council, is elected at the annual Congress. Congress consists of representatives of all unions according to the size of the organization, and is the principal policy-making body.

The General Secretary (Brendan Barber, b. 1951) is elected from nominations submitted by the unions. The TUC draws up policies and promotes and publicizes them. It makes representations to government, employers and international bodies. The TUC also carries out research and campaigns, and provides a range of services to unions including courses for union representatives.

The TUC is affiliated to the International Confederation of Free Trade Unions, the Trade Union Advisory Committee of OECD, the Commonwealth Trade Union Council and the European Trade Union Confederation. The TUC provides a service of trade union education. It provides members to serve, with representatives of employers, on the managing boards of such bodies as the Health and Safety Commission and the Advisory, Conciliation and Arbitration Service.

In 2002 machinery and transport equipment accounted for 43·1% of the UK's imports and 45·6% of exports; chemicals, manufactured goods classified chiefly by

material and miscellaneous manufactured articles 41·5% of imports and 39·4% of exports; food, live animals, beverages and tobacco 8·3% of imports and 5·4% of exports; mineral fuels, lubricants and related materials 4·3% of imports and 8·1% of exports; and crude materials, inedible, animal and vegetable oil and fats 2·9% of imports and 1·5% of exports. The UK was the second largest exporter of services in 1998 behind the USA. The trade surplus in services was £15·1bn. in 2000, whereas there was a deficit of £30·3bn. in trade in goods.

Trade Fairs. London ranked as the second most popular convention city behind Paris in 2001 according to the Union des Associations Internationales (UAI).

COMMUNICATIONS

Roads. Responsibility for the construction and maintenance of trunk roads belongs to central government. Roads not classified as trunk roads are the responsibility of county or unitary councils.

In 2001 there were 392,408 km of public roads, classified as: motorways, 3,472 km; trunk roads, 11,725 km; other major roads, 34,825 km; minor roads, 342,386 km.

In 2001 journeys by car, vans and taxis totalled 624bn. passenger km (less than 60bn. in the early 1950s). Even in the early 1950s passenger km in cars, vans and taxis exceeded the annual total at the end of the 20th century by rail. Motor vehicles in 2001 included 23,899,000 passenger cars, 882,000 mopeds, scooters and motorcycles, 89,000 public transport vehicles and 2,544,000 other private and light goods vehicles. The average distance travelled by a passenger car in the year 1998 was 16,000 km. In 2001, 74% of households had regular use of a car with 30% of households having use of two or more cars. New vehicle registrations in 2001, 3,137,700. Driving tests, 2001–02 (in 1,000): applications, 1,315; tests held, 1,216; tests passed, 527; pass rate, 43%. The driving test was extended in 1996 to include a written examination.

Road casualties in Great Britain in 2001, 313,309 including 3,450 killed. Britain has the lowest death rates in road accidents of any industrialized country, at 5·9 deaths per 100,000 people.

Inter- and intra-urban bus and coach journeys average 46bn. passenger-km annually. Passenger journeys by local bus services, 2000–01, 4,309m. For London buses *see* Transport for London *under* RAILWAYS, *below.*

Rail. In 1994 the nationalized railway network was restructured to allow for privatization. Ownership of the track, stations and infrastructure was vested in a government-owned company, Railtrack, which was privatized in May 1996.

Passenger operations were reorganized into 25 train-operating companies, which were transferred to the private sector by Feb. 1997. By March 1997 all freight operations were also privatized. On 7 Oct. 2001 Railtrack plc was taken into administration because the company was, or was likely to become, unable to pay its debts. The High Court appointed Ernst & Young as Joint Special Administrators of Railtrack plc. On 3 Oct. 2002 a new private sector not-for-profit company limited by guarantee, Network Rail, took over from Railtrack plc as network owner and operator. The train-operating companies pay Network Rail for access to the rail network, and lease their rolling stock from three private-sector companies.

Eurotunnel PLC holds a concession from the government to operate the Channel Tunnel (49·4 km), through which vehicle-carrying and Eurostar passenger trains are run in conjunction with French and Belgian railways. A new dedicated high-speed line is planned to connect the Channel Tunnel to London St Pancras. This line will be used by both international and domestic trains. Construction is being undertaken in two sections with the first section planned to open before the end of 2003. The entire line should open in 2007.

The rail network comprises around 16,500 route km (a third electrified). Annual passenger km have increased from 32·1bn. in 1996–97 to 39·1bn. in 2000–01, an increase of almost 22%. Passenger journeys have increased by 20% from 801m. in 1996–97 to 960m. in 2001–02. The amount of freight moved declined gradually over many years to 13·0bn. tonne km in 1995–96. Following privatization it rose sharply to 18·1bn. tonne km in 2000–01 and further to 19·4bn. tonne km in 2001–02, its highest level in more than 20 years. In 2001–02, 32 people (excluding trespassers

and suicides) were fatally injured on the railways (compared to 3,450 deaths in road accidents in 2001).

Transport *for* London (T*f*L) is accountable to the Mayor of London and responsible for implementing his Transport Strategy as well as planning and delivering a range of transport facilities. T*f*L's remit covers London Buses, the Docklands Light Railway and Tramlink, Victoria Coach Station, London River Services, the Public Carriage Office and Street Management. London Underground will become part of T*f*L once agreement on its management and funding is reached with the Government. T*f*L also manages a 580 km network of London's main roads and its 4,600 traffic signals and regulates taxis and private hire trade. It helps to co-ordinate schemes for transport users with reduced mobility and plans and works to improve conditions on London's streets for walkers, cyclists and freight, whilst reducing congestion. In 1999–2000 London Underground carried 3m. passengers a day to and from 274 stations on 12 lines. These stations include 12 managed by Silverlink Train Services; 2 by SouthWest Trains; and 22 stations with interchanges managed by national rail service operators. Some 6,500 buses, run under contract to London Transport by independent companies, carried 4·8m. passengers a day on some 700 routes.

The privately franchised Docklands Light Railway is operated in east inner London.

There are metros in Glasgow and Newcastle, and light rail systems in Birmingham/Wolverhampton, Manchester and Sheffield.

Civil Aviation. All UK airports handled a total of 180·0m. passengers during 2000. Of those, 115·8m. were handled by London area airports (Heathrow, Gatwick, London City, Luton and Stansted).

Busiest airports in 2000:

	Passengers	*International*		*Freight (tonnes)*
Heathrow	64,279,079	56,875,158	Heathrow	1,306,918
Gatwick	31,948,939	29,036,589	Gatwick	318,962
Manchester	18,352,115	15,485,480	East Midlands	178,765
Stansted	11,860,335	10,443,265	Stansted	167,829
Birmingham	7,493,220	6,281,696	Manchester	117,019

Heathrow is Europe's busiest airport for passenger traffic, ahead of Frankfurt, Paris Charles de Gaulle, Amsterdam, Madrid and Gatwick, the sixth busiest (in 2000). More international passengers use Heathrow than any other airport in the world.

Following the Civil Aviation Act 1971, the Civil Aviation Authority (CAA) was established as an independent public body responsible for the economic and safety regulation of British civil aviation. A CAA wholly owned subsidiary, National Air Traffic Services, operates air traffic control. Highlands and Islands Airports Ltd is owned by the Scottish Office and operates 10 airports.

There were 16,666 civil aircraft registered in the UK at 1 Nov. 2002.

British Airways is the largest UK airline, with a total of 340 aircraft at 31 Dec. 2000. It operates long- and short-haul international services, as well as an extensive domestic network. British Airways also has franchise agreements with other UK operators: British Mediterranean Airways, British Regional Airlines, Brymon Airways, CityFlyer Express, GB Airways, Loganair and Maersk Air. British Airways (European Operations at Gatwick) Limited had 38 aircraft at 31 Dec. 2000. Other major airlines in 2000 (with numbers of aircraft): Air 2000 (27); Airtours International Airways Ltd (31); Britannia Airways (32); British Midland (45); British European (31), formerly Jersey European Airways (UK); KLM UK (38); Manx Airlines/British Regional Airlines (49); Virgin Atlantic (32). According to CAA airline statistics, in 2000–01 British Airways flew 601·4m. km and carried 35,335,602 passengers (26,283,992 on international flights in 1998, out of 31,152,382 passengers carried). Virgin Atlantic ranked second on the basis of aircraft-km flown (115·8m. km) and Britannia Airways second on the basis of passengers carried (8,058,769). British Airways carried more passengers on international flights in 2000 than any other airline. In recent years low-cost airlines such as Ryanair and easyJet have become increasingly popular. Serving only domestic and European destinations, they recovered quickly from the slump of the airline business following the attacks on New York and Washington on 11 Sept. 2001.

The most frequently flown route into and out of the UK in 2001 was Heathrow–New York John F. Kennedy and vice-versa (2,325,539 passengers), followed by Heathrow–Amsterdam and vice-versa (2,136,733) and Heathrow–Paris Charles de Gaulle and vice-versa (2,120,079).

Shipping. The UK-owned merchant fleet (trading vessels over 100 GT) in June 2001 totalled 612 ships of 12·0m. DWT and 9·4m. GT. The UK-owned and registered fleet totalled 369 ships of 3·2m. DWT.

The average age (DWT) of the UK-owned fleet was 10·2 years, while that of the world fleet was 13·3 years. Total gross international revenue in 2000 was £5,122m. The net direct contribution to the UK balance of payments was £1,435m.; there were import savings of £1,830m., giving a total contribution of £3,266m.

The principal ports are (with 1m. tonnes of cargo handled in 2001): Grimsby and Immingham (54·8), Tees and Hartlepool (50·8), London (50·7), Forth (41·6), Southampton (35·4). Total traffic in 2001 was 566·4m. tonnes.

Inland Waterways. There are approximately 3,500 miles (5,630 km) of navigable canals and river navigations in Great Britain. Of these, the publicly-owned British Waterways (BW) is responsible for some 385 miles (620 km) of commercial waterways (maintained for freight traffic) and some 1,160 miles (1,868 km) of cruising waterways (maintained for pleasure cruising, fishing and amenity). BW is also responsible for a further 450 miles (732 km) of canals, some of which are not navigable. BW's direct income for the year to 31 March 2002 was £111·0m. This comprised principally: income for externally funded restoration schemes (£43·0m.), leisure (£19·9m.), the estate (£28·8m.) and commercial uses (£11·8m.). Additionally, British Waterways was in receipt of grants from the Department of the Environment, Food and Rural Affairs of £64·6m.

River navigations and canals managed by other authorities include the Thames, Great Ouse and Nene, Norfolk Broads and Manchester Ship Canal.

The Association of Inland Navigation Authorities (AINA) represents some 30 navigation authorities providing an almost complete UK coverage.

Telecommunications. In 1997 there were 148 licensed telecommunications operators: 125 cable operators, 19 national and regional public telecommunications operators and, in 2003, five mobile phone operators. Fixed-link telephone services were offered by BT, Mercury Communications, Kingston Communications (Hull), most of the cable operators and the public telecommunications operators. BT (then British Telecom) was established in 1981 to take over the management of telecommunications from the Post Office. In 1984 it was privatized as British Telecommunications plc, changing its trading name from British Telecom to BT in 1991.

In 1998 all of the BT system was served by digital exchanges. There are almost 3·5m. km of optical fibre in place. In 2000 there were 35,177,000 main telephone lines (equivalent to 588·6 per 1,000 population). In 1996, 76% of the lines were residential and 24% business. There were 138,000 public payphones and 200,000 private rented payphones in 1996. BT handles a daily average of 103m. telephone calls a day and 22m. calls to emergency fire, police or ambulance services a year.

In 1996 there were 1·99m. fax receivers. There were still 20,000 telex subscribers in 1996, although telex usage has declined considerably in recent years. Electronic services include electronic mail ('email') and a complete corporate global messaging network. BT telephone, television and business services are carried by 15–20 satellites. In 1995 BT had some 20 offices worldwide and employed 137,561 persons.

In Nov. 2001 there were 43·45m. mobile telephone subscribers in the UK. Orange was the largest operator, with 12·12m. customers, followed by BT Cellnet (now O2) with 11·02m., Vodafone with 10·76m. and One2One (now T-Mobile) with 9·52m. At the beginning of 1999 there had been 13m. mobile phone subscribers. Virgin Mobile, launched in Nov. 1999, had 650,000 subscribers by Nov. 2001. 3 was launched by Hutchison on 3 March 2003 and is the UK's first mainland third generation mobile network.

Telecommunications services are regulated by OFTEL in the interests of consumers.

Internet. In Sept. 2002 there were 34·3m. Internet users in the UK (more than in any other country in Europe), just over 57% of the total population. According to

a survey published in Dec. 1999, 3·6m. children between the ages of 7 and 16 used the Internet, with 52% of users being boys, compared to 61% in March 1999. In Oct. 1998, 42% of users were at home and 38% at work. In 2000, 45% of households had a home computer; there were 20·2m. PCs in total in 2000 (33·8 per 1,000 inhabitants).

Postal Services. Royal Mail Group plc operates three distinct businesses: Royal Mail (letter delivery), Parcelforce Worldwide (parcel delivery) and Post Office Ltd (retailing and agency services). Every area of the country is served by regional offices for each of the businesses. Royal Mail collects and delivers 82m. letters a day to the 27m. UK addresses. Other services include electronic mail, guaranteed mail deliveries (same-day and overnight to UK addresses), and Swiftair deliveries to 140 other countries and territories. The British Postal Consultancy Service provides advice to administrations abroad.

In 2002 there were almost 17,500 post offices, around 600 operated directly by Post Office Ltd, the remainder (sub-post offices) on a franchise or agency basis, and 120,000 posting points. Staff numbered 200,000 in 2001–02.

SOCIAL INSTITUTIONS

Justice. *England and Wales.* The legal system of England and Wales, divided into civil and criminal courts, has at the head of the superior courts, as the ultimate court of appeal, the House of Lords, which hears each year a number of appeals in civil matters, including a certain number from Scotland and Northern Ireland, as well as some appeals in criminal cases. In order that civil cases may go from the Court of Appeal to the House of Lords, it is necessary to obtain the leave of either the Court of Appeal or the House itself, although in certain cases an appeal may lie direct to the House of Lords from the decision of the High Court. An appeal can be brought from a decision of the Court of Appeal or the Divisional Court of the Queen’s Bench Division of the High Court in a criminal case provided that the Court is satisfied that a point of law ‘of general public importance’ is involved, and either the Court or the House of Lords is of the opinion that it is in the public interest that a further appeal should be brought. As a judicial body, the House of Lords consists of the Lord Chancellor, the Lords of Appeal in Ordinary, commonly called Law Lords, and such other members of the House as hold or have held high judicial office. The final court of appeal for certain of the Commonwealth countries is the Judicial Committee of the Privy Council which, in addition to Privy Counsellors who are or have held high judicial office in the UK, includes others who are or have been Chief Justices or Judges of the Superior Courts of Commonwealth countries.

Civil Law. The main courts of original civil jurisdiction are the High Court and county courts.

The High Court has exclusive jurisdiction to deal with specialist classes of case e.g. judicial review. It has concurrent jurisdiction with county courts in cases involving contract and tort although it will only hear those cases where the issues are complex or important. The High Court also has appellate jurisdiction to hear appeals from lower tribunals.

The judges of the High Court are attached to one of its three divisions: Chancery, Queen’s Bench and Family; each with its separate field of jurisdiction. The Heads of the three divisions are the Lord Chief Justice (Queen’s Bench), the Vice-Chancellor (Chancery) and the President of the Family Division. In addition there are 99 High Court judges (92 men and 7 women). For the hearing of cases at first instance, High Court judges sit singly. Appellate jurisdiction is usually exercised by Divisional Courts consisting of two (sometimes three) judges, though in certain circumstances a judge sitting alone may hear the appeal. High Court business is dealt with in the Royal Courts of Justice and by over 130 District Registries outside London.

County courts can deal with all contract and tort cases, and recovery of land actions, regardless of value. They have upper financial limits to deal with specialist classes of business such as equity and Admiralty cases. Certain county courts have been designated to deal with family, bankruptcy, patents and discrimination cases.

There are about 230 county courts located throughout the country, each with its own district. A case may be heard by a circuit judge or by a district judge. Defended claims are allocated to one of three tracks—the small claims track, the fast track and the multi-track. The small claims track provides a simple and informal procedure for resolving disputes, mainly in claims for debt, where the value of the claim is no more than £5,000. Parties should be able to do this without the need for a solicitor. Other claims valued between £5,000 and £15,000 will generally be allocated to the fast track, and higher valued claims which could not be dealt with justly in the fast track may be allocated to the multi-track.

The Restrictive Practices Court was set up in 1956 under the Restrictive Trade Practices Act and is responsible for deciding whether a restrictive trade agreement is in the public interest. It is presided over by a High Court judge, but laymen sit on the bench also. Another specialist court is the Employment Appeal Tribunal, with similar composition, which hears appeals in employment cases from lower tribunals.

The Court of Appeal (Civil Division) hears appeals in civil actions from the High Court and county courts, and certain special courts such as the Restrictive Practice Court and Employment Appeal Tribunal. Its President is the Master of the Rolls, aided by up to 35 Lords Justices of Appeal (as at 1 Jan. 2003) sitting in six or seven divisions of two or three judges each.

Civil proceedings are instituted by the aggrieved person, but as they are a private matter, they are frequently settled by the parties through their lawyers before the matter comes to trial. In very limited classes of dispute (e.g. libel and slander), a party may request a jury to sit to decide questions of fact and the award of damages.

Criminal Law. At the base of the system of criminal courts in England and Wales are the magistrates' courts which deal with over 96% of criminal cases. In general, in exercising their summary jurisdiction, they have power to pass a sentence of up to six months imprisonment and to impose a fine of up to £5,000 on any one offence. They also deal with the preliminary hearing of cases triable at the Crown Court. In addition to dealing summarily with over 2·0m. cases, which include thefts, assaults, drug abuse, etc., they also have a limited civil and family jurisdiction.

Magistrates' courts normally sit with a bench of three lay justices. Although unpaid they are entitled to loss of earnings and travel and subsistence allowance. They undergo training after appointment and they are advised by a professional justices' clerk. In central London and in some provincial areas full-time stipendiary magistrates have been appointed. Generally they possess the same powers as the lay bench, but they sit alone. On 1 Jan. 2000 the total strength of the lay magistracy was 30,308 including 14,764 women. Justices are appointed on behalf of the Queen by the Lord Chancellor, except in Greater Manchester, Merseyside and Lancashire, where they are appointed by the Chancellor of the Duchy of Lancaster.

Justices are selected and trained specially to sit in Youth and Family Proceedings Courts. Youth Courts deal with cases involving children and young persons up to the age of 18 charged with criminal offences (other than homicide and other grave offences). These courts normally sit with three justices, including at least one man and one woman, and are accommodated separately from other courts.

Family Proceedings Courts deal with matrimonial applications and Children Act matters, including care, residence and contact and adoption. These courts normally sit with three justices including at least one man and one woman.

Above the magistrates' courts is the Crown Court. This was set up by the Courts Act 1971 to replace quarter sessions and assizes. Unlike quarter sessions and assizes, which were individual courts, the Crown Court is a single court which is capable of sitting anywhere in England and Wales. It has power to deal with all trials on indictment and has inherited the jurisdiction of quarter sessions to hear appeals, proceedings on committal of persons from the magistrates' courts for sentence, and certain original proceedings on civil matters under individual statutes.

The jurisdiction of the Crown Court is exercisable by a High Court judge, a Circuit judge or a Recorder or Assistant Recorder (part-time judges) sitting alone, or, in specified circumstances, with justices of the peace. The Lord Chief Justice has given directions as to the types of case to be allocated to High Court judges (the more serious cases) and to Circuit judges or Recorders respectively.

Appeals from magistrates' courts go either to a Divisional Court of the High Court (when a point of law alone is involved) or to the Crown Court where there is a complete re-hearing on appeals against conviction and/or sentence. Appeals from the Crown Court in cases tried on indictment lie to the Court of Appeal (Criminal Division). Appeals on questions of law go by right, and appeals on other matters by leave. The Lord Chief Justice or a Lord Justice sits with judges of the High Court to constitute this court. Thereafter, appeals in England and Wales can be made to the House of Lords.

There remains as a last resort the invocation of the royal prerogative exercised on the advice of the Home Secretary. In 1965 the death penalty was abolished for murder and abolished for all crimes in 1998.

All contested criminal trials, except those which come before the magistrates' courts, are tried by a judge and a jury consisting of 12 members. The prosecution or defence may challenge any potential juror for cause. The jury decides whether the accused is guilty or not. The judge is responsible for summing up on the facts and explaining the law; he sentences convicted offenders. If, after at least two hours and ten minutes of deliberation, a jury is unable to reach a unanimous verdict it may, on the judge's direction, provided that in a full jury of 12 at least ten of its members are agreed, bring in a majority verdict. The failure of a jury to agree on a unanimous verdict or to bring in a majority verdict may involve the retrial of the case before a new jury.

The Employment Appeal Tribunal. The Employment Appeal Tribunal, which is a superior Court of Record with the like powers, rights, privileges and authority of the High Court, was set up in 1976 to hear appeals on questions of law against decisions of employment tribunals and of the Certification Officer. The appeals are heard by a High Court Judge sitting with two members (in exceptional cases four) appointed for their special knowledge or experience of industrial relations either on the employer or the trade union side, with always an equal number on each side. The great bulk of their work is concerned with the problems which can arise between employees and their employers.

Military Courts. Offences committed by persons subject to service law under the Army Act 1955, the Air Force Act 1955 or the Naval Discipline Act 1957 may be dealt with either summarily or by courts-martial.

The Personnel of the Law. All judicial officers are independent of Parliament and the Executive. They are appointed by the Crown on the advice of the Prime Minister or the Lord Chancellor, and hold office until retiring age. Under the Judicial Pensions and Retirement Act 1993 judges normally retire by age 70 years.

The legal profession is divided; barristers, who advise on legal problems and can conduct cases before all courts, usually act for the public only through solicitors, who deal directly with the legal business brought to them by the public and have rights to present cases before certain courts. The distinction between the two branches of the profession has been weakened since the passing of the Courts and Legal Services Act 1990, which has enabled solicitors to obtain the right to appear as advocates before all courts. Long-standing members of both professions are eligible for appointment to most judicial offices.

For all judicial appointments up to and including the level of Circuit Judge (except for Recordership, which is achieved on promotion from assistant Recordership), it is necessary to apply in writing to be considered for appointment. Vacancies are advertised. A panel consisting of a judge, an official and a lay member decide whom to invite for interview and also interview the shortlisted applicants. They make recommendations to the Lord Chancellor, who retains the right of final recommendation to the Sovereign or appointment, as appropriate.

Legal Services. The system of legal aid in England and Wales was established after the Second World War under the Legal Aid and Advice Act 1949. The Legal Aid Board was then set up under the Legal Aid Act 1988, and took over the administration of legal aid from the Law Society in 1989. The Legal Services Commission (LSC) was set up under the Access to Justice Act 1999 and replaced the Legal Aid Board on 1 April 2000. The LSC is an executive non-departmental public body. It comprises a Chair and ten members, all appointed by the Lord

Chancellor. It is responsible for the development and administration of two schemes in England and Wales: the *Community Legal Service*, which from 1 April 2000 replaced the old civil scheme of legal aid, bringing together networks of funders and suppliers into partnerships to provide the widest possible access to information and advice; and the *Criminal Defence Service*, which from 2 April 2001 replaced the old system of criminal legal aid and provides criminal services to people accused of crimes. Only organizations with a contract with the LSC are able to provide advice or representation funded by the LSC.

Under the Community Legal Service, which improves access to justice for those most in need, the LSC directly funds legal services for eligible clients. Some solicitors are prepared to give a free or low-cost initial interview whether or not the client qualifies for funding. The different levels of service in civil matters are *Legal Help, Help at Court, Approved Family Help, Family Mediation, Legal Representation*, and *Support Funding.* Approved Family Help is available in two forms (*Help with Mediation* and *General Family Help*), as are Legal Representation (*Investigative Help* and *Full Representation*) and Support Funding (*Investigative Support* and *Litigation Support*).

The purpose of the Criminal Defence Service is to ensure that people suspected or accused of a crime have access to advice, assistance and representation, as the interests of justice require. The different levels of service are *Advice and Assistance*, *Advocacy Assistance* and *Representation.* Advice and Assistance covers help from a solicitor including giving general advice, writing letters, negotiating, getting a barrister's opinion and preparing a written case. Advocacy Assistance covers the cost of a solicitor preparing a client's case and initial representation in certain proceedings in both the magistrates' court and the crown court. Representation covers the cost of a solicitor to prepare a client's defence before a court appearance and to represent the client there, including dealing with issues such as bail.

In 2001–02 the Commission received funding of £1·2bn. with which to fund the provision of services and spent £71·6m. on administration costs. Community Legal Services payments in 2001–02 came to £734·5m. (1,005,000 acts of assistance) and net Criminal Defence Services payments to £508·3m. (1,697,200 acts of assistance), giving net Legal Services Commission payments of £1,242·8m. and a total of 2,702,200 acts of assistance.

Police. In England and Wales there are 43 police forces, each maintained by a police authority typically comprising nine local councillors, three magistrates and five independent members. London is policed by the Metropolitan Police Service (responsible to the 23-member Metropolitan Police Authority, 12 of whom are members of the Greater London Assembly) and the City of London Police (whose police authority is the City of London Corporation). In Scotland the unitary councils are the police authorities.

Figures show that the total strength of the police service in England and Wales at 31 March 2002 was 129,603 (including 23,089 women). In addition there were 11,598 special constables (including 3,584 women). Total provision for policing in England and Wales to be supported by grant in 2003–04 is £9,683m. This is a cash increase of £566m. over 2002–03, or 6·2%, and builds on substantial government investment in the Police Service over the past three years.

In the year to March 2002 crimes recorded by the police in England and Wales totalled 5·5m, an increase of 7% compared to the year to March 2001, although it is thought that most of the increase is owing to changes in recording practices. 82% of all crimes were against property. In the 12 months ending March 2001 a total of 5·2m. offences were recorded by the police in England and Wales. In Nov. 2002 the prison population in England and Wales was 72,272 (68,452 in Nov. 2001). In 2001 the incarceration rate of 127 people per 100,000 inhabitants was the second highest in western Europe after Portugal. The annual average prison population rose 58% between 1992 and 2002, but the recorded crime level went up by only 18%. During this time the female prison population rose by 174%, from 1,560 to 4,280, but the male prison population only rose by 53%. These figures do not include prisoners held in police cells.

Religion. The Anglican Communion has originated from the Church of England and parallels in its fellowship of autonomous churches the evolution of British influence beyond the seas from colonies to dominions and independent nations. The Archbishop of Canterbury presides as *primus inter pares* at the decennial meetings of the bishops of the Anglican Communion at the Lambeth Conference and at the biennial meetings of the Primates and the Anglican Consultative Council. The last Conference was held in Canterbury in 1998 and was attended by 743 bishops. Anglican membership in Britain in 2000 numbered 1·6m., compared to 3·5m. in 1950.

The Anglican Communion consists of 38 member Churches. These are: The Anglican Church of Aotearoa, New Zealand and Polynesia; The Anglican Church of Australia; The Church of Bangladesh; The Episcopal Anglican Church of Brazil; The Church of the Province of Burundi; The Anglican Church of Canada; The Church of the Province of Central Africa; The Anglican Church of the Central America Region; The Province of the Anglican Church of the Congo; The Church of England; Hong Kong Sheng Kung Hui; The Church of the Province of the Indian Ocean; The Church of Ireland; Nippon Sei Ko Kai; The Episcopal Church in Jerusalem and the Middle East; The Church of the Province of Kenya; The Anglican Church of Korea; The Church of the Province of Melanesia; The Anglican Church of Mexico; The Church of the Province of Myanmar (Burma); The Church of the Province of Nigeria; The Church of North India; The Church of Pakistan; The Anglican Church of Papua New Guinea; The Philippine Episcopal Church; The Province of the Episcopal Church of Rwanda; The Scottish Episcopal Church; The Church of the Province of South East Asia; The Church of the Province of Southern Africa; The Anglican Church of the Southern Cone of America; The Church of South India; The Episcopal Church of the Sudan; The Church of the Province of Tanzania; The Church of the Province of Uganda; The Episcopal Church in the United States of America; The Church in Wales; The Church of the Province of West Africa; and The Church in the Province of the West Indies. There are Extra Provincial Dioceses of Bermuda, Cuba, Portugal, Puerto Rico, Spain, Sri Lanka and

Venezuela, and new provinces are also currently in formation. Churches in Communion include the Mar Thoma Syrian Church, the Philippine Independent Church, and some Lutheran and Old Catholic Churches in Europe. The Church in China is known as a 'post denominational' Church whose formation included Anglicans in the Holy Catholic Church in China.

England and Wales. The established Church of England, which baptizes about 20% of the children born in England (i.e. excluding Wales but including the Isle of Man and the Channel Islands), is Anglican. Civil disabilities on account of religion do not attach to any class of British subject. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from 1 April 1920, and Wales was formed into a separate Province.

The Queen is, under God, the supreme governor of the Church of England, with the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The Queen, on the advice of the First Lord of the Treasury, also appoints to such deaneries, prebendaries and canonries as are in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are two archbishops (at the head of the two Provinces of Canterbury and York), and 42 diocesan bishops including the bishop of the diocese in Europe, which is part of the Province of Canterbury. Dr Rowan Williams was enthroned as *Archbishop of Canterbury* in Feb. 2003. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his Province he exercises metropolitan, jurisdiction. In Dec. 2001 there were 64 suffragan and assistant bishops, 36 deans and provosts of cathedrals and 114 archdeacons. The *General Synod*, which replaced the Church Assembly in 1970 in England, consists of a House of Bishops, a House of Clergy and a House of Laity, and has power to frame legislation regarding Church matters. The first two Houses consist of the members of the Convocations of Canterbury and York, each of which consists of the diocesan bishops and elected representatives of the suffragan bishops, six for Canterbury province and three for York (forming an Upper House); deans and archdeacons, and a certain number of proctors elected as the representatives of the priests and deacons in each diocese, together with, in the case of Canterbury Convocation, four representatives of the Universities of Oxford, Cambridge, London and the Southern Universities, and in the case of York two representatives of the Universities of Durham and Newcastle and the other Northern Universities, and three archdeacons to the Armed Forces, the Chaplain General of Prisons and two representatives of the Religious Communities (forming the Lower House). The House of Laity is elected by the lay members of the Deanery Synods but also includes three representatives of the Religious Communities. The Houses of Clergy and Laity also include a small number of *ex officio* members. Every Measure passed by the General Synod must be submitted to the Ecclesiastical Committee, consisting of 15 members of the House of Lords nominated by the Lord Chancellor and 15 members of the House of Commons nominated by the Speaker. This committee reports on each Measure to Parliament, and the Measure receives the Royal Assent and becomes law if each House of Parliament resolves that the Measure be presented to the Queen.

Parochial affairs are managed by annual parochial church meetings and parochial church councils. In 2001 there were 13,000 ecclesiastical parishes, inclusive of the Isle of Man and the Channel Islands. These parishes do not, in many cases, coincide with civil parishes. Although most parishes have their own churches, not every parish nowadays can have its own incumbent or priest. About 2,000 non-stipendiary clergy hold a bishop's licence to officiate at services.

In 2001 there were 5,161 incumbents excluding dignitaries, 1,993 other clergy of incumbent status and 1,498 assistant curates working in the parishes.

Women have been admitted to Holy Orders (but not the Episcopate) as deacons since 1987 and as priests since 1994. At 31 Dec. 2001 there were 1,194 full-time stipendiary women clergy, 1,125 of whom were in the parochial ministry. Between 1993 and 2001, 487 clergymen resigned because they disagreed with the ordination of women. 64 clergymen subsequently re-entered the Church of England ministry and of the 487 who resigned, 258 are known to have joined the Roman Catholic Church and 29 the Orthodox Church.

Private persons possess the right of presentation to over 2,000 benefices; the patronage of the others belongs mainly to the Queen, the bishops and cathedrals, the Lord Chancellor, and the colleges of the universities of Oxford and Cambridge. In addition to the dignitaries and parochial clergy already identified there were, in 2001, 114 cathedral and 330 full-time non-parochial clergy working within the diocesan framework, giving a total of 9,352 full-time stipendiary clergy working within the diocesan framework as at Dec. 2001. In addition there were over 200 part-time stipendiary clergy. Although these figures account for the majority of active clergy in England, there are many others serving in parishes and institutions who cannot be quantified with any certainty. They include some 1,100 full-time hospital, Forces, prison, industrial, and school and college chaplains.

Of the 40,609 buildings registered for the solemnization of marriages at 30 June 2000 (statistics from the Office of National Statistics), 16,481 belonged to the Church of England and the Church in Wales, and 24,128 to other religious denominations (Methodist, 6,641; Roman Catholic, 3,342; Baptist, 3,109; United Reformed, 1,675; Congregational, 1,257; Calvinistic Methodist, 1,084; Jehovah's Witnesses, 817; Brethren, 742; Salvation Army, 751; Unitarians, 165; other Christian, 4,095; Sikhs, 147; Muslims, 127; other non-Christian, 176). Of the 267,961 marriages celebrated in 2000 (331,150 in 1990), 65,536 were in the Established Church and the Church in Wales (115,328 in 1990), 31,625 in other denominations (43,837 in 1990), and 170,800 were civil marriages in Register Offices (156,875 in 1990).

Roman Catholics in England and Wales were estimated at 4,121,004 in 2000. There are 22 dioceses in five provinces and one Bishopric of the Forces (also covers Scotland). Cormac Murphy O'Connor was installed as *Archbishop of Westminster* in March 2000. He was created a Cardinal in Feb. 2001. There are 5 archbishops, 17 other diocesan bishops and 7 auxiliary or assistant bishops. There are 5,429 priests in active ministry and 2,814 parish churches. There are 1,260 convents of female religious, who number 8,656.

Membership of other denominations in the UK in 1991 (and 1975): Presbyterians, 1,291,672 (1·65m.); Methodists, 483,387 (0·61m.); Baptists, 241,842 (0·27m.); other Protestants, 123,677; independent churches, 408,999; Orthodox, 265,258 (0·2m.); Afro-Caribbean churches, 69,658; Latter-day Saints (Mormons) (1998), 173,800; Jehovah's Witnesses, 0·12m.; Spiritualists, 60,000; Muslims, 0·99m. (0·4m.); Sikhs, 0·39m. (0·12m.); Hindus, 0·14m. (0·1m.); Jews, 108,400 (0·11m.).

In 2001 for the first time the census asked an optional question about religion. In England and Wales 37·3m. people described themselves as Christian. In England, 3·1% of the population stated their religion as Muslim, 1·1% Hindu, 0·7% Sikh, 0·5% Jewish and 0·3% Buddhist. In Wales, 0·7% of the population stated their religion as Muslim, 0·2% Hindu, 0·1% Sikh, 0·1% Jewish and 0·2% Buddhist. In England and Wales 7·7m. people said they had no religion (14·6% in England and 18·5% in Wales). Just over 4m. people chose not to answer the religion question.

In Scotland the 2001 census asked two questions on religion—religion of upbringing and current religion. For religion of upbringing, the largest groups were Church of Scotland (47%), no religion (18%) and Roman Catholic (17%). The equivalent percentages for current religion were 42%, 28% and 16%.

Across all denominations, adult church attendance in the UK was less than 8% of the population in 2000.

The Salvation Army is established in 94 countries. In 1991 in the UK and Ireland it had 1,792 ministers, 55,000 members and 837 churches.

There is a 400-member Board of Deputies of British Jews.

There were approximately 2·5m. visits to Westminster Abbey in 1997, 2m. to both St Paul's Cathedral and York Minster, and 1·6m. to Canterbury Cathedral.

Education. 'Around a fifth of working age adults in England have a low level of literacy (capable of reading but with little understanding) or a very low level (struggling with the simplest text). Up to a quarter have very low levels of numeracy (unable to perform the simplest calculations) and a further quarter a low level

(unable to handle fractions or percentages with any confidence)'. (*A Fresh Start. Improving Literacy and Numeracy*—Report of the working group chaired by Sir Claus Moser published in 1999). In response to the recommendations in the Moser report, the government established the Adult Basic Skills Strategy Unit to drive forward adult literacy and numeracy.

The Publicly Maintained System of Education. Compulsory schooling begins at the age of 5 (4 in Northern Ireland) and the minimum leaving age for all pupils is 16. No tuition fees are payable in any publicly maintained school (but it is open to parents, if they choose, to pay for their children to attend other schools—completely outside the public sector are independent schools run by individuals, companies or charitable institutions). The post-school or tertiary stage, which is voluntary, includes universities, further education establishments and other higher education establishments (including those which provide courses for the training of teachers), as well as adult education and the youth service. Financial assistance (grants and loans) is generally available to students on higher education courses in the university and non-university sectors, and to some students on other courses in further education.

National Curriculum. The National Curriculum for England was revised in 1999. Statutory subjects at ages 5–11 (Key stages 1 and 2) are English, mathematics, science (core subjects), design and technology, information and communication technology, history, geography, art, music and PE. At 11–14 a modern foreign language and citizenship are added. Statutory subjects at 14–16 are English, mathematics, science, design technology, a foreign language and physical education. Religious education and, at secondary level, sex education, are not prescribed in the curriculum but are requirements; parents may withdraw their children from these lessons. Careers and personal, social and health education are also statutory at secondary level.

Early Years Education. Early years education services encompass a wide range of different providers, including: state nursery schools, nursery classes in primary schools and reception classes; private, voluntary and independent sector nursery schools; and childminder networks. There are 35,000 settings in the state private and voluntary sectors delivering the government's early education curriculum. Since Sept. 1998 there has been a free early education place for all 4-year-olds and by Sept. 2004, every 3-year-old will enjoy this entitlement. At March 2002, 66% of 3-year-olds group were able to enjoy a free early education place.

Primary Schools. These provide compulsory education for pupils from the age of five up to the age of 11 (12 in Scotland). Most public sector primary schools take both boys and girls in mixed classes. Some pre-compulsory age pupils attend nursery classes within primary schools, however, and in England some middle schools cater for pupils at either side of the secondary education transition age. In 2000–01 there were 22 pupils per teacher at primary schools in Great Britain as a whole, and there were 21,978 public sector mainstream primary schools.

Middle Schools. A number of local education authorities in England operate a middle school system. These provide for pupils from the age of 8, 9 or 10 up to the age of 12, 13 or 14, and are deemed either primary or secondary according to the age range of the pupils.

Secondary Schools. These usually provide for pupils from the age of 11 upwards and in 2000–01 there were 4,099 secondary schools in Great Britain. Some local authorities have retained selection at age 11 for entry to grammar schools, of which there were 159 (in England) in 2000–01. There were 145 secondary modern schools in 2000–01 providing a general education up to the minimum school leaving age of 16, although exceptionally some pupils stay on beyond that age. In public sector mainstream secondary schools in Great Britain in 2000–01 there were an average 17 pupils per teacher.

Almost all local education authorities operate a system of comprehensive schools to which pupils are admitted without reference to ability or aptitude. In 2000–01 there were 3,443 such schools in Great Britain with over 3·3m. pupils. With the development of comprehensive education, various patterns of secondary schools have come into operation. Principally these are: 1) All-through schools with pupils

aged 11 to 18 or 11 to 16; pupils over 16 being able to transfer to an 11 to 18 school or a sixth form college providing for pupils aged 16 to 19. (Since 1 April 1993, sixth form colleges have been part of the further education sector—there were 105 sixth form colleges in England in 2000–01). 2) Local education authorities operating a three-tier system involving middle schools where transfer to secondary school is at ages 12, 13 or 14. These correspond to 12 to 18, 13 to 18 and 14 to 18 comprehensive schools respectively. 3) In areas where there are no middle schools a two-tier system of junior and senior comprehensive schools for pupils aged 11 to 18, with optional transfer to these schools at age 13 or 14.

Specialist Schools. Business and Enterprise Colleges, Mathematics and Computing Colleges, Science Colleges, Engineering Colleges, Technology Colleges, Language Colleges, Art Colleges and Sports Colleges. A programme to help existing maintained secondary schools to specialize in a particular area of the curriculum, while continuing to cover the full National Curriculum. To be included in the programme, schools must raise sponsorship and then prepare development plans, in competition with other schools, to seek extra government funding. They must demonstrate how they will share their resources and expertise with local schools and the wider community. The first Technology Colleges operated from Sept. 1994. By Sept. 2001 there were 685 Specialist Schools in England. The government's latest target is for 1,500 by Sept. 2005, 46% of secondary schools.

City Technology Colleges. 15 independent all-ability secondary schools established in partnership between government and business sponsors, under the Education Reform Act 1988. They teach the full National Curriculum but give special emphasis to technology, science and mathematics. Government meets all recurrent costs. Sponsors are required to provide a 20% contribution towards the cost of all capital projects.

Assisted Places Scheme. The government is phasing out the assisted places scheme and is using the money saved to reduce infant class sizes in the maintained sector. The Education (Schools) Act 1997, which came into force on 1 Sept. 1997, has the effect of preventing any further intakes to assisted places after the start of the 1997–98 school year. However, the government has made a commitment to provide continued support for existing assisted pupils for the remainder of the current phase of their education. Children receiving secondary education will continue to hold their assisted places until the completion of their secondary education. Children receiving primary education will normally hold their place until the completion of their primary education. There is a discretionary power under the Act to allow some pupils to hold their assisted places for a further period in which they receive secondary education.

Music and Dance Scheme (formerly the Music and Ballet Scheme). The 'Aided Pupil Scheme' for boys and girls with outstanding talent in music or dance (principally ballet) helps parents with the fees and boarding costs at eight specialist private schools in England. This scheme provides a specialist provision not readily available in the maintained sector and will therefore continue to operate and develop further.

Special Education. Under the Education Act 1996 children have special educational needs if they have a learning difficulty which calls for special educational provision to be made for them. It has been estimated that, nationally, some 20% of the school population will have special educational needs at some time during their school career. In a minority of cases, perhaps just over 2% of children, the Local Education Authority will need to make a statutory assessment of special educational needs under the Education Act 1996, which may ultimately lead to a 'statement'. (In Scotland pupils are assessed for a Record of Needs.)

The Education Act 1996 and regulations made thereunder build upon the principles and practices first set out in the 1981 Education Act. They place duties and responsibilities on Local Education Authorities and schools, and all those who help them work with children with special educational needs. Maintained schools must use their best endeavours to make provision for such pupils. The Special Educational Needs Code of Practice, a revised version of which came into force on 1 Jan. 2002, replacing the original published in Sept. 1994, gives practical guidance to these bodies as to how they fulfil their duties. Provision for all children with

special educational needs will be made by the most appropriate agency, which in most cases will be the child's mainstream school. The Code of Practice recognizes that there is a continuum of needs and a continuum of provision, which may be made in a variety of different forms. However, even before reaching statutory school age, a child may have special educational needs requiring the intervention of the Local Education as well as the Health Authority.

Some pupils with 'statements' remain in school after the age of 16. Local Education Authorities remain responsible for such pupils until they are 19. Others with statements leave school at 16, moving perhaps to a college within the further education sector, or to social services provision.

Ancillary Services. Local Education Authorities (LEAs) and governing bodies of schools that have a budgetary element for school meals delegated to them may provide registered pupils with meals, milk and other refreshment and make such charges as they think fit. However, they must charge the same price for the same quantity of the same item. It is for LEAs and governing bodies of schools, as described above, to decide on the presentation and content of school meals. They must provide meals free of charge to pupils whose parents receive income support, income-based Jobseekers' Allowance, or support provided under part VI of the Immigration and Asylum Act 1999. Pupils who receive income support or income-based jobseekers allowance in their own right are also entitled to receive free school meals. Where LEAs decide to provide milk, they have a duty to provide it free of charge to these categories of pupils.

Further Education (Non-University). Up to March 2001 further education (FE) courses in FE sector colleges in England and in Wales were largely funded through grants from the respective Further Education Funding Councils. In April 2001, however, the Learning and Skills Council (LSC) took over the responsibility for funding the FE sector in England, and the National Council for Education and Training for Wales (CETW) did so for Wales. The LSC is primarily responsible for funding full- and part-time education and training provision for people aged 16 to 19 in England delivered through the FE sector, including through FE colleges, sixth form colleges, work-based learning providers, and LEA maintained institutions. It also funds some higher education in FE sector colleges and since April 2002 has had responsibility for school sixth form funding. It also has a duty to secure provision for people age 19 and over, including basic skills provision, and adult and community learning.

Further education is the largest sector providing educational opportunities to the over 16s. There are 411 colleges in the further education sector in England, and 3·8m. students were enrolled in 2000–01. Of the students on Council funded provision, 18% were under 19 and 82% were adults.

In Wales, the National Council funds FE provision made by FE institutions via a third party or sponsored arrangements. The Scottish FEFC (SFEFC) funds FE colleges in Scotland, while the Department for Employment and Learning funds FE colleges in Northern Ireland.

The Youth Service. Youth Services provide informal personal and social education for young people. The priority age group for the service is 13–19 year olds, but the target age group may extend to 11–25 year olds in some cases. Provision is usually in the form of youth clubs and centres, or through 'detached' or outreach work aimed at young people at risk from alcohol or drug misuse, or of drifting into crime. There is an increasing emphasis on youth workers working with disaffected, and socially excluded, young people.

The statutory requirement for an LEA to provide a youth service is contained in section 508 of the Education Act, 1996. OFSTED inspect youth work using the *'Inspecting Youth Work: a revised framework for inspection,* June 2001'. Should an OFSTED inspection deem a youth service to be providing less than value for money the Secretary of State could couch in a direction which would achieve the desired result.

The Learning and Skills Act, 2000 gives the Secretary of State a new power to secure the provision of support for all 13–19 year olds for the purpose of encouraging and enabling young people to stay on and participate effectively in education and training.

Local Authority youth services receive Standard Spending Assessment through their Rate Support Grant to provide a local youth service. They are required to provide adequate facilities for further education including social, physical and recreational training and organized leisure time. These provisions cover the Youth Service. It is for individual authorities to decide how they discharge this requirement, taking into account a range of local factors and priorities.

The Youth Service has a key contribution to make to the Connexions Service and will bring expertise and a wide-ranging network to the Connexions Partnerships. Youth Service provision for 13–19 year olds is an integral part of the Connexions Service delivery.

Through its three-year cycle of funding to National Voluntary Youth Organisations (NVYOs), the Department for Education and Skills (DfES) aims to promote the personal and social education of young people. The level of grant for the period from April 1999–March 2002 was £12m. This scheme has been focused on two broad ministerial objectives: tackling social exclusion through targeting priority groups and raising the standard and quality of youth work. DfES' NVYO Grant Scheme is the only source of direct government support for the voluntary youth sector.

The current cycle of grants, to the headquarters of 81 national voluntary youth organisations, supports a total of 84 projects. This includes nine joint projects involving two or more organizations. The Scheme has already involved many thousands of young people in youth service activities for the first time and provides a very wide range of personal and social education programmes for young people.

The two key funding objectives—tackling social exclusion and raising the quality of youth work—are being retained for the Scheme's current three year cycle from 2002 to 2005. A key feature of the Scheme for 2002–05 is the encouragement of NVYOs to become involved with Connexions Partnerships.

The Connexions Service helps schools, colleges and all those involved with young people to make a step change in learning achievement—both formal and informal—for all teenagers, stretching the most gifted, raising aspirations and providing opportunities for all young people to achieve their potential. Connexions brings together all the services—public, voluntary or private sector—that young people need to make a smooth transition to adult life. It identifies and helps those who need additional support, when and where they need it. No young person is outside the scope of the Connexions Service, whatever their needs and regardless of the issues they have to address before they can take advantage of the opportunities available for learning and personal development. The Service began operating in England in April 2001. By the end of 2002–03 some £420m. was expected to have been invested in the Connexions Service across England.

Independent/State School Partnerships Grant Scheme. The aim of this scheme is to promote collaborative working between the independent and state school sectors to raise standards in education. In its first four years, 150 projects worth £3m. were funded. £450,000 of this was provided by the Sutton Trust, an educational charity established to provide educational opportunities for young people from non-privileged backgrounds. A further £200,000 was provided by John Beckwith, Chairman of Youth Sport Trust, and an anonymous donor, for projects focusing on Sport. £800,000 funding was available for 2002–03, and schools in England were invited to apply for funding.

Higher Education (HE) Student Support. Depending on their own, and their families' income, students are expected to make a contribution towards their tuition fees. The maximum that a student was expected to pay towards their tuition in 2002–03 was £1,100. In 2002–03 the annual income threshold at which fees start to be payable was set at £20,480. Consequently, it was expected that about 50% of all students would not have to pay any fees at all. In addition, students on courses of initial teacher training (other than first degrees), in the fifth or later years of medical and dental courses, and on NHS-funded courses in professions allied to medicine, pay no fees, whatever their and their family's income.

Loans are available to help with students' living costs. All students are entitled to 75% of the maximum loan, with the remaining quarter subject to income assessment. The maximum amounts of loan available to new students in 2002–03

were: £4,815 (living away from home and studying in London); £3,815 (living away from home and studying outside London); and £3,090 (living at home). These loans do not have to be repaid until the student has left university or college and is earning over £10,000 a year. They are repaid on what is known as an income contingent basis, set at 9% of gross income over £10,000 a year. This means that repayments rise and fall in line with income.

Help is also available to part-time students. Those on benefits or low incomes can apply to get their fees paid for them and may also be entitled to £500 loans for help with other course costs.

Applications for support in HE are made through Local Education Authorities. Students' loan accounts are managed by the Student Loans Company (SLC). Loan payments are made by the SLC direct to the student's bank account except for the first instalment each year, which is usually paid by cheque via the student's university or college.

Extra, non-repayable, help is targeted at certain students: those with disabilities; those with dependants; and those entering HE from low-income families in inner city areas. Help is also available from universities and colleges for those who get into financial difficulties as students. In 2001–02 the amount available to be distributed by universities and colleges to students in financial difficulties was £93m.

Opportunity Bursaries were introduced by the government in 2001–02 as part of the Excellence Challenge programme. For 2002–03 there were bursaries worth £2,000 each for 8,200 new and 6,580 continuing students from low-income families with little or no background in higher education.

Studentships and research grants are available for postgraduate courses from the Research Councils and the Arts and Humanities Research Board (AHRB). There are six Research Councils, five providing for science and technology and one funding economic and social sciences, who report to the Office of Science and Technology in the Department for Trade and Industry. They offer awards to students studying topics within the broad spectrum of agriculture and food; the biological sciences; man's natural environment; science and engineering and the social sciences. They offer three types of funding: advanced course studentships which are for masters level taught courses, usually of one year's duration, research masters training awards and standard research studentships, which are for PhD or MPhil students on programmes of up to three years full-time or five years part-time.

The AHRB also makes awards for postgraduate study and research. It funds studentships in the humanities for Masters and Doctoral programmes, as well as awards for students undertaking a range of professional or vocational training in a variety of arts and humanities subject areas. Both Research Council and AHRB funding is awarded on a competitive basis and securing a place on a course at a higher education institution does not in any way guarantee support. In 1999–2000 the six Research Councils granted 6,791 awards in total, while in the same year the AHRB made 1,592 awards. The British Academy seeks to complement the work of the AHRB and the Economic and Social Research Council by supporting individual scholars in providing small personal research grants, for amounts up to £5,000; postdoctoral fellowships; research readerships and professorships; grants with international programmes, including overseas exchange schemes; and support for conferences.

Many postgraduate students also look to the public sector for support and obtain loans from banks, seek sponsorship, receive help from educational trusts and charities, or pursue their studies on a part-time basis.

Career Development Loans (CDLs) were introduced in 1988 to provide adults with the opportunity to invest in their learning. CDLs are deferred repayment commercial bank loans specifically designed to help individuals acquire and improve vocational skills, and are aimed at those who would otherwise not have reasonable or adequate access to the funds required to learn. Loans of between £300 and £8,000 can be applied for to support up to two years of education or learning (plus up to one year's practical work experience where it forms part of the course). The Department for Education and Skills operates the programme in partnership with four high street banks (Barclays, The Co-operative, Clydesdale and the Royal Bank of Scotland). The Department for Education and Skills pays the interest on the loan for the period

of supported learning and for up to one month afterwards. The individual then repays the loan to the bank in accordance with their loan agreement. Subject to certain conditions it may be possible for individuals to further defer their loan re-payments for up to 17 months.

By Jan. 2002 over £549m. had been advanced to over 160,000 applicants since the programme was launched.

Teachers. In order to teach in a maintained school or a non-maintained special school in England or Wales, it is normally first necessary to achieve qualified teacher status (QTS). This is generally achieved by successfully completing an undergraduate or postgraduate course of initial teacher training. Computerized skills tests in numeracy and literacy now form part of the requirements for QTS. Since May 2002 all trainees seeking QTS have had to pass a further test in information and communication technology (ICT). Newly qualified teachers in England are then required to satisfactorily complete an induction programme during their first year of teaching. There is no statutory induction programme in Wales.

Those who are recognized as qualified teachers in Scotland or Northern Ireland are also entitled to apply to the General Teaching Council for England or the General Teaching Council for Wales for qualified teacher status. Teachers who are nationals of participating member states of the European Economic Area who are recognized as qualified in their own countries may also be entitled to apply for qualified teacher status if they meet the requirements on the mutual recognition of qualifications.

Those who have trained overseas in a country outside of the European Economic Area can also gain qualified teacher status through special employment-based arrangements. Overseas-trained teachers with at least two years' teaching experience may be eligible for assessment against the induction and qualified teacher status standards at the same time without further training. Those who are successful are exempted from serving an induction period.

In addition, from Sept. 2000, a new, flexible, modular postgraduate route was introduced to allow trainees to receive more individualized teacher training that better matches their needs and circumstances. This training takes account of any prior learning and experience, and is broken up into flexible modules which trainees can undertake when convenient to them.

In 2000–01 there were about 50,500 students on initial teacher training courses; this figure includes students on the Open University and school-centred courses.

In 2000–01, 450,100 full-time equivalent teachers were employed in public sector maintained nursery, primary and secondary schools in Great Britain.

Finance. Total managed education and training expenditure by central and local government in the UK for the year ending 1999–2000 was £40·9bn. This equates to 4·5% of GDP. By the end of 2001–02 this was expected to rise to £49·7bn. (approximately 5% of GDP). By 2003–04 it is expected to rise to £58·1bn. (5·3% of GDP).

Independent Schools. All independent schools in England (and Wales) are required to be registered by the Department for Education and Skills (and the National Assembly for Wales). Just over half of all independent schools belong to an association affiliated to the Independent Schools Council (ISC). Independent schools which belong to an association affiliated to the Independent Schools Council are now subject to an inspection regime agreed between the government and the ISC. These arrangements provide for inspections which are broadly comparable with the OFSTED framework for inspections of maintained schools and to the same 6-year cycle. They result in publicly available reports which enable parents and others to have information about the general quality and standards achieved in ISC schools. Independent schools which belong to an association account for approximately 80% of the total independent school pupil population. Non-association schools will continue to be inspected by HM inspectors from OFSTED on a five–six year cycle.

The earliest of the schools were founded by, and attached to, medieval churches. Many were founded as 'grammar' (classical) schools in the 16th century, receiving charters from the reigning sovereign. Reformed mainly in the middle of the 19th century, among the best-known are Eton College, founded in 1440 by Henry VI; Winchester College (1394), founded by William of Wykeham, Bishop of Winchester; Harrow School, founded in 1560 as a grammar school by John Lyon,

a yeoman; and Charterhouse (1611). Among the earliest foundations are King's School, Canterbury, founded 600; King's School, Rochester (604) and St Peter's, York (627).

Higher Education. Higher education has been through considerable changes over the last 30 years. In 2000–01 there were almost 2·1m. higher education students in the UK at some 90 universities, 60 higher education colleges or on higher education courses in further education colleges. The number of male and female students is roughly equal, although female students do now outnumber males. 25% of the UK population between the ages of 25 and 64 have been through tertiary education, compared to an OECD average of 22%.

Total revenue for higher education institutions was around £12·8bn. in 1999–2000. Approximately 60% of this comes from UK or European Union governments in the form of grants via the funding councils, public contributions to standard tuition fees and research grants and contracts. Higher education institutions are funded by four UK funding bodies, one each for England, Scotland, Wales and Northern Ireland. They are responsible to Parliament for higher education. Their roles include: allocating funds for teaching and research; promoting high-quality education and research; advising government on the needs of higher education; informing students about the quality of higher education available; and ensuring the proper use of public funds.

The *Open University* received its Royal Charter on 1 June 1969 and is an independent, self-governing institution, awarding its own degrees at undergraduate and postgraduate level. It is financed by the government through the HEFCE for all its students in England, Wales and Northern Ireland and through the Scottish HEFC for the teaching of its students in Scotland, and by the receipt of students' fees. At the heart of most courses is a series of specially produced textbooks or 'course units' (which are also widely used in the rest of the HE sector). They are closely integrated with a varying mix of set books, recommended reading, television programmes, audio and video tapes, home experiment kits, computer-based learning programmes, multimedia resources and network services. There are also 331 local tutorial centres where face-to-face tutorials may be offered. No formal qualifications are required for entry to undergraduate courses. Residents from most countries of Western Europe aged 18 or over may apply (though some courses are not available outside the UK). There are over 200 undergraduate courses; many are available on a one-off basis. In 2000–2001 there were over 134,000 undergraduates, and over 23,500 postgraduate level students. The university has some 4,000 full-time staff working at Milton Keynes and in 13 Regional Centres throughout the country. There are over 7,000 part-time associate lecturers.

One university is independent of the state system, the *University of Buckingham*, which opened in 1976 and received a Royal charter in 1983. It offers two-year courses towards its own honours degrees, the academic year commencing in Jan. or July and consisting of four ten-week terms. There are four areas of study: Business; Humanities; Law; and Sciences. In 1999 there were 583 full-time and 45 part-time undergraduate students and 79 full-time and 14 part-time postgraduate students. There were 75 teachers (3 part-time).

All universities charge fees, but financial help is available to students from several sources, and the majority of students receive some form of financial assistance.

The British Council. The purpose of the British Council is to win recognition abroad for the UK's values, ideas and achievements, and to nurture lasting, mutually beneficial relationships with other countries. Established in 1934 and incorporated by Royal Charter in 1940, it is the UK's international organization for educational and cultural relations. An independent, non-political organization, it is represented in 109 countries, running a mix of offices, libraries, resource centres and English-teaching operations. Its headquarters are in London and Manchester, with further centres in Belfast, Cardiff and Edinburgh. The British Council's total income in 2000–01 was £430m. This was made up of government grants (£142m.), revenues from English-language teaching and client-funded education services (£173m.), and development programmes, principally in education and training, which are managed on behalf of the British government

and other clients (£115m.). The British Council teaches English, supports arts events, funds scientific and other research links, manages development projects, and runs libraries and information centres.

Health. The National Health Service (NHS) in England and Wales started on 5 July 1948. There is a separate Act for Scotland.

The NHS is a charge on the national income in the same way, for example, as the armed forces. Every person normally resident in the UK is entitled to use any part of the service, and no insurance qualification is necessary.

Since 1948 a weekly NHS contribution has been payable by employees and the self-employed. In 1957 this contribution was extended to employers. For convenience this contribution is collected with the National Insurance contribution and amounts to 1·05% of the latter for employees and 0·9% for employers. The NHS is funded 12·1% by these contributions, 82% by general taxation and 2·3% by charges for drugs and dental treatment, and the rest from other receipts. Health authorities may raise funds from voluntary sources; hospitals may take private, paying patients.

In 2000–01 the UK spent 5·55% of its GDP on the NHS, with public spending amounting to £53,039m.

Organization. The National Health Service and Community Care Act, 1990, provided for a major restructuring of the NHS. From 1 April 1991 health authorities became the purchasers of healthcare, concentrating on their responsibilities to plan and obtain services for their local residents by the placement of health service contracts with the appropriate units. Day-to-day management tasks became the responsibility of hospitals and other units, with whom the contracts are placed, in their capacity as providers of care.

In April 1996 the Regional Health Authorities were replaced by eight regional offices of the NHS Executive. The District Health Authorities and Family Health Service Authorities were replaced by comprehensive Health Authorities directly financed by central government's Hospital and Community Health Services funds. The budget for 1996–97 was £2,260m.

The key responsibility of Health Authorities is to ensure that the health needs of their local communities are met. They have the purchasing power to commission hospital and community health services for their residents. In doing so they have a duty to ensure that high standards are maintained and that they are securing the best possible value for money.

The Health Authorities manage the Family Doctor (or General Medical) Service and also organize the general dental, pharmaceutical and ophthalmic services for their areas. Any doctor may take part in the Family Doctor Service, and are paid for their NHS work; they may also take private fee-paying patients.

NHS Trusts are established as self-governing units within the NHS. Trusts are responsible for the ownership and management of the hospitals or other establishments or facilities vested in them, and for carrying out the individual functions set out in their establishment orders. In April 1996 there were 520 Trusts, representing most hospitals.

General practitioners (GPs) may apply for fundholding status, responsible for their own NHS budget for a specified range of goods and services. There are two types of fundholder: Standard fundholders for practices with at least 5,000 patients in England and 4,000 in Wales and Scotland, who purchase the full range of in- and out-patient services; and Community fundholders, for smaller practices of at least 3,000 patients, who purchase only community nursing services and diagnostic tests. In 1996 there were some 14,000 fundholding GPs in 3,300 practices, covering 47% of the population.

Services. The NHS broadly consists of hospital and specialist services, general medical, dental and ophthalmic services, pharmaceutical services, community health services and school health services. In general these services are free of charge; the main exceptions are prescriptions, spectacles, dental and optical examination,

dentures and dental treatment, amenity beds in hospitals, and some community services, for which contributory charges are made with certain exemptions.

The total cost of the NHS was estimated at £53,039m. for 2000–01.

In 2001 there were 27,843 GPs in England each with an average of 1,841 patients. There were 1,796 in Wales with an average of 1,685 patients each and 3,756 in Scotland with an average of 1,409. There were 16,451 general dental practitioners in England, 931 in Wales and 1,866 in Scotland. In hospitals in Great Britain in 2001 there were 71,107 medical staff and 437,417 nurses and midwives (down from 490,545 in 1989) excluding agency staff. In 1998 provision of beds in the UK was 42 per 10,000 population. In 1998 there were 194,000 hospital beds (108,000 acute-care beds).

In the UK in 1995 there were 193 public and private hospices for the terminally ill with 2,982 beds.

Private. In recent years increasing numbers of people have turned to private medical insurance. This covers the costs of private medical treatment (PMI) for curable short-term medical conditions. PMI includes the costs of surgery, specialists, nursing and accommodation at a private hospital or in a private ward of an NHS hospital. Approximately 11% of the UK population have private medical insurance. The leading companies are BUPA Healthcare, PPP healthcare and Norwich Union Healthcare Ltd.

In 1998, 28% of the population of the UK aged 15 and over smoked. In 1974 the percentage had been 45%, with 51% of males and 41% of females smoking. Over the years the difference between the percentage of men and of women who smoke has been declining, and by the mid-1990s there was a similar rate among men and women. Among schoolchildren 12% of girls but only 9% of boys smoked in 1998. The average British adult smokes 4·2 cigarettes a day, slightly less than the European Union average of 4·5 a day. Alcohol consumption has increased in recent years. Whereas in 1961 the average Briton consumed the equivalent of 4·5 litres of pure alcohol a year, by 1998 this figure had risen to 7·5 litres. By 2000, 21·0% of the population were considered obese (having a body mass index over 30), compared to 14·0% in 1991 and 7·0% in 1980.

The UK's AIDS rate stands at 24·1 cases per 100,000 population.

A survey published by the World Health Organization in June 2000 to measure health systems in all of the sovereign countries and find which country has the best overall health care ranked the UK in 18th place.

Personal Social Services. Under the Local Authority Social Services Act, 1970, and in Scotland the Social Work (Scotland) Act, 1968, the welfare and social work services provided by local authorities were made the responsibility of a new local authority department—the Social Services Department in England and Wales, and Social Work Departments in Scotland headed by a Director of Social Work, responsibility in Scotland passing in 1975 to the local authorities. The social services thus administered include: the fostering, care and adoption of children, welfare services and social workers for people with learning difficulties and the mentally ill, the disabled and the aged, and accommodation for those needing residential care services. Legislation of 1996 permits local authorities to make cash payments as an alternative to community care. In Scotland the Social Work Departments' functions also include the supervision of persons on probation, of adult offenders and of persons released from penal institutions or subject to fine supervision orders.

Personal Social Services staff numbered 212,000 in 2001. The total cost of these services was estimated at £12,226m. for 2000–01. Expenditure is reviewed by the Social Services Inspectorate and the Audit Commission (in Scotland by the Social Work Services Inspectorate and the Accounts Commission).

Welfare. The National Insurance Act 1946 came into operation on 5 July 1948, repealing the existing schemes of health, pensions and unemployment insurance. This Act, along with later legislation, was consolidated as the National Insurance Act 1965. The scheme now operates under the Social Security Contributions and Benefits Act 1992 and the Social Security Administration Act 1992.

Since 1975 Class 1 contributions have been related to the employee's earnings and are collected with PAYE income tax, instead of by affixing stamps to a card.

Class 2 and Class 3 contributions remain flat-rate, but, in addition to Class 2 contributions, those who are self-employed may be liable to pay Class 4 contributions, which for the year 2002–03 were at the rate of 7% on profits or gains between £4,615 and £30,420, which are assessable for income tax under Schedule D. The non-employed and others whose contribution record is not sufficient to give entitlement to benefits were able to pay a Class 3 contribution of £6·85 per week in 2002–03 voluntarily, to qualify for a limited range of benefits. Class 2 weekly contributions for 2002–03 for men and women were £2·00. Class 1A contributions are paid by employers who provide employees with a car and fuel for their private use.

From 6 April 1978 the Social Security Pensions Act 1975 introduced earnings-related retirement, invalidity and widows' pensions. Members of occupational pension schemes may be contracted out of the earnings-related part of the state scheme relating to retirement and widows' benefits. Employee's national insurance contribution liability depends on whether he/she is in contracted-out or not contracted-out employment.

Full-rate contributions for non-contracted-out employment in 2002–03:

Weekly Earnings (in £1)	*Employee pays*	*Employer pays*
Nil–75	Nil	Nil
75–89	10%	Nil
89–585	10%	11·8%
Over 585	£49·60	11·8%

For contracted-out employment, the contracted-out rebate for primary contributions (employee's contribution) is 1·6% of earnings between the lower earnings limit and the upper earnings limit for all forms of contracting-out; the contracted-out rebate for secondary contributions (employer's contributions) is 3·5% of earnings between the lower earnings limit and the upper earnings limit. The employees' and employers' rates will both increase by 1·0% in 2003–04, increasing the rate paid by employees to 11% and that paid by employers to 12·8%.

From April 1996 employers who engage a trainee, or a person who has been unemployed for at least two years, are eligible for a year's rebate of contributions.

Contributions together with interest on investments form the income of the *National Insurance Fund* from which benefits are paid. A Treasury grant was instituted in 1993. 27,950,000 persons (12,360,000 women) paid contributions in 2000–01, including 25,360,000 employees at standard rate.

Receipts, 2000–01 (in £1m.), 72,480·2, including: contributions, 55,664·7; investment income, 884·1; compensation from Consolidated Fund for recoveries, 687·7. Disbursements (in £1m.), 52,574·0, including: Retirement Pensions, 42,349·8; administration, 1,197·4; Widow's Pensions, 1,008·0; Jobseekers' Allowance (Contributory), 449·3; transfers to Northern Ireland, 200·0; Redundancy Payments, 195·3; Pensioners' Lump Sums, 123·4; Maternity Allowances, 46·0; Guardian's Allowances, 1·6.

Statutory Sick Pay (SSP). Employers are responsible for paying statutory sick pay (SSP) to their employees who are absent from work through illness or injury for up to 28 weeks in any three-year period. Basically, all employees aged between 16 and 65 (60 for women) with earnings above the Lower Earnings Limit are covered by the scheme whenever they are sick for four or more days consecutively. The weekly rate is £63·25. For most employees SSP completely replaces their entitlement to state incapacity benefit which is not payable as long as any employer's responsibility for SSP remains.

Contributory benefits. Qualification for these depends upon fulfilment of the appropriate contribution conditions, except that persons who are incapable of work as the result of an industrial accident may receive incapacity benefit followed by invalidity benefit without having to satisfy the contributions conditions.

Jobseekers' Allowance. This replaced unemployment benefit on 7 Oct. 1996. Unemployed persons claiming the allowance must sign a 'Jobseekers' Agreement' setting out a plan of action to find work. The allowance is not payable to persons who left their job voluntarily or through misconduct. Claimants with sufficient

National Insurance contributions are entitled to the allowance for six months regardless of their means; otherwise, recipients qualify through a means test and the allowance is fixed according to family circumstances, at a rate corresponding to Income Support for an indefinite period. In May 2002 there were 827,500 people receiving the Jobseekers' Allowance (634,600 males). Payments start at £32·50 per week.

Incapacity benefit. This replaced the former sickness benefit and invalidity benefit on 13 April 1995. Entitlement begins when entitlement to SSP (if any) ends. There are three rates: a lower rate for the first 28 weeks; a higher rate between the 29th and 52nd week; and a long-term rate from the 53rd week of incapacity. It also comprises certain age additions and increases for adult and child dependants. A more objective medical test of incapacity for work was introduced for incapacity benefit as well as for other social security benefits paid on the basis of incapacity for work. This test applies after 28 weeks' incapacity for work and assesses ability to perform a range of work-related activities rather than the ability to perform a specific job. Benefit is taxable after 28 weeks. Some 1,496,900 claims were being made in Feb. 2002.

Statutory Maternity Pay. Pregnant working women may be eligible to receive statutory maternity pay directly from their employer for a maximum of 18 weeks if average gross earnings are £75 a week or more (2002–03). There are two rates: a lower rate of £75·00 for up to 12 weeks, and a higher rate (90% of average earnings for six weeks). For women who do not qualify for Statutory Maternity Pay, including self-employed women, there is a Maternity Allowance.

A payment of £500 from the Social Fund (Sure Start Maternity Grant) may be available if the mother or her partner are receiving income support, income-based Jobseeker's Allowance, Working Families' Tax Credit or Disabled Person's Tax Credit. It is also available if a woman adopts a baby.

Bereavement Benefits. Available to both men and women, Bereavement Benefits were introduced from 9 April 2001 to replace the former widow's benefit scheme. There are three main types of Bereavement Benefits available to men and women widowed on or after that date: bereavement payment, widowed parent's allowance, bereavement allowance. *Bereavement Payment* is a single tax-free lump sum payment of £2,000 payable immediately to help with costs arising on bereavement. A widower/widow may be able to get this benefit if his/her late spouse has paid enough National Insurance Contributions (NIC) and he/she was under 60 when her husband died; or her husband/wife was not getting a Category A State Retirement Pension when he/she died. *Widowed Parent's Allowance* is a weekly benefit payable to widowed parents. A widower/widow may be able to get this benefit if his/her late spouse has paid enough NIC and the widower/widow is receiving Child Benefit or can be treated as entitled to Child Benefit, or the late spouse was receiving Child Benefit, or she is expecting her husband's baby, or in certain cases of artificial insemination. The amount of Widowed Parent's Allowance they will get is based on their late spouse's NIC record. He/she may also get benefit for her eldest dependent child and further higher benefit for each subsequent child and may also include an additional pension based on their late spouse's earnings. If their late spouse was a member of a contracted-out occupational scheme or a personal pension scheme, that scheme is responsible for paying the whole or part of the additional pensions. Widowed Parent's Allowance is taxable. *Bereavement Allowance* is a weekly benefit payable to widows and widowers without dependent children and is payable between age 45 and State Pension age. The amount of Bereavement Allowance payable to a widower/widower between 45 and 54 is related to their age at the date of entitlement. Their weekly rate is reduced by 7% for each year they are aged under 55 so that they get 93% rate at age 54, falling to 30% at age 45. Those aged 55 or over at the date of entitlement will get the full rate of Bereavement Allowance. The amount of Bereavement Allowance they will get is based on their late spouse's NIC record and is payable for a maximum of 52 weeks from the date of bereavement. A widower/widow cannot get a Bereavement Allowance at the same time as a Widowed Parent's Allowance. If Widowed Parent's Allowance ends within 52 weeks of bereavement, Bereavement Allowance is payable up to the 52nd week from the late spouse's death. Bereavement Allowance is taxable.

A widower/widow cannot get bereavement benefits based on their late spouse's NIC if: he/she had been divorced from the man/woman who has died; or he/she was living with the man/woman as if he/she were married to him/her, but without being legally married to him/her; or he/she is living with another man/woman as if he/she is married to him/her; or he/she was in prison or held in legal custody.

Women widowed before 9 April 2001 will continue to receive their widows benefit entitlement on the arrangements that existed before that date so long as they continue to satisfy the qualifying conditions. There were some 255,500 recipients of widows' benefits in Feb. 2001.

Retirement Pension. The state retirement ('old-age') pension scheme has two components: a basic pension and an earnings-related pension (State Earnings Related Pension—SERPS). The amount of the first is subject to National Insurance contributions made; SERPS is 1·25% of average earnings between the lower weekly earnings limit for Class I contribution liability and the upper earnings limit for each year of such earnings, building up to 25% in 20 years. For individuals reaching pensionable age after 6 April 1999, changes in the way pensions are calculated will be phased in over 10 years to include a lifetime's earnings with an accrual rate of 20%. Pensions are payable to women at 60 years of age and men at 65, but the age differential will be progressively phased out starting in April 2010. Women born before 6 April 1950 will be unaffected; women born after 5 March 1955 will receive their pension at 65; pension age for women between these dates will move up gradually from 60 to 65. There are standard rates for single persons and for married couples, the latter being 159% of two single-person rates. Proportionately reduced pensions are payable where contribution records are deficient.

Employees in an occupational scheme may be contracted out of SERPS provided that the occupational scheme provides a pension not less than the 'guaranteed minimum pension'. Self-employed persons, and also employees, may substitute personal pension schemes for SERPS. An independent statutory body, the Occupational Pension Board, is responsible for supervising contracted-out schemes.

Self- and non-employed persons may contribute voluntarily for retirement pension.

Persons who defer claiming their pension during the five years following retirement age are paid an increased amount, as do men and women who had paid graduated contributions. Although no further graduated contributions have been paid after April 1975, pension already earned will be paid along with the basic pension in the normal way. In March 2002 some 11,124,000 persons were receiving National Insurance retirement pensions (6,982,500 women and 4,141,500 men). The basic state pension in 2002–03 was £75·50 per week for a single person and £120·70 per week for a married couple. Since 1 Oct. 1989 the pension for which a person has qualified may be paid in full whether a person continues in work or not irrespective of the amount of earnings. Although for males the official retirement age is 65, in 1995 the average actual retirement age among males was 62.

At the age of 80 a small age addition is payable. In addition non-contributory pensions are now payable, subject to residence conditions, to persons aged 80 and over who do not qualify for a retirement pension or qualify for one at a low rate. These pensions are financed by Exchequer funds.

Pensioners whose pension is insufficient to live on may qualify for Income Support.

Non-Contributory Benefits.

Child Benefit. Child benefit is a tax-free cash allowance for children normally paid to the mother. The weekly rates are highest for the eldest qualifying child and less for each other child. Child benefit is payable for children under 16, for 16- and 17-year-olds registered for work or training, and for those under 19 receiving full-time non-advanced education. Some 7,066,400 families received benefit in 2002 at any one time.

Child Support Agency. The Agency, which started work in April 1993, is gradually replacing the court system for obtaining maintenance for children being brought up by single parents. The Agency is responsible for assessing, collecting and enforcing child maintenance payments and for tracing absent parents. Assessments are made

using a formula which takes into account each parent's income and essential outgoings. Changes to the child support arrangements were introduced in Feb. 1994 to take account of concerns raised by members of the public and MPs. These are designed to reduce the amount of child maintenance that many absent parents are required to pay, and to give some families more time to adjust to increased bills. Legislation of 1995 introduced the possibility of fixing maintenance alongside the formula-assessment method. Appeals on points of law may be made to the Child Support Commissioners. The Agency receives over 330,000 applications a year and at Nov. 1999 was handling over 998,900 cases.

Working Families' Tax Credit. This was introduced on 5 Oct. 1999 and replaced Family Credit. It aims to provide a better deal for working families and is administered by the Inland Revenue; it is paid through the pay packet. It is available to families (either couples or lone parents) who work at least 16 hours a week, who have one or more children under 16 (or under 19 if in full-time education up to A-level or equivalent standard), who are resident in and entitled to work in the UK, and who have savings of £8,000 or less. In Dec. 2001 there were 1,293,700 WFTC awards current. The average award in Aug. 2000 was £76·86 per week.

Guardian's Allowance. A person responsible for an orphan child may be entitled to a guardian's allowance in addition to child benefit. Normally, both the child's parents must be dead but when they never married or were divorced, or one is missing, or serving a long sentence of imprisonment, the allowance may be paid on the death of one parent only. In May 2002 there were 2,300 recipients.

Attendance Allowance. This is a tax-free Social Security benefit for disabled people over 65 who need help with personal care. The rates are increased for the terminally ill. There were some 1,291,400 recipients in Feb. 2002.

Invalid Care Allowance. This is a taxable benefit which may be paid to those who forego the opportunity of full-time work to care for a person who is receiving attendance allowance, constant attendance allowance or the highest or middle-core component of Disability Living Allowance. There is a weekly rate, with increases for dependants. In March 2002 there were 387,000 recipients.

Disability Living Allowance. This is a non-taxable benefit available to people disabled before the age of 65, who need help with getting around or with personal care for at least three months. The mobility component has two weekly rates, the care component has three. There were some 2,322,800 recipients in Feb. 2002.

Disabled Person's Tax Credit. This is a tax-free benefit for people with an illness or disability who are already working at least 16 hours a week. The allowance is not payable if assets exceed £16,000. Applicants must be receiving or must have been receiving a qualifying benefit such as disability living allowance or attendance allowance. The maximum weekly rates for single people is £62·10 and for a couple or lone parent £95·30.

Industrial Injuries Disablement and Death Benefits. The Industrial Injuries Act, which also came into operation on 5 July 1948, with its later amending Acts, was consolidated as the National Insurance (Industrial Injuries) Act, 1965. This legislation was incorporated in the Social Security Act, 1975. The scheme provides a system of insurance against 'personal injury by accident arising out of and in the course of employment' and against certain prescribed diseases and injuries owing to the nature of the employment. It takes the place of the Workmen's Compensation Acts and covers persons who are employed earners under the Social Security Act. There are no contribution conditions for the payment of benefit. There were 280,400 recipients in 2001 at any one time. Two types of benefit are provided:

—*Disablement benefit.* This is payable where, as the result of an industrial accident or prescribed disease, there is a loss of physical or mental faculty. The loss of faculty will be assessed as a percentage by comparison with a person of the same age and sex whose condition is normal. If the assessment is between 14–100% benefit will be paid as weekly pension; 14–19% are payable at the 20% rate. The rates vary from 20% disabled to 100% disablement. Assessments of less than 14% do not normally attract basic benefit except for certain progressive chest diseases. Pensions for persons under 18 are at a reduced rate. When injury benefit was abolished for industrial accidents occurring and prescribed diseases commencing on

or after 6 April 1983, a common start date was introduced for the payment of disablement benefit 90 days (excluding Sundays) after the date of the relevant accident or onset of the disease. The following increases can be paid with disablement benefit: *Constant attendance allowance* – where the disability for which the claimant is receiving disablement benefit is assessed at 100% and is so severe that they need constant care and attention. There are four rates depending on the amount of attendance needed. *Exceptionally severe disablement allowance* – where the claimant is in receipt of constant attendance allowance at one of the two higher rates and the need for attendance is likely to be permanent. *Reduced earnings allowance* (REA) is a separate benefit. Entitlement exists if the claimant has not retired and cannot go back to their normal job or do another job for the same pay because of the effects of the disability caused by an accident or disease which occurred on or before 30 Sept. 1990. It can be paid whether or not disablement benefit is paid, providing the disablement benefit assessment is 1% or more (e.g. where disablement is assessed at less than 14%) and on top of 100% disablement benefit. From 1 Oct. 1989, if a claimant is of pensionable age (60 for a woman, 65 for a man) they can continue to receive REA if they are in regular employment, or in some cases if they are receiving Sickness Benefit, Invalidity Benefit or Unemployment Benefit. It will not matter whether or not they receive State Retirement Pension. If they are not in regular employment, then entitlement to REA will cease. In most cases it will be replaced by Retirement Allowance.

—*Death Benefit.* This is payable to the widow of a person who died before 11 April 1988 as the result of an industrial accident or a prescribed disease. Deaths which occurred on or after 11 April 1988—a widow is entitled to full widow's benefits even if her late husband did not satisfy the contribution condition, if he died as a result of an industrial accident or prescribed disease. Allowances may be paid to people who are suffering from pneumoconiosis or byssinosis or certain other slowly developing diseases due to employment before 5 July 1948. They must not at any time have been entitled to benefit for the disabled under the Industrial Injuries provision of the Social Security Act, or compensation under Workmen's Compensation Acts, or have received damages through the courts. In certain cases supplementation allowances are payable to people who are getting or are entitled to compensation under the Workmen's Compensation Acts.

War Pensions. Pensions are payable for disablement or death as a result of service in the armed forces. Similar schemes exist for other groups such as merchant seaman injured as a result of war or for civilians injured by enemy action in the Second World War. The amount depends on the degree of disablement. Various supplements may apply. There were some 272,730 recipients in 2001 at any one time.

Severe Disablement Allowance. A severe disablement allowance as well as an age-related addition may be payable to people under pensionable age who have been continuously incapable of work for at least 28 weeks, but who do not qualify for incapacity benefit. Those over 20 who are unable to work and are 80% disabled but do not qualify for the National Insurance invalidity pension because they have not paid sufficient contributions may be entitled to severe disablement allowance. Additions for adult dependants and for children may also be paid. There were some 399,000 beneficiaries in 1998–99.

Housing Benefit. The housing benefit scheme assists persons who need help to pay their rent, using general assessment rules and benefit levels similar to those for the income support scheme. People whose net income is below certain specified levels qualify for housing benefit of up to 100% of their rent. The scheme sets a limit of £16,000 on the amount of capital a person may have and still remain entitled. Restrictions on the granting of benefit to persons under 25 were introduced in 1995. In 2002 some 2,037,600 claims for rent rebate and 1,775,000 for rent allowance were being made at any one time.

Income Support. Income Support is a non-contributory benefit and the full basis for entitlement is set out in regulations. People in Great Britain who are aged 16 or over, not working 16 hours or more a week or with a partner not working more than 24 hours or more per week, and not required to be available for employment are eligible to claim Income Support. These include single parents, long-term sick or disabled persons, and those caring for them who qualify for Invalid Care

Allowance. It is payable to person whose resources are below a certain level. Income Support is not payable if the claimant (or claimant and partner together) has capital assets that total more than £8,000. These include savings, investments or property other than their home. Savings/capital assets worth under £3,000 are ignored. Savings between £3,000 and £8,000 are treated as if each £250 or part of £250 brings in an income of £1 per week. Some groups have capital treated differently. These include Income Support claimants whose partners are of pension age; in these circumstance they are allowed to have up to £12,000 and still be entitled to Income Support. However, only £6,000 will be disregarded. In addition claimants in residential care and nursing homes have their capital treated differently. They are allowed to have up to £16,000 and still be entitled to Income Support. However, only £10,000 of their assets are disregarded. The amount of benefit that a claimant can receive is calculated using an 'applicable amount' and takes account of any resources they have. Receipt of Income Support also automatically entitles the claimant and his dependants to certain other welfare benefits. Applicable amounts are specified by regulations and are used to calculate the maximum amount of benefit that a claimant can receive. These consist of: a personal allowance—which depends upon the age of the claimant and the presence and age of a partner; additions for any dependants; 'premiums'—which provide additional allowances in recognition of special needs such as old age or disability; and certain types of housing costs. In 2002 there were 3,929,800 Income Support claimants at any one time. The average weekly award was £69·94 in May 2002.

Council Tax Benefit. The scheme offers help to those claiming income support and others with low incomes. Subject to rules broadly similar to those governing the provision of income support and housing benefit, people may receive rebates of up to 100% of their council tax. In 2002 some 4,601,700 households received such help at any one time. A person who is liable for the council tax may also claim benefit (called 'second adult rebate') for a second adult who is not liable to pay the council tax and who is living in the home on a non-commercial basis.

The Social Fund. The Fund makes payments and loans to help recipients meet intermittent expenses. The Regulated Social Fund comprises: *Sure Start Maternity Grant* (a payment of up to £500 for each baby expected, born or adopted, payable to persons receiving Income Support, Income-based Jobseekers' Allowance, Disabled Person's Tax Credit or Working Families' Tax Credit); *Funeral Payments* (a payment of fees levied by the burial authorities and crematoria, plus up to £600 for other funeral expenses, to persons receiving Income Support, Income-based Jobseekers' Allowance, Disabled Person's Tax Credit, Working Families' Tax Credit, Housing Benefit or Council Tax Benefit); *Cold Weather Payments* (a payment of £8·50 for any consecutive seven days when the temperature is below freezing to persons receiving income support who are pensioners, disabled or have a child under five); *Winter Fuel Payments* (a payment of £200 to every household with a person aged 60 or over providing they do not live permanently in a hospital, residential care or nursing home). The Discretionary Social Fund comprises: *Community Care Grants* (payments to help persons receiving income support to move into the community or avoid institutional care); *Budgeting Loans* (interest-free loans to persons receiving income support for expenses difficult to budget for); *Crisis Loans* (interest-free loans to anyone without resources in an emergency where there is no other means of preventing serious risk to health or safety). Savings over £500 (£1,000 for persons aged 60 or over) are taken into account before payments are made.

CULTURE

Broadcasting. Radio and television services are provided by the British Broadcasting Corporation (BBC), by licensees of the Radio Authority and the Independent Television Commission (ITC) and by the Welsh-language Sianel Pedwar Cymru (S4C, Channel 4 Wales). The BBC, constituted by Royal Charter until 31 Dec. 1996, has responsibility for providing domestic and external broadcast services, the former financed from the television licence revenue, the latter by

government grant. The domestic services provided by the BBC include two national television services, five national radio network services and a network of local radio stations. Government proposals for the future of the BBC after 1996 were published in July 1994.

The ITC is responsible for licensing and regulating all non-BBC TV services (except S4C), provided in and from the UK whether analogue or digital. These include ITV (regional and breakfast-time licensees), Channel 4, Channel 5, cable and satellite and additional services, such as teletext, carried on the spare capacity of TV signals. The Radio Authority is responsible for licensing and regulating independent national and local radio services. S4C is transmitted in Wales, and is funded by the government. It acts as both broadcaster and regulator.

The BBC's domestic radio services are available on Long Wave, Medium Wave and VHF/FM; those of the Radio Authority on Medium Wave and VHF/FM. Television services other than those only on cable and satellite are broadcast at UHF in 625-line definition and in colour (by PAL). The BBC World Service, which started life in 1932 as the Empire Service, broadcast in 43 languages to an audience estimated at 150m. in 2001. As the self-financed BBC Worldwide TV, the BBC is also involved in commercial joint ventures to provide international television services.

The broadcasting authorities, whose governing bodies are appointed (by HM the Queen in the case of the BBC and by the Secretary of State for Culture, Media and Sport in the case of the ITC, the Radio Authority and S4C) as trustees for the public interest in broadcasting, are independent of government and are publicly accountable to Parliament for the discharge of their responsibilities. Their duties and powers are laid down in the BBC Royal Charter and the Broadcasting Act 1990.

All independent (non-BBC) radio and television services other than S4C are financed by the sale of broadcasting advertising time, commercial sponsorship, or, in some cable and satellite services, by subscription.

The Broadcasting Standards Commission (BSC) was established on 1 April 1997 by the Broadcasting Act 1996, through the merger of the Broadcasting Standards Council and Broadcasting Complaints Commission. Combining the functions of the two predecessor bodies, it acts as a forum for public concern about fairness and taste and decency on television and radio. The Commission considers and reaches findings on taste and decency complaints received from the public and adjudicates upon complaints of unfair or unjust treatment in broadcast programmes, and of unwarranted infringement of privacy in programmes or in their preparation. It also undertakes and commissions research and the monitoring of public attitudes, and must draw up a code of practice on both broadcasting standards and fairness which the broadcasters and regulators are required to reflect in their own programming guidelines. The Commission is half-funded by the Department, half by contributions from the BBC, ITC, Radio Authority and S4C.

The number of television receiving licences in force on 31 March 2002 was 23,157,000, of which 23,040,000 were for colour. There were 9·4m. satellite and cable TV subscribers in early 2002 (5·8m. with BSkyB, 2·3m. with NTL and 1·3m. with Telewest). In 1997 there were 84·5m. radio receivers, or 1,443 per 1,000 inhabitants—a figure only exceeded in the USA, with 2,116 per 1,000 inhabitants.

Cinema. In 2001 cinemas had 2,509 screens. Admissions were 141·0m. in 2001. Admissions had totalled 500m. in 1960, but had fallen as low as 54m. in 1984. Gross box office takings in 2001 amounted to £550·1m. 96 full-length films were made in 2001 (128 in 1996). In 1997 British films took 27% of the national market, but in 1998 this dropped to 13%.

Press. In 2003 there were ten national dailies with a combined average daily circulation in Jan. 2003 of 12,427,715, and ten national Sunday newspapers (13,381,334). There were also about 100 morning, evening and Sunday regional newspapers and 2,000 weeklies (about 1,000 of these for free distribution). There were about 6,500 other commercial periodicals and 4,000 professional and business journals. In 1996 an average of 18·3m. newspapers were sold per day, down from over 23m. in 1980. The most widely read daily is the tabloid *The Sun*, with an average daily circulation of 3,578,302 in Jan. 2003. The most widely read Sunday paper is the tabloid *News of the World*, which had an average circulation of 3,971,846 in Jan. 2003.

In Jan. 1991 the Press Complaints Commission replaced the former Press Council. It has 15 members and a chair, including seven editors. It is funded by the newspaper industry.

In 1996, 101,504 book titles were published, including 89,984 non-fiction. 95,064 titles were published in 1995.

Tourism. In 2001 UK residents made 163·1m. trips within the UK, passing 529·6m. nights in accommodation and spending £26,094m. Of these, 101·2m. were holiday-makers spending £17,016m. There were 22·8m. overseas visitors in 2001 staying 189·5m. nights in accommodation and spending £11,306m. UK residents made 58·3m. trips abroad in 2001. The main countries of origin for foreign visitors in 2001 were: USA (3·6m.), France (2·9m.), Germany (2·3m.), Ireland (2m.) and the Netherlands (1·4m.). Between 1997 and 2001, visits by USA residents to the UK increased by 148,000, the largest increase for any single country. Over the same period visits by French residents of the UK fell by the greatest number. The UK is the 5th most popular tourist destination in the world. In 2001 tourism was affected by the foot-and-mouth epidemic which closed parts of the countryside.

The leading attraction in 2001 was Blackpool Pleasure Beach, Lancs, with an estimated 6·5m. visits. The leading tourist attractions charging admission in 2001 were: the British Airways London Eye, with 3,850,000; the Tower of London, with 2,019,210 visits; Eden Project in St Austell, with 1,700,000; Natural History Museum in London, with 1,696,176; and Legoland Windsor, with 1,632,000 visits.

In Sept. 2001 there were 2·1m. (not seasonally adjusted) people working in tourism-related industries.

France is the most popular destination for Britons travelling abroad (12m. British visitors in 2001), followed by Spain (11·7m.) and USA (4m.). There were 58·3m. trips abroad made by British residents in 2001, up from 13·4m. in 1978.

Festivals. Among the most famous music festivals are the Promenade Concerts or ‘Proms’, which take place at the Royal Albert Hall in London every year from July to Sept; the Glyndebourne season in Sussex (May to Aug.); the Aldeburgh Festival in Suffolk (June); the Glastonbury Festival in Somerset (June); and the Buxton Festival in Derbyshire (July). The annual London Film Festival takes place in Nov. Literary festivals include the Hay Festival in Herefordshire (late May/early June) and Cheltenham Festival of Literature in Gloucestershire (Oct.). The Edinburgh Festival and the Fringe Festival both take place in Aug./early Sept. and are major international festivals of culture. The Brighton Festival in May is England’s largest arts festival. The multicultural Notting Hill Carnival in London takes place at the end of Aug. Other major events in the annual calendar are the New Year’s Parade in London, the Crufts Dog Show at the Birmingham National Exhibition Centre (March), the Ideal Home Exhibition in London (March–April), the London Marathon (April), the Chelsea Flower Show (May), Royal Ascot (horse racing, in June), Wimbledon (tennis, in June–July), Henley Royal Regatta (July), Cowes (yachting, in Aug.) and the Lord Mayor’s Show in London (Nov.).

Libraries. In 1997 there were 5,183 public libraries, 18 National libraries and 781 Higher Education libraries; they held a combined 249,361,000 volumes. There were 61,415,000 registered library users in 1997.

Museums and Galleries. The museums with the highest number of visitors are all in London. In 2001 there were 4,918,985 visits to the National Gallery, 4,800,938 to the British Museum, 3,551,885 to the Tate Modern, 1,696,176 to the Natural History Museum and 1,446,344 to the Victoria and Albert Museum.

ENGLAND

KEY HISTORICAL EVENTS

After the withdrawal of the Roman legions, 5th century Celtic Britain was invaded by Scandinavian and Teutonic tribes. In the course of the next 150 years they conquered the east and centre of the country, pinning down the Celtic Britons on the higher lands to the west. More than 200 years passed before the prevailing tribes recognized one king.

For much of the 1st century AD, Viking invaders were dominant in England. An Anglo-Saxon counter-attack was led by King Alfred, whose successors consolidated their hold on the country. After the departure of the Scandinavians, England attracted the interest of France or, more particularly, Normandy. In 1066 William, Duke of Normandy, was victorious against King Harold at the Battle of Hastings. William was crowned king. When William died in 1087, he left Normandy to his eldest son Robert, thus separating it from England. The French dialect known as Anglo Norman was spoken by the ruling class in England for two centuries after the Conquest.

The Norman heritage was preserved also in the overlap between French and English feudal lords. Henry II, the founder of the Plantagenet dynasty, was feudatory lord of half France. But most of the French possessions were lost by Henry’s son John. Thereafter, the Norman baronage came to regard themselves as English.

The ambitions of Edward III began and those of Henry V renewed the Hundred Years War (1338–1453) with France, which ended with the loss of all the remaining French possessions except Calais.

The dynastic struggle between the rival houses of York and Lancaster culminated in the Tudor ascendancy over political and clerical factions. Henry VII was a

unifying monarch preparing the way for Henry VIII who forced the Church to submit to lay rule. Tudor power reached its zenith with Elizabeth I when England, allied with other Protestant powers, humbled the Spanish Armada.

Elizabeth's death brought on a great struggle for supremacy between Crown and Parliament. There followed the Civil War, the execution of Charles I, the rule by Protector Cromwell by military dictatorship, and the restoration of the Stuart monarchy on terms which conceded financial authority and thus decision-making power to Parliament.

The attempt of James II to restore the royal prerogative led to the intervention of William of Orange. James fled the country and the crown was taken by William and his wife Mary as Queen. The accession of William involved England in a protracted war against France but before peace was achieved, the 1688 revolution was confirmed by the Hanoverian succession, and the history of England was merged with that of Great Britain by the union with Scotland in 1707.

TERRITORY AND POPULATION

At the census taken on 29 April 2001 the area of England was 130,281 sq. km and the population 49,138,831, giving a density of 377 per sq. km. England covers 53·7% of the total area of the United Kingdom. Households at the 2001 census: 21,262,000. Estimated population of England, mid-2002, 49,343,000.

Population (present on census night) at the four previous decennial censuses:

1961	*1971*	*1981*	*1991*
43,460,525[1]	46,018,371[1]	46,226,100[2]	46,382,050

[1]Area now included in Wales formed the English county of Monmouthshire until 1974.
[2]The final count is believed to be over-stated as a result of an error in processing. The preliminary counts presented here rounded to the nearest hundred are thought to be more accurate.

Eight 'Standard Regions' (also classified as 'level 1 regions' for EU purposes) are identified in England as economic planning regions. They have no administrative significance. Estimated population of the regions of England (in 1,000), 2001, East Anglia, 2,177; East Midlands, 4,175; West Midlands, 5,267; North, 3,004; North West, 6,244; South East, 18,412 (including Greater London, 7,188); South West, 4,934; Yorkshire and Humberside, 4,967. Although the populations of most of the regions increased during the 1990s, the North, North West, and Yorkshire and Humberside saw their population declines, by 88,000, 148,000 and 16,000 respectively between 1991 and 2001. The population on census day in 2001 in the nine English Government Office regions was as follows: East, 5,388,154; East Midlands, 4,172,179; London, 7,172,036; North East, 2,515,479; North West, 6,730,800; South East, 8,000,550; South West, 4,928,458; West Midlands, 5,267,337; Yorkshire and the Humber, 4,965,838.

Following the local government reorganization in the mid-1990s, there is a mixed pattern to local government in England. Apart from Greater London, England is divided into 34 counties with 2 tiers of administration; a county council and district councils. There are 6 metropolitan county areas containing 36 single-tier metropolitan districts.

In addition, there are 46 single-tier unitary authorities which, with the exception of the Isle of Wight, were formally district councils in the shire counties of England. The Isle of Wight is a unitary county council.

As a consequence of the establishment of the 46 unitary authorities, a number of county areas were abolished. These were Avon, Cleveland and Humberside. Berkshire County Council was also abolished but the county itself is retained for ceremonial purposes. Greater London comprises 32 boroughs and the City of London.

SOCIAL INSTITUTIONS

Education. For details on the nature and types of school, see under Education, United Kingdom.

In 2001–02 education and skills expenditure by Central and Local government in England is expected to top £42·7bn. In Jan. 2001 there were 506 public-sector nursery and primary schools with nursery classes in England; in addition, there were 1,500 independent schools with provision for children under five (including direct grant nurseries). In 2001 there were 44,990 pupils under five attending nursery schools and pupils under five in nursery and infant classes in primary schools. Some of these children were attending part-time.

In Jan. 2001 there were 4,406,215 pupils at 18,069 primary schools in England, of which 2,070 were infant schools providing for pupils up to the age of about 7, the remainder mainly taking pupils from age 5 through to 11. Nearly all primary schools take both boys and girls. 15% of primary schools had 100 full-time pupils or fewer.

In Jan. 2001 there were 463 middle schools in England deemed either primary or secondary according to the age range of the school concerned.

In Jan. 2001 there were 3,481 secondary schools in England. Some local authorities have retained selection at age 11 for entry to grammar schools, of which there were 159 in 2001. There were a small number of technical schools in 2001 which specialize in technical studies. There were 145 secondary modern schools in 2001, providing a general education up to the minimum school leaving age of 16, although exceptionally some pupils stay on beyond that age.

Almost all local education authorities operate a system of comprehensive schools to which pupils are admitted without reference to ability or aptitude. In Jan. 1997 there were 2,882 such schools in England with over 2·6m. pupils. With the development of comprehensive education, various patterns of secondary schools have come into operation. Principally these are: 1) All-through schools with pupils aged 11 to 18 or 11 to 16; pupils over 16 being able to transfer to an 11 to 18 school or a sixth form college providing for pupils aged 16 to 19. (There are currently 102 sixth form colleges in England). 2) Local education authorities operating a three-tier system involving middle schools where transfer to secondary school is at ages 12, 13 or 14. These correspond to 12 to 18, 13 to 18 and 14 to 18 comprehensive schools respectively; or 3) In areas where there are no middle schools a two-tier system of junior and senior comprehensive schools for pupils aged 11 to 18 with optional transfer to these schools at age 13 or 14.

Under the Education Act 1996 children have special educational needs if they have a learning difficulty which calls for special educational provision to be made for them. In some cases the Local Education Authority will need to make a statutory assessment of special educational needs under the Education Act 1996, which may ultimately lead to a ‘statement’. In England the total number of pupils with statements in 2001 was 258,200. In 2001 there were 1,113 maintained special schools and 62 non-maintained special schools.

Outside the state system of education there were in England about 2,188 independent schools in Jan. 2001, ranging from large prestigious schools to small local ones. Some provide boarding facilities but the majority include non-resident day pupils. There are about 569,253 pupils in these schools, which represent about 7% of the total pupil population in England.

Further Education (Non-University). In 2000–01, 3·8m. students were enrolled at FE colleges in England. Those on Learning and Skills Council funded provision were studying for 6·6m. qualifications. Total funding for the FE sector in 2001–02 was £4,029m.

Higher Education. In England in 2002–03 there were 132 institutions of higher education directly funded by the HEFCE (Higher Education Funding Council for England), of which 77 were universities. The HEFCE distributes public money for teaching and research to universities and colleges. It works in partnership with the higher education sector and advises the government on higher education policy. In 2002–03 the HEFCE distributed £5·1bn. in funding, including £3,271m. for teaching and £940m. for research.

SCOTLAND

KEY HISTORICAL EVENTS

Earliest evidence of human settlement in Scotland dates from the Middle Stone Age. Hunters and fishermen on the west coast were succeeded by farming communities who made homes as far north as Shetland. The Romans were active in the first century AD but made so little impact on hostile tribes they built Hadrian's Wall

between the Tyne and Solway Firth as their northern frontier. At this time, the Picts with their own language and culture consolidated their strength beyond the Firth of Clyde, but it was the southern Scots, a Celtic people from Ireland, who gave their name to the land.

In 843 Kenneth MacAlpine united the Scots and the Picts to found the kingdom of Scotland. A legal and administrative uniformity was established by David I whose 29-year reign ended in 1153. His successors maintained an understanding with England which allowed for a century of peace, but in 1286 Edward I of England asserted his claim as overlord of Scotland and appointed his son to succeed to the crown.

Resistance to English rule was led by Robert Bruce, who turned back the English at Bannockburn. His son, David II, was less successful in the battlefield, but defended independence by clever diplomacy. He died in 1371 and was succeeded by his nephew Robert, the first king of the Stuart line.

The reigns of five James's occupied the century and a half between the death of Robert III in 1406 and the accession of Mary. This was the time when the alliance between France and Scotland was cemented by common hostility to England.

James IV reinforced a peace agreement with Henry VII by marrying his daughter Margaret in 1503. Religious differences put a strain on the alliance, and when Henry VIII invaded France, James attacked England only to be killed in the Battle of Flodden.

The young James V was assailed by conflicting pressures from pro-French and pro-English factions but having secured his personal rule, he entered into two successive French marriages. His second wife, Mary, was the mother of Mary, Queen of Scots, who married the Dauphin in 1558. Protestant opposition to French influence was bolstered by Elizabeth I of England who sent troops. Mary was then in France. Returning to Scotland after her husband's death in 1561 she was beset by religious enemies and forced to take refuge in England, where she was the nearest heir to Elizabeth. Her son James VI survived the animosity between his own and his mother's followers to make an alliance with England. With the execution of his mother by a nervous Protestant establishment in England, James became heir to the English throne to which he succeeded in 1603.

The crowns of England and Scotland were now worn by the same monarch but for a century more the two countries remained independent. Reflecting the religious and political divisions of the Civil War in England, which led to the execution of Charles I, Scottish armies fought for both sides. The Scots soon united, however, to accept Charles II as their king. Having established dominance in England, Cromwell moved against Scotland forcing Charles II into exile. His restoration in 1660 was welcomed in both kingdoms. His successor James VII of Scotland and James II of Great Britain and Ireland was less astute in managing religious and political differences. The collapse of his regime in 1688 and the arrival of William of Orange confirmed the Protestant ascendancy in Scotland and England.

The union of parliament, which followed in 1707, brought Scotland more directly under English authority but in many respects the country retained its own system of government.

The remaining supporters of James VII, the Jacobites, led two abortive risings on behalf of James's son and grandson (the old and new Pretenders) but were defeated decisively at Culloden in 1746.

TERRITORY AND POPULATION

The total area of Scotland is 77,925 sq. km (2001), including its islands, 186 in number, and inland water 1,580 sq. km. Scotland covers 32·1% of the total area of the United Kingdom.

CONSTITUTION AND GOVERNMENT

One of the main aspects of the British Labour government's programme of constitutional reform is devolution. In the referendum on Scottish devolution on 11 Sept. 1997, 1,775,045 votes (74·3%) were cast in favour of a Scottish parliament and 614,400 against (25·7%). The turn-out was 60·4%, so around 44·8% of the total electorate voted in favour. For the second question, on the Parliament's tax-raising powers, 1,512,889 votes were cast in favour (63·5%) and 870,263 against (36·5%). This represented 38·4% of the total electorate.

The Parliamentary electorate of Scotland in the register numbered 3,984,306 in 2001–02.

RECENT ELECTIONS

At the UK general election held in June 2001, 72 members were returned from Scotland. The Scottish National Party gained 5 seats (6 in 1997). At the June 1999 European Parliament elections Labour won 3 seats, the Scottish National Party 2, the Conservatives 2 and Liberal Democrats 1.

In elections to the Scottish Parliament on 1 May 2003, Labour won 50 seats (4 by regional list), against 27 (18 by regional list) for the Scottish National Party, 18 (15 by regional list) for the Conservatives, 17 (4 by regional list) for the Liberal Democrats, 7 (all by regional list) for the Greens, 6 (all by regional list) for the Scottish Socialist Party (SSP) and 4 independents. Of the 129 seats, 73 were won on a first-past-the-post basis and 56 through proportional representation (regional list). Turn-out was 49%. Donald Dewar was elected as *First Minister* on 13 May 1999. He died on 11 Oct. 2000. Jim Wallace was acting first minister until the election of Henry McLeish on 26 Oct. 2000. McLeish resigned on 8 Nov. 2001 and Wallace again assumed the post temporarily. Jack McConnell was elected first minister on 23 Nov. 2001 and re-elected on 15 May 2003.

ENERGY AND NATURAL RESOURCES
Electricity. The Electricity Act 1989 created three new companies in Scotland. ScottishPower and Scottish Hydro-Electric (now renamed Scottish and Southern Energy) are vertically integrated companies carrying out generation, transmission, distribution and supply of electricity within their areas. They were privatized in 1990. Scottish Nuclear, responsible for operating the two Scottish nuclear power stations, was merged with Nuclear Electric in 1996. ScottishPower now owns Manweb in England, and Scottish Hydro-Electric has merged with Southern Electric under its new group name.

Water. Water supply is the responsibility of the Regional and Island local authorities. Seven river purification boards are responsible for environmental management.

Agriculture. In 1997 total agricultural area was 6,122,000 ha, of which 3,494,000 ha were used for rough grazing and 1,809,000 ha for crops and grass.

Selected crop production, 1997 (1,000 tonnes): barley, 1,813; potatoes, 1,149; wheat, 821; oats, 121.

Fisheries. The major fishing ports are Aberdeen, Mallaig, Lerwick and Peterhead. In 1997 there were 2,770 fishing vessels that landed 686,400 tonnes of fish worth £278·7m.

INDUSTRY
Labour. In 1999 the economically active population numbered 2,467,000 (1,121,000 females), of whom 182,000 (63,000) were unemployed. This equates to an unemployment rate of 7·4% (8·9% for men and 5·6% for women). By Sept. 2001 employment in Scotland was at its highest in 40 years. In Sept. 1997, 22·7% of the active workforce were in distribution, hotels and catering and repairs, 21·2% in education, social work and health services, 16·4% in manufacturing, and 14·85% in financial and business services.

COMMUNICATIONS

In 1997 there were 53,100 km of public roads, of which 329 km were motorways. There were 1,779,000 licensed private and light goods vehicles.

Rail. Total railway length in 1997 was 2,696 km. There is a metro in Glasgow.

Shipping. The principal Scottish port is Forth, which handled 44·0m. tonnes of cargo in 1998.

SOCIAL INSTITUTIONS

Justice. The High Court of Justiciary is the supreme criminal court in Scotland and has jurisdiction in all cases of crime committed in any part of Scotland, unless expressly excluded by statute. It consists of the Lord Justice General, the Lord Justice Clerk and 30 other Judges, who are the same Judges who preside in the Court of Session, the Scottish Supreme Civil Court. One Judge is seconded to the Scottish Law Commission. The Court is presided over by the Lord Justice General, whom failing, by the Lord Justice Clerk, and exercises an appellate jurisdiction as well as being a court of first instance. The home of the High Court is Edinburgh, but the court visits other towns and cities in Scotland on circuit and indeed the busiest High Court sitting is in Glasgow. The court sits in Edinburgh both as a Court of Appeal (the *quorum* being two judges if the appeal is against sentence or other disposals, and three in all other cases) and on circuit as a court of first instance. Although the decisions of the High Court are not subject to review by the House of Lords, with the Scotland Act 1998 coming into force on 20 May 1999, there is a limited right of appeal against the termination of a devolution issue to the Judicial Committee of the Privy Council. One Judge sitting with a Jury of 15 persons can, and usually does, try cases, but two or more Judges (with a Jury) may do so in important or complex cases. The court has a privative jurisdiction over cases of treason, murder, rape, breach of duty by Magistrates and certain statutory offences under the Official Secrets Act 1911 and the Geneva Conventions Act 1957. It also tries the most serious crimes against person or property and those cases in which a sentence greater than imprisonment for three years is likely to be imposed.

The appellate jurisdiction of the High Court of Justiciary extends to all cases tried on indictment, whether in the High Court or the Sheriff Court, and persons so convicted may appeal to the court against conviction or sentence, or both, except where the sentence is fixed by law. In such an appeal, a person may bring under review any alleged miscarriage of justice including an alleged miscarriage of justice based on the existence and significance of evidence not heard at the original proceedings provided there is reasonable explanation of why it was not heard and an alleged miscarriage of justice where the Jury returned a verdict which no reasonable Jury, properly directed, could have returned. It is also a court of review from courts of summary jurisdiction, and on the final termination of any summary prosecution the convicted person may appeal to the court by way of stated case on questions of law, but not on questions of fact, except in relation to a miscarriage of justice alleged by the person accused on the basis of the existence and significance of additional evidence not heard at the original proceedings provided that there is a reasonable explanation of why it was not heard. Before cases proceed to a full hearing, leave of appeal must first be granted. Grounds of appeal and any relevant reports are sifted by a Judge sitting alone in chambers, who will decide if there are arguable grounds of appeal. Should leave of appeal be refused, this decision may be appealed to the High Court within 14 days, when the matter will be reviewed by three Judges. The Lord Advocate is entitled to appeal to the High Court against any sentence passed on indictment on the ground that it is unduly lenient, or on a point of law. Both the prosecution and defence, at any time in solemn and summary proceedings, may appeal by way of Bill of Advocation in order to correct irregularities in the preliminary stages of a case. In summary proceedings the accused may appeal by Bill of Suspension, where he desires to bring under review a warrant, conviction or judgement issued by an inferior Judge. In summary proceedings the accused can also appeal against sentence alone by way of Stated Case. In summary proceedings the Crown can appeal against a sentence on the grounds that it is unduly lenient. The court also hears appeals under the Courts-Martial (Appeals) Act 1951.

The Sheriff Court has an inherent universal criminal jurisdiction (as well as an extensive civil one), limited in general to crimes and offences committed within a sheriffdom (a specifically defined region), which has, however, been curtailed by statute or practice under which the High Court of Justiciary has exclusive

jurisdiction in relation to the crimes mentioned above. The Sheriff Court is presided over by a Sheriff Principal or a Sheriff, who when trying cases on indictment sits with a Jury of 15 people. His powers of awarding punishment involving imprisonment are restricted to a maximum of three years, but he may under certain statutory powers remit the prisoner to the High Court for sentence if this is felt to be insufficient. The Sheriff also exercises a wide summary criminal jurisdiction and when doing so sits without a Jury; and he has concurrent jurisdiction with every other court within his Sheriff Court district in regard to all offences competent for trial in summary courts. The great majority of offences which come before courts are of a more minor nature and as such are disposed of in the Sheriff Summary Courts or in the District Courts (*see* below). Where a case is to be tried on indictment either in the High Court of Justiciary or in the Sheriff Court, the Judge may, before the trial, hold a preliminary or first diet to decide questions of a preliminary nature, whether relating to the competency or relevancy of proceedings or otherwise. Any decision at a preliminary diet (other than a decision to adjourn the first or preliminary diet or discharge trial diet) can be the subject of an appeal to the High Court of Justiciary prior to the trial. The High Court also has the exclusive power to provide a remedy for all extraordinary occurrences in the course of criminal business where there is no other mode of appeal available. This is known as the Nobile Officium powers of the High Court and all petitions to the High Court as the Nobile Officium must be heard before at least three judges.

In cases to be tried on indictment in the Sheriff Court a first diet is mandatory before the trial diet to decide questions of a preliminary nature and to identify cases which are unlikely to go to trial on the date programmed. Likewise in summary proceedings, an intermediate diet is again mandatory before trial. In High Court cases such matters may be dealt with at a preliminary diet.

District Courts have jurisdiction in more minor offences occurring within a district which before recent local government reorganization corresponded to district council boundaries. These courts are presided over by Lay Magistrates, known as Justices, who have limited powers for fine and imprisonment. In Glasgow District there are also Stipendiary Magistrates, who are legally qualified, and who have the same sentencing powers as Sheriffs.

The Court of Session, presided over by the Lord President (the Lord Justice General in criminal cases), is divided into an inner-house comprising two divisions of five judges each with a mainly appellate function, and an outer-house comprising 22 single Judges sitting individually at first instance; it exercises the highest civil jurisdiction in Scotland, with the House of Lords as a Court of Appeal.

Police. In Scotland, the unitary councils have the role of police authorities. Establishment levels were abolished in Scotland on 1 April 1996. The actual strength at 31 March 2002 was 12,513 men and 2,738 women. There were 1,119 special constables. The total police net expenditure in Scotland for 1999–2000 was £752·9m.

[1]Except for serious offences which qualify for solemn proceedings, children aged 8–15 are not proceeded against in Scottish courts. Children within this age group that commit crime are generally referred to the reporter of the children's panel or are given a police warning.

In 2000 there were 423,000 crimes reported, of which 23,000 were violent. The average prison population in Scotland in 2000 was 5,869.

Religion. The Church of Scotland, which was reformed in 1560, subsequently developed a presbyterian system of church government which was established in 1690 and has continued to the present day.

The supreme court is the General Assembly, which now consists of some 800 members, ministers and elders in equal numbers, together with members of the diaconate commissioned by presbyteries. It meets annually in May, under the presidency of a Moderator appointed by the Assembly. The Queen is normally represented by a Lord High Commissioner, but has occasionally attended in person. The royal presence in a special throne gallery in the hall but outside the Assembly symbolizes the independence from state control of what is nevertheless recognized as the national Church in Scotland.

There are also 46 presbyteries in Scotland, together with 1 presbytery of England, 1 presbytery of Europe, and 1 presbytery of Jerusalem. At the base of this conciliar structure of Church courts are the kirk sessions, of which there were 1,555 on 31 Dec. 2000. The total communicant membership of the Church at that date was 607,714.

The Episcopal Church of Scotland is a province of the Anglican Church and is one of the historic Scottish churches. It consists of seven dioceses. As at 31 Dec. 2001 it had 304 churches and missions, 349 clergy and 46,237 members, of whom 29,810 were communicants.

There are in Scotland some small outstanding Presbyterian bodies and also Baptists, Congregationalists, Methodists and Unitarians.

The Roman Catholic Church which celebrated the centenary of the restoration of the Hierarchy in 1978, had in Scotland (1998) 1 cardinal archbishop, 1 archbishop, 5 bishops, 20 permanent deacons, 907 clergy, 463 parishes and 705,650 adherents.

The proportion of marriages in Scotland according to the rites of the various Churches in 2001 was: Church of Scotland, 38·5%; Roman Catholic, 6·9%; Baptist Union of Scotland, 1·1%; others, 14·7%; civil, 38·8%.

Education. In Sept. 2001 there were 2,855 publicly funded (local authority, grant-aided and self-governing) primary, secondary and special schools. All teachers employed in these schools require to be qualified.

Pre-school Education. In Jan. 2002 there were 2,597 pre-school centres that were in partnership with their local authority and 98,769 pupils enrolled in these centres.

Primary Education. In Sept. 2001 there were 2,271 publicly funded primary schools with 420,523 pupils and 22,289 full-time equivalent teachers.

Secondary Education. In Sept. 2001 there were 387 publicly funded secondary schools with 316,368 pupils and 1,296 adults. All but 21 schools provided a full range of Scottish Certificate of Education courses and non-certificate courses. Pupils who start their secondary education in schools which do not cater for a full range of courses may be transferred at the end of their second or fourth year to schools where a full range of courses is provided. There were 24,552 full-time equivalent teachers in secondary schools.

Independent schools. There were 155 independent schools in Sept. 2001, with a total of 30,400 pupils. A small number of the Scottish independent schools are of the 'public school' type, but they are not known as 'public schools' since in Scotland this term is used to denote education authority (i.e., state) schools.

Special Education. In Sept. 2001 there were 197 publicly funded special schools with 8,183 pupils.

Further Education. Under the Further and Higher Education (Scotland) Act 1992 funding of the Further Education colleges was transferred to central government in 1993. With effect from 1 July 1999 Scotland's FE colleges are funded by the Scottish Further Education Funding Council, a new executive Non Departmental Public Body established by the Secretary of State for Scotland on 1 Jan. 1999.

There are 42 incorporated FE colleges as well as the FE colleges in Orkney and Shetland, which are run by the local education authorities, and 2 privately managed colleges, Sabhal Mor Ostaig and Newbattle Abbey College. The colleges offer

training in a wide range of vocational areas and co-operate with the Scottish Qualifications Authority, the Enterprise and Lifelong Learning Department and the Education Department of the Scottish Executive in the development of new courses. The qualifications offered by colleges aim to improve the skills of the nation's workforce and increase the country's competitiveness. The colleges benefit from co-operation with industry, through involvement with Industry Lead Bodies and National Training Organizations whose responsibility it is to identify education, training and skills needs at sectoral level. Industry is also represented on college boards of management. Colleges and schools in Scotland are directly involved in providing the new national qualifications introduced in 1999 as a result of the Higher Still development programme.

In 2000–01 there were 383,543 students enrolled on vocational courses at Scotland's 46 further education institutions; the full-time equivalent staff number in the colleges was 12,310.

Full-time students resident in Scotland (and EU students) undertaking non-advanced (further education) courses are mainly supported through discretionary further education bursaries which are administered locally by further education colleges within National Policy Guidelines issued by the Scottish Further Education Funding Council. The Colleges have delegated discretionary powers for some aspects of the bursary support award.

In May 2000 the Scottish Executive announced the abolishment of tuition fees for all eligible Scottish (and EU) full-time further education students from Autumn 2000. The Executive also made a commitment to take steps to align, from Autumn 2001, the levels of support available on a weekly basis for FE students with those that will apply for HE students and to begin to align the systems of assessment of parental/family contributions.

Higher Education. In Scotland in 2002 there were 21 institutions of higher education funded by the Scottish Higher Education Funding Council (SHEFC), with the exception of the Scottish Agricultural College which is funded by the Scottish Executive Rural Affairs Department. Included in this total is the Open University. SHEFC took over the responsibility for funding the Open University in Scotland at the start of the 2000–01 academic session. University education in Scotland has a long history. Four universities—St Andrews, Glasgow, Aberdeen and Edinburgh, known collectively as the 'four ancient Scottish universities'—were founded in the 15th and 16th centuries. Four further universities—Strathclyde, Heriot-Watt, Stirling and Dundee—were formally established as independent universities between 1964 and 1967, and four others—Napier, Paisley, Robert Gordon and Glasgow Caledonian—were granted the title of university in 1992, with a fifth, the University of Abertay, Dundee, being added in 1994.

Of the remaining higher education institutions, which all offer courses at degree level (although not themselves universities), five were formerly Central Institutions: Edinburgh College of Art, Glasgow School of Art, Queen Margaret University College (Edinburgh), Royal Scottish Academy of Music and Drama (Glasgow) and Scottish Agricultural College (Perth).

Two additional higher education institutions were established in 2001. UHIMI Millennium Institute was designated as a higher education institution on 1 April when it took over from the local colleges of further education and other non-SHEFC funded institutions responsibility for all HE provision and all students on courses of HE in the Academic Partner institutions. Bell College of Technology became a higher education institution on 1 Aug. when its transfer from the further to the higher education sector was completed.

Further education colleges may also provide higher education courses.

WALES

KEY HISTORICAL EVENTS

After the Roman evacuation, Wales divided into tribal kingdoms. Cunedda Wledig, a prince from southern Scotland, founded a dynasty in the northwest district of Gwynedd to become the centrepoint for Welsh unity. Offa's Dyke, the defensive earthwork built in the time of King Offa of Mercia, was the dividing line between England and Wales but over the next two centuries a succession of Welsh kings deferred to the English monarchy.

With the accession of Llewelyn (1194–1240) the house of Gwynedd overcame rival claims from Powys and Deneubarth to forge a stable political state under English suzerainty. But when Llywelyn ap Gruffydd (1246–82) intrigued against Edward I, Wales was annexed and Edward's infant son, born at Caernarvon, was made Prince of Wales.

In the Tudor period, Welsh loyalty to Henry VIII, who was of Welsh descent, was fully reciprocated. The Act of Union in 1536 made English law general and admitted Welsh representatives to Parliament.

TERRITORY AND POPULATION

At the census taken on 29 April 2001 the population was 2,903,085. The area of Wales is 20,732 sq. km. Population density, 2001 census: 140 per sq. km. Wales covers 8·5% of the total area of the United Kingdom.

Population at census day 2001:

Males	*Females*	*Total*
1,403,900	1,499,185	2,903,085

Population (present on census night) at the four previous decennial censuses:

2,644,023[1]	2,731,204[1]	2,790,500[2]	2,811,865

[1]Areas now recognized as Monmouthshire and small sections of various other counties formed the county of Monmouthshire in England until 1974.

[2]The final count is believed to be over-stated as a result of an error in processing. The preliminary counts presented here rounded to the nearest hundred are thought to be more accurate.

Estimated population, mid-2002, 2,908,000. Cardiff, the capital and largest city, had a population in 2001 of 305,340; Swansea, the second largest city, had a population of 223,293 in 2001.

In 2001, 457,950 people aged three and over were able to speak, read and write Welsh. Households at the 2001 census: 1,276,000.

The clear-up rate was 40·6%. 17,350 people were found guilty of indictable offences in Magistrates' Courts and 4,040 in Crown Courts. A total of 4,158 people were given custodial sentences.

Religion. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from 1 April 1920, and Wales was formed into a separate Province.

Education. There were 41 maintained nursery schools in Jan. 2001, and 66,324 pupils under five years provided for in nursery schools and in nursery or infants classes in primary schools.

In Jan. 2001 there were 285,786 pupils at 1,631 primary schools. Within these figures, 440 primary schools use Welsh as the sole or main medium of instruction. Such schools are to be found in all parts of Wales but are mainly concentrated in the predominantly Welsh-speaking areas of west and northwest Wales. Generally, children transfer from primary to secondary schools at 11 years of age.

In Jan. 2001 there were 229 secondary schools. All maintained secondary schools are classified as comprehensive; there are no middle schools in Wales. In 2000–01, 53 of the secondary schools were classed as Welsh-speaking as defined in section 354(b) of the Education Act 1996.

Since Sept. 1999, in accordance with the Schools Standards and Framework Act 1998, all maintained schools, including grant maintained schools, in Wales had to change category to one of the following: Community, Community Special, Foundation, Voluntary Controlled, Voluntary Aided. These categories continue to remain in place with the introduction of the Education Act 2002.

Under the Education Act 1996, children have special educational needs if they have a learning difficulty which calls for special educational provision to be made for them. In a minority of cases the local education authority will need to make a statutory assessment of special educational needs under the Education Act 1996, which may ultimately lead to a 'statement of Special Educational Needs'. The total number of pupils with statements in Jan. 2001 was 17,415. From April 2002 Special Educational Needs (SEN) guidance for Wales is set out in the SEN Code of Practice for Wales.

In Jan. 2001, 9,257 full-time pupils attended 54 independent schools.

Post-16 Learning. The National Council for Education and Training Wales (ELWa) was formed from the merger of the four TECs (training and enterprise councils), the Council of Welsh TECs and Further Education Funding Council for Wales (FEFCW) and has been operational since April 2001. It is responsible for the planning and promoting of further, adult and continuing education, work-based training and school sixth forms. Grant in aid allocation for 2002–03 was £489·22m. In 2000–01 the FEFCW supported 42,833 full-time and sandwich students and 192,978 students studying part-time in the further education sector at 27 further education institutions and 9 higher education institutions. In addition, the four TECs supported 30,487 starts in work-based training or with training to return to the workplace. In 2001, 12% of 16- to 18-year-olds did not have a qualification; 5 percentage points lower than in 1996. The percentage of adults with no qualification fell from 23% in 1996 to 21% in 2001; and 40% of adults had an NVQ level three or equivalent, up from 35% in 1996. Between 1996 and 1999 it was estimated that around 7 in 10 adults had functional basis skills in either literacy or numeracy.

In 2000–01 there were 13 institutions of higher education funded directly by the Higher Education Funding Council for Wales (HEFCW), including the University of Glamorgan and the colleges of the University of Wales. NORTHERN IRELAND

KEY HISTORICAL EVENTS

Northern Ireland is part of the United Kingdom. The Government of Ireland Act 1920 granted Northern Ireland its own bicameral parliament (Stormont), and between 1921 and 1972 it had full responsibility for local affairs except for such matters as defence and the armed forces, foreign and trade policies, and taxation and customs. However, in the late 1960s a Civil Rights campaign and reactions to it escalated into serious rioting and sectarian violence involving the Irish Republican Army (IRA, an illegal organization aiming to unify Northern Ireland with the Republic of Ireland) and loyalist paramilitary organizations. The Northern Ireland government resigned and direct rule by the UK government began in 1972. The Northern Ireland parliament was abolished in 1973. The Northern Ireland Constitution Act 1973 provided for devolved government on a power-sharing basis, but this collapsed in May 1974.

Under the Northern Ireland Act 1974 the UK parliament approves all laws for Northern Ireland and the Northern Ireland departments are under the direction and control of a UK Cabinet Minister, the Secretary of State for Northern Ireland.

Attempts have been made by successive governments to find a means of restoring greater power to Northern Ireland's political representatives on a widely acceptable basis, including a Constitutional Convention (1975–76), a Constitutional Conference (1979–80) and 78-member Northern Ireland Assembly elected by proportional

representation in 1982. This was dissolved in 1986, partly in response to Unionist reaction to the Anglo-Irish Agreement signed on 15 Nov. 1985, which established an Intergovernmental Conference of British and Irish ministers to monitor political, security, legal and other issues of concern to the nationalist community.

On 15 Dec. 1993 the Prime Ministers of the UK and the Republic of Ireland (John Major and Albert Reynolds) issued a joint declaration as a basis for all-party talks to achieve a political settlement. They invited Sinn Féin ('Ourselves Alone', pro-Republican nationalist party and the political wing of the IRA) to join the talks in an All-Ireland Forum three months after the cessation of terrorist violence.

The IRA announced 'a complete cessation of military operations' on 31 Aug. 1994. On 13 Oct. 1994 the anti-IRA Combined Loyalist Military Command also announced a ceasefire 'dependent upon the continued cessation of all nationalist republican violence'.

Elections were held on 30 May 1996 to constitute a 110-member forum to take part in talks with the British and Irish governments. Each of the 18 Northern Ireland constituencies returned five delegates. The ten parties receiving the most votes received two extra delegates. The Ulster Unionist Party won 30 seats with 24·2% of votes cast; the Social Democratic and Labour Party, 21 with 21·4%; the Democratic Unionist Party, 24 with 18·8%; and Sinn Féin, 17 with 15·5%.

Opening Plenary talks, excluding Sinn Féin, began under the chairmanship of US Senator George Mitchell on 12 June 1996. A marathon negotiating struggle on 9–10 April 1998 led to agreement on a framework for sharing power designed to satisfy Protestant demands for a reaffirmation of their national identity as British, Catholic desires for a closer relationship with the predominantly Catholic Republic of Ireland and Britain's wish to return to Northern Ireland the powers London assumed in 1972 when the local Stormont legislature was disbanded.

Under the Good Friday Agreement, there was to be a democratically elected legislature in Belfast, a ministerial council giving the governments of Northern Ireland and Ireland joint responsibilities in areas like tourism, transportation and the environment, and a consultative council meeting twice a year to bring together ministers from the British and Irish parliaments, and the three assemblies being created in Northern Ireland and in Scotland and Wales. The Irish government has eliminated from its constitution its territorial claim on Northern Ireland.

The critical issues of police and judicial-system reform, the release of paramilitary prisoners, and the dismantling of the vast underground arsenals of weaponry in the province are the subject of further study and recommendations.

In the referendum on 22 May 1998, 71·12% of votes in Northern Ireland were cast in favour of the Good Friday peace agreement and 94·4% in the Republic of Ireland. As a consequence, in June, Northern Ireland's 1·2m. voters elected the first power-sharing administration since the collapse of the Sunningdale Agreement in 1974. But IRA blockage on the decommissioning of arms continues to hold up the transfer of powers from London to Belfast.

On 15 Aug. 1998 a 200 kg bomb exploded in the centre of Omagh. 29 people died and over 200 were injured, making it the single bloodiest incident of the Troubles. The dissident republican group the 'Real IRA' claimed responsibility.

In Nov. 1999 the Mitchell talks finally produced an agreement between the Ulster Unionists and Sinn Féin which paved the way for the formation of a government with devolved powers. The new Northern Ireland Assembly met for the first time on 29 Nov. 1999, and on 2 Dec. legislative powers were fully devolved from London to Belfast, with the new executive of Unionists, nationalists and republicans meeting for the first time. In the Republic of Ireland on 2 Dec. 1999 the Irish constitution was amended to remove the articles which referred to claims to Northern Ireland. However, on 11 Feb. 2000 the Assembly was suspended following a breakdown in negotiations on the decommissioning of IRA weapons. Direct rule from London was restored while politicians searched for a way forward. Devolved government resumed on 30 May after the IRA agreed to open their arms dumps to independent inspection. First Minister David Trimble resigned on 30 June 2001 to pressure republicans over decommissioning, but on 22 Oct. Sinn Féin president Gerry Adams announced that he had recommended a 'ground-breaking' step on the arms issue. The IRA made a start on decommissioning arms, ammunition and explosives. David Trimble was re-elected First Minister on 6 Nov. 2001.

On 15 Oct. 2002 the Assembly executive was again suspended over allegations of IRA spying at the Northern Ireland Office. Direct rule from London was re-imposed and on 30 Oct. the IRA cut off its links with the weapons de-commissioning body. The Ulster Volunteer Force followed suit on 17 Jan. 2003.

Tony Blair and Bertie Ahern held talks in March 2003 but failed to produce a solution. Clarification of the IRA's intent have so far failed to satisfy the British government or the unionists.

Elections to form a new power-sharing administration, planned for 29 May 2003, have been postponed until late 2003 at the earliest.

ENERGY AND NATURAL RESOURCES

Electricity. There are three power stations with an installed capacity of some 2,100 MW.

A 500 MW interconnector linking the Northern Ireland Electricity (NIE) and Scottish Power networks was officially opened in April 2002. A number of interconnectors also link the NIE network with the Electricity Supply Board (ESB) network in the Republic of Ireland.

Oil and Gas. Natural Gas was brought to Northern Ireland in 1996 via the Scotland to Northern Ireland Gas Pipeline. This allowed Ballylumford Power Station to be converted to gas firing and to make gas available to industrial, commercial and domestic consumers in the Greater Belfast and Larne areas. In Sept. 2001 the Northern Ireland executive approved grant support for the development of the gas network to the North/North West region and for the construction of a South/North pipeline.

INDUSTRY

Labour. The main sources of employment statistics are the Census of Employment, conducted every two years, and the Quarterly Employment Survey. In Dec. 1999 there were 625,030 employees, of whom 309,010 were males. Employment in manufacturing and construction amounted to 137,340, 22% of the total employees in employment. 19,400 of these jobs were in the food, drink and tobacco industries, 9,360 in the manufacture of wearing apparel, 9,100 in textiles, 30,840 in construction and 68,640 in other sectors of manufacturing. Unemployment in the spring of 2000, at 7·0%, was the lowest in 26 years.

COMMUNICATIONS

Roads. In April 2002 the total length of public roads was 24,788 km, graded for administrative purposes as follows: motorway, 133 km (including 19 km slip roads);

Class '1' dual carriageway, 149 km; Class '1' single carriageway, 2,118 km; Class '2', 2,869 km; Class '3', 4,704 km; unclassified, 14,834 km.

Ulsterbus and Citybus subsidiaries of N.I. Transport Holding Company (NITHC) provide co-ordinated services with N.I. Railways (NIR) Ltd under the service brand name of Translink.

At 31 March 2000 there were 1,963 professional hauliers and 5,322 vehicles licensed to engage in road haulage.

The number of motor vehicles licensed at 31 Dec. 1999 was 720,645, comprising private light goods, 608,316; motorcycles, scooters and mopeds, 13,088; buses, 2,204; goods vehicles, 17,075; agricultural vehicles, 5,505; exempt including crown vehicles, 73,229; and others, 1,228.

Rail. NIR, a subsidiary of NITHC, provides rail services within Northern Ireland and cross-border services to Dublin, jointly with Irish Rail. The number of track-km. operated is 340. In 2000–01 railways carried 5·9m. passengers, generating passenger receipts of £14·1m.

Civil Aviation. There are scheduled air services to three airports in Northern Ireland: Belfast International, Belfast City and City of Derry. Scheduled services are provided by easyJet, bmi British Midland, British Airways' franchise partners and British European (Flybe). Belfast International, the busiest airport, is Northern Ireland's main charter airport with holiday flights operated direct to European destinations by a wide range of local and UK tour operators. In 2001–02 the airports collectively handled 5m. passengers. Belfast International handled 3,602,702 passengers in 2000.

Belfast City Airport offers commuter services to 16 regional airports in Great Britain including services to London Heathrow. The City of Derry Airport is situated 14 km from Londonderry and provides services from the northwest of Ireland to Dublin and to three United Kingdom destinations (Glasgow, London Stansted, Manchester). There are two other licensed airfields at St Angelo and Newtownards. They are used principally by flying clubs, private owners and air taxi businesses.

Shipping. Belfast is the largest port, competing with Larne for the majority of the passenger and Roll-on Roll-off services that operate to and from Northern Ireland. Passenger services are currently available to Liverpool, Stranraer, Cairnryan, Heysham and Troon. In addition, Belfast, Londonderry and Warrenpoint ports offer bulk cargo services mostly for British and European markets. They also occasionally service other international destinations direct.

Total traffic in Northern Ireland in 1999 was 22·8m. tonnes. Belfast handled 12·9m. tonnes of cargo in 1999.

SOCIAL INSTITUTIONS

Justice. The Lord Chancellor has responsibility for the administration of all courts through the Northern Ireland Court Service and for the appointment of judges and magistrates. The court structure has three tiers: the Supreme Court of Judicature of Northern Ireland (comprising the Court of Appeal, the High Court and the Crown Court), the County Courts and the Magistrates' Courts. There are 20 Petty Sessions districts which when grouped together for administration purposes form seven County Court Divisions and four Crown Court Circuits.

The County Court has general civil jurisdiction subject to an upper monetary limit. Appeals from the Magistrates' Courts lie to the County Court, or to the Court of Appeal on a point of law, while appeals from the County Court lie to the High Court or, on a point of law, to the Court of Appeal.

Police. Following legislation introduced in the House of Commons in May 2000, the Royal Ulster Constabulary has now been replaced by the Police Service of Northern Ireland (PSNI). The Police Authority for Northern Ireland has been replaced by the newly formed Northern Ireland Policing Board. The Police Service continues to undergo significant changes arising from the recommendations of the Commission into the future of policing in Northern Ireland published in 1999. In 2002 the PSNI comprised 7,220 regular officers including those student officers undergoing training, 1,786 full-time reserve officers and 955 part-time reserves. The proportion of Catholic regular officers, which was around 8% in Sept. 1999, had increased to 11·6% by Dec. 2002.

Religion. According to the 2001 census there were: Roman Catholics, 678,462; Presbyterians, 348,742; Church of Ireland, 257,788; Methodists, 59,173; other Christian, 102,221; other religions and philosophies, 5,028. There were also 233,853 persons with no religion or religion was not stated.

Education. Public education, other than university education, is presently administered by the Department of Education, the Department of Employment and Learning, and locally by five Education and Library Boards. The Department of Education is concerned with the range of education from nursery education through to secondary, youth services and for the development of community relations within and between schools. The Department of Employment and Learning is responsible for higher education, further education, student support, postgraduate awards, and the funding of teacher training.

Each Education and Library Board is the local education authority for its area. Boards were first appointed in 1973, the year of local government reorganization, and are normally reappointed every four years following the District Council elections. The membership of each Board consists of District councillors, representatives of transferors of schools, representatives of trustees of maintained schools and other persons who are interested in the service for which the Board is responsible. Boards have a duty, amongst other things, to ensure that there are sufficient schools of all kinds to meet the needs of their areas. The Boards are responsible for costs associated with capital works at controlled schools. Voluntary schools, including maintained and voluntary grammar schools, can receive grant-aid from the Department of Education toward capital works of up to 85%, or 100% if they have opted to change their management structures so that no single interest group has a majority of nominees. Most voluntary grammar schools can receive the same rate of grant on the purchase of equipment. The Boards award university and other scholarships; they provide school milk and meals; free books and assisted transport for certain pupils; they enforce school attendance; provide a curriculum advisory and support service to all schools in their area; regulate the employment of children and young people; and secure the provision of youth and recreational facilities. They are also required to develop a comprehensive and efficient library service for their area. Board expenditure is funded at 100% by the Department of Education. Integrated schools receive 100% funding for recurrent costs from the Department of Education, and, where long-term viability has been established, for capital works.

The Education Reform (NI) Order 1989 made provision for the setting up of a Council for Catholic Maintained Schools with effect from April 1990. The Council has responsibility for all maintained schools under Roman Catholic Management which are under the auspices of the diocesan authorities and of religious orders. The main objective of the Council is to promote high standards of education in the schools for which it is responsible. Its functions include providing advice on matters relating to its schools, the employment of teaching staff and administration of appointment procedures, the promotion of effective management, and the promotion and co-ordination of effective planning and rationalization of school provision in the Catholic Maintained sector. The membership of the Council consists of trustee representatives appointed by the Northern Roman Catholic Bishops, parents, teachers, and persons appointed by the Head of the Department of Education in consultation with the Bishops.

There is a Council for the Curriculum, Examinations and Assessment which conducts public examinations and oversees the selection procedure and arrangements for pupil assessment. There is also the Northern Ireland Council for Integrated Education, both of which are grant-aided by the Department of Education.

Integrated Schools. The Department of Education has a statutory duty to encourage and facilitate the development of integrated education. It does not seek to impose integration but responds to parental demand for new integrated schools where this does not involve unreasonable public expenditure. The emphasis for future development of the integrated sector has increasingly been on the transformation of existing schools to integrated status. In Dec. 2002 there were 47 grant-aided integrated schools, with a total enrolment of 14,626 pupils, about 4% of all pupils.

Irish Medium Education. Following a commitment in the Belfast Agreement, the 1998 Education Order placed a statutory duty on the Department to encourage and facilitate the development of Irish-medium education. It also provided for the funding of an Irish-medium promotional body, and funding of Irish-medium schools on the same basis as integrated schools. In Dec. 2002 there were 13 Irish-medium primary schools, one post-primary and nine units, two of which are post-primary catering for over 2,000 pupils.

Pre-school Education is provided in nursery schools or nursery classes in primary schools, reception classes and in funded places in voluntary and private settings. There were 96 nursery schools in 2001–02 with 6,093 pupils, and 7,012 nursery pupils in primary schools. A further 1,474 reception pupils were enrolled in primary schools. In addition there were 5,340 children in funded places in voluntary and private pre-school centres.

Primary Education is from 4 to 11 years. In 2001–02 there were 899 primary schools with 167,883 pupils. There were also 21 preparatory departments of grammar schools with 2,670 pupils. In 2001–02 there were 8,781 FTE primary school teachers and 160 FTE preparatory department teachers.

Secondary Education is from 11 to 18 years. In 2001–02 there were 71 grammar schools with 62,743 pupils and 164 secondary schools with 92,760 pupils. In 2001–02 there were 6,698 FTE secondary school teachers and 4,111 FTE grammar school teachers.

Further Education. There are 17 institutions of further education. In 1999–2000 there were 2,031 full-time and 2,764 part-time teachers, approximately 24,000 full-time enrolments, approximately 33,000 part-time enrolments and approximately 32,000 evening students on vocational courses. There were about 60,000 students on non-vocational (mostly evening) courses.

Special Education. The Education and Library Boards provide for children with special educational needs up to the age of 19. This provision may be made in ordinary classes in primary or secondary schools or in special units attached to those schools, or in special schools. In 1999–2000 there were 53 special schools with 4,861 pupils. This includes three hospital schools.

Universities. There are two universities: the Queen's University of Belfast (founded in 1849 as a college of the Queen's University of Ireland and reconstituted as a separate university in 1908) had 21,021 students, 1,361 full-time and 96 part-time academic staff in 1998–99. The University of Ulster, formed on 1 Oct. 1984, has campuses in Belfast, Coleraine, Jordanstown and Londonderry. In the 1998–99 academic year it had 19,479 students, 1,190 full-time and 67 part-time academic staff.

Full-Time Initial Teacher Education takes place at both universities and at two university colleges of education—Stranmillis, and St. Mary's—the latter mainly for the primary school sector, in respect of which four-year (Hons) BEd courses are available. The training of teachers for secondary schools is provided, in the main, in the education departments of the two universities, but four-year (Hons) BEd courses are also available in the colleges for intending secondary teachers of religious education, business studies and craft, design and technology. There were a total of 1,632 students (1,325 women) in training at the two university colleges and the two universities during 1999–2000.

Health. The Department of Health and Social Services is responsible for the provision of integrated health and personal social services. Four Health and Social Services Boards are responsible for assessing the requirements of their resident populations and for purchasing appropriate services. Since 1 April 1996 services have been delivered exclusively by HSS Trusts (similar to NHS Trusts in the rest of the UK) established under the Health and Personal Social Services (NI) Order 1991.

A total of 19 HSS Trusts are fully operational. Seven HSS Trusts based on acute hospitals and the regional Northern Ireland Ambulance Service are identical in structure and management to NHS Trusts in Great Britain. Of the remaining 12, five provide community-based health and personal social services and six provide

both hospital and community-based health and personal social services, reflecting the integrated nature of these services in Northern Ireland. In 2000 there were 1,066 doctors (principals), with an average of 1,662 patients each.

Welfare. The Social Security Agency's remit is now part of the Department for Social Development, and social security schemes are similar to those in Great Britain.

National Insurance. During the year ended 31 March 1999 the expenditure of the National Insurance Fund at £1,251·1m. exceeded contributions by £163·7m. The shortfall in income was made up by a Treasury Grant, investment income and a transfer from the Great Britain Fund. Total benefit expenditure was £1,177·9m., excluding £4·1m. which was subsequently recovered from damages paid to recipients of National Insurance Fund Benefits. Employers received £1m. reimbursement in respect of Statutory Sick Pay paid to their employees. £14·6m. was paid in Jobseekers' Allowance contributions. Widows Benefit amounted to £33·2m. and Retirement Pensions to £802·2m. Incapacity Benefits totalled £323·7m. Maternity Allowance of £1·1m. was paid and employers were reimbursed £17·6m. in respect of Statutory Maternity Pay. £39·3m. was given to personal pension plan providers.

Child Benefit. During the year ended 31 March 1999, £261·4m. was paid. *Income Support:* In 1998–99, £513·6m. was paid. *Family Credit:* In 1998–99, £98·0m. was paid.

CULTURE

Tourism. There were an estimated 1·68m. visits to Northern Ireland in 2001, contributing £282m. to the economy. The Northern Ireland Tourist Board is responsible for encouraging tourism. Nine Areas of Outstanding Natural Beauty and 45 Statutory Nature Reserves have been declared, and there are many country and regional parks.

ISLE OF MAN

KEY HISTORICAL EVENTS

The Isle of Man was first inhabited approximately 10,000 years ago and the Island became attached to Norway in the 9th century. In 1266 it was ceded to Scotland, but it came under English control in 1333.

The Isle of Man has been a British Crown dependency since 1765, with the British government responsible for its defence and foreign policy. Otherwise it has extensive right of self-government.

A special relationship exists between the Isle of Man and the European Union providing for free trade, and adoption by the Isle of Man of the EU's external trade policies with third countries. The Island remains free to levy its own system of taxes.

TERRITORY AND POPULATION

Area, 221 sq. miles (572 sq. km); resident population census April 2001, 76,315, giving a density of 134 per sq. km. In 2001 an estimated 73% of the population lived in urban areas. The principal towns are Douglas (population, 25,308), Onchan (adjoining Douglas; 8,706), Ramsey (7,626), Peel (3,779), Castletown (3,082). The Island is divided into six sheadings—Ayre, Garff, Glenfaba, Michael, Middle and Rushen. Garff is further subdivided into two parishes and the others each have three parishes.

SOCIAL STATISTICS

2000: births, 831; deaths, 897; marriages, 417. Annual growth rate, 1996–2000, 1·3%.

CLIMATE

Lying in the Irish Sea, the Island's climate is temperate and lacking in extremes. Thunderstorms, snow and frost are infrequent, although the Island tends to be windy. July and Aug. are the warmest months with an average daily maximum temperature of around 17·6°C (63°F).

CONSTITUTION AND GOVERNMENT

As a result of Revestment in 1765, the Isle of Man became a dependency of the British Crown. The UK government is responsible for the external relations of the Island, including its defence and international affairs, and the Island makes a financial contribution to the cost of these services. The Isle of Man has a special relationship with the European Union. It neither contributes funds to, nor receives money from, the EU. The Isle of Man is not represented in either the UK or European Parliaments.

The Island is administered in accordance with its own laws by the High Court of *Tynwald*, consisting of the President of Tynwald, the *Legislative Council* and the *House of Keys*. The Legislative Council is composed of the Lord Bishop of Sodor and Man, eight members selected by the House of Keys and the Attorney General, who has no vote. The House of Keys is an assembly of 24 members chosen by adult suffrage. The President of Tynwald is chosen by the Legislative Council and the House of Keys, sitting together as Tynwald. An open-air Tynwald ceremony is held in early July each year at St Johns. Until 1990 the Lieut.-Governor, appointed by the UK government, presided over Tynwald.

A Council of Ministers was instituted in 1990, replacing the Executive Council which had acted as an advisory body to the Lieut.-Governor. The Council of Ministers consists of the Chief Minister (elected for a five-year term) and the ministers of the nine major departments, being the Treasury; Agriculture, Fisheries and Forestry; Education; Health and Social Security; Home Affairs; Local Government and the Environment; Tourism and Leisure; Trade and Industry; and Transport.

RECENT ELECTIONS

Elections to the House of Keys were held on 22 Nov. 2001. The Manx Labour Party won 2 seats with 17·3% of the vote; the Alliance for Progressive Government 3 seats (14·6% of the vote) while non-partisans won 17 seats. The Manx Nationalist Party boycotted the elections. Turn-out was 57·6%.

CURRENT ADMINISTRATION

Lieut.-Governor: Ian Macfadyen.

President: Noel Cringle (elected April 2000).

In March 2003 the *Chief Minister* was Richard Corkill. *Finance Minister:* Alan Bell.

ECONOMY

Overview. The Isle of Man's economic policy is the pursuit of manageable and sustainable growth based on a diversified economy.

Currency. The Isle of Man government issues its own notes and coins on a par with £ sterling. Various commemorative coins have been minted. Inflation was around 1% at the end of 2001.

Budget. The Isle of Man is statutorily required to budget for a surplus of revenue over expenditure. Revenue is raised from income tax, taxes on expenditure, health and social security contributions, and fees and charges for services.

The standard rate of tax is 12% for personal income, and there is a higher rate of 18%. Companies are liable at 12% on their first £500,000 of taxable income and 28% on the balance.

There is a Customs and Excise Agreement with the UK, and rates of tax on expenditure are the same as those in the UK with very few exceptions. In addition, there is a reciprocal agreement on social security with the UK, and the rates of health and social security (National Insurance) contributions are the same as in the UK.

In 2001–02 the Isle of Man government budgeted for expenditure of £603m. and revenue of £625m.

Performance. In 1999–2000 GNP was £1,032m. and GDP was £973m. Real GDP growth in 1999–2000 was 13·7%. Just over 80% of national income is generated from services with the finance sector being the single largest contributor (41%).

Banking and Finance. The banking sector is regulated by the Financial Supervision Commission which is responsible for the licensing and supervision of banks, deposit-takers and financial intermediaries giving financial advice, and receiving client monies for investment and management. A compensation fund to protect investors was set up in 1991 under the Commission.

Agriculture. The area farmed is about 113,000 acres, being 80% of a total land area of around 141,500 acres. 66,000 acres are grassland with a further 35,000 acres for rough grazing. There are approximately 178,000 sheep, 35,000 cattle, 15,000 poultry and 6,000 pigs on the Island's 766 farms. Agriculture now contributes less than 2% of the Island's GDP.

The Channel Islands consist of Jersey, Guernsey and the following dependencies of Guernsey: Alderney, Brechou, Great Sark, Little Sark, Herm, Jethou and Lihou. They were an integral part of the Duchy of Normandy at the time of the Norman Conquest of England in 1066. Since then they have belonged to the British Crown and are not part of the UK. The islands have created their own form of self-government, with the British government at Westminster being responsible for defence and foreign policy. The Lieut.-Governors of Jersey and Guernsey, appointed by the Crown, are the personal representatives of the Sovereign as well as being the commanders of the armed forces. The legislature of Jersey is 'The States of Jersey', and that of Guernsey is 'The States of Deliberation'.

From 1940 to 1945 the islands were left undefended and were the only British territory to fall to the Germans.

TERRITORY AND POPULATION

The Channel Islands cover a total of 75 sq. miles (194 sq. km), and in 2001 had a population of approximately 150,000.

There is an appeal from the Royal Courts to the Courts of Appeal of Jersey and of Guernsey. A final appeal lies to the Privy Council in certain cases. A stipendiary magistrate in each, Jersey and Guernsey, deals with minor civil and criminal cases.

UNITED KINGDOM OVERSEAS TERRITORIES

There are 14 British Overseas Territories: Anguilla, Bermuda, British Antarctic Territory, British Indian Ocean Territory, British Virgin Islands, Cayman Islands, Falkland Islands, Gibraltar, Montserrat, Pitcairn Islands, St Helena and its Dependencies (Ascension Island and Tristan da Cunha), South Georgia and the South Sandwich Islands, the Sovereign Base Areas of Akrotiri and Dhekelia in Cyprus, and the Turks and Caicos Islands. Three (British Antarctic Territory, British Indian Ocean Territory and South Georgia and the South Sandwich Islands) have no resident populations and are administered by a commissioner instead of a governor.

Gibraltar is a peninsula bordering the south coast of Spain; the Sovereign Base Areas are in Cyprus and the remainder are islands in the Caribbean, Pacific, Indian Ocean and South Atlantic. Gibraltar and the Falkland Islands are the subjects of territorial claims by Spain and Argentina respectively.

The Overseas Territories are constitutionally not part of the United Kingdom. They have separate constitutions, and most of them have elected governments with varying degrees of responsibilities for domestic matters. The Governor, who is appointed by, and represents, HM the Queen, retains responsibility for external affairs, internal security, defence, and in most cases the public service.

At the launch of the White Paper 'Partnership for Progress and Prosperity', in March 1999, the Foreign Secretary of the time, Robin Cook, outlined four underlying principles for the relationship between Britain and the Overseas Territories: self-determination for the Territories; mutual obligations and responsibilities; freedom for the Territories to run their own affairs to the greatest degree possible; and Britain's firm commitment to help the territories develop economically and to assist them in emergencies. He also offered British citizenship, with the right of abode in the UK, to those citizens of the Overseas Territories who did not already enjoy it. On 21 May 2002 the citizenship provisions of the British Overseas Territories Act came into force. It granted British citizenship to the citizens of all Britain's Overseas Territories (except those who derived their British nationality by virtue only of a connection with the Sovereign Base Areas of Akrotiri and Dhekelia in Cyprus).

ANGUILLA

KEY HISTORICAL EVENTS

Anguilla was probably given its name by the Spaniards or the French because of its eel-like shape. It was inhabited by Arawaks for several centuries before the arrival of Europeans. Anguilla was colonized in 1650 by English settlers from neighbouring St Kitts. In 1688 the island was attacked by a party of Irishmen who then settled. Anguilla was subsequently administered as part of the Leeward Islands, and from 1825 became even more closely associated with St Kitts. In 1875 a petition sent to London requesting separate status and direct rule from Britain met with a negative response. Again in 1958 the islanders formally petitioned the Governor requesting a dissolution of the political and administrative association with St Kitts, but this too failed. From 1958 to 1962 Anguilla was part of the Federation of the West Indies.

Opposition to rule from St Kitts erupted on 30 May 1967 when St Kitts policemen were evicted from the island and Anguilla refused to recognize the authority of the State government any longer. During 1968–69 the British government maintained a 'Senior British Official' to advise the local Anguilla Council and devise some solution to the problem. In March 1969, following the ejection from the island of a high-ranking British civil servant, British security forces occupied Anguilla. A Commissioner was installed, and in 1969 Anguilla became *de facto* a separate dependency of Britain, a situation rendered *de jure* on 19 Dec. 1980 under the Anguilla Act 1980 when Anguilla formally separated from the state of St Kitts, Anguilla-Nevis. A new constitution came into effect in 1982 providing for a large measure of autonomy under the Crown.

TERRITORY AND POPULATION

Anguilla is the most northerly of the Leeward Islands, some 70 miles (112 km) to the northwest of St Kitts and 5 miles (8 km) to the north of St Martin/Sint Maarten. The territory also comprises the island of Sombrero and several other off-shore islets or cays. The total area of the territory is about 60 sq. miles (155 sq. km). *De jure* census population (2001) was 11,561; density of 74·6 per sq. km. Average annual population increase between 1992 and 2001 was 3·2%. People of African descent make up 90% of the population, mixed origins 5% and white 4%. The capital is The Valley. In 1995 an estimated 89% of the population lived in rural areas.

The official language is English.

SOCIAL STATISTICS

Births, 1999, 176; deaths, 58. In 2001 life expectancy at birth for females was 78·0 years and for males 77·9 years. Households numbered 3,788 in 2001.

CLIMATE

Tropical oceanic climate with rain throughout the year, particularly between May and Dec. Tropical storms and hurricanes may occur between July and Nov.

Generally summers are hotter than winters although there is little variation in temperatures.

CONSTITUTION AND GOVERNMENT

A set of amendments to the constitution came into effect in 1990, providing for a Deputy Governor, a Parliamentary Secretary and an Opposition Leader. The *House of Assembly* consists of a Speaker, Deputy Speaker, seven directly elected members for five-year terms, two nominated members and two *ex officio* members: the Deputy Governor and the Attorney-General. FALKLAND ISLANDS

KEY HISTORICAL EVENTS

France established a settlement in 1764 and Britain a second settlement in 1765. In 1770 Spain bought out the French and drove off the British. This action on the part of Spain brought that country and Britain to the verge of war. The Spanish restored the settlement to the British in 1771, but the settlement was withdrawn on economic grounds in 1774. In 1806 Spanish rule was overthrown in Argentina, and the Argentine claimed to succeed Spain in the French and British settlements in 1820. The British objected and reclaimed their settlement in 1832 as a Crown Colony.

On 2 April 1982 Argentine forces occupied the Falkland Islands. On 3 April the UN Security Council called, by 10 votes to 1, for Argentina's withdrawal. After a military campaign, but without a formal declaration of war, the UK regained possession on 14–15 June when Argentina surrendered.

In April 1990 Argentina's Congress declared the Falkland and other British-held South Atlantic islands part of the new Argentine province of Tierra del Fuego though the threat of hostilities has been lifted.

TERRITORY AND POPULATION

The Territory comprises numerous islands situated in the South Atlantic Ocean about 480 miles northeast of Cape Horn covering 12,200 sq. km. The main East Falkland Island, 6,760 sq. km; the West Falkland, 5,410 sq. km, including the adjacent small islands. The population at the census of 2001 was 2,379. The only town is Stanley, in East Falkland, with a 2001 population of 1,989. The population is nearly all of British descent, with 1,326 born in the Islands (2001 census figures) and 925 in the UK. In 1995, 84·1% lived in urban areas. A British garrison of about 2,000 servicemen, stationed in East Falkland in 1991, is not included in the 2001 census figures, but the 534 civilians employed there are.

The official language is English.

SOCIAL STATISTICS

In 2000 there were 27 births and 11 deaths on the islands.

CLIMATE

A cool temperate climate, much affected by strong winds, particularly in spring. Stanley, Jan. 49°F (9·4°C), July 35°F (1·7°C). Annual rainfall 24" (625 mm).

CONSTITUTION AND GOVERNMENT

A new Constitution came into force in 1997, updating the previous constitution of 1985 which incorporated a chapter protecting fundamental human rights, and in the preamble recalled the provisions on the right of self-determination contained in international covenants.

Executive power is vested in the Governor who must consult the Executive Council except on urgent or trivial matters. He must consult the Commander British Forces on matters relating to defence and internal security (except police).

There is a *Legislative Council* consisting of eight members (five from Stanley and three from Camp, elected every four years) and two *ex officio* members, the Chief Executive and Financial Secretary. Only elected members have a vote. The Commander British Forces has a right to attend and take part in its proceedings but has no vote. The Attorney General also has a similar right to take part in proceedings with the consent of the person presiding. The Governor presides over sittings. He also presides over the monthly sittings of the Executive Council which consists of three elected members (elected by and from the elected members of Legislative Council) and the Chief Executive and Financial Secretary (*ex officio*). The Commander British Forces and Attorney General have a right to attend but may not vote.

British citizenship was withdrawn by the British Nationality Act 1981, but restored after the Argentine invasion of 1982.

RECENT ELECTIONS

Elections to the Legislative Assembly were held on 22 Nov. 2001. Only non-partisans were elected.

CURRENT ADMINISTRATION

Governor: Howard Pearce.

Chief Executive: Dr Michael Blanch.

DEFENCE

Since 1982 the Islands have been defended by a 2,000-strong garrison of British servicemen. In addition there is a local volunteer defence force.

ECONOMY

The GNP of the Islands is estimated to have tripled from 1985–87 as a result of the expansion of the fishing industry. In 1998–99 the GNP was estimated at £53m.

Overview. In 2001 the Falklands Islands government published the Islands Plan, a three-year rolling programme aimed at achieving sustainable economic growth whilst preserving the natural environment and unique culture of the Falkland Islands.

Policy-making is also influenced by the Falkland Islands Development Corporation (FIDC), established in 1984. Activities in 1998–99 included assisting a chemical-free wool project and initiating surveys into deposits of calcified seaweed.

Currency. The unit of currency is the *Falkland Islands pound* (FKP) of 100 *pence*, at parity with £1 sterling.

Budget. Revenue and expenditure (in £ sterling) for fiscal year ending 30 June 2000 was: revenue, 52·3m.; expenditure, 40·4m.

Banking and Finance. The only bank is Standard Chartered Bank, which had assets of £31m. in 1997. Credit cards are, as yet, generally not accepted on the island.

ENERGY AND NATURAL RESOURCES

Electricity. Electricity production in 1998 totalled 12m. kWh.

Oil and Gas. In 1996 the Falkland Islands government awarded production licences to Shell, Amerada Hess, Desire Petroleum and International Petroleum Corporation (Sodra), allowing them to begin oil exploration. The licensed areas are situated 150 km north of the Islands over the North Falkland Basin. Six exploration wells were drilled in 1998 and analysis of the findings suggested that in excess of 60bn. bbls. of oil have been generated in the basin.

Agriculture. The economy was formerly based solely on agriculture, principally sheep farming. Following a programme of sub-division, much of the land is divided into family-size units. There were 100 farms in 1997, averaging 33,600 acres and 8,200 sheep. During 1991 the Falklands Islands Co. sold its agricultural holdings to the Falkland Island government. Less than 5% of the total land area is owned outside the islands. Wool is the principal product; 1,870,000 tonnes worth £2,292,000 was exported to the UK in 1998.

Livestock: in April 2000 there were over 700,000 sheep. 1996: cattle, 4,000; horses, 1,000.

Fisheries. Since the establishment of a 150-mile interim conservation and management zone around the Islands in 1986 and the consequent introduction, on 1 Feb. 1987, of a licensing regime for vessels fishing within the zone, income from the associated fishing activities is now the largest source of revenue. Licences raised £25m. in 1992 but this figure had fallen to £20m. by 1998–99. In 2000 the fish catch (1,000 tonnes) was: illex, 190; loligo, 64; blue whiting, 23; hoki, 20; hake, 3; others, 19. The growth in the annual fish catch since the mid 1980s has been one of the fastest in the world.

On 26 Dec. 1990 the Falklands outer conservation zone was introduced which extends beyond the 150-mile zone out to 200 miles from baselines. In Nov. 1992 commercial fishing in the outer zone was banned, the zone was reopened to fishing in 1994. A UK-Argentine South Atlantic Fisheries Commission was set up in 1990; it meets at least twice a year. In 2001 there were 27 registered fishing vessels.

INDUSTRY

Labour. In 2001 there were 2,025 people employed full-time, including 358 in construction and 326 in agriculture, hunting and fishing. The growth of the fishing industry has ensured practically zero unemployment.

EXTERNAL ECONOMIC RELATIONS

Around 85% of trade is with the UK, the rest with Latin America, mainly Chile. In 1998 imports totalled £23·5m.; exports (mainly wool), £3·5m. (1995).

COMMUNICATIONS

Roads. There are over 50 km of surfaced roads and another 400 km of unsurfaced road. This includes the 80 km between Stanley and Mount Pleasant Airport. Other settlements outside Stanley are linked by tracks. There were about 1,100 private cars in 1996.

Civil Aviation. Air communication is currently via Ascension Island. An airport, completed in 1986, is sited at Mount Pleasant on East Falkland. RAF Tristar aircraft operate a twice-weekly service between the Falklands and the UK. Internal air links are provided by the government-operated air service, which carries passengers, mail, freight and medical patients between the settlements and Stanley on non-scheduled flights in Islander aircraft. A Chilean airline, LanChile, runs a weekly service to Punta Arenas. Aircraft movements at Stanley Airport in 1998 amounted to 4,264 with 7,715 passengers moving through the airport.

Telecommunications. Number of telephone main lines (March 1998) 1,856—one of the highest penetration rates in the world. International direct dialling is available, as are international telex and facsimile links. In 1996, 257 households had a PC and 213 had a fax machine.

Postal Services. The Post Office and the Philatelic Bureau work in tandem. In 1998 there were two post offices and 740 post boxes. Airmail is generally received and dispatched twice weekly and surface post is airlifted out about once every two weeks. Surface mail is received approximately once every three weeks.

In Stanley in 2002 there were 30 pre-school pupils, 190 primary pupils (18 teachers) and 160 pupils in the 11–16 age range (18 teachers). In rural areas students attend small settlement schools or are visited by one of seven travelling teachers. Lessons may also be carried out over the radio or telephone. All teachers are trained in the United Kingdom. Students achieving the required number of GCSE passes at Grades A–C are funded for A Level/GNVQ courses on the British mainland. Estimated recurrent expenditure on education and training from own funds in 1994–95, £2,041,440.

Health. The Government Medical Department is responsible for all medical services to civilians. Primary and secondary health care facilities are based at the King Edward VII Memorial Hospital, the only hospital on the islands. It has 28 beds. It is staffed by five doctors, six sisters (including four midwives), eight staff nurses, a health visitor, counsellor, physiotherapist, social worker and an auxiliary nursing staff. The Royal Army Medical Corps staff the surgical facilities. Regular visits are received from specialists based in the UK. Most services are free to residents and British citizens, though some charges are made. There are two dentists on the island. Estimated expenditure (1994–95), £2,092,490.

Welfare. In 1998 total amount spent on old age pension payments was £504,075. Total amount spent on family allowance payments was £336,365.

CULTURE

Broadcasting. The Falkland Islands Broadcasting Station (FIBS), in conjunction with British Forces Broadcasting Service (BFBS), broadcasts 24 hours a day on FM and MW. Some BBC World Service programmes are also available.

BFBS also provides a single channel TV service (UKPAL) to Stanley, Mount Pleasant and most outlying camp settlements and a cable TV service is also in operation. In 1997 there were 1,000 TV and 1,000 radio sets.

Tourism. In the 1999–2000 season there were estimated to be 30,000 cruise ship visitors, representing a 400% increase over three seasons. There are tourist lodges at Port Howard, San Carlos, Sea Lion Island and Pebble Island. Stanley has two hotels.

GIBRALTAR

KEY HISTORICAL EVENTS

The Rock of Gibraltar was settled by Moors in 711. In 1462 it was taken by the Spaniards, from Granada. It was captured by Admiral Sir George Rooke on 24 July 1704, and ceded to Great Britain by the Treaty of Utrecht, 1713. The cession was confirmed by the treaties of Paris (1763) and Versailles (1783). In 1830 Gibraltar became a British crown colony.

On 10 Sept. 1967 a UN resolution on the decolonization of Gibraltar led to a referendum to ascertain whether the people of Gibraltar wished to retain their link with the UK. Out of an electorate of 12,762, an overwhelming majority voted to retain the British connection.

The border was closed by Spain in 1969, opened to pedestrians in 1982 and fully opened in 1985. In 1973 Gibraltar joined the European Community as a dependent territory of the United Kingdom. In 2001 talks were held between Britain and Spain over the colony's sovereignty. In a joint statement, the British and Spanish foreign ministers said they would work towards a comprehensive agreement by the summer of 2002. Gibraltar's government held an unofficial referendum on sharing sovereignty with Spain on 7 Nov. 2002 in which 98·97% of votes cast were against joint sovereignty. While Britain sees the principle of shared sovereignty as the definitive solution, Spain maintains its historic claim to outright control.

TERRITORY AND POPULATION

Gibraltar is situated in latitude 36°07' N and longitude 05°21' W. Area, 2½ sq. miles (6·5 sq. km) including port and harbour. Highest point is 426 metres. Total population, (2000), 27,033 (of whom 21,121 were British Gibraltarian, 3,696 Other British and 2,216 Non-British); density, 4,159 per sq. km. The population is mostly of Genoese, Portuguese and Maltese and Spanish descent.

The official language is English. Spanish, Italian and Portuguese are also spoken.

SOCIAL STATISTICS

CLIMATE

The climate is warm temperate, with westerly winds in winter bringing rain. Summers are pleasantly warm and rainfall is low. Mean maximum temperatures: Jan. 16°C, July 28°C. Annual rainfall 722 mm.

CONSTITUTION AND GOVERNMENT

A new Constitution was introduced in 1969. The Legislative and City Councils were merged to produce an enlarged legislature known as the *Gibraltar House of Assembly*. Executive authority is exercised by the Governor, who is also Commander-in-Chief. The Governor retains direct responsibility for matters relating to defence, external affairs and internal security. He has the power to intervene in the conduct of domestic affairs in support of this responsibility and has certain powers of intervention in the interests of maintaining financial and economic

stability. However, he is normally required to act in accordance with the advice of the Gibraltar Council, which consists of four *ex officio* members (the Deputy Governor, the Deputy Fortress Commander, the Attorney-General and the Financial and Development Secretary) together with five elected members of the House of Assembly appointed by the Governor after consultation with the Chief Minister. Matters of primarily domestic concern are devolved to elected Ministers. There is a Council of Ministers presided over by the Chief Minister.

The House of Assembly consists of a Speaker appointed by the Governor, 15 elected and two *ex officio* members (the Attorney-General and the Financial and Development Secretary). No more than eight of the elected seats may go to the winning party at elections.

Gibraltarians have full UK citizenship.

A Mayor of Gibraltar is elected by the elected members of the Assembly.

RECENT ELECTIONS

At the elections of 10 Feb. 2000 the electorate was 18,600 and turn-out was 83%. The ruling Gibraltar Social Democratic Party (GSD) gained eight seats with 58·0% of votes cast. The opposition alliance of the Gibraltar Socialist Labour Party and the Liberal Party gained seven with 41·0%. Independent Liberal Forum and Pro-Settlement each received 0·5%. ECONOMY

Overview. The economy is primarily dependent on service industries and port facilities, with income derived from tourism and, perhaps most importantly in terms of growth, the provision of financial services.

Currency. The legal tender currency is UK sterling. Also legal tender are Government of Gibraltar Currency notes and coins for the *Gibraltar pound* (GIP) of 100 *pence*, at parity with the UK £1 sterling. The total of Government of Gibraltar notes in circulation at 31 March 1999 was £12·6m. The annual rate of inflation was 0·8% in 1999.

Budget. Departmental revenue credited to the Consolidated Fund for the year ending 31 March 2000 totalled £140·6m. whilst expenditure amounted to £104·9m. Consolidated Fund charges totalled £21·5m. of which £6·6m. were public debt charges. The main sources of Consolidated Fund revenues were Income Tax (£49·6m.), import duties (£27·6m.) and General Rates (£11·2m.). Main items of expenditure: education, youth culture and consumer affairs (£15·7m.); environment and health (£13·6m.); electricity (£10·5m.); tourism and transport (£6·9m.); police (£6·8m.).

Banking and Finance. In Dec. 2001 there were 20 banks and 2 building societies. The financial sector employs 12% of the working population. In 1989 the Financial Services Commission was established to regulate financial activities. A number of Spanish banks have established offices in Gibraltar, encouraging the territory's growth as an off-shore centre, as has the absence of taxes for non-residents.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 33,000 kW in 1993. Generation in 2001 amounted to 126m. kWh.

Oil and Gas. Gibraltar is dependent on oil and butane gas imports.

Water. There are no permanent natural water supplies in Gibraltar. The main sources of water supply are the distillation plants which purify sea water.

Minerals. There are no natural mineral resources for this sector and there is total dependence on imports.

Agriculture. Gibraltar lacks agricultural land and natural resources; the territory is dependent on imports of foodstuffs and fuels.

INDUSTRY

The industrial sector (including manufacturing, construction and power) employed around 17% of the working population in 1999.

Labour. The total insured labour force at Oct. 1998 was 12,774. EXTERNAL ECONOMIC RELATIONS

Gibraltar has a special status within the EU which exempts it from the latter's fiscal policy.

Britain provided 37% of imports in 2001 and is the largest source. Other major trade partners include the Netherlands, Spain and Japan. Foodstuffs accounted for 10% of total imports in 2001 (excluding petroleum products). Value of non-fuel imports, 1995, £276·2m. Mineral fuels comprised about 32% of the value of total imports in 1998. Exports are mainly re-exports of petroleum and petroleum products supplied to shipping, and include manufactured goods, wines, spirits, malt and tobacco. Gibraltar depends largely on tourism, offshore banking and other financial sector activity, the entrepôt trade and the provision of supplies to visiting ships. Exports of local produce are negligible. In 2001 Gibraltar recorded a visible trade deficit of £218·8m. (excluding petroleum products).

COMMUNICATIONS

Roads. There are 56 km of roads including 6·8 km of pedestrian way. In 2001 there were 25,717 private vehicles, 8,873 motorcycles, 15 buses, 2,000 commercial vehicles and 199 omnibuses including taxis.

The number of telephone stations (2001) was 29,352. The number of exchange lines stood at 24,512. International direct dialling is available to over 150 countries via the Gibraltar Telecommunications Ltd (Gibtel) Earth Satellite Station and other international circuits. Gibtel began operating a mobile system in 1994. By the end of 2001 there were 9,797 mobile phone customers of whom 5,916 were prepaid. During 2001 GNC's subsidiary company, GNC Networks Limited, continued to develop and expand Internet services and by the end of the year 2,953 customers had been connected.

MONTSERRAT

KEY HISTORICAL EVENTS
Montserrat was discovered by Columbus in 1493 and colonized by Britain in 1632, who brought Irish settlers to the island. Montserrat formed part of the federal colony of the Leeward Islands from 1871 until 1958, when it became a separate colony following the dissolution of the Federation.

On 18 July 1995 the Soufriere Hills volcano erupted for the first time in recorded history, which led to over half the inhabitants being evacuated to the north of the island, and the relocation of the chief town, Plymouth. Another major eruption on 25 June 1997 caused a number of deaths and led to further evacuation.

TERRITORY AND POPULATION
Montserrat is situated in the Caribbean Sea, 43 km southwest of Antigua. The area is 39·5 sq. miles (102 sq. km). Census population, 1991, 10,639; estimate, 2002, 4,500. What was previously the capital, Plymouth, is now deserted as a result of the continuing activity of the Soufriere Hills volcano. The safe area is in the north of the island.

The official language is English.

CLIMATE
A tropical climate with an average annual rainfall of 60" (1,500 mm) the wettest months being Sept.–Dec., with a hurricane season June–Nov. Plymouth, Jan. 76°F (24·4°C), July 81°F (27·2°C).

CONSTITUTION AND GOVERNMENT

Montserrat is a British Overseas Territory. The Constitution dates from the 1989 Montserrat Constitutional Order. The head of state is Queen Elizabeth II, represented by a *Governor* who heads an Executive Council, comprising also the Chief Minister, the Financial Secretary, the Attorney-General and three other ministers. The *Legislative Council* consists of seven elected members, two civil service officials (the Attorney-General and Financial Secretary) and two nominated members; it sits for five-year terms.

RECENT ELECTIONS

In elections to the Legislative Council on 2 April 2001 the New People's Liberation Movement won 7 of the 9 seats against 2 for the National Progressive Party.

CURRENT ADMINISTRATION

Governor: Tony Longrigg (since 11 May 2001).

Chief Minister: John Osborne (since 5 April 2001, having previously been in office from 1978 to 1991).

INTERNATIONAL RELATIONS

Montserrat is a member of CARICOM and the OECS.

ECONOMY

Currency. Montserrat's currency is the *Eastern Caribbean dollar* (*see* ANTIGUA AND BARBUDA: Currency).

Budget. In 1998 the estimated expenditure was EC$60·6m. compared with actual expenditure of EC$63·5m. in 1997, a reduction of 5%.

Performance. Real GDP growth was –2·9% in 1995 and 0·8% in 1994.

Banking and Finance. The East Caribbean Central Bank based in St Kitts and Nevis functions as a central bank. The *Governor* is Sir Dwight Venner. In 1996 there were 3 commercial and 21 offshore banks. Responsibility for overseeing offshore banking rests with the Governor. In late 1998 there were two commercial banks on the island.

Weights and Measures. Both metric and imperial weights and measures are in use.

ENERGY AND NATURAL RESOURCES

Electricity. Production (1998) 10m. kWh.

Agriculture. 3,700 ha are normally suitable for agriculture, with about half in use, but only 1,000 ha were available in 1996 because of the volcanic crisis. In 1998 there were 2,000 ha of arable and permanent crop land. Potatoes, tomatoes, onions, mangoes and limes were produced in recent times. Meat production began in 1994 and the island soon became self-sufficient in chicken, mutton and beef.

Livestock (1996); cattle, 10,000; pigs, 1,000; sheep, 5,000; goats, 7,000.

Forestry. The area under forests in 1995 was 3,000 ha, or 30% of the total land area.

Fisheries. The total catch in 1999 was estimated at 50 tonnes.

INDUSTRY

Manufacturing has in recent years contributed about 6% to GDP and accounted for 10% of employment, but has been responsible for about 80% of exports. It has been limited to rice milling and the production of light consumer goods such as electronic components, light fittings, plastic bags and leather goods. The volcanic activity has put a halt to the milling of rice in the exclusion zone and curtailed the production of light consumer goods.

Trade Unions. There is one trade union, the Montserrat Allied Workers Union (MAWU).

EXTERNAL ECONOMIC RELATIONS

Imports and Exports. Imports in 1995 totalled US$80m.; exports, US$5m. The USA was the main trading partner.

COMMUNICATIONS

Roads. In 1995 there were 205 km of paved roads, 25 km of unsurfaced roads and 50 km of tracks. In 1995 there were 2,700 cars and 400 commercial vehicles registered. These figures changed as a result of the volcanic eruptions of 1995 and 1997 but since then the government, through the Ministry of Communications and Works, has been focusing its road developments in the north of the island, and a number of road work projects are under way.

Civil Aviation. At the W. H. Bramble airport LIAT used to provide services to Antigua with onward connections to the rest of the eastern Caribbean, but it was closed in June 1997 as volcanic activity increased.

Shipping. Plymouth is the port of entry, but alternative anchorage was provided at Old Bay Road during the volcanic crisis.

Telecommunications. Number of telephone main lines, 1997, 3,800. With the migration of people to the north and overseas, and the subsequent destruction of the southern part of the island, the number of telephones has since shrunk to 2,100. There were 300 mobile phone subscribers in 1997.

SOCIAL INSTITUTIONS

Justice. Law is based on UK common law as exercised by the Eastern Caribbean Supreme Court. Final appeal lies to the UK Privy Council. Law is administered by the West Indies Associated States Court, a Court of Summary Jurisdiction and Magistrate's Courts.

Religion. In 1997, 25% of the population were Anglican, 20% Methodist, 15% Pentecostal, 10% Roman Catholic and 10% Adventist.

Education. In 1996–97 there were 11 primary schools (only four open), a comprehensive secondary school with three campuses, and a technical college. Schools are run by the government, the churches and the private sector. There is a medical school, the American University of the Caribbean.

Health. In 1996 there were 4 medical officers, 1 surgeon, 1 dentist and 1 hospital with 69 beds.

CULTURE

Broadcasting. There is a government-owned radio station (ZJB) and two commercial stations (Radio Antilles and GEM Radio). There is a commercial cable TV company (colour by NTSC).

Press. In 1996 there was one weekly newspaper.

Tourism. Tourism at one time contributed about 30% of GDP; earnings in 1993 were EC$40m. There were 36,077 visitors including 11,636 cruise ship arrivals in 1994. However, after the volcanic eruptions the tourist industry declined dramatically, although there were still some 6,000 visitors in 1998.

The first landing and exploration was undertaken by Captain James Cook, who formally took possession in the name of George III on 17 Jan. 1775. British sealers arrived in 1788 and American sealers in 1791. Sealing reached its peak in 1800. A German team was the first to carry out scientific studies there in 1882–83. Whaling began in 1904 and ceased in 1966, and the civil administration was withdrawn. Argentine forces invaded South Georgia on 3 April 1982. A British naval task force recovered the Island on 25 April 1982.

SOVEREIGN BASE AREAS OF AKROTIRI AND DHEKELIA IN CYPRUS

KEY HISTORICAL EVENTS

The Sovereign Base Areas (SBAs) are those parts of the island of Cyprus that stayed under British jurisdiction and remained British sovereign territory when the 1960 Treaty of Establishment created the independent Republic of Cyprus. The Akrotiri facility formed a strategic part of the Westís nuclear capacity during the Cold War. The SBAs were used for the deployment of troops in the Gulf War in 1991. Military intelligence is now the key role of the SBAs. The construction of massive antennae at the RAF communications base at Akrotiri sparked violent riots in 2001 and 2002,

led by a Greek Cypriot MP. In Feb. 2003 the British Government offered to surrender approximately half the area of the SBAs as an incentive for a settlement between the Greek and Turkish administrations in Cyprus.

TERRITORY AND POPULATION

The Sovereign Base Areas (SBAs), with a total land area of 254 sq. km (98 sq. miles), comprise the Western SBA (123 sq. km), including Episkopi Garrison and RAF Akrotiri (opened 1956), and the Eastern SBA (131 sq. km), including Dhekelia Garrison. The SBAs cover 3% of the land area of the island of Cyprus. There are approximately 3,000 military personnel and approximately 5,000 civilians. The British Government has declared that it will not develop the SBAs for other than military purposes. Citizens and residents of the Republic of Cyprus are guaranteed freedom of access and communications to and through the SBAs.

The SBAs are administered as military bases reporting to the Ministry of Defence in London. The Administrator is the Commander, British Forces Cyprus. The joint force headquarters are at Episkopi. Greek and English are spoken.

CURRENT ADMINISTRATION

Administrator: Air Vice-Marshall Bill Rimmer (appointed Sept. 2000).

Only eight are inhabited: Grand Caicos, the largest, is 48 km long by 3 to 5 km broad; Grand Turk, the capital and main political and administrative centre, is 11 km long by 2 km broad. Population, 1990 census, 12,350; Grand Turk, 3,761; Providenciales, 5,586; South Caicos, 1,220; Middle Caicos, 275; North Caicos, 1,305; Salt Cay, 213. The estimated population for 2000 was 19,350. An estimated 56·4% of the population were rural in 1995.

KEY HISTORICAL EVENTS

The earliest inhabitants of the north American continent can be traced back to Palaeolithic times but it was not until the twelfth century that permanent settlements were created, particularly in the east where rich opportunities for cultivation and fishing supported major fortified towns. The first Europeans to make their presence felt were Spaniards who based themselves in Florida before venturing north and west. Santa Fe in New Mexico was founded in 1610. But by the mid-sixteenth century there was competition from the French centred on Quebec who colonized along the St Lawrence River.

Elizabethan adventurers were eager to exploit the New World but it was not until 1607 that a British colony was established. This was at Jamestown in what is now southern Virginia. After a perilous start when disease and malnutrition carried off most of the settlers, Virginia's population grew rapidly to meet the European demand for tobacco. Maryland, originally a refuge for persecuted Catholics, also thrived on the tobacco trade. To make up for the shortage of labour, slaves were imported from Africa.

In 1620 a hundred pilgrims landed at Plymouth Rock to found a Puritan enclave which became the colony of Massachusetts. Other settlements soon followed, accommodating a bewildering variety of Christian radicals who had fled from persecution. Not all were tolerant of beliefs that differed from their own. Pennsylvania, the colony named after the Quaker William Penn, was exceptional in offering freedom of worship to 'all persons who confess and acknowledge the one almighty and eternal God'. In 1664 the British took control of neighbouring Dutch colonies. New Amsterdam became New York. Almost all of the eastern seaboard was now claimed by British settlers who were also venturing inland.

Their main European rivals were the French who claimed a vast area around and to the southwest of the Great Lakes. With Indian tribes allied to both sides, there was heavy fighting in 1744 and 1748. But within a decade British forces had captured most of the French strongholds. After the Treaty of Paris in 1763, Britain commanded the whole of North America east of the Mississippi while Spain, having surrendered Florida, gained Louisiana from France. For a brief period colonization was restricted to the area east of the Appalachians, the rest of the territory being reserved for Indian tribes. This soon became a point of issue between the settlers who were intent on expansion and their masters in London who wanted a settled, self-supporting community benefiting British trade. Having disposed of the French threat, the colonists felt confident enough to defy orders that ignored their interests. In particular, they objected to the Navigation Acts which required goods to be carried in British vessels and to various taxes imposed without consultation. 'No taxation without representation' became a rallying cry for disaffected colonists. The centre of opposition was Boston, scene of the infamous 'tea party' when, in 1763, militants destroyed a cargo of East India tea. In 1775 the arrest of rebel ringleaders served only to provoke the 13 colonies to co-operate in further acts of rebellion, including the setting up of a *de facto* government which appointed George Washington commander of American forces.

The War of Independence was by no means a clear-cut affair. British forces, never more than 50,000 strong, were supported by a powerful body of colonists who remained loyal to the Crown. The war lasted for seven years from 1776 with both sides often getting close to a conclusive victory. The decisive moment came at last with the surrender of General Burgoyne and his 8,000 troops in upper New York state in Oct. 1777, a defeat that persuaded a cautious France to enter the war. Under the peace terms secured in 1783 Britain kept Canada leaving the new United States

with territory stretching from the Atlantic to the Mississippi. A constitution based on democratic principles buttressed by inalienable rights including the ownership of property came into force in 1789. It allowed for a federal government headed by a president and executive, a legislature with a House of Representatives and a Senate, and a judiciary with ultimate authority on constitutional matters exercised by a Supreme Court. The first president was George Washington, who was elected in 1789. In 1800 Washington, D.C. was declared the national capital.

Hostilities with Britain resumed in 1812 amidst accusations that Britain was using the excuse of the Napoleonic wars to harass American shipping and to encourage Indian resistance to expansion into the mid west. Most of the fighting took place on the Canadian border where an attempted invasion was decisively repulsed. But Louisiana, having reverted to French rule and subsequently sold to the US, was secured for the Union. With the exception of Louisiana, other American territories that had once been part of the Spanish empire fell to Mexico. But not for long. In 1836 Texas broke away from Mexico, surviving as an independent republic until 1845 when it was annexed by the US. This provoked war with Mexico which ended in 1848 with the US taking over what are now the states of California, Arizona, Colorado, Utah, Nevada and New Mexico. Any temptation there might have been for European involvement in the struggle was removed by the Monroe Doctrine, a declaration by President Monroe that interference from the Old World in matters concerning the western hemisphere would not be tolerated. It was a measure of the growing military and economic self confidence of the US that such a warning, delivered in 1823, was taken seriously.

The westward expansion began soon after independence but accelerated with the destruction of Indian power and the removal of the native population to designated reservations. In 1846 a long-running dispute with Britain confirming US title to Oregon acted as a spur to migration as did the Californian gold rush of 1848. By the 1850s the railway network was bringing people and economic prosperity to the mid west. Population quadrupled between 1815 to 1860, from 8m. to almost 31m. In 1862 the Homestead Act allocated 160 acres to anyone who was ready to farm it. By 1890 the west was won.

The transition from a rural society to an industrial power of world importance created tensions, not least between the slave-owning southern states and the rest of the Union which favoured the abolition of slavery. Economic as well as humanitarian factors were in play since the North resented the advantage cheap labour gave to the South. The opposing view held that the South, by now the world's largest cotton producer, depended on slavery for its commercial survival. Mutual antagonism came to a head with the secession of the southern states from the Union in 1860–61 and their formation as a Confederacy. Despite sporadic outbreaks of violence, civil war was not in prospect until Confederate troops fired on the US flag at Fort Sumter. Lincoln ordered a blockade of the South. The recruitment of rival armies followed within weeks. The war turned out to be much bloodier than anyone had expected. More American lives were lost in the Civil War than in the two world wars combined. The military balance was maintained until 1863 when the North secured a crushing victory at the Battle of Gettysburg. However, the war continued until April 1865 when Robert E. Lee surrendered to Ulysses S. Grant at Appomattox Courthouse in Virginia. A few days later Lincoln was assassinated, a loss that the southern states had subsequent cause to regret. Contrary to Lincoln's hopes, a generous settlement was now out of the question. Instead of a gradual transition to a new society, the South was rushed into a social revolution. This in turn led to terrorist violence and acts of vengeance against freed slaves. From this carnage emerged the notorious Ku Klux Klan as the standard bearer of lynch law. While the 13th amendment prohibited slavery, political freedom was denied to the black community by state imposed literacy tests and discriminatory property taxes.

That America had interests beyond its own borders was made evident by the Spanish war of 1898 which resulted in the US becoming the dominant power in the Caribbean though the effort to take over in the Philippines came up against Filipino resistance and led to a heavy death toll.

By 1900 the US rivalled Britain and Germany as the world's dominant power. With vast natural resources and a manufacturing capacity that secured 11% of world trade, it was clear that Europe was soon to lose its grip on world affairs. Ironically,

though, it was Europe as the chief supplier of labour that gave the US the impetus it needed to fulfil its promise. Between 1881 and 1920, 23m. immigrants entered the US, the largest population movement ever recorded.

Given the nationalistic mix that constituted early twentieth century America it is scarcely surprising that popular opinion was against involvement in the First World War. But events, including German U-boat harassment of American shipping, soon proved that isolationism was not an option. It was not until 1917 that America joined the hostilities but the resurgence of energy created by the arrival of the American Expeditionary Force was critical to the Allied breakthrough.

Post-war America, relatively unscathed by the European conflict, was unquestionably the most powerful nation and as such was able to dictate terms at the Versailles peace conference. But President Wilson's much vaunted 'fourteen points' which set out a plan for collective security policed by a League of Nations failed to win support in the one country that was critical to its success. The Treaty was rejected by the Senate in 1920 and America retreated once again into isolationism.

A resumption of economic growth was accompanied by a struggle to impose a common set of values, chiefly white, Protestant, on an incredibly diverse population. To outsiders the most extraordinary experiment in social engineering was Prohibition, a federal imposed attempt to outlaw all alcoholic drinks. Whatever gain there was to the health of the nation, the chief beneficiaries were the bosses of organized crime.

Dreams of everlasting prosperity were shattered by the 1929 Stock Market Crash. A succession of bank failures was followed by widespread bankruptcies and mass unemployment which sent the economy into a further downward spin. The beginning of the end to the agony came with the election to the presidency of Franklin D. Roosevelt, who pushed through Congress a series of radical measures known collectively as the New Deal aimed at revitalizing the nation. Cheap loans to restart factories and farms and huge investment in public works proved to be the key to recovery though unemployment remained high until production was boosted by the demands of another world war.

Roosevelt was well aware of the dangers to the US if the fascist dictators were allowed to triumph, but as in 1914, there was formidable opposition to direct involvement. Roosevelt compromised by supplying Britain with much needed armaments on favourable terms. But it was events in Asia rather than in Europe that eventually persuaded America of the need for direct action. Opposition to Japanese expansion into China and South East Asia, including an oil embargo and a freezing of Japanese assets in the US, brought a savage retaliation at Pearl Harbour, when much of the US fleet was destroyed. America declared war on Japan while Germany declared war on America. The US military effort focused initially on the Pacific but after 1942 American forces were also committed to the campaign in north Africa and Europe. With the D-Day landings in June 1944, US troops led the attack on Germany before forcing a Japanese surrender by sacrificing Hiroshima and Nagasaki to the atomic bomb.

This time, in the aftermath of war, the US needed no encouragement to assume the leadership of the free world. The threat of a Soviet takeover in Europe was countered by the formation of NATO and the provision of dollar aid under the Marshall Plan to kick start European economic recovery. The risk of a return to isolationism receded still further when China fell to communism. In 1950 American troops went to the aid of South Korea when it was invaded by the communist North. Though technically under the aegis of the UN, the campaign was an almost entirely American affair led by General Douglas MacArthur. When Chinese forces became involved, MacArthur spoke openly of extending the war to the Chinese mainland, a threat countered strongly by President Truman who forced MacArthur's resignation to establish undisputed political control over the military. A ceasefire was negotiated after Dwight Eisenhower was elected President in 1953 and the US took the lead in setting up the South East Asia Treaty Organization on the same lines as NATO.

At home, civil rights were high on the political agenda. The thuggish tactics of Senator Joe McCarthy and the House Committee on Un-American Activities brought into focus basic democratic freedoms guaranteed by the Constitution while

growing protests against racial discrimination led to legislation to enforce equality of opportunity in education and employment. The civil rights movement peaked in the early sixties when the imposition of federal law in the South led to acts of violence against liberal protesters. Social tensions were exacerbated by the Cold War confrontation. On acceding to the presidency in 1961, one of the first challenges President Kennedy had to face was the placing of Soviet missiles in Cuba. For a time, the prospect of world war was only too real. But an agreement between the two nations allowed for a withdrawal of the missiles on the condition of a US promise not to invade Cuba. Another optimistic sign was the Nuclear Test Ban Treaty of 1963 which, for the first time, put a brake on the spread of nuclear weapons. Less hopeful was the acceleration of the conflict in Vietnam. Following President Kennedy's assassination in 1963, US military involvement in Vietnam was intensified but opposition at home led to withdrawal of forces in 1973.

In 1974 President Nixon was forced to resign amidst charges of corruption known collectively as Watergate. A revival of Republican fortunes came with the election of Ronald Reagan in the 1980 presidential race. In international affairs, Reagan was resolutely anti-Communist, raising fears of confrontation with the Soviet Union over his Strategic Defense Initiative, otherwise known as his 'Star Wars' system of defence. However, relations between the two superpowers improved in the mid-eighties with successful negotiations on nuclear arms limitations. The collapse of the Soviet empire in 1990 extended US economic aid to Eastern Europe. The Democrats regained control of the White House with the election of Bill Clinton, who combined economic recovery at home with an active foreign policy which underlined America's role as the only superpower.

On 11 Sept. 2001 the heart of New York City was devastated after hijackers flew two jet airliners into the World Trade Center. A plane also crashed into the Pentagon, in Washington, D.C., and a fourth hijacked plane crashed near the town of Shanksville, Pennsylvania. The death toll was 2,800, with 67 countries reporting dead or missing citizens. Osama bin Laden, a Saudi dissident believed to be living in Afghanistan at the invitation of the ruling Taliban, immediately became the chief suspect and military action against Afghanistan followed, with air strikes beginning on 7 Oct. 2001.

On 20 March 2003 US forces, supported by the UK, launched attacks on Iraq, and initiated a war aimed at 'liberating Iraq'. On 9 April 2003 American forces took control of central Baghdad, effectively bringing an end to Saddam Hussein's rule.

Among 10-year age groups the 35–44 age group contained most people according to the 2000 census, with a total of 45,148,527 (16·0% of the population).

At the 2000 census there were 105,480,101 households, up from 91,947,410 in 1990.

The following table includes population statistics, the year in which each of the original 13 states (Connecticut, Delaware, Georgia, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Virginia) ratified the constitution, and the year when each of the other states was admitted into the Union. Traditional abbreviations for the names of the states are shown in brackets with postal codes for use in addresses.

The USA is divided into four geographic regions comprised of nine divisions. These are, with their 2000 census populations: Northeast (comprised of the New England and Middle Atlantic divisions), 53,594,378; Midwest (East North Central, West North Central), 64,392,776; South (South Atlantic, East South Central, West South Central), 100,236,820; West (Mountain, Pacific), 63,197,932.

[1]Arlington CDP (census designated place) is not incorporated as a city.

Washington, D.C.: The capital of the United States, the city is located at the head of the Potomac River, and was carved from Virginia and Maryland in 1790 to form the permanent seat of government for the new nation. The city is home to many of the most important monuments, artifacts and museums in the country. The larger metropolitan city, however, suffers from complex social and economic problems.

New York: Located on the Eastern Atlantic coast of the United States at the mouth of the Hudson River, it became the focus for the first European immigrants in the 17th century. Greater New York was formed in 1898 by the amalgamation of the five boroughs—The Bronx, Brooklyn, Manhattan, Queens and Staten Island. Affectionately known as the ‘Big Apple’ it covers an area of 301 sq. miles. It was the world’s most populous city until overtaken by Tokyo in the late 1960s. New York is one of the world’s leading financial centres and is the headquarters of the United Nations.

Los Angeles: Sprawling across some 464 sq. miles (1,202 sq. km), Los Angeles is the second most populous city and metropolitan area in the United States after New York. Developing from an 18th century missionary settlement, the city was opened up by the railroads at the end of the 19th century. The city has become a centre for the US film industry and has the busiest harbour on the West Coast. It is one of the most ethnically diverse and divided cities in the US.

Chicago: Chicago is the third most populous city and metropolitan area in the United States. Owing to its strategic position at the lakeside interior of a rapidly expanding country, Chicago developed in the early 19th century to become a nexus for goods transport via canals and railways. Industry followed and Chicago emerged as the major city of the Midwest. The city is famous for its prohibition-period gangster history and its skyline of skyscrapers including the Sears Tower, the second tallest building in the world.

Immigration and naturalization. The Immigration and Nationality Act, as amended, provides for the numerical limitation of most immigration. The Immigration Act of 1990 established major revisions in the numerical limits and preference system regulating legal immigration. The numerical limits are imposed on visas issued and not admissions. The maximum number of visas allowed to be issued under the preference categories in 1998 was 268,997: 191,480 for family-sponsored immigrants and 77,517 for employment-based immigrants. Within the overall limitations the per-country limit for independent countries is set to 7% of the total family and employment limits, while dependent areas are limited to 2% of the total.

[1]Immigration from the former USSR in 1997 included 16,600 from Russia and 15,700 from Ukraine. Figures from 1996 were: Russia, 19,700; Ukraine, 15,700; Armenia, 2,400; Azerbaijan, 2,000; Belarus, 4,300; Moldova, 1,800; Uzbekistan, 4,700.

The total number of immigrants admitted from 1820 up to 30 Sept. 1998 was 64,599,082; this included 7,156,257 from Germany, and 5,431,454 from Italy.

The number of immigrants admitted for legal permanent residence in the United States in the fiscal year 1998 was 660,477. Included in this total were 357,037 aliens previously living abroad who obtained immigrant visas through the US Department of State and became legal permanent residents upon entry into the United States. The remaining 303,440 legal immigrants, including former undocumented immigrants, refugees, and asylees, had been living in the United States an average of three years and adjusted status through the Immigration and Naturalization Service (INS). Legal immigration in 1998 was 17% lower than in 1997 (798,378). The decrease was due primarily to an increase in the number of adjustment of status applications pending a decision at INS, not to a decline in the demand to immigrate.

A total of 463,060 persons were naturalized in fiscal year 1998. This number would have been much higher were it not for a backlog of more than 1m. applications pending a decision at the end of 1997.

The refugee admissions ceiling for the fiscal year 1998 was fixed at 83,000, including 54,000 from Eastern Europe and the former Soviet Union and 4,000 from Asia East and South-East Asia.

2000	14·7	8·7	8·5	4·2
2001	14·5	8·7[1]	8·4[1]	4·0[1]

[1]Preliminary.

Rate of natural increase per 1,000 population: 7·7 in 1991; 6·0 in 2000. Annual population growth rate, 1990–2000, 1·3%.

Even though the marriage rate shows a gradual decline, it remains much higher than in most other industrial countries. The most popular age range for marrying is 25–29 for males and 20–24 for females. Estimated number of births to unmarried women in 1997 was 1,257,000 (32·4% of all births), compared to 666,000 in 1980. The USA has the highest rate of births to teenage woman in the industrialized world, at 52·1 per 1,000 women in 1998. Between 1970 and 1998 the annual number of births rose by 5·7%. The number of births within marriage declined by 19·2% whereas the number outside of marriage rose by 223·6%. The number of lone-parent families rose by 190·2% over the same period. Whereas in 1970 as many as 83·4% of children lived with both biological parents, by 2000 only 60·4% were living with married biological parents and 2·1% with unmarried biological parents.

Infant mortality rates, per 1,000 live births: 29·2 in 1950; 12·9 in 1980; 7·1 in 1999. Fertility rate, 1999, 2·0 births per woman (3·6 in 1960).

There were 1·31m. abortions in 2000 (1·61m. in 1990), giving a rate of 21·3 for every 1,000 women aged 15–44, compared to a high of 29·3 per 1,000 in 1980 and 1981.

Expectation of life, 1970: males, 67·1 years; females, 74·7 years; 1999: males, 73·9 years; females, 79·7 years.

Numbers of deaths by principal causes, 1998 (and as a percentage of all deaths): heart disease, 724,900 (31·0%); cancer, 541,500 (23·2%); stroke, 158,400 (6·8%); obstructive lung disease, 112,600 (4·8%); accidents, 97,800 (4·2%); pneumonia and

influenza, 91,800 (3·9%); diabetes mellitus, 64,800 (2·8%); suicide, 30,600 (1·3%); kidney diseases, 26,200 (1·1%); liver diseases, 25,200 (1·1%); septicemia, 23,700 (1·0%); AIDS, 18,200 (0·8%).

The number of Americans living in poverty in 2000 was 31·1m. or 11·3% of the total population, down from 15·1% in 1993.

A UNICEF report published in 2000 showed that 22·4% of children in the USA live in poverty (in households with income below 50% of the national median), compared to just 2·6% in Sweden. The report also showed that the poverty rate of children in lone-parent families was 55·4%, compared to 15·8% in two-parent families.

CLIMATE

For temperature and rainfall figures, *see* entries on individual states as indicated by regions, below, of mainland USA.

Pacific Coast. The climate varies with latitude, distance from the sea and the effect of relief, ranging from polar conditions in North Alaska through cool to warm temperate climates further south. The extreme south is temperate desert. Rainfall everywhere is moderate. *See* Alaska, California, Oregon, Washington.

Mountain States. Very varied, with relief exerting the main control; very cold in the north in winter, with considerable snowfall. In the south, much higher temperatures and aridity produce desert conditions. Rainfall everywhere is very variable as a result of rain-shadow influences. *See* Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming.

High Plains. A continental climate with a large annual range of temperature and moderate rainfall, mainly in summer, although unreliable. Dust storms are common in summer and blizzards in winter. *See* Nebraska, North Dakota, South Dakota.

Central Plains. A temperate continental climate, with hot summers and cold winters, except in the extreme south. Rainfall is plentiful and comes at all seasons, but there is a summer maximum in western parts. *See* Mississippi, Missouri, Oklahoma, Texas.

Mid-West. Continental, with hot summers and cold winters. Rainfall is moderate, with a summer maximum in most parts. *See* Indiana, Iowa, Kansas.

Great Lakes. Continental, resembling that of the Central Plains, with hot summers but very cold winters because of the freezing of the lakes. Rainfall is moderate with a slight summer maximum. *See* Illinois, Michigan, Minnesota, Ohio, Wisconsin.

Appalachian Mountains. The north is cool temperate with cold winters, the south warm temperate with milder winters. Precipitation is heavy, increasing to the south but evenly distributed over the year. *See* Kentucky, Pennsylvania, Tennessee, West Virginia.

Gulf Coast. Conditions vary from warm temperate to sub-tropical, with plentiful rainfall, decreasing towards the west but evenly distributed over the year. *See* Alabama, Arkansas, Florida, Louisiana.

Atlantic Coast. Temperate maritime climate but with great differences in temperature according to latitude. Rainfall is ample at all seasons; snowfall in the north can be heavy. *See* Delaware, District of Columbia, Georgia, Maryland, New Jersey, New York State, North Carolina, South Carolina, Virginia.

New England. Cool temperate, with severe winters and warm summers. Precipitation is well distributed with a slight winter maximum. Snowfall is heavy in winter. *See* Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont. *See also* Hawaii and Outlying Territories.

CONSTITUTION AND GOVERNMENT

The form of government of the USA is based on the constitution adopted on 17 Sept. 1787 and effective from 4 March 1789.

By the constitution the government of the nation is composed of three co-ordinate branches, the executive, the legislative and the judicial.

The Federal government has authority in matters of general taxation, treaties and other dealings with foreign countries, foreign and inter-state commerce, bankruptcy, postal service, coinage, weights and measures, patents and copyright, the armed forces (including, to a certain extent, the militia), and crimes against the USA; it has sole legislative authority over the District of Columbia and the possessions of the USA.

The 5th article of the constitution provides that Congress may, on a two-thirds vote of both houses, propose amendments to the constitution, or, on the application of the legislatures of two-thirds of all the states, call a convention for proposing amendments, which in either case shall be valid as part of the constitution when ratified by the legislatures of three-fourths of the several states, or by conventions in three-fourths thereof, whichever mode of ratification may be proposed by Congress. Ten amendments (called collectively 'the Bill of Rights') to the constitution were added 15 Dec. 1791; two in 1795 and 1804; a 13th amendment, 6 Dec. 1865, abolishing slavery; a 14th in 1868, including the important 'due process' clause; a 15th, 3 Feb. 1870, establishing equal voting rights for white and black; a 16th, 3 Feb. 1913, authorizing the income tax; a 17th, 8 April 1913, providing for popular election of senators; an 18th, 16 Jan. 1919, prohibiting alcoholic liquors; a 19th, 18 Aug. 1920, establishing woman suffrage; a 20th, 23 Jan. 1933, advancing the date of the President's and Vice-President's inauguration and abolishing the 'lameduck' sessions of Congress; a 21st, 5 Dec. 1933, repealing the 18th amendment; a 22nd, 26 Feb. 1951, limiting a President's tenure of office to 2 terms, or to 2 terms plus 2 years in the case of a Vice-President who has succeeded to the office of a President; a 23rd, 30 March 1961, granting citizens of the District of Columbia the right to vote in national elections; a 24th, 4 Feb. 1964, banning the use of the poll-tax in federal elections; a 25th, 10 Feb. 1967, dealing with Presidential disability and succession; a 26th, 22 June 1970, establishing the right of citizens who are 18 years of age and older to vote; a 27th, 7 May 1992, providing that no law varying the compensation of Senators or Representatives shall take effect until an election has taken place.

National motto. 'In God we trust'; formally adopted by Congress 30 July 1956.

Presidency. The executive power is vested in a president, who holds office for four years, and is elected, together with a vice-president chosen for the same term, by electors from each state, equal to the whole number of senators and representatives to which the state may be entitled in the Congress. The President must be a natural-born citizen, resident in the country for 14 years, and at least 35 years old.

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in Nov. Technically, this is an election of presidential electors, not of a president directly; the electors thus chosen meet and give their votes (for the candidate to whom they are pledged, in some states by law, but in most states by custom and prudent politics) at their respective state capitals on the first Monday after the second Wednesday in Dec. next following their election; and the votes of the electors of all the states are opened and counted in the presence of both Houses of Congress on the sixth day of Jan. The total electorate vote is one for each senator and representative. Electors may not be a member of Congress or hold federal office. If no candidate secures the minimum 270 college votes needed for outright victory, the 12th Amendment to the Constitution applies, and the House of Representatives chooses a president from among the first three finishers in the electoral college. (This last happened in 1824).

If the successful candidate for President dies before taking office the Vice-President-elect becomes President; if no candidate has a majority or if the successful candidate fails to qualify, then, by the 20th amendment, the Vice-President acts as President until a president qualifies. The duties of the Presidency, in absence of the President and Vice-President by reason of death, resignation, removal, inability or failure to qualify, devolve upon the Speaker of the House under legislation enacted on 18 July 1947. In case of absence of a Speaker for like reason, the presidential duties devolve upon the President *pro tem.* of the Senate and successively upon those members of the cabinet in order of precedence, who have the constitutional qualifications for President.

The presidential term, by the 20th amendment to the constitution, begins at noon on 20 Jan. of the inaugural year. This amendment also installs the newly elected Congress in office on 3 Jan. instead of—as formerly—in the following Dec. The President's salary is $400,000 per year (taxable), with in addition $50,000 to assist in defraying expenses resulting from official duties. Also he may spend up to $100,000 non-taxable for travel and $19,000 for official entertainment. In 1999 the presidential salary was increased for the president taking office in Jan. 2001, having remained at $200,000 a year since 1969. The office of Vice-President carries a salary

of $192,600 and $10,000 allowance for expenses, all taxable. The Vice-President is *ex officio* President of the Senate, and in the case of 'the removal of the President, or of his death, resignation, or inability to discharge the powers and duties of his office', he becomes the President for the remainder of the term.

[1]Position vacant thereafter until commencement of the next presidential term.

Cabinet. The administrative business of the nation has been traditionally vested in several executive departments, the heads of which, unofficially and *ex officio*, formed the President's cabinet. Beginning with the Interstate Commerce Commission in 1887, however, an increasing amount of executive business has been entrusted to some 60 so-called independent agencies, such as the Housing and Home Finance Agency, Tariff Commission, etc.

All heads of departments and of the 60 or more administrative agencies are appointed by the President, but must be confirmed by the Senate.

Congress. The legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives.

Electorate. By amendments of the constitution, disqualification of voters on the ground of race, colour or sex is forbidden. The electorate consists of all citizens over 18 years of age. Literacy tests have been banned since 1970. In 1972 durational residency requirements were held to violate the constitution. In 1973 US citizens abroad were enfranchised.

With limitations imposed by the constitution, it is the states which determine voter eligibility. In general states exclude from voting: persons who have not established residency in the jurisdiction in which they wish to vote; persons who have been convicted of felonies whose civil rights have not been restored; persons declared mentally incompetent by a court.

Illiterate voters are entitled to receive assistance in marking their ballots. Minority-language voters in jurisdictions with statutorily prescribed minority concentrations are entitled to have elections conducted in the minority language as well as English. Disabled voters are entitled to accessible polling places. Voters absent on election days or unable to go to the polls are generally entitled under state law to vote by absentee ballot.

The Constitution guarantees citizens that their votes will be of equal value under the 'one person, one vote' rule.

Senate. The Senate consists of two members from each state (but not from the District of Columbia), chosen by popular vote for six years, approximately one-third retiring or seeking re-election every two years. Senators must be no less than 30 years of age; must have been citizens of the USA for nine years, and be residents

in the states for which they are chosen. The Senate has complete freedom to initiate legislation, except revenue bills (which must originate in the House of Representatives); it may, however, amend or reject any legislation originating in the lower house. The Senate is also entrusted with the power of giving or withholding its 'advice and consent' to the ratification of all treaties initiated by the President with foreign powers, a two-thirds majority of senators present being required for approval. (However, it has no control over 'international executive agreements' made by the President with foreign governments; such 'agreements' cover a wide range and are more numerous than formal treaties.).

The Senate has 21 Standing Committees to which all bills are referred for study, revision or rejection. The House of Representatives has 20 such committees. In both Houses each Standing Committee has a chairman and a majority representing the majority party of the whole House; each has numerous sub-committees. The jurisdictions of these Committees correspond largely to those of the appropriate executive departments and agencies. Both Houses also have a few select or special Committees with limited duration.

House of Representatives. The House of Representatives consists of 435 members elected every second year. The number of each state's representatives is determined by the decennial census, in the absence of specific Congressional legislation affecting the basis. The number of representatives for each state in the 108th congress, which began in Jan. 2003 (based on the 2000 census), is given below:

Alabama	7	Indiana	9	Nebraska	3	South Carolina	6
Alaska	1	Iowa	5	Nevada	3	South Dakota	1
Arizona	8	Kansas	4	New Hampshire	2	Tennessee	9
Arkansas	4	Kentucky	6	New Jersey	13	Texas	32
California	53	Louisiana	7	New Mexico	3	Utah	3
Colorado	7	Maine	2	New York	29	Vermont	1
Connecticut	5	Maryland	8	North Carolina	13	Virginia	11
Delaware	1	Massachusetts	10	North Dakota	1	Washington	9
Florida	25	Michigan	15	Ohio	18	West Virginia	3
Georgia	13	Minnesota	8	Oklahoma	5	Wisconsin	8
Hawaii	2	Mississippi	4	Oregon	5	Wyoming	1
Idaho	2	Missouri	9	Pennsylvania	19		
Illinois	19	Montana	1	Rhode Island	2		

The constitution requires congressional districts within each state to be substantially equal in population. Final decisions on congressional district boundaries are taken by the state legislatures and governors. By custom the representative lives in the district from which he is elected. Representatives must be not less than 25 years of age, citizens of the USA for seven years and residents in the state from which they are chosen.

In addition, five delegates (one each from the District of Columbia, American Samoa, Guam, the US Virgin Islands and Puerto Rico) are also members of Congress. They have a voice but no vote, except in committees. The delegate from Puerto Rico is the resident commissioner. Puerto Ricans vote at primaries, but not at national elections. Each of the two Houses of Congress is sole 'judge of the elections, returns and qualifications of its own members'; and each of the Houses may, with the concurrence of two-thirds, expel a member. The period usually termed 'a Congress' in legislative language continues for two years, terminating at noon on 3 Jan.

The salary of a senator is $150,000 per annum, with tax-free expense allowance and allowances for travelling expenses and for clerical hire. The salary of the Speaker of the House of Representatives is $192,600 per annum, with a taxable allowance. The salary of a Member of the House is $150,000 ($166,700 for the Majority Leader and Minority Leader).

No senator or representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the USA which shall have been created or the emoluments of which shall have been increased during such time; and no person holding *any* office under the USA can be a member of either House during his continuance in office. No religious text may be required as a qualification to any office or public trust under the USA or in any state.

Indians. By an Act passed on 2 June 1924 full citizenship was granted to all Indians born in the USA, though those remaining in tribal units were still under special

federal jurisdiction. The Indian Reorganization Act of 1934 gave the tribal Indians, at their own option, substantial opportunities of self-government and the establishment of self-controlled corporate enterprises empowered to borrow money and buy land, machinery and equipment; these corporations are controlled by democratically elected tribal councils. Recently a trend towards releasing Indians from federal supervision has resulted in legislation terminating supervision over specific tribes. In 1988 the federal government recognized that it had a special relationship with, and a trust responsibility for, federally recognized Indian entities in continental USA and tribal entities in Alaska. In 1993 the Bureau of Indian Affairs listed 552 'Indian Entities Recognized and Eligible to Receive Services'. Indian lands (1991) amounted to 52,092,247 acres, of which 41,868,582 was tribally owned and 10,233,665 in trust allotments. Indian lands are held free of taxes. Total Indian population at the 1990 census was 1,959,000, of which Oklahoma, Arizona, California and New Mexico accounted for 832,466.

The **District of Columbia,** ceded by the State of Maryland for the purposes of government in 1791, is the seat of the US government. It includes the city of Washington, and embraces a land area of 61 sq. miles. The Reorganization Plan No. 3 of 1967 instituted a Mayor Council form of government with appointed officers. In 1973 an elected Mayor and elected councillors were introduced; in 1974 they received power to legislate in local matters. Congress retains power to enact legislation and to veto or supersede the Council's acts. Since 1961 citizens have had the right to vote in national elections. On 23 Aug. 1978 the Senate approved a constitutional amendment giving the District full voting representation in Congress. This has still to be ratified.

The Commonwealth of Puerto Rico, American Samoa, Guam and the Virgin Islands each have a local legislature, whose acts may be modified or annulled by Congress, though in practice this has seldom been done. Puerto Rico, since its attainment of commonwealth status on 25 July 1952, enjoys practically complete self-government, including the election of its governor and other officials. The conduct of foreign relations, however, is still a federal function and federal bureaux and agencies still operate in the island.

General supervision of territorial administration is exercised by the Office of Territories in the Department of Interior.

Local Government. The Union comprises 13 original states, 7 states which were admitted without having been previously organized as territories, and 30 states which had been territories—50 states in all. Each state has its own constitution (which the USA guarantees shall be republican in form), deriving its authority, not from Congress, but from the people of the state. Admission of states into the Union has been granted by special Acts of Congress, either (1) in the form of 'enabling Acts' providing for the drafting and ratification of a state constitution by the people, in which case the territory becomes a state as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each state is provided with a legislature of two Houses (except Nebraska, which since 1937 has had a single-chamber legislature), a governor and other executive officials, and a judicial system. Both Houses of the legislature are elective, but the senators (having larger electoral districts usually covering two or three counties compared with the single county or, in some states, the town, which sends one representative to the Lower House) are less numerous than the representatives, while in 38 states their terms are four years; in 12 states the term is two years. Of the four-year senates, Illinois, Montana and New Jersey provide for two four-year terms and one two-year term in each decade. Terms of the lower houses are usually shorter; in 45 states, two years. The trend is towards annual sessions of state legislatures; most meet annually now whereas in 1939 only four did.

The Governor is elected by direct vote of the people over the whole state for a term of office ranging in the various states from two to four years, and with a salary ranging from $70,000 (Maine) to $179,000 (New York). His duty is to see to the faithful administration of the law, and he has command of the military forces of the state. He may recommend measures but does not present bills to the legislature. In some states he presents estimates. In all but one of the states (North Carolina) the Governor has a veto upon legislation, which may, however, be overridden by the

two Houses, in some states by a simple majority, in others by a three-fifths or two-thirds majority. In some states the Governor, on his death or resignation, is succeeded by a Lieut.-Governor who was elected at the same time and has been presiding over the state Senate. In several states the Speaker of the Lower House succeeds the Governor.

National Anthem. The Star-spangled Banner, 'Oh say, can you see by the dawn's early light'; words by F. S. Key, 1814, tune by J. S. Smith; formally adopted by Congress 3 March 1931.

RECENT ELECTIONS

At the presidential election on 7 Nov. 2000 turn-out was 51·2% (49% in 1996). George W. Bush (R.) received 50,461,080 votes (48·1%), Albert Arnold ('Al') Gore Jr (D.) 50,994,082 (48·3%), Ralph Nader (Green Party) 2,858,843 (2·6%), Pat Buchanan (Reform Party) 438,760 (0·4%), Harry Browne (Libertarian Party) (0·4%). Electoral college votes: Bush, 271; Gore, 267; other candidates, nil. Bush's victory was only confirmed on 13 Dec. 2000 after a recount in Florida gave him a total of 271 electoral colleges, one more than he needed to win the presidency. In becoming president as George Bush had 12 years earlier, George W. Bush became only the second son of a former US president to follow his father into office. John Quincy Adams became president in 1825, 24 years after his father John Adams had left office.

The next presidential elections are scheduled to take place on 2 Nov. 2004.

The Speaker of the House of Representatives is Dennis Hastert (R.). The Majority Leader of the Senate is Bill Frist (R.).

DEFENCE

The President is C.-in-C. of the Army, Navy and Air Force.

The National Security Act of 1947 provides for the unification of the Army, Navy and Air Forces under a single Secretary of Defense with cabinet rank. The President is also advised by a National Security Council and the Office of Civil and Defense Mobilization.

Defence expenditure in 2001 totalled US$322,365m. (US$1,128 per capita), representing 3·2% of GDP (down from 6·5% of GDP in 1985). The USA spent more on defence in 2001 than the next ten biggest spenders combined. US expenditure

was 38% of the world total. In 1997 the Quadrennial Defense Review (QDR) was implemented—a plan to transform US defence strategy and military forces. In Oct. 2002 the US Senate approved the biggest increase in military spending in two decades by agreeing to a defence budget of US$355·1bn. for the fiscal year 2003, an increase of US$37·5bn. on 2002.

The estimated number of active military personnel in 2001 was 1,367,700.

The USA is the world's largest exporter of arms, with sales in 2001 worth $9·7bn., or 45·5% of the world total. In 2000 Lockheed Martin and Boeing were the two largest arms producing companies in the USA and in the world, accounting for $18·61bn. and $16·90bn. worth of sales respectively.

The USA's last nuclear test was in 1993. In accordance with START I—the treaty signed by the US and USSR in 1991 to reduce strategic offensive nuclear capability—the number of nuclear warheads (intercontinental ballistic missiles, submarine-launched ballistic missiles and bombers) in Jan. 2002 was approximately 6,480. In 1990 the number of warheads had been 12,718. Strategic nuclear delivery vehicles were made up as follows:

Intercontinental ballistic missiles: 500 Minuteman III; 50 Peacekeeper (MX).

Submarine-launched ballistic missiles: 168 Trident I (C-4); 264 Trident II (D-5).

Bombers: 93 B-52H; 21 B-2.

The USA had what was believed to be the world's second largest stockpile of chemical weapons, but by federal law is committed to unilateral destruction of the weapons by 2004.

In May 2001 President Bush called for the development of an anti-missile shield to move beyond the constraints of the Anti-Ballistic Missile Treaty. In Dec. 2001 he announced that the USA was unilaterally abandoning the Treaty. As the relationship with Russian president Vladimir Putin strengthened following the events of 11 Sept. 2001 he proposed a reduction of operational nuclear warheads to between 1,700 and 2,200 by 2010. On 24 May 2002 the USA and Russia signed an arms control treaty to reduce the number of US and Russian warheads, from between 6,000 and 7,000 each to between 1,700 and 2,200 each, over the next ten years.

Army. *Secretary of the Army.* Vacant.

The Secretary of the Army is the head of the Department of the Army. Subject to the authority of the President as C.-in-C. and of the Secretary of Defense, he is responsible for all affairs of the Department.

The Army consists of the Active Army, the Army National Guard of the US, the Army Reserve and civilian workforce; and all persons appointed to or enlisted into the Army without component; and all persons serving under call or conscription, including members of the National Guard of the States, etc., when in the service of the US. The strength of the Active Army was (2002) 485,500 (including 71,400 women).

The Army budget for fiscal years 2002–04 is as follows: 2002, $86,099m.; 2003, $90,933m.; 2004, $93,903m.

The US Army Forces Command, with headquarters at Fort McPherson, Georgia, commands the Third US Army; four continental US Armies, and all assigned Active Army and US Army Reserve troop units in the continental US, the Commonwealth of Puerto Rico, and the Virgin Islands of the USA. The headquarters of the continental US Armies are: First US Army, Fort George G. Meade, Maryland; Second US Army, Fort Gillem, Georgia; Fifth US Army, Fort Sam Houston, Texas; Sixth US Army, Presidio of San Francisco, California. The US Army Space Command, with headquarters in Colorado Springs (CO), is the Army component to the US Space Command.

Approximately 32% of the Active Army is deployed outside the continental USA. Several divisions, which are located in the USA, keep equipment in Germany and can be flown there in 48–72 hours. Headquarters of US Seventh and Eighth Armies are in Europe and Korea respectively.

Combat vehicles of the US Army are the tank, armoured personnel carrier, infantry fighting vehicle, and the armoured command vehicle. The first-line tanks are the M1A1 Abrams tank, and the M1 Abrams. The standard armoured infantry personnel carrier is the M2 Bradley Fighting Vehicle (BFV), which is replacing the older M113.

The Army has over 5,000 aircraft, all but about 280 of them helicopters, including AH-1 Cobra and AH-64 Apache attack helicopters.

Over 95% of recruits enlisting in the Army have a high-school education and over 50% of the Army is married. Women serve in both combat support and combat service support units.

The National Guard is a reserve military component with both a state and a federal role. Enlistment is voluntary. The members are recruited by each state, but are equipped and paid by the federal government (except when performing state missions). As the organized militia of the several states, the District of Columbia, Puerto Rico and the Territories of the Virgin Islands and Guam, the Guard may be called into service for local emergencies by the chief executives in those jurisdictions; and may be called into federal service by the President to thwart invasion or rebellion or to enforce federal law. In its role as a reserve component of the Army, the Guard is subject to the order of the President in the event of national emergency. In 2002 it numbered 464,300 (Army, 355,900; Air Force, 108,400).

The Army Reserve is designed to supply qualified and experienced units and individuals in an emergency. Members of units are assigned to the Ready Reserve, which is subject to call by the President in case of national emergency without declaration of war by Congress. The Standby Reserve and the Retired Reserve may be called only after declaration of war or national emergency by Congress. In 2002 the Army Reserve numbered 358,100.

Navy. *Secretary of the Navy (acting).* Hansford T. Johnson.

The Navy's Operating Forces include the Atlantic Fleet, divided between the 2nd fleet (home waters) and 6th fleet (Mediterranean) and the Pacific Fleet, similarly divided between the 3rd fleet (home waters), the 7th fleet (West Pacific) and the 5th fleet (Indian Ocean), which was formally activated in 1995 and maintained by units from both Pacific and Atlantic.

The authorized budget for the Department of the Navy (which includes funding both for the Navy and Marine Corps) for fiscal years 2002–04 is as follows: 2002, $104,836m.; 2003, $111,184m.; 2004, $114,720m.

Personnel and fleet strength declined during the mid-1990s but are now stabilizing. The '600-ship battle force' planned in the late 1980s has reduced to a current figure of 317. The Navy personnel total in 2002 was 385,400.

The operational strength of the Navy in the year indicated:

Category	*1992*	*1997*	*2002*
Strategic Submarines	23	18	18
Nuclear Attack Submarines	87	67	54
Aircraft Carriers	12	11[1]	12[1]
Amphibious Carriers	13	11	11
Cruisers	46	30	27
Destroyers	51	56	55
Frigates	90	31	28

[1]Includes the USS *John F. Kennedy* as 'operational and training reserve carrier' in the Naval Reserve Force.

Ships in the inactive reserve are not included in the table, but those serving as Naval Reserve Force training ships are.

Submarine Forces. A principal part of the US naval task is to deploy the seaborne strategic deterrent from nuclear-powered ballistic missile-carrying submarines (SSBN), of which there were 18 in 2002, all of the Ohio class. The listed total of 54 nuclear-powered attack submarines (SSN) includes two of three new Seawolf class and 51 of the Los Angeles class. There is also one of the Sturgeon class.

Surface Combatant Forces. The surface combatant forces are comprised of modern cruisers, destroyers and frigates. These ships provide multi-mission capabilities to achieve maritime dominance in the crowded and complex littoral warfare environment.

The cruiser force consists of 27 Ticonderoga class ships. There are 33 guided-missile Arleigh Burke Aegis class destroyers, 20 Spruance class destroyers and 35 (28 active and 7 in the reserve force) Oliver Hazard Perry class guided missile frigates.

Aircraft carriers. There are eight nuclear-powered Nimitz class carriers. The USS *Enterprise,* completed in 1961, was the prototype nuclear-powered carrier. The two

ships of the Kitty Hawk and one of the John F. Kennedy classes were completed between 1961 and 1968, and represent the last oil-fuelled carriers built by the US Navy. All carriers deploy an air group which comprises on average two squadrons each of F-14 Tomcat fighters and three squadrons each of F/A-18 Hornet fighter/ground attack aircraft.

Naval Aviation. The principal function of the naval aviation organization (currently 12,110 pilots and Naval flight officers) is to train and provide combat ready aviation forces. The main carrier-borne combat aircraft in the current inventory are 232 F-14 fighters and 821 F/A-18 Hornet dual-purpose fighter/attack aircraft.

The Marine Corps. While administratively part of the Department of the Navy, the Corps ranks as a separate armed service, with the Commandant serving in his own right as a member of the Joint Chiefs of Staff, and responsible directly to the Secretary of the Navy. Its strength had stabilized at 173,400 by 2002.

The role of the Marine Corps is to provide specially trained and equipped amphibious expeditionary forces. The Corps includes an autonomous aviation element numbering 35,650 in 2002 with some 442 combat aircraft and 515 helicopters. They include F/A 18 Hornets and AV-8B Harriers.

The US Coast Guard. The Coast Guard operates under the Department of Transportation in time of peace and as part of the Navy in time of war or when directed by the President. The act of establishment stated the Coast Guard 'shall be a military service and branch of the armed forces of the United States at all times'.

The Coast Guard is the country's oldest continuous sea-going service and its missions include maintenance of aids to navigation, icebreaking, environmental response (oil spills), maritime law enforcement, marine licensing, port security, search and rescue and waterways management.

The workforce in 2002 was made up of approximately 34,480 military personnel augmented by 5,840 civilians. On an average Coast Guard day, the service saves 14 lives, conducts 120 law enforcement boardings, seizes 209 pounds of marijuana and 170 pounds of cocaine, boards 90 large vessels for port safety checks, processes 120 seaman's documents, investigates 17 marine accidents, inspects 64 commercial vessels, assists 328 people in distress, saves $2,490,000 in property, services 150 aids to navigation and interdicts 176 illegal immigrants.

Air Force. *Secretary of the Air Force.* James G. Roche.

The Department of the Air Force was activated within the Department of Defense on 18 Sept. 1947, under the terms of the National Security Act of 1947.

The USAF has the mission to defend the USA through control and exploitation of air and space. For operational purposes the service is divided into 8 major commands, 37 field operating agencies and 3 direct-reporting units.

The bulk of the combat forces are grouped under the Air Combat Command, which controls strategic bombing, tactical strike, air defence and reconnaissance assets in the USA.

Air Force bombers include the B-1B Lancer, the B-2A and the B-52G/H Stratofortress, which has been the primary manned strategic bomber for over 35 years. In the fighter category are the F-15 Eagle, the F-16 Fighting Falcon and the F-117A, the world's first operational aircraft to exploit low-observable stealth technology.

The Air Force budget for fiscal years 2002–04 is as follows: 2002, $100,266m.; 2003, $108,451m.; 2004, $113,805m.

In 2002 the Air Force had approximately 369,700 military personnel. 56,400 Air Force members are women. Since 1991 women have been authorized to fly combat aircraft, but not until 1993 were they allowed to fly fighters.

INTERNATIONAL RELATIONS

The USA is a member of the UN, WTO, NATO, BIS, OECD, OSCE, OAS, Inter-American Development Bank, Asian Development Bank, Pacific Community, Colombo Plan, IOM and the Antarctic Treaty.

In 2001 the USA gave US$10·9bn. in international aid, the highest figure of any country. In terms of a percentage of GNI, however, the USA was the least generous major industrialized country, giving just 0·1% (compared to more than 0·6% in the early 1960s).

ECONOMY

Services accounted for approximately 80% of GDP in 1999, industry 18% and agriculture 2%.

According to the anti-corruption organization *Transparency International*, in 2002 the USA ranked 16th in the world in a survey of the countries with the least corruption in business and government. It received 7·7 out of 10 in the annual index.

Per capita income in 2001 was $30,472, up from $19,572 in 1990.

Overview. In March 2001 the US economy entered its first recession in a decade after the longest period of expansion in US history. The economy declined further following the 11 Sept. 2001 attacks. Economic policies have moved from short-term stabilization to strengthening the base for durable growth. In Dec. 2000 monetary policy was eased and in Jan. 2001 interest rates were cut by 50 basis points, the first cut since 1992. The 11 Dec. 2001 rate cut was the eleventh interest fall of 2001. In June 2002 short-term interest rates were at a 40-year low. Worsened economic conditions have led to a smaller federal budget surplus than forecast. In March 2002 there was a budget deficit over 1% of GDP. Spending plans for 2003 include a 14% increase in the defence budget and a 50% increase on homeland security.

Currency. The unit of currency is the *dollar* (USD) of 100 *cents*. Notes are issued by the 12 Federal Reserve Banks, which are denoted by a branch letter (A = Boston, MA; B = New York, NY; C = Philadelphia, PA; D = Cleveland, OH; E = Richmond, VA; F = Atlanta, GA; G = Chicago, IL; H = St Louis, MO; I = Minneapolis, MN; J = Kansas City, MO; K = Dallas, TX; L = San Francisco, CA).

Inflation was 2·2% in 1999, 3·4% in 2000 and 2·8% in 2001. Foreign exchange reserves in June 2002 were US$32,166m. Gold reserves in June 2002 were 262·0m. troy oz. The USA has the most gold reserves of any country, and more than the combined reserves of the next two (Germany and France). Total money supply in March 2002 was $1,552bn.

Budget. The budget covers virtually all the programmes of federal government, including those financed through trust funds, such as for social security, Medicare and highway construction. Receipts of the government include all income from its sovereign or compulsory powers; income from business-type or market-orientated activities of the government is offset against outlays. The fiscal year ends on 30 Sept. (before 1977 on 30 June). Budget receipts and outlays, including off-budget receipts and outlays (in $1m.):

National Income. The Bureau of Economic Analysis of the Department of Commerce prepares detailed estimates on the national income and product. In Oct. 1999 the Bureau revised these accounts back to 1959, and in April 2000 back to 1929. The principal tables are published monthly in *Survey of Current Business;* the complete set of national income and product tables are published in the *Survey* normally each Aug., showing data for recent years. *The National Income and Product Accounts of the United States* (1929–97, 2 vols.) were published in Sept. 2001. The conceptual framework and statistical methods underlying the accounts are described in National Income and Product Account (NIPA) Methodology Papers 1–6. Subsequent limited changes are described in the Aug. 1999, Sept. 1999, Oct. 1999, Dec. 1999, April 2000, Aug. 2000, Aug. 2001 and Aug. 2002 *Surveys*.

[1]In 1996 the chain-weighted method of estimating GDP replaced that of constant base-year prices. In chain-weighting the weights used to value different sectors of the economy are continually updated to reflect changes in relative prices.

Performance. Total GDP in 2001 was US$10,082·2bn., representing approximately 32% of the world's total GDP. Real GDP growth was 4·3% in 1998, 4·1% in 1999 and 3·8% in 2000. In the first quarter of 2001 the economy contracted for the first time since 1993, shrinking by 0·6%. The recession came to an end in the final quarter of 2001, with growth of 2·7%, giving a growth rate for 2001 as a whole of 0·3%. In the 2002 *World Competitiveness Yearbook*, compiled by the International Institute for Management Development, the USA came top in the world ranking. The USA was top in both the Growth Competitiveness Ranking and the Microeconomic Competitiveness Ranking in the World Economic Forum's *Global Competitiveness Report 2002–03*, up from second in both in 2001–02.

Banking and Finance. The Federal Reserve System, established under The Federal Reserve Act of 1913, comprises the Board of seven Governors, the 12 regional Federal Reserve Banks with their 25 branches, and the Federal Open Market Committee. The seven members of the Board of Governors are appointed by the President with the consent of the Senate. Each Governor is appointed to a full term of 14 years or an unexpired portion of a term, one term expiring every two years.

The Board exercises broad supervisory authority over the operations of the 12 Federal Reserve Banks, including approval of their budgets and of the appointments of their presidents and first vice presidents; it designates three of the nine directors of each Reserve Bank including the Chairman and Deputy Chairman. The Chairman of the Federal Reserve Board is appointed by the President for four-year terms. The *Chairman* for 2000–04 is Alan Greenspan. The Board has supervisory and regulatory responsibilities over banks that are members of the Federal Reserve System, bank holding companies, bank mergers, Edge Act and agreement corporations, foreign activities of member banks, international banking facilities in the USA, and activities of the US branches and agencies of foreign banks. Legislation of 1991 requires foreign banks to prove that they are subject to comprehensive consolidated supervision by a regulator at home, and have the Board's approval to establish branches, agencies and representative offices. The Board also assures the smooth functioning and continued development of the nation's vast payments system. Another area of the Board's responsibilities involves the implementation by regulation of major federal laws governing consumer credit.

In 2001, four of the five largest banks in the world in terms of market capitalization were US banks. Citigroup was the largest ($255·2bn.). The third, fourth and fifth largest were Bank of America ($95·7bn.), JP Morgan Chase ($88·4bn.) and Wells Fargo ($74·7bn.).

The key stock exchanges are the New York Stock Exchange (NYSE), the Nasdaq Stock Exchange (NASDAQ) and the American Stock Exchange (ASE). There are several other stock exchanges, in Philadelphia, Boston, San Francisco (Pacific Stock Exchange) and Chicago, although trading is very limited in them.

In 1999 the USA received $276bn. worth of foreign direct investment—three times as much as any other country.

By Oct. 2000 approximately 18% of the population were using e-banking.

Weights and Measures. The US Customary System derives from the British Imperial System. It differs in respect of the *gallon* (= 0·83268 Imperial gallon); *bushel* (= 0·969 Imperial bushel); *hundredweight* (= 100 lb); and the *short* or *net ton* (= 2,000 lb).

ENERGY AND NATURAL RESOURCES

Environment. The USA's carbon dioxide emissions in 1998 accounted for 24·3% of the world total, higher than any other country, and according to the *World Bank Atlas* were equivalent to 19·8 tonnes per capita. The population of the USA is only 4·6% of the world total. An *Environmental Sustainability Index* compiled for the World Economic Forum meeting in Feb. 2002 ranked the USA 45th in the world, with 53·2%. The index measured the ability of countries to maintain favourable environmental conditions and examined various factors including pollution levels and the use or abuse of natural resources.

In March 2001 President Bush rejected the 1997 Kyoto Protocol, which aims to combat the rise in the earth's temperature through the reduction of industrialized nations' carbon dioxide emissions by an average 5·2% below 1990 levels by 2012. In Feb. 2002 he unveiled an alternative climate-change plan to the Kyoto Protocol, calling for voluntary measures to reduce the rate of increase of US carbon dioxide emissions.

The USA recycled 31·5% of its household waste in 1998, ranking it seventh in the world.

Electricity. Net capacity in 1999 was 639·3m. kW. Fossil fuel accounts for approximately 70% of electricity generation. In 2001, 20% of electricity was produced by 104 nuclear reactors. (The last one to begin commercial operation was in 1996.) The US has more nuclear reactors in use than any other country in the world. In 1999 the USA had a nuclear generating capacity of 97,200 MW. Electricity production in 1999 was the highest in the world, at 3,173,674m. kWh.[1] Consumption per capita in 1998 was 11,832 kWh.

[1]Does not include non-utility production.

Oil and Gas. Crude oil production (2001), 1,830m. bbls. Production has been gradually declining since the mid-1980s, when annual production was 3,274m. bbls.

Only Saudi Arabia produces more oil. Proven reserves were 22·0bn. bbls. in 2001, but they are expected to be exhausted by 2011. Output (1999) was valued at $33·40bn. Imported supplies account for approximately half of US oil consumption, with Saudi Arabia supplying a sixth of US oil imports. In Oct. 2002 the USA took its first delivery of Russian oil for its Strategic Petroleum Reserve as a consequence of an energy dialogue declared by Presidents George W. Bush and Vladimir Putin at their summit in May 2002.

The USA is by far the largest single consumer of natural gas, and the second largest producer after Russia. Natural gas production, 2001, was 19·21trn. cu. ft. Proven gas reserves in 2001 totalled 177trn. cu. ft.

Wind. The USA is one of the largest producers of wind-power. By the end of 2002 total installed capacity amounted to 4,685 MW.

Water. The total area covered by water is 256,645 sq. miles. Americans' average annual water usage is nearly 67,000 cu. ft per person—more than twice the average for an industrialized nation.

Non-Fuel Minerals. The USA is wholly dependent upon imports for columbium, bauxite, mica sheet, manganese, strontium and graphite, and imports over 80% of its requirements of industrial diamonds, fluorspar, platinum, tantalum, tungsten, chromium and tin.

Total value of non-fuel minerals produced in 1999 was $40,100m. ($33,445m. in 1990). Details of some of the main minerals produced are given in the following tables.

Coal. Demonstrated coal reserves were 507,740m. short tons at 1 Jan. 1997. Output in 1999 (in 1m. short tons): 1,099·1 including bituminous coal, 621·3; sub-bituminous coal, 388·3; lignite, 84·4; anthracite, 5·2. 1998 output from opencast workings, 699,807; underground mines, 417,728. Value of total output, 1998, $19·75bn.

Agriculture. Agriculture in the USA is characterized by its ability to adapt to widely varying conditions, and still produce an abundance and variety of agricultural products. From colonial times to about 1920 the major increases in farm production were brought about by adding to the number of farms and the amount of land under cultivation. During this period nearly 320m. acres of virgin forest were converted to crop land or pasture, and extensive areas of grasslands were ploughed. Improvident use of soil and water resources was evident in many areas.

During the next 20 years the number of farms reached a plateau of about 6·5m., and the acreage planted to crops held relatively stable around 330m. acres. The major source of increase in farm output arose from the substitution of power-driven machines for horses and mules. Greater emphasis was placed on development and improvement of land, and the need for conservation of basic agricultural resources was recognized.

Since the Second World War the uptrend in farm output has been greatly accelerated by increased production per acre and per farm animal. These increases are associated with a higher degree of mechanization; greater use of lime and fertilizer; improved varieties, including hybrid maize and grain sorghums; more effective control of insects and disease; improved strains of livestock and poultry; and wider use of good husbandry practices, such as nutritionally balanced feeds, use of superior sites and better housing.

All land in farms totalled less than 500m. acres in 1870, rose to a peak of over 1,200m. acres in the 1950s and declined to 941m. acres in 2001, even with the addition of the new States of Alaska and Hawaii in 1960. The number of farms declined from 6·35m. in 1940 to 2·16m. in 2001, as the average size of farms doubled. The average size of farms in 2001 was 436 acres, but ranged from a few acres to many thousand acres. In 1997 the total value of land and buildings was $912,344m. The average value of land and buildings per acre in 1998 was $1,000.

At the 1990 census 66,964,000 persons (22·5% of the population) were rural, of whom 4,591,000 (under 2%) lived on farms. In 1997 there were an estimated 1,317,000 farm operators and managers and 2,030,000 persons in other agricultural and related occupations, of which 796,000 were farm workers. There were in 1998 4·8m. tractors and 662,000 harvester-threshers.

Forestry. Forests covered a total area of 525m. acres (212m. ha) in 1995, or 23% of the land area. Between 1990 and 1995 new planting resulted in the total area under forests growing by 7·2m. acres (2·9m. ha), the largest increase in any country in the world over the same period. The national forests had an area of 191,854,000 acres in 1999. In 1996 there were 518m. acres of timberland (124m. acres federally owned or managed, 35m. acres state, county or municipality owned, 357m. acres private). Timber production was 500·75m. cu. metres in 1999. The USA is the world's second largest producer of roundwood after China (15% of the world total in 1999). It is also the second highest consumer of roundwood; timber consumption in 1999 totalled 17·49bn. cu. ft.

There are 624 designated wilderness areas throughout the USA, covering a total of 104m. acres (42m. ha). More than half of the areas are in Alaska (56%), followed by California (13%), Arizona, Washington and Idaho.

The USA's imports of fishery commodities in 1999 ($9·41bn.) were exceeded only by those of Japan.

In the period 1995–97 the average American citizen consumed 46·1 lb (20·9 kg) of fish and fishery products a year, compared to an average 34·6 lb (15·7 kg) for the world as a whole.

Tennessee Valley Authority. Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 sq. miles in the seven Tennessee River Valley states: Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia. In addition, 76 counties outside the Valley are served by TVA power distributors. Its three directors are appointed by the President, with the consent of the Senate; headquarters are in Knoxville (TN). Under a policy announced in Dec. 1994 the TVA is subject to a debt ceiling of $30,000m. Total debt in 1994 was $26,000m.

The primary task of the TVA was the multipurpose development of the Tennessee River for flood control, navigation, and electric power production. In 1994 three nuclear reactors were in operation.

The TVA has also contributed to controlling erosion on the land, introducing better fertilizers and new farming practices, eradicating malaria, demonstrating ways electricity could lighten the burdens in the home and increase production on the farm, and the creation of potential job-producing enterprises.

INDUSTRY

The largest companies in the USA—and the world—by market capitalization in Jan. 2002 were: The General Electric Company (US$372bn.); The Microsoft Corporation (US$327bn.), the world's leading software company; and The Exxon Mobil Corporation (US$300bn.), the world's largest integrated oil company. According to a survey published by the New York-based Interbrand in July 2000, Coca-Cola is the most valuable brand, worth US$72·5bn.

The following table presents industry statistics of manufactures as reported at various censuses from 1909 to 1980 and from the Annual Survey of Manufactures for years in which no census was taken.

The annual Surveys of Manufactures carry forward the key measures of manufacturing activity which are covered in detail by the Census of Manufactures. The large plants in the surveys account for approximately two-thirds of the total employment in operating manufacturing establishments in the USA.

The total number of employees in the manufacturing industry in 2000 was approximately 16,681,000. In 2000 manufacturing contributed 17% of GDP and provided 14% of jobs, down from 27% of GDP and 31% of jobs in 1960. Industrial production grew far faster during the 1990s than in any other major economy, output expanding by 34% during the period 1990–98. Employees worked an average of 41·5 hours per week in 2000 for an average weekly income of $597.

The leading industries in 1999 in terms of value added by manufacture (in $1m.) were: transportation equipment, 268,511; computer and electronic products, 265,442; chemicals and allied products, 229,284; food, 177,659; fabricated metal products, 142,451. In 1999 a total of 13,022,000 motor vehicles were made in the USA, making it the world's leading vehicle producer.

In 1999 principal commodities produced (by value of shipments, in $1m.) were: transportation equipment, 675,122; computer and electronic products, 458,485; food, 429,053; chemicals and allied products, 419,674; machinery, 277,117.

The USA is the world's largest beer producer, with 6,248m. gallons in 1999.

Net profits (1999) for manufacturing corporations reached a record $356bn. before tax ($261bn. after tax).

Iron and Steel. Output of the iron and steel industries (in 1m. net tons of 2,000 lb), according to figures supplied by the American Iron and Steel Institute, was:

	Pig iron (including ferro-alloys)	*Raw steel*	*Steel by method of production*[1]	
			Electric	*Basic Oxygen*

1998	53·2	108·8	49·1	59·7
1999	51·0	107·4	49·7	57·7

[1]The sum of these two items should equal the total in the preceding column; any difference is due to rounding.

In 1997 companies comprising 65% of raw steel production employed 83,466 wage-earners who worked an average of 42·7 hours per week and earned an average of $23·90 per hour: total employment costs were $6,465m. and total employment costs for 28,359 salaried employees were $2,378m.

Labour The Bureau of Labor Statistics estimated that in 2002 the civilian labour force was 144,863,000 (66·6% of those 16 years and over), of whom 136,485,000 were employed and 8,378,000 (5·8%) were unemployed. By April 2000 the unemployment rate was down to 3·8%—the lowest rate since 1970. However, it has risen in the meantime, and was 5·7% in Jan. 2003. Total non-farm payroll employment fell by 230,000 in the 12 months ending Dec. 2002. Employment by industry in 2002:

A total of 29 strikes and lockouts of 1,000 workers or more occurred in 2001, involving 99,000 workers and 1·2m. idle days; the number of idle days was less than one out of every 10,000 available workdays. Between 1989 and 1998 strikes cost the USA an average of 54 days per 1,000 employees a year.

On 1 Sept. 1997 the federal hourly minimum wage was raised from $4·75 to $5·15 an hour. On 1 Oct. 1996 it had been raised from $4·25 to $4·75 an hour, the first time it had been raised since 1991. Americans work among the longest hours in the world, averaging 1,996 hours in 1997.

Labour relations are legally regulated by the National Labor Relations Act, amended by the Labor–Management Relations (Taft–Hartley) Act, 1947 as amended by the Labor–Management Reporting and Disclosure Act, 1959, again amended in 1974, and the Railway Labor Act of 1926, as amended in 1934 and 1936.

A survey for the World Economic Forum's *1999 Global Competitiveness Report* showed that the USA was the easiest country in the world in which to set up a business.

Trade Unions. The labour movement comprises 78 national and international labour organizations plus a large number of small independent local or single-firm labour organizations. The American Federation of Labor and the Congress of Industrial Organizations merged into one organization, the AFL–CIO, in 1955, with 13m. members in 2000. Its president is John Sweeney, elected 1995. There were 16,258,200 union members in total in 2000.

Unaffiliated or independent labour organizations, inter-state in scope, had an estimated total membership excluding all foreign members (1993) of about 3m.

Labour organizations represented 14·6% (17·8m.) of wage and salary workers in 2002; a newly developing 'associative unionism' is not based on the workplace, but provides representation for employees which is portable throughout their work history; 13·2% (16·1m.) were actual members of unions. 37·5% of employees in the public sector, and 8·5% in the private sector, were members of unions in 2002. Strongholds of organized labour are, industry-wise, iron and steel, railways, coal mining and car building; region-wise, East coast cities and the mid-West industrial belt.

INTERNATIONAL TRADE

The North American Free Trade Agreement (NAFTA) between the USA, Canada and Mexico was signed on 7 Oct. 1992 and came into effect on 1 Jan. 1994. The UK has had 'most-favoured-nation' status since 1815. In 1998 foreign direct investment totalled $811,756m., the leading investor still being the United Kingdom.

Imports and Exports. Total value of exports and imports (in $1bn.):

COMMUNICATIONS

Roads. On 31 Dec. 1999 the total public road mileage was 3,917,240 miles (urban, 846,059; rural, 3,071,181). Of the urban roads, 111,000 were state controlled and 740,000 under local control. 663,000 miles of rural roads were controlled by the states, about 2,299,000 miles of rural roads were under local control, and, in 1996, there were about 169,000 miles of federal park and forest roads. State highway funds were $83,675m. in 1999.

Motor vehicles registered in 1999: 216,309,000, of which 132,432,000 automobiles, 83,148,000 trucks and 729,000 buses. There were 187,170,000 licensed drivers in 1999 and 4,111,000 motorcycle registrations. The average distance travelled by a passenger car in the year 1999 was 11,900 miles. There were 41,717 deaths in road accidents in 1999.

Rail. Freight service is provided by 12 major independent railroad companies and several hundred smaller operators. Long-distance passenger trains are run by the National Railroad Passenger Corporation (Amtrak), which is federally assisted. Amtrak was set up in 1971 to maintain a basic network of long-distance passenger trains, and is responsible for almost all non-commuter services over some 38,000 route-km, of which it owns only 1,256 km (555 km electrified). Outside the major conurbations, there are almost no regular passenger services other than those of Amtrak, which carried 21,544,000 passengers in 1999. Passenger revenue for Amtrak (1999) was $1,067·8m.; revenue passenger miles, 5,289m.

Civil Aviation. The busiest airport in 2001 was Atlanta (Hartsfield International), which handled 37,181,068 passenger enplanements (34,382,731 on domestic flights). The second busiest was Chicago (O'Hare) with 31,529,561 passenger enplanements (27,519,219 on domestic flights), followed by Los Angeles International, with 29,365,436 passenger enplanements (22,134,944 on domestic flights). As well as being the three busiest airports in the USA for passenger traffic in 2001, they are also the three busiest in the world. New York (John F. Kennedy) was the busiest airport in the USA for international passenger enplanements in 2001, with 7,610,411, ahead of Los Angeles International, with 7,230,492. The leading domestic routes for 2000 were Los Angeles to/from New York (3,583,680 passengers), New York to/from Orlando (3,063,930) and Chicago to/from New York (3,057,540).

The leading airports in 2001 on the basis of aircraft departures completed were Chicago, O'Hare (463,948); Atlanta, Hartsfield International (449,450); Dallas/Fort Worth (417,874).

There were 35 airports with more than 100,000 international enplanements in 2001. These were, in descending order: New York (John F. Kennedy); Los Angeles; Miami; Chicago (O'Hare); New York (Newark); San Francisco; Atlanta (Hartsfield); Houston (George Bush); Honolulu; Dallas/Fort Worth; Washington, D.C. (Dulles International); Boston; Guam; Detroit (Metropolitan-Wayne County); Philadelphia; San Juan (Luis Muñoz Marin International); Orlando International; Seattle; Minneapolis/St Paul; Orlando (Sanford); New York (La Guardia); Fort Lauderdale (Hollywood International); Saipan; Phoenix; Denver; Las Vegas (McCarran); Charlotte; Baltimore; Cincinnati (Northern Kentucky International); Pittsburgh; San Jose; St Louis (Lambert); San Diego (Lindbergh Field); Tampa; Memphis.

In 2001 Delta Air Lines carried the most passengers of any airline in the world with 90,520,588 (around 4% on international flights), ahead of Southwest Airlines, with 73,742,202 (all on domestic flights) and American Airlines, with 69,881,469 (around 10% on international flights). American Airlines carried the most international passengers of any US carrier, ahead of United Airlines. American Airlines also flew the furthest of any carrier in the world in 1999, covering 1,550·1m. km (963·2m. miles), ahead of United Airlines, with 1,477·9m. km (918·3m. miles). In Dec. 2002 United Airlines filed for bankruptcy following a record loss of $2·1bn. in 2001 and reported losses of approximately $1·7bn. for the first nine months of 2002.

In 2001 US flag carriers in scheduled service enplaned 621m. revenue passengers (665m. in 2000).

Shipping. In Oct. 2001 the cargo-carrying US flag fleet consisted of 31,387 vessels, of which 3,835 were of 1,000 GRT and over (2,148 liquid carriers, 760 dry bulk carriers, 126 containerships and 801 other freighters). Of 27,552 vessels of less than 1,000 GRT, 1,767 were liquid carriers, 21,705 dry bulk carriers, 4 containerships and 4,076 other freighters. Shipping capacity in Oct. 2001 was 72,816,000 GRT, of which the vessels of 1,000 GRT and over totalled 31,877,000 GRT while those of less than 1,000 GRT totalled 40,939,000 GRT. On 1 Jan. 2002 the US merchant marine included 443 ocean-going self-propelled merchant vessels of 1,000 gross tons or over, with an aggregate 15·0m. DWT. This included 130 tankers of 7·5m. DWT.

In 1999 vessels totalling 440,341,000 NRT entered, and 302,344,000 NRT cleared, all US ports.

Telecommunications. Regional private companies formed from the American Telephone and Telegraph Co. after its dissolution in 1995 ('Baby Bells') operate the telephone, telegraph, telex and electronic transmission services system at the national and local levels. In 2000 main telephone lines numbered 192,518,800 (or 699·7 per 1,000 persons). There were 100·7m. mobile phone subscribers by the end of 2000, with the largest operators being Verizon and Cingular (ranked 3rd and 5th in the world, with 27·5m. and 19·7m. subscribers respectively). There were 161m. PCs in 2000 (585·2 for every 1,000 persons—the highest rate in the world) and in 1997 there were 21m. fax machines. The number of Internet users in April 2002 was estimated to be 165·75m., or 59·1% of the population (among the highest percentages in the world).

Legislation on the media and telecommunications of 1996 coming into force on 31 March 1999 aimed at deregulating the market while preserving safeguards

against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services.

Postal Services. The US Postal Service superseded the Post Office Department on 1 July 1971.

Postal business for the years ended in Sept. included the following items:

	1997	*1998*	*1999*	*2000*
Number of post offices, stations and branches	38,019	38,159	38,169	38,060
Operating revenue ($1m.)	58,331	60,116	62,755	64,581
Operating expenditures ($1m.)	54,873	57,786	60,642	62,992

SOCIAL INSTITUTIONS

Justice. Legal controversies may be decided in two systems of courts: the federal courts, with jurisdiction confined to certain matters enumerated in Article III of the Constitution, and the state courts, with jurisdiction in all other proceedings. The federal courts have jurisdiction exclusive of the state courts in criminal prosecutions for the violation of federal statutes, in civil cases involving the government, in bankruptcy cases and in admiralty proceedings, and have jurisdiction concurrent with the state courts over suits between parties from different states, and certain suits involving questions of federal law.

The highest court is the Supreme Court of the US, which reviews cases from the lower federal courts and certain cases originating in state courts involving questions of federal law. It is the final arbiter of all questions involving federal statutes and the Constitution; and it has the power to invalidate any federal or state law or executive action which it finds repugnant to the Constitution. This court, consisting of nine justices appointed by the President who receive salaries of $184,400 a year (the Chief Justice, $192,600), meets from Oct. until June every year. For the term ended June 2000 it disposed of 8,445 cases, deciding 81 on their merits. In the remainder of cases it either summarily affirms lower court decisions or declines to review. A few suits, usually brought by state governments, originate in the Supreme Court, but issues of fact are mostly referred to a master.

The US courts of appeals number 13 (in 11 circuits composed of three or more states and one circuit for the District of Columbia and one Court of Appeals for the Federal Circuit); the 179 circuit judges receive salaries of $159,100 a year. Any party to a suit in a lower federal court usually has a right of appeal to one of these courts. In addition, there are direct appeals to these courts from many federal administrative agencies. In the year ending 30 June 1997, 53,742 appeals were filed in the courts of appeals, including 1,417 in the Federal Circuit.

The trial courts in the federal system are the US district courts, of which there are 89 in the 50 states, one in the District of Columbia and one each in the Commonwealth of Puerto Rico and the Territories of the Virgin Islands, Guam and the Northern Marianas. Each state has at least one US district court, and three states have four apiece. Each district court has from one to 28 judgeships. There are 649 US district judges ($150,000 a year), who received 261,162 civil cases from 1 July 1997 to 30 June 1998.

In addition to these courts of general jurisdiction, there are special federal courts of limited jurisdiction. The US Court of Federal Claims (16 judges at $150,000 a year) decides claims for money damages against the federal government in a wide variety of matters; the Court of International Trade (9 judges at $150,000) determines controversies concerning the classification and valuation of imported merchandise.

The judges of all these courts are appointed by the President with the approval of the Senate; to assure their independence, they hold office during good behaviour and cannot have their salaries reduced. This does not apply to judges in the Territories, who hold their offices for a term of ten years or to judges of the US Court of Federal Claims. The judges may retire with full pay at the age of 70 years if they have served a period of ten years, or at 65 if they have 15 years of service, but they are subject to call for such judicial duties as they are willing to undertake.

In 1998–99, of the 251,511 civil cases filed in the district courts, 159,205 arose under various federal statutes (such as labour, social security, tax, patent, securities, antitrust and civil rights laws); 39,785 involved personal injury or property damage claims; 46,721 dealt with contracts; and 5,787 were actions concerning real property.

In 2000 the number of lawyers in the USA passed the 1m. mark, equivalent to 363 per 100,000 people.

Among the 66,055 offenders convicted in 1999 in the district courts, 24,275 persons were charged with alleged infractions of drug laws, 17,097 with public order offences, 12,712 with property offences and 2,781 with violent offences. All other people convicted were charged with miscellaneous general offences.

Persons convicted of federal crimes may be fined, released on probation under the supervision of the probation officers of the federal courts, confined in prison, or confined in prison with a period of supervised release to follow, also under the supervision of probation officers of the federal courts. Federal prisoners are confined in 87 institutions incorporating various security levels that are operated by the Bureau of Prisons. On 31 Dec. 2001 the total number of prisoners under the jurisdiction of Federal or State adult correctional authorities was 1,406,031. A record 1,962,220 inmates were held in Federal or State prisons or local jails at the end of 2001, giving a rate of 686 per 100,000 population.

The state courts have jurisdiction over all civil and criminal cases arising under state laws, but decisions of the state courts of last resort as to the validity of treaties or of laws of the USA, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the US. The state court systems are generally similar to the federal system, to the extent that they generally have a number of trial courts and intermediate appellate courts, and a single court of last resort. The highest court in each state is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but sometimes appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. The lowest tribunals are usually those of Justices of the Peace; many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances.

There were no executions from 1968 to 1976. The US Supreme Court had held the death penalty, as applied in general criminal statutes, to contravene the eighth and fourteenth amendments of the US constitution, as a cruel and unusual punishment when used so irregularly and rarely as to destroy its deterrent value. The death penalty was reinstated by the Supreme Court in 1976, but has not been authorized in Alaska, the District of Columbia, Hawaii, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, North Dakota, Rhode Island, Vermont, West Virginia and Wisconsin. There were, in Oct. 2002, 3,697 (including 53 women) prisoners under sentence of death. In 2002 there were 71 executions (66 in 2001 but only 14 in 1991). From 1976–2002 there were 820 executions of which 289 were in Texas and 87 in Virginia. The execution of young offenders under the age of 18 is still permitted and carried out in some states. For the first time since 1963, there were two executions under federal jurisdiction in 2001.

There were 15,517 murders in 2000, the lowest total since 1969. The murder rate in 2000 was 5·5 per 100,000 persons, down from 10·2 per 100,000 in 1980. 67·8% of all murders in 1997 were carried out with guns (53·3% of which were handguns).

Education. The adult literacy rate is at least 99%.

Elementary and secondary education is mainly a state responsibility. Each state and the District of Columbia has a system of free public schools, established by law, with courses covering 12 years plus kindergarten. There are three structural patterns in common use; the K8-4 plan, meaning kindergarten plus eight elementary grades followed by four high school grades; the K6-3-3 plan, or kindergarten plus six elementary grades followed by a three-year junior high school and a three-year

senior high school; and the K5-3-4 plan, kindergarten plus five elementary grades followed by a three-year middle school and a four-year high school. All plans lead to high-school graduation, usually at age 17 or 18. Vocational education is an integral part of secondary education. Many states also have two-year colleges in which education is provided at a nominal cost. Each state has delegated a large degree of control of the educational programme to local school districts (numbering 14,891 in school year 1998–99), each with a board of education (usually three to nine members) selected locally and serving mostly without pay. The school policies of the local school districts must be in accord with the laws and the regulations of their state Departments of Education. While regulations differ from one jurisdiction to another, in general it may be said that school attendance is compulsory from age 7 to 16.

'Charter schools' are legal entities outside the school boards administration. They retain the basics of public school education, but may offer unconventional curricula and hours of attendance. Founders may be parents, teachers, public bodies or commercial firms. Organization and conditions depend upon individual states' legislation. The first charter schools were set up in Minnesota in 1991. By Sept. 1999, 1,484 charter schools were operating in 31 states and Washington, D.C.

In 1940 a new category was established—the 'functionally illiterate', meaning those who had completed fewer than five years of elementary schooling; for persons 25 years of age or over this percentage was 1·6 in March 1999 (for the Black population it was 1·9%); it was 0·6% for white and 0·4% for Blacks in the 25–29-year-old group. It was reported in March 1999 that 83·4% of all persons 25 years old and over had completed four years of high school or more, and that 25·2% had completed a bachelor's degree or more. In the age group 25 to 29, 87·8% had completed four years of high school or more, and 28·2% had completed a bachelor's degree or more. However, according to a report published in 2001 nearly a third of American fourth graders (aged 9–10) are unable to read.

In the autumn of 1998, 14,549,000 students (8,582,000 full-time and 8,163,000 women) were enrolled in 3,913 colleges and universities; 2,218,000 were first-time students. 36·6% of the population between the ages of 18 and 24 were enrolled in colleges and universities. It is projected that in 2010 the student population will number 17,490,000.

Public elementary and secondary school revenue is supplied from the county and other local sources (44·8% in 1997–98), state sources (48·4%) and federal sources (6·8%). In 1998–99 expenditure for public elementary and secondary education totalled about $349,200m., including $303,500m. for current operating expenses, $37,700m. for capital outlay and $8,000m. for interest on school debt. The current expenditure per pupil in average daily attendance was about $6,900. The total cost per pupil, also including capital outlay and interest, amounted to about $7,960.

In 1998–99 total expenditure on education came to about 7·1% of GDP. Estimated total expenditures for private elementary and secondary schools in 1998–99 were about $27,700m. In 1998–99 college and university spending totalled about $246,300m., of which about $152,400m. was spent by institutions under public control. The federal government contributed about 12% of total current-fund revenue; state governments, 23%; student tuition and fees, 28%; and all other sources, 37%.

Vocational education below college grade, including the training of teachers to conduct such education, has been federally aided since 1918. Federal support for vocational education in 1998–99 amounted to about $1,128m. Many public high schools offer vocational courses in addition to their usual academic programmes.

[3]Estimated.

In the autumn of 1998 there were 18·0 pupils per teacher in public elementary schools in the USA and 14·2 pupils per teacher in public secondary schools.

Most of the private elementary and secondary schools are affiliated with religious denominations. In 1998–99 there were 6,990 Roman Catholic elementary schools with 1,876,000 pupils and 105,900 teachers, and 1,227 secondary schools with 620,000 pupils and 47,100 teachers.

During the school year 1998–99 high-school graduates numbered about 2,740,000 (of whom about 2,456,000 were from public schools). Institutions of higher education conferred about 1,184,000 bachelor's degrees during the year 1998–99, 559,000 associate's degrees; 430,000 master's degrees; 46,000 doctorates; and 78,600 first professional degrees. In 1998–99 the US Department of Education provided $11,685m. in grants, loans, work-study programmes and other financial assistance to post-secondary students. Other agencies of the Federal Government provided about $2,945m. in additional assistance.

During the academic year 1999–2000, 515,000 foreign students were enrolled in American colleges and universities. The countries with the largest numbers of students in American colleges were: China, 54,500; Japan, 46,900; India, 42,300; South Korea, 41,200; Taiwan, 29,200; Canada, 23,500.

In 1998–99, 130,000 US students were enrolled at colleges and universities abroad. The country attracting the most students from the USA was the United Kingdom, with 27,700.

School enrolment, Oct. 1999, embraced 96·0% of the children who were 5 and 6 years old; 98·7% of the children aged 7–13 years; 98·2% of those aged 14–15, 93·6% of those aged 16–17 and 60·6% of those aged 18–19.

The US National Center for Education Statistics estimates the total enrolment in the autumn of 2000 at all of the country's elementary, secondary and higher educational institutions (public and private) at 68·1m. (67·6m. in the autumn of 1999).

The number of teachers in regular public and private elementary and secondary schools in the autumn of 2000 was expected to increase slightly to about 3,250,000. The average annual salary of public school teachers was $40,600 in 1998–99.

A survey for the 1999 *World Competitiveness Yearbook* showed that well-educated people in the USA are the least likely of any country in the world to emigrate.

Health. Admission to the practice of medicine (for both doctors of medicine and doctors of osteopathic medicine) is controlled in each state by examining boards directly representing the profession and acting with authority conferred by state law. Although there are a number of variations, the usual time now required to complete training is eight years beyond the secondary school with up to three or more years of additional graduate training. Certification as a specialist may require between three and five more years of graduate training plus experience in practice. In Jan. 1999 the estimated number of active physicians (MD and DO—in all forms of practice) in the USA, Puerto Rico and outlying US areas was 756,700 (684,400 in 1994 and 552,700 in 1985).

Dental employment in 1998 numbered 202,000.

Number of hospitals listed by the American Hospital Association in 1999 was 5,890, with 994,000 beds (equivalent to 3·6 beds per 1,000 population). Of the total, 264 hospitals with 55,000 beds were operated by the federal government; 1,197 with 136,000 beds by state and local government; 3,012 with 587,000 beds by non-profit organizations (including church groups); 747 with 107,000 beds were

investor-owned. The categories of non-federal hospitals were (1999): 4,956 short-term general and special hospitals with 830,000 beds; 129 non-federal long-term general and special hospitals with 20,000 beds; 516 psychiatric hospitals with 87,000 beds; 4 tuberculosis hospitals with fewer than 500 beds.

Patient admissions to community hospitals (1999) was 32,359,000; average daily census was 525,500. There were 495·3m. outpatient visits.

Personal health-care costs projected for 1999 totalled $998,200m., distributed as follows: hospital care, $383,200m.; doctors, $221,400m.; nursing-home care, $87,300m.; drugs, $106,100m.; dentists, $53,700m.; medical durables, $14,300m.; home health care, $33,200m.; other personal health care, $32,400m. Total national health expenditure in 1998 (projected) amounted to $1,146·8bn. In 2000 the USA spent 13·0% of its GDP on health—over 2% more than any other leading industrialized nation. Public spending on health amounted to 44·3% of total health spending in 2000 (the lowest percentage of any major industrialized nation). A survey published by the World Health Organization in June 2000 to measure health systems in all of the sovereign countries and find which country has the best overall health care ranked the USA in 37th place.

In 1999, 22·7% of Americans (24·2% of males and 20·9% of females) were smokers, down from a peak of over 40% in 1964. By 1999, 26% of the population were considered obese (having a body mass index over 30), compared to 14·5% in the late 1970s.

Welfare. Social welfare legislation was chiefly the province of the various states until the adoption of the Social Security Act of 14 Aug. 1935. This as amended provides for a federal system of old-age, survivors and disability insurance; health insurance for the aged and disabled; supplemental security income for the aged, blind and disabled; federal state unemployment insurance; and federal grants to states for public assistance (medical assistance for the aged and aid to families with dependent children generally and for maternal and child health and child welfare services).

Legislation of Aug. 1996 began the transfer of aid administration back to the states, restricted the provision of aid to a maximum period of five years, and abolished benefits to immigrants (both legal and illegal) for the first five years of their residence in the USA. The Social Security Administration (formerly part of the Department of Health and Human Services but an independent agency since March 1995) has responsibility for a number of programmes covering retirement, disability, Medicare, Supplemental Security Income and survivors. The Administration for Children and Families (ACF), an agency of the Department of Health and Human Services, is responsible for federal programmes which promote the economic and social wellbeing of families, children, individuals and communities. ACF has federal responsibility for the following programmes: Temporary Assistance for Needy Families; low income energy assistance; Head Start; child care; child protective services; and a community services block grant. The ACF also has federal responsibility for social service programmes for children, youth, native Americans and persons with developmental disabilities.

The Administration on Aging (AoA), an agency in the US Department of Health and Human Services, is one of the nation's largest providers of home- and community-based care for older persons and their caregivers. Created in 1965 with the passage of the Older Americans Act (OAA), AoA is part of a federal, state, tribal and local partnership called the National Network on Aging. It serves about 7m. older persons and their caregivers, and consists of 56 State Units on Aging, 655 Area Agencies on Aging, 236 Tribal and Native organizations, 2 organizations that serve Native Hawaiians, 29,000 service providers and thousands of volunteers. These organizations provide assistance and services to older individuals and their families in urban, suburban, and rural areas throughout the USA.

The Health Care Financing Administration, an agency of the Health and Human Services Department, has federal responsibility for health insurance for the aged and disabled. Unemployment insurance is the responsibility of the Department of Labor.

In 1999 an average of 2,512,000 families (6,722 recipients) were receiving payments under Temporary Assistance for Needy Families. Total payments under

Temporary Assistance for Needy Families were $22,585m. in 1999. The role of Child Support Enforcement is to ensure that children are supported by their parents. Money collected is for children who live with only one parent because of divorce, separation or out-of-wedlock birth. In 1999 approximately $15,843m. was collected on behalf of these children.

The Social Security Act provides for protection against the cost of medical care through Medicare, a two-part programme of health insurance for people age 65 and over, people of any age with permanent kidney failure, and for certain disabled people under age 65 who receive Social Security disability benefits. In 2000 payments totalling $130,284m. were made under the hospital portion of Medicare. During the same period, $88,991m. was paid under the voluntary medical insurance portion of Medicare. A total of 29·6m. people received Medicare payments in 1998.

In 2000 about 44·3m. beneficiaries were on the rolls; the average paid to a retired worker (not counting any benefits paid to his/her dependants) in 2000 was $845 per month. Full retirement benefits are now payable at age 65, with reduced benefits available as early as age 62. Beginning in 2000, the age for full retirement benefits will gradually increase until it reaches 67 in 2027. In 1995 the average actual retirement age for males was 63.

Medicaid is a jointly-funded, Federal-State health insurance programme for certain low-income and needy people. It covers 36m. individuals including children, the aged, blind, and/or disabled, and people who are eligible to receive federally-assisted income maintenance payments.

In Dec. 1999, 6·56m. persons were receiving Supplementary Security Income payments. 1,308,000 old-age persons received $4,725m. in benefits; 79,000 blind people received $391m.; and 5,169,000 disabled people received $25,772m. Payments, including supplemental amounts from various states, totalled $30,959m. in 1999.

In 1998 a total of $391,733m. was spent on cash and non-cash benefits (such as food stamps) for persons with limited incomes. In 2000 the food stamp programme helped 17,163,000 persons at a cost of $14,985m.; and 27,200,000 persons received help from the national school lunch programme at a cost of $5,489m.

CULTURE

Broadcasting. The licensing agency for broadcasting stations is the Federal Communications Commission, an independent federal body composed of five Commissioners appointed by the President. Its regulatory activities comprise: allocation of spectrum space; consideration of applications to operate individual stations; and regulation of their operations. In 1996 there were 12,313 commercial radio stations, 1,174 commercial TV stations, 352 non-commercial TV stations and 11,119 cable TV systems. Programming is targeted to appeal to a given segment of the population or audience taste. There are five national TV networks (three commercial; colour by NTSC) with 46 national cable networks. All major cities have network affiliates and additional commercial stations.

Legislation on the media and telecommunications of 1996 came into force on 31 March 1999 deregulating the market while preserving safeguards against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services.

Broadcasting to countries abroad is conducted by The Voice of America, which functions under a seven-member council nominated by the President and reviewed by Congress. Voice of America has an annual audience of 94m. and broadcasts in over 50 languages.

In 1997 there were 575m. radio receivers in use, equivalent to 2,116 per 1,000 inhabitants. No other country averaged more than 1,500 radios per 1,000. There were 219m. TV receivers in use in 1997, equivalent to 806 per 1,000 inhabitants (a rate exceeded only in Bermuda). In 1999 there were 66·7m. cable TV subscribers.

Cinema. In Jan. 1994 there were 25,737 screens, including 850 drive-ins; gross box office receipts came to US$5·25bn. 628 full-length films were made in 1999. An estimated 66% of adults went to the cinema in 1997.

Press. In 2000 there were 1,480 daily newspapers with a combined daily circulation of 55·8m., the second highest in the world behind Japan. There were 766 morning papers and 727 evening papers, plus 917 Sunday papers (circulation, 59·4m.). Unlike Japan, where circulation is rising, in the USA it has fallen since 1985, when daily circulation was 62·8m. The most widely read newspapers are *USA Today* (average daily circulation in March 2001 of 1·85m.), followed by the *Wall Street Journal* (1·82m.) and the *New York Times* (1·16m.).

Books published in 1998 totalled 120,244, of which 14,645 were sociology and economics, 11,016 fiction, 9,195 juvenile and 9,103 technology.

Tourism. In 1999 the USA received 48,491,000 visitors, of whom 14,110,000 were from Canada and 9,915,000 from Mexico. 23% of all tourists were from Europe. Only France and Spain received more tourists than the USA in 1999.

In 1999 visitors to the USA spent approximately $74,448m. (excluding transportation paid to US international carriers). The USA has the highest annual revenue from tourists of any country (more than twice as much as Spain, which received the second most in 1999). Expenditure by US travellers in foreign countries for 1999 was an estimated $59,331m. (excluding transportation paid to foreign flag international carriers).

Festivals. There are major opera festivals at Glimmerglass, New York (July–Aug.), Santa Fe, New Mexico (June–Aug.) and Seattle, Washington (Aug.). Among the many famous film festivals are the Sundance Film Festival in Jan. and the New York Film Festival in late Sept./early Oct.

Museums and Galleries. Among the most famous museums are the National Gallery in Washington, D.C., the Museum of Fine Arts in Boston, the Metropolitan Museum, the Guggenheim Museum, and the Museum of Modern Art, all in New York, and the Museum of Art in Philadelphia. In 1997, 35% of US adults visited an art museum at least once.

STATES AND TERRITORIES

GENERAL DETAILS

Against the names of the Governors, Lieut.-Governors and the Secretaries of State, (D.) stands for Democrat and (R.) for Republican.

Figures for the revenues, expenditures and debt outstanding of the various states are those of the Federal Bureau of the Census, which takes the original state figures and arranges them on a common pattern so that those of one state can be compared with those of any other.

ALABAMA

KEY HISTORICAL EVENTS

The early European explorers were Spanish, but the first permanent European settlement was French, as part of French Louisiana after 1699. During the 17th and 18th centuries the British, Spanish and French all fought for control of the territory; it passed to Britain in 1763 and thence to the USA in 1783, except for a Spanish enclave on Mobile Bay, which lasted until 1813. Alabama was organized as a Territory in 1817 and was admitted to the Union as a state on 14 Dec. 1819.

The economy was then based on cotton, grown in white-owned plantations by black slave labour imported since 1719. Alabama seceded from the Union at the beginning of the Civil War (1861) and joined the Confederate States of America; its capital Montgomery became the Confederate capital. After the defeat of the Confederacy the state was re-admitted to the Union in 1878. Attempts made during the reconstruction period to find a role for the newly freed black slaves—who made up about 50% of the population—largely failed, and when whites regained political control in the 1870s a strict policy of segregation came into force. At the same time Birmingham began to develop as an important centre of iron- and steel-making. Most of the state was still rural. In 1915 a boll-weevil epidemic attacked the cotton and forced diversification into other farm produce. More industries developed from the power schemes of the Tennessee Valley Authority in the 1930s. The black population remained mainly rural, poor and without political power, until the 1960s when confrontations on the issue of civil rights produced reforms.

TERRITORY AND POPULATION

Alabama is bounded in the north by Tennessee, east by Georgia, south by Florida and the Gulf of Mexico and west by Mississippi. Land area, 50,744 sq. miles (131,426 sq. km). Census population, 1 April 2000, 4,447,100 (55·4% urban), an increase of 10·1% since 1990; July 2002 estimate, 4,486,508.

Population in five census years was:

	White	*Black*	*Indian*	*Asiatic*	*Total*	*Per sq. mile*
1930	1,700,844	944,834	465	105	2,646,248	51·3
			All others			
1970	2,533,831	903,467	6,867		3,444,165	66·7
1980	2,872,621	996,335	24,932		3,893,888	74·9
1990	2,975,797	1,020,705	44,085		4,040,587	79·6
2000	3,162,808	1,155,930	128,362		4,447,100	87·6

Of the total population in 2000, 2,300,596 were female, 3,323,678 were 18 years old or older and 2,462,673 were urban. In 2000 the Hispanic population was 75,830, up from 24,629 in 1990 (an increase of 207·9%).

The large cities (2000 census) were: Birmingham, 242,820 (metropolitan area, 921,106); Montgomery (the capital), 201,568 (333,055); Mobile, 198,905 (540,258); Huntsville, 158,216 (342,376); Tuscaloosa, 77,906 (164,875).

For the 108th Congress, which convened in Jan. 2003, Alabama sends seven members to the House of Representatives. It is represented in the Senate by Richard Shelby (D. 1987–94; R. 1994–2005) and Jeff Sessions (R. 1997–2009).

ALASKA

KEY HISTORICAL EVENTS

Discovered in 1741 by Vitus Bering, Alaska's first settlement, on Kodiak Island, was in 1784. The area known as Russian America with its capital (1806) at Sitka was ruled by a Russo-American fur company and vaguely claimed as a Russian colony. Alaska was purchased by the United States from Russia under the treaty of 30 March 1867 for $7·2m. Settlement was boosted by gold workers in the 1880s. In 1884 Alaska became a 'district' governed by the code of the state of Oregon. By Act of Congress approved 24 Aug. 1912 Alaska became an incorporated Territory; its first legislature in 1913 granted votes to women, seven years in advance of the Constitutional Amendment.

During the Second World War the Federal government acquired large areas for defence purposes and for the construction of the strategic Alaska Highway. In the 1950s oil was found. Alaska became the 49th state of the Union on 3 Jan. 1959. In the 1970s new oilfields were discovered and the Trans-Alaska pipeline was opened in 1977. The state obtained most of its income from petroleum by 1985.

Questions of land-use predominate; there are large areas with valuable mineral resources, other large areas held for the native peoples and some still held by the Federal government. The population increased by over 400% between 1940 and 1980.

TERRITORY AND POPULATION

Alaska is bounded north by the Beaufort Sea, west and south by the Pacific and east by Canada. The total area is 663,267 sq. miles (1,717,854 sq. km), making it the largest state of the USA; 571,951 sq. miles (1,481,346 sq. km) are land and 91,316 sq. miles (236,507 sq. km) are water. It is also the least densely populated state. Census population, 1 April 2000, was 626,932, an increase of 14·0% over 1990; July 2002 estimate, 643,786.

Population in five census years was:

	White	*Black*	*All Others*	*Total*	*Per sq. mile*
1950	92,808	. . .	35,835	128,643	0·23

Of the total population in 2000, 324,1212 were male, 436,215 were 18 years old or older and 411,257 were urban. Alaska's Hispanic population was 24,795 in 2000, up from 17,803 in 1990.

The largest county equivalent and city is in the borough of Anchorage, which had a 2000 census population of 260,283. Census populations of the other 14 county equivalents, 2000: Fairbanks North Star, 82,840; Matanuska-Susitna 59,322; Kenai Peninsula, 49,691; Juneau, 30,711; Bethel, 16,006; Ketchikan Gateway, 14,070; Kodiak Island, 13,913; Valdez-Cordova, 10,195; Nome, 9,196; Sitka, 8,835; North Slope, 7,385; Northwest Arctic, 7,208; Wade Hampton, 7,028; Wrangell-Petersburg, 6,684. CONSTITUTION AND GOVERNMENT

The state has the right to select 103·55m. acres of vacant and unappropriated public lands in order to establish 'a tax basis'; it can open these lands to prospectors for minerals, and the state is to derive the principal advantage in all gains resulting from the discovery of minerals. In addition, certain federally administered lands reserved for conservation of fisheries and wild life have been transferred to the state. Special provision is made for federal control of land for defence in areas of high strategic importance.

The constitution of Alaska was adopted by public vote, 24 April 1956. The state legislature consists of a Senate of 20 members (elected for four years) and a House of Representatives of 40 members (elected for two years).

For the 108th Congress, which convened in Jan. 2003, Alaska sends one member to the House of Representatives. It is represented in the Senate by Ted Stevens (R. 1968–2009) and Lisa Murkowski (R. 2002–05). The franchise may be exercised by all citizens over 18.

The capital is Juneau.

Agriculture. In some parts of the state the climate during the brief spring and summer (about 100 days in major areas and 152 days in the southeastern coastal area) is suitable for agricultural operations, thanks to the long hours of sunlight, but Alaska is a food-importing area. In 2000 there were 580 farms covering a total of 920,000 acres. The average farm had 1,586 acres in 2000.

Total value of agricultural products in 1994: $27,766,000 of which $2,828,000 was from feed crops, $2,738,000 from vegetables (including potatoes), $6·1m. from livestock and poultry, $2,465,000 from dairy products and $15,833,000 from greenhouse and nursery industries. Net income from farms in 1996 was $10m.

At 1 Jan. 1995 there were 9,900 cattle and calves and 1,700 sheep and lambs; at 1 Dec. 1994, 2,000 hogs and pigs and 2,000 poultry. There were about 33,000 reindeer in western Alaska in 1994. Sales of reindeer meat and by-products in 1994 were valued at $1,366,000.

The interior forest covers 115m. acres; more than 13m. acres are considered commercial forest, of which 3·4m. acres are in designated parks or wilderness and unavailable for harvest. The coastal rain forests provide the bulk of commercial timber volume; of their 13·6m. acres, 7·6m. acres support commercial stands, of which 1·9m. acres are in parks or wilderness and unavailable for harvest. In 1992, 590m. bd ft of timber were harvested from private land for a total value of $548·9m., and in 1993, 9·38m. bd ft from state land for $342·6m.

There are 624 designated wilderness areas throughout the USA, covering a total of 104m. acres (42m. ha). Nearly 56% of the system is in Alaska (58·18m acres or 23·54m. ha).

Fisheries. The catch for 1993 was 2·7m. lb of fish and shellfish having a value to fishermen of $905m. The most important species are salmon, crab, herring, halibut and pollock.

Rail. There is a railway of 111 miles from Skagway to the town of Whitehorse, the White Pass and Yukon route, in the Canadian Yukon region (this service operates seasonally). The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 471 miles. This is a freight service with only occasional passenger use. A passenger service operates from Anchorage to Fairbanks via Denali National Park in the tourist season.

Civil Aviation. Alaska's largest international airports are Anchorage and Fairbanks. In 1999 Alaska Airlines flew 209·2m. km, carrying 13,604,000 passengers (1,530,300 on international flights). There were 2,710,848 passenger enplanements statewide in 1999. General aviation aircraft in the state per 1,000 population is about 10 times the US average.

Shipping. Regular shipping services to and from the USA are furnished by two steamship and several barge lines operating out of Seattle and other Pacific coast ports. A Canadian company also furnishes a regular service from Vancouver, BC. Anchorage is the main port.

A 1,435 nautical-mile ferry system for motor cars and passengers (the 'Alaska Marine Highway') operates from Bellingham, Washington and Prince Rupert (British Columbia) to Juneau, Haines (for access to the Alaska Highway) and Skagway. A second system extends throughout the south-central region of Alaska linking the Cook Inlet area with Kodiak Island and Prince William Sound.

ARIZONA

KEY HISTORICAL EVENTS

Spaniards looking for sources of gold or silver entered Arizona in the 16th century, finding there people from several Native American groups, including Tohono O'odham, Navajo, Hopi and Apache. The first Spanish Catholic mission was founded in the early 1690s by Father Eusebio Kino, settlements were made in 1752 and a Spanish army headquarters was set up at Tucson in 1776. The area was governed by Mexico after the collapse of Spanish colonial power. Mexico ceded it to the USA in the Treaty of Guadelupe Hidalgo after the Mexican-American war (1848). Arizona was then part of New Mexico; the Gadsen Purchase (of land south of the Gila River) was added to it in 1853. The whole was organized as the Arizona Territory on 24 Feb. 1863.

Miners and ranchers began settling in the 1850s. Conflicts between Indian and immigrant populations intensified when troops were withdrawn to serve in the Civil War. The Navajo surrendered in 1865, but the Apache continued to fight, under Geronimo and other leaders, until 1886. Arizona was admitted to the Union as the 48th state in 1912.

Large areas of the state have been retained as Indian reservations and as parks to protect the exceptional desert and mountain landscape. In recent years this landscape and the Indian traditions have been used to attract tourist income.

TERRITORY AND POPULATION

Arizona is bounded north by Utah, east by New Mexico, south by Mexico, west by California and Nevada. Land area, 113,634 sq. miles (294,313 sq. km). Of the total area in 1992, 28% was Indian Reservation, 17% was in individual or corporate ownership, 19% was held by the US Bureau of Land Management, 15% by the US Forest Service, 13% by the State and 8% by others. Census population on 1 April 2000 was 5,130,632, an increase of 40·0% over 1990. July 2002 estimate, 5,456,453. The rate of Arizona's population increase during the 1990s was the second fastest in the USA, at 40%. Nevada is the only state to have had faster growth.

ARKANSAS

KEY HISTORICAL EVENTS

In the 16th and 17th centuries French and Spanish explorers entered Arkansas, finding there tribes of Chaddo, Osage and Quapaw. The first European settlement was French, at Arkansas Post in 1686, and the area became part of French Louisiana. The USA bought Arkansas from France as part of the Louisiana Purchase in 1803, it was organized as a Territory in 1819 and entered the Union on 15 June 1836 as the 25th state.

The eastern plains by the Mississippi were settled by white plantation-owners who grew cotton with black slave labour. The rest of the state attracted a scattered population of small farmers. The plantations were the centre of political power. Arkansas seceded from the Union in 1861 and joined the Confederate States of America. At that time the slave population was about 25% of the total.

In 1868 the state was re-admitted to the Union. Attempts to integrate the black population into state life achieved little, and a policy of segregation was rigidly adhered to until the 1950s. In 1957 federal authorities ordered that high school segregation must end. The state governor called on the state militia to prevent desegregation; there was rioting, and federal troops entered Little Rock, the capital, to restore order. It was another ten years before school segregation finally ended.

The main industrial development followed the discovery of large reserves of bauxite.

CALIFORNIA

KEY HISTORICAL EVENTS

There were many small Indian tribes, but no central power, when the area was discovered in 1542 by the Spanish navigator Juan Cabrillo. The Spaniards did not begin to establish missions until the 18th century, when the Franciscan friar Junipero Serra settled at San Diego in 1769. The missions became farming and ranching villages with large Indian populations. When the Spanish empire collapsed in 1821, the area was governed from newly independent Mexico.

The first wagon-train of American settlers arrived from Missouri in 1841. In 1846, during the war between Mexico and the USA, Americans in California proclaimed it to be part of the USA. The territory was ceded by Mexico on 2 Feb. 1848 and became the 31st state of the Union on 9 Sept. 1850.

Gold was discovered in 1848–49 and there was an immediate influx of population. The state remained isolated, however, until the development of railways in the 1860s. From then on the population doubled on average every 20 years. The sunny climate attracted fruit-growers, market-gardeners and wine producers. In the early 20th century the bright lights and cheap labour attracted film-makers to Hollywood, Los Angeles.

Southern California remained mainly agricultural with an Indian or Spanish-speaking labour force until after the Second World War. Now more than 90% of the population is urban, with the main manufacture being hi-technology equipment, much of it for the aerospace, computer and office equipment industries.

TERRITORY AND POPULATION

Land area, 155,959 sq. miles (403,932 sq. km). Census population, 1 April 2000, 33,871,648, an increase of 4,111,627, or 13·8%, over 1990. July 2002 estimate, 35,116,033, an increase of 1·74% from 2001. The growth rate reflects continued high though somewhat reduced natural increase (excess of births over deaths) as well as substantial net immigration.

California has the largest Hispanic population of any state in the USA in terms of numbers and the second largest in terms of percentage of population. In 2000 there were 10,966,556 Hispanics living in California (32·4% of the overall population), representing a rise of 3,278,618 since 1990, the largest numeric rise of any state over the same period. ECONOMY

Per capita personal income (2001) was $32,702.

Budget. For the year ending 30 June 2002, total state revenues were $82·9bn. Total expenditures were $96·2bn. (education, $40·4bn.; health and human services, $26·5bn.; youth and adult corrections, $5·7bn.). Debt outstanding (2002) $25·3bn.

Performance. California's economy, the largest among the 50 states and one of the largest in the world, has major components in high technology, trade, entertainment,

agriculture, manufacturing, tourism, construction and services. California experienced an economic recession in 2001 and a sluggish recovery in 2002, with greatest impacts in the high technology sector. The economy improved in the first half of 2002, with employment and total state personal income posting gains. The improvement had faltered by the middle of the year, however, and the economy was sluggish in the second half of 2002, with unemployment varying narrowly between 6·4% and 6·6% and employment faltering by about 28,000. If California were a country in its own right it would be the world's fifth largest economy, after the USA, Japan, Germany and the United Kingdom. 2000 Gross State Product was $1,344,623m., representing more than 13% of the USA's total GDP. Taxable sales in 2001 totalled $441,518m.

Banking and Finance. In 1997 there were 9,796 establishments of depository institutions which included 5,740 commercial banks, 2,626 savings institutions and 1,306 credit unions.

ENERGY AND NATURAL RESOURCES

Electricity. Californians spent $20bn. on electricity in 1999. Total consumption amounted to 260,936m. kWh. 75% of electricity is derived from in-state resources. In Jan. 2001 Governor Gray Davis announced a state of emergency after power shortages led to a series of blackouts.

Oil and Gas. California is the nation's 4th largest oil producing state. Total onshore and offshore production was 261m. bbls. in 2001. California ranks 10th out of US states for the production of natural gas. Net natural gas production in 2001 was 338bn. cu. ft.

Water. The total area covered by water is approximately 2,895 sq. miles. Water quality is judged to be good along 83% of the 960 miles of assessed coastal shoreline.

Minerals. Gold output was 13,972 kg in 2001. Asbestos, boron minerals, diatomite, sand and gravel, lime, salt, magnesium compounds, clays, cement, silver, gypsum and iron ore are also produced.

In 2001 California ranked 1st among the states in non-fuel mineral production, accounting for more than 8% of the US total. The value of non-fuel minerals produced (2001) was $3·27bn.; the mining industry employed around 24,000 persons in 2001 (compared to 48,000 in the early 1980s).

Agriculture. California is the most diversified agricultural economy in the world, producing more than 350 agricultural commodities. In 2001 California led the nation in the production of more than 75 agricultural products. There were some 88,000 farms, comprising 28m. acres; average farm, 315 acres. Agricultural production and gross cash income in 2001 increased to $27·6bn., 1% more than the previous year but fractionally less than the record income set in 1997. Nuts and fruit remained the most significant cash crop (2001), accounting for 41% of the nation's total fruit and nut production and 26% of the state's gross agricultural income. Livestock and poultry accounted for 27%; vegetables, 22%; field crops, 9%; nursery, greenhouse products and floriculture, 11%. The state's leading billion-dollar agricultural products included milk and cream with receipts of $4·63bn.; grapes, $2·65bn.; nursery products, $2·09bn.; lettuce, $1·37bn.; cattle and calves, $1·35bn.; hay, $1·02bn.

Fisheries. The catch in 2001 was 443m. lb; leading species in landings were squid, sardine, anchovy, mackerel, urchin, tuna, sole, herring, whiting and crab.

INDUSTRY

In 2002 the fastest-growing industries were in public and private education, retail trade, health services, social services, management consulting and engineering. The continuing high technology slump made high technology business services and manufacturing the leading job-losing sectors. The manufacturing sector employed 1,816,008 people in 2002, including 242,025 in the field of electronic equipment, 264,275 in industrial machinery and 184,608 in food and similar products.

Labour. In 2002 the civilian labour force was 17·6m., of whom 16·5m. were employed. A total of 38,408 jobs were lost during 2002, led by electronic equipment manufacturing, computer-related services and computer and office equipment manufacturing. By the end of 2002 unemployment had risen to 6·6% from 6·1% a year earlier.

INTERNATIONAL TRADE

Exports to all but five of California's top 25 trading partners declined during 2001. High technology goods dominate California's exports, comprising almost three-quarters of all made-in-California exports. Electronic components and computers account for almost half of total exports. Even though exports of other commodities grew almost 4% during 2001 the reduction of high technology exports was great enough to cause a 10·8% overall drop.

COLORADO

KEY HISTORICAL EVENTS

Spanish explorers claimed the area for Spain in 1706; it was then the territory of the Arapaho, Cheyenne, Ute and other Plains and Great Basin Indians. Eastern Colorado, the hot, dry plains, passed to France in 1802 and then to the USA as part of the Louisiana Purchase in 1803. The rest remained Spanish, becoming Mexican when Spanish power in the Americas ended. In 1848, after war between Mexico and the USA, Mexican Colorado was ceded to the USA. A gold rush in 1859 brought a great influx of population, and in 1861 Colorado was organized as a Territory.

The Territory officially supported the Union in the Civil War of 1861–65, but its settlers were divided and served on both sides.

Colorado became a state in 1876. Mining and ranching were the mainstays of the economy. In the 1920s the first large projects were undertaken to exploit the Colorado River. The Colorado River Compact was agreed in 1922, and the Boulder Dam (now Hoover Dam) was authorized in 1928. Since then irrigated agriculture has overtaken mining as an industry and is as important as ranching. In 1945 the Colorado-Big Thompson project diverted water by tunnel beneath the Rocky Mountains to irrigate 700,000 acres (284,000 ha) of northern Colorado. Now more than 80% of the population is urban, with the majority engaged in telecommunications, aerospace and computer technology.

TERRITORY AND POPULATION

Colorado is bounded north by Wyoming, northeast by Nebraska, east by Kansas, southeast by Oklahoma, south by New Mexico and west by Utah. Land area, 103,718 sq. miles (268,628 sq. km).

There is a seven-member State Supreme Court.

For the 108th Congress, which convened in Jan. 2003, Colorado sends seven members to the House of Representatives. It is represented in the Senate by Ben Campbell (R. 1993–2005) and Wayne Allard (R. 1997–2009).

CONNECTICUT

KEY HISTORICAL EVENTS

Formerly territory of Algonquian-speaking Indians, Connecticut was first colonized by Europeans during the 1630s, when English Puritans moved there from Massachusetts Bay. Settlements were founded in the Connecticut River Valley at Hartford, Saybrook, Wethersfield and Windsor in 1635. They formed an organized commonwealth in 1637. A further settlement was made at New Haven in 1638 and was united to the commonwealth under a royal charter in 1662. The charter confirmed the commonwealth constitution, drawn up by mutual agreement in 1639 and called the Fundamental Orders of Connecticut.

The area was agricultural and its population of largely English descent until the early 19th century. After the War of Independence Connecticut was one of the original 13 states of the Union. Its state constitution came into force in 1818 and survived with amendment until 1965 when a new one was adopted.

In the early 1800s a textile industry was established using local water power. By 1850 the state had more employment in industry than in agriculture, and immigration from the continent of Europe (and especially from southern and eastern Europe) grew rapidly throughout the 19th century. Some immigrants worked in whaling and iron-mining, but most sought industrial employment. Settlement was spread over a large number of small towns, with no single dominant culture.

Yale University was founded at New Haven in 1701. The US Coastguard Academy was founded in 1876 at New London, a former whaling port.

DELAWARE

KEY HISTORICAL EVENTS

Delaware was the territory of Algonquian-speaking Indians who were displaced by European settlement in the 17th century. The first settlers were Swedes who came in 1638 to build Fort Christina (now Wilmington), and colonize what they called New Sweden. Their colony was taken by the Dutch from New Amsterdam in 1655. In 1664 the British took the whole New Amsterdam colony, including Delaware, and called it New York.

In 1682 Delaware was granted to William Penn, who wanted access to the coast for his Pennsylvania colony. Union of the two colonies was unpopular, and Delaware gained its own government in 1704, although it continued to share a royal governor with Pennsylvania until the War of Independence. Delaware then became one of the 13 original states of the Union and the first to ratify the federal constitution (on 7 Dec. 1787).

The population was of Swedish, Finnish, British and Irish extraction. The land was low-lying and fertile, and the use of slave labour was legal. There was a significant number of black slaves, but Delaware was a border state during the Civil War (1861–65) and did not leave the Union.

19th-century immigrants were mostly European Jews, Poles, Germans and Italians. The north became industrial and densely populated, more so after the Second World War with the rise of the petrochemical industry. Industry in general profited from the opening of the Chesapeake and Delaware Canal in 1829; it was converted to a toll-free deep channel for ocean-going ships in 1919.

TERRITORY AND POPULATION

Delaware is bounded in the north by Pennsylvania, northeast by New Jersey, east by Delaware Bay, south and west by Maryland. Land area 1,954 sq. miles (5,061 sq. km). Census population, 1 April 2000, was 783,600, an increase of 17·6% since 1990. July 2002 estimate, 807,385.

DISTRICT OF COLUMBIA

KEY HISTORICAL EVENTS

The District of Columbia, organized in 1790, is the seat of the government of the USA, for which the land was ceded by the states of Maryland and Virginia to the USA as a site for the national capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and federal authority over it became

vested in 1801. In 1846 the land ceded by Virginia (about 33 sq. miles) was given back.

TERRITORY AND POPULATION

The District forms an enclave on the Potomac River, where the river forms the southwest boundary of Maryland. The land area of the District of Columbia is 61 sq. miles (159 sq. km).

Census population, 1 April 2000, was 572,059 (100% urban), a decrease of 5·72% from that of 1990. July 2002 estimate, 570,898. Metropolitan area of Washington, D.C.–Baltimore (2000), 7,608,070. The Hispanic population in 2000 was 44,953, up from 32,710 in 1990 (an increase of 37·4%). Of the total population in 2000, 302,693 were female and 457,067 were 18 years old or older.

Marriages (1997), 3,800 (7·3 per 1,000 population in 1995); divorces, 1,200 (1997), 2·3. The abortion rate, at 68·1 for every 1,000 women in 2000, is the highest of any US state.

CLIMATE

Washington, Jan. 34°F (1·1°C), July 77°F (25°C). Annual rainfall 43" (1,064 mm). The District of Columbia belongs to the Atlantic Coast climate zone (*see* UNITED STATES: Climate).

CONSTITUTION AND GOVERNMENT

Local government, from 1 July 1878 until Aug. 1967, was that of a municipal corporation administered by a board of three commissioners, of whom two were appointed from civil life by the President, and confirmed by the Senate, for a term of three years each. The other commissioner was detailed by the President from the Engineer Corps of the Army. The Commission form of government was abolished in 1967 and a new Mayor Council instituted with officers appointed by the President with the advice and consent of the Senate. On 24 Dec. 1973 the appointed officers were replaced by an elected Mayor and councillors, with full legislative powers in local matters as from 1974. Congress retains the right to legislate, to veto or supersede the Council's acts. The 23rd amendment to the federal constitution (1961) conferred the right to vote in national elections. The District has two delegates in Congress who may vote in committees but not on the House floor.

RECENT ELECTIONS

In the 2000 presidential election Gore polled 171,923 votes; Bush, 18,073; Nader, 10,576.

ENERGY AND NATURAL RESOURCES

Water. The total area covered by water is approximately 7 sq. miles.

Justice. The death penalty was declared unconstitutional in the District of Columbia on 14 Nov. 1973. In June 2000 there were 8,575 federal and state prisoners.

The District's Court system is the Judicial Branch of the District of Columbia. It is the only completely unified court system in the United States, possibly because of the District's unique city-state jurisdiction. Until the District of Columbia Court Reform and Criminal Procedure Act of 1970, the judicial system was almost entirely in the hands of Federal government. Since that time, the system has been similar in most respects to the autonomous systems of the states.

Religion. The largest churches are the Protestant and Roman Catholic Christian churches; there are also Jewish, Eastern Orthodox and Islamic congregations.

Education. In 1996 there were an estimated 105,700 pupils enrolled at elementary and secondary public schools. Average expenditure per pupil in 1997 was $8,167.

FLORIDA

KEY HISTORICAL EVENTS

There were French and Spanish settlements in Florida in the 16th century, of which the Spanish, at St Augustine in 1565, proved permanent. Florida was claimed by Spain until 1763 when it passed to Britain. Although regained by Spain in 1783, the British used it as a base for attacks on American forces during the war of 1812. Gen. Andrew Jackson captured Pensacola for the USA in 1818. In 1819 a treaty was signed which ceded Florida to the USA with effect from 1821 and it became a Territory of the USA in 1822.

Florida had been the home of the Apalachee and Timucua Indians. After 1770 groups of Creek Indians began to arrive as refugees from the European-Indian wars. These 'Seminoles' or runaways attracted other refugees including slaves, the recapture of whom was the motive for the first Seminole War of 1817–18. A second war followed in 1835–42, when the Seminoles retreated to the Everglades swamps. After a third war in 1855–58 most Seminoles were forced or persuaded to move to reserves in Oklahoma.

Florida became a state in 1845. About half of the population were black slaves. At the outbreak of Civil War in 1861 the state seceded from the Union.

During the 20th century Florida continued to grow fruit and vegetables, but real-estate development (often for retirement) and the growth of tourism and the aerospace industry set it apart from other ex-plantation states.

TERRITORY AND POPULATION

Florida is a peninsula bounded in the west by the Gulf of Mexico, south by the Straits of Florida, east by the Atlantic, north by Georgia and northwest by Alabama. Land area, 53,927 sq. miles (139,670 sq. km). Census population, 1 April 2000, 15,982,378, an increase of 23·5% since 1990. July 2002 estimate, 16,713,149.

GEORGIA

KEY HISTORICAL EVENTS

Originally the territory of Creek and Cherokee tribes, Georgia was first settled by Europeans in the 18th century. James Oglethorpe founded Savannah in 1733, intending it as a colony which offered a new start to debtors, convicts and the poor. Settlement was slow until 1783, when growth began in the cotton-growing areas west of Augusta. The Indian population was cleared off the rich cotton land and moved beyond the Mississippi. Georgia became one of the original 13 states of the Union.

A plantation economy developed rapidly, using slave labour. In 1861 Georgia seceded from the Union and became an important source of supplies for the Confederate cause, although some northern areas never accepted secession and continued in sympathy with the Union during the Civil War. At the beginning of the war 56% of the population were white, descendants of British, Austrian and New England immigrants; the remaining 44% were black slaves.

The city of Atlanta, which grew as a railway junction, was destroyed during the war but revived to become the centre of southern states during the reconstruction period. Atlanta was confirmed as state capital in 1877. Also in Atlanta were developed successive movements for black freedom in social, economic and political life. The Southern Christian Leadership Conference, led by Martin Luther King (assassinated in 1968), was based in King's native city of Atlanta.

HAWAII

KEY HISTORICAL EVENTS

The islands of Hawaii were settled by Polynesian immigrants, probably from the Marquesas Islands, about AD 400. A second major immigration, from Tahiti, occurred around 800–900. In the late 18th century all the islands of the group were united into one kingdom by Kamehameha I. Western exploration began in 1778, and Christian missions were established after 1820. Europeans called Hawaii the Sandwich Islands. The main foreign states interested were the USA, Britain and France. Because of the threat imposed by their rivalry, Kamehameha III placed Hawaii under US protection in 1851. US sugar-growing companies became dominant in the economy and in 1887 the USA obtained a naval base at Pearl Harbour. A struggle developed between forces for and against annexation

by the USA. In 1893 the monarchy was overthrown. The republican government agreed to be annexed to the USA in 1898, and Hawaii became a US Territory in 1900.

The islands and the naval base were of great strategic importance during the Second World War, when the Japanese attack on Pearl Harbour brought the USA into the war.

Hawaii became the 50th state of the Union in 1959. The 19th-century plantation economy encouraged the immigration of workers, especially from China and Japan. Hawaiian laws, religions and culture were gradually adapted to the needs of the immigrant community.

TERRITORY AND POPULATION

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 54' and 28° 15' N. lat. and 154° 40' and 178° 25' W. long., about 2,090 nautical miles southwest of San Francisco. There are 137 named islands and islets in the group, of which 7 major and 5 minor islands are inhabited. Land area, 6,423 sq. miles (16,636 sq. km). Census population, 1 April 2000, 1,211,537, an increase of 9·3% since 1990; density was 188·6 per sq. mile in 1990. July 2002 estimate, 1,244,898. Of the total population in 2000, 608,671 were male, 915,770 were 18 years old or older, and 1,108,225 were urban (91·47%, the fourth most urban state).

The principal islands are Hawaii, 4,028 sq. miles, population 1990, 120,317; Maui, 727 sq. miles, population 91,361; Oahu, 600 sq. miles, population 836,231; Kauai, 552 sq. miles, population 50,947; Molokai, 260 sq. miles, population 6,717; Lanai, 141 sq. miles, population 2,426; Niihau, 70 sq. miles, population 230; Kahoolawe, 45 sq. miles (uninhabited). The capital Honolulu—on the island of Oahu—had a population in 2000 of 371,657, and Hilo—on the island of Hawaii—40,759.

Estimated figures in 1999 for racial groups (excluding persons in institutions or military barracks) were: 252,742 white; 223,193 Hawaiian; 219,855 Japanese; 145,248 Filipinos; 44,787 Chinese; 17,430 black (1998); 13,693 Samoan and Tongan; 11,737 Korean; 95,456 Hispanic; 128,144 all others (1998).

Births, 1999, were 16,864 (14·2 per 1,000 population); deaths, 8,369 (7·1). Infant deaths, 1998, were at a rate of 6·8 per 1,000 live births. There were 22,873 resident marriages (7·4 per 1,000 population), and divorces and annulments numbered 4,376 (4·1 per 1,000 population) in 1999. Inter-marriage between the races is common. In 1998, 46·3% of marriages were inter-racial. 58·3% were non-resident marriages.

CLIMATE

All the islands have a tropical climate, with an abrupt change in conditions between windward and leeward sides, most marked in rainfall. Temperatures vary little. Average temperatures in Honolulu in 1999: warmest month 81·4°F, coolest month 72·9°F. Annual rainfall in Honolulu (1997) 22·02".

CONSTITUTION AND GOVERNMENT

Hawaii was officially admitted into the United States on 21 Aug. 1959. However, the constitution of the State of Hawaii was created by the 1950 Constitutional Convention, ratified by the voters of the Territory on 7 Nov. 1950, and amended on 27 June 1959. There have been two constitutional conventions since 1950, in 1968 and 1978. In addition to amendments proposed by these conventions the Legislature is able to propose amendments to voters during the general election. This has resulted in numerous amendments.

For the 108th Congress, which convened in Jan. 2003, Hawaii sends two members to the House of Representatives. It is represented in the Senate by Daniel Inouye (D. 1963–2005) and Daniel Akaka (D. 1990–2007).

IDAHO

KEY HISTORICAL EVENTS

The original people of Idaho were Kutenai, Kalispel, Nez Percé and other tribes, living on the Pacific watershed of the northern Rocky Mountains. European exploration began in 1805, and after 1809 there were trading posts and small

settlements, with fur-trapping as the primary economic activity. The area was disputed between Britain and the USA until 1846 when British claims were dropped. In 1860 gold and silver were found, and there was a rush of immigrant prospectors. The newly enlarged population needed organized government. An area including that which is now Montana was created a Territory in March 1863. Montana was separated from it in 1864. Population growth continued, stimulated by refugees from the Confederate states after the Civil War and by settlements of Mormons from Utah.

Fur-trapping and mining gave way to farming, especially of grains, as the main economic activity. Idaho became a state in 1890, with its capital at Boise. The Territory capital, Idaho City, had been a gold-mining boom town in the 1860s whose population (about 40,000 at its height) was the largest in the Pacific Northwest. The population declined to 1,000 by 1869.

During the 20th century the Indian population shrunk to nearly 1%. The Mormon community has grown to include much of southeastern Idaho and more than half the church-going population of the state.

Industrial history has been influenced by the development of the Snake River of southern Idaho for hydro-electricity and irrigation, especially at the American Falls and reservoir. Processing food, minerals and timber are important to the economy. Much of the state, however, remains sparsely populated and rural. Rapid growth of high technology companies in Idaho's metropolitan areas has prompted economic diversification and rapid population growth.

TERRITORY AND POPULATION

Idaho is within the Rocky Mountains and bounded north by Canada, east by Montana and Wyoming, south by Nevada and Utah, west by Oregon and Washington. Land area, 82,747 sq. miles (214,314 sq. km). Census population, 1 April 2000, 1,293,953, an increase of 28·5% since 1990. July 2002 estimate, 1,341,131.

Population in five census years was:

ILLINOIS

KEY HISTORICAL EVENTS

Territory of a group of Algonquian-speaking tribes, Illinois was explored first by the French in 1673. France claimed the area until 1763 when, after the French and Indian War, it was ceded to Britain along with all the French land east of the Mississippi. In 1783 Britain recognized the US' title to Illinois, which became part of the North West Territory of the USA in 1787, and of Indiana Territory in 1800. Illinois became a Territory in its own right in 1809, and a state in 1818.

Settlers from the eastern states moved on to the fertile farmland, immigration increasing greatly with the opening in 1825 of the Erie Canal from New York along which settlers could move west and their produce back east for sale. Chicago was incorporated as a city in 1837 and quickly became the transport, trading and distribution centre of the middle west. Once industrial growth had begun there, a further wave of immigration took place in the 1840s, mainly of European refugees looking for work. This movement continued with varying force until the 1920s, when it was largely replaced by immigration of black work-seekers from the southern states.

During the 20th century the population became largely urban and heavy industry was established along an intensive network of rail and waterway routes. Chicago recovered from a destructive fire in 1871 to become the hub of this network and at one time the second largest American city.

INDIANA

KEY HISTORICAL EVENTS

The area was inhabited by Algonquian-speaking tribes when the first European explorers (French) laid claim to it in the 17th century. They established some fortified trading posts but there was little settlement. In 1763 the area passed to Britain, with other French-claimed territory east of the Mississippi. In 1783 Indiana became part of the North West Territory of the USA; it became a separate territory in 1800 and a state in 1816. Until 1811 there had been continuing conflict with the Indian inhabitants, who were then defeated at Tippecanoe.

Early farming settlement was by families of British and German descent, including Amish and Mennonite communities. Later industrial development offered an incentive for more immigration from Europe, and, later, from the southern states. In 1906 the town of Gary was laid out by the United States Steel Corporation and named after its chairman, Elbert H. Gary. The industry flourished on navigable water midway between supplies of iron ore and of coal. Trade and distribution in general benefited from Indiana Port on Lake Michigan, especially after the opening of the St Lawrence Seaway in 1959. The Ohio River was also exploited for carrying freight.

Indianapolis was built after 1821 and became the state capital in 1825. Natural gas was discovered in the neighbourhood in the late 19th century. This stimulated the growth of a motor industry, celebrated by the Indianapolis 500 race, held annually since 1911.

TERRITORY AND POPULATION

Indiana is bounded west by Illinois, north by Michigan and Lake Michigan, east by Ohio and south by Kentucky across the Ohio River. Land area, 35,867 sq. miles (92,895 sq. km). Census population, 1 April 2000, was 6,080,485, an increase of 9·7% since 1990. July 2002 estimate, 6,159,068.

Population in five census years was:

IOWA

KEY HISTORICAL EVENTS

Originally the territory of the Iowa Indians, the area was explored by the Frenchmen Marquette and Joliet in 1673. French trading posts were set up, but there was little other settlement. In 1803 the French sold their claim to Iowa to the USA as part of the Louisiana Purchase. The land was still occupied by Indians but, in the 1830s, the tribes sold their land to the US government and migrated to reservations. Iowa became a US Territory in 1838 and a state in 1846.

The state was settled by immigrants drawn mainly from neighbouring states to the east. Later there was more immigration from Protestant states of northern Europe. The land was extremely fertile and most immigrants came to farm. Not all the Indian population had accepted the cession and there were some violent confrontations, notably the murder of settlers at Spirit Lake in 1857. The capital, Des Moines, was founded in 1843 as a fort to protect Indian rights. It expanded rapidly with the growth of a local coal field after 1910.

KANSAS

KEY HISTORICAL EVENTS

The area was explored from Mexico in the 16th century, when Spanish travellers found groups of Kansas, Wichita, Osage and Pawnee tribes. The French claimed Kansas in 1682 and they established a valuable fur trade with local tribes in the 18th century. In 1803 the area passed to the USA as part of the Louisiana Purchase and became a base for pioneering trails further west. After 1830 it was 'Indian Territory' and a number of tribes displaced from eastern states were settled there. In 1854 the Kansas Territory was created and opened for white settlement. The early settlers were farmers from Europe or New England, but the Territory's position brought it into contact with southern ideas also. Until 1861 there were frequent outbreaks of violence over the issue of slavery. Slavery had been excluded from the future Territory by the Missouri Compromise of 1820, but the 1854 Kansas-Nebraska Act had affirmed the principle of 'popular sovereignty' to settle the issue, which was then fought out by opposing factions throughout 'Bleeding Kansas'.

Kansas finally entered the Union (as a non-slavery state) in 1861; the part of Colorado which had formed part of the Kansas Territory was then separated from it.

The economy developed through a combination of cattle-ranching and railways. Herds were driven to the railheads and shipped from vast stockyards, or slaughtered and processed in railhead meat-packing plants. Wheat and sorghum also became important once the plains could be ploughed on a large scale.

TERRITORY AND POPULATION

Kansas is bounded north by Nebraska, east by Missouri, with the Missouri River as boundary in the northeast, south by Oklahoma and west by Colorado. Land area, 81,815 sq. miles (211,900 sq. km). KENTUCKY

KEY HISTORICAL EVENTS

Lying west of the Appalachians and south of the Ohio River, the area was the meeting place and battleground for the eastern Iroquois and the southern Cherokees.

Northern Shawnees also penetrated. The first successful white settlement took place in 1769 when Daniel Boone reached the Bluegrass plains from the eastern, trans-Appalachian, colonies. After 1783 immigration from the east was rapid, settlers travelling by river or crossing the mountains by the Cumberland Gap. The area was originally attached to Virginia but became a separate state in 1792.

Large plantations dependent on slave labour were established, as were small farms worked by white owners. The state became divided on the issue of slavery, although plantation interests (mainly producing tobacco) dominated state government. In the event the state did not secede in 1861, and the majority of citizens supported the Union. Public opinion swung round in support of the south during the difficulties of the reconstruction period.

The eastern mountains became an important coal-mining area, tobacco-growing continued and the Bluegrass plains produced livestock, including especially fine thoroughbred horses.

LOUISIANA

KEY HISTORICAL EVENTS

Originally the Territory of Choctaw and Caddo tribes, the whole area was claimed for France in 1682. The French founded New Orleans in 1718 and it became the centre of a crown colony in 1731. During the wars which the European powers fought over their American interests, the French ceded the area west of the Mississippi (most of the present state) to Spain in 1762 and the eastern area, north of New Orleans, to Britain in 1763. The British section passed to the USA in 1783, but France bought back the rest from Spain in 1800, including New Orleans and the mouth of the Mississippi. The USA, fearing to be excluded from a strategically important and commercially promising shipping area, persuaded France to sell Louisiana again in 1803. The present states of Missouri, Arkansas, Iowa, North Dakota, South Dakota, Nebraska and Oklahoma were included in the purchase.

The area became the Territory of New Orleans in 1804 and was admitted to the Union as a state in 1812. The economy at first depended on cotton and sugarcane plantations. The population was of French, Spanish and black descent, with a growing number of American settlers. Plantation interests succeeded in achieving secession in 1861, but New Orleans was occupied by the Union in 1862. Planters re-emerged in the late 19th century and imposed rigid segregation of the black population, denying them their new rights.

The state has become mainly urban industrial, with the Mississippi ports growing rapidly. There is petroleum and natural gas, and a strong tourist industry based on the French culture and Caribbean atmosphere of New Orleans.

TERRITORY AND POPULATION

Louisiana is bounded north by Arkansas, east by Mississippi, south by the Gulf of Mexico and west by Texas. Land area, 43,562 sq. miles (112,825 sq. km). Census population, 1 April 2000, 4,468,976, an increase of 5·9% since 1990. July 2002 estimate, 4,482,646.

MAINE

KEY HISTORICAL EVENTS

Originally occupied by Algonquian-speaking tribes, the Territory was disputed between different groups of British settlers, and between the British and French, throughout the 17th and most of the 18th centuries. After 1652 it was governed as part of Massachusetts, and French claims finally failed in 1763. Most of the early settlers were English and Protestant Irish, with many Quebec French.

The Massachusetts settlers had gained control when the original colonist, Sir Ferdinando Gorges, supported the losing royalist side in the English civil war. Their control was questioned during the English-American war of 1812, when Maine residents claimed that the Massachusetts government did not protect them against British raids. Maine was separated from Massachusetts and entered the Union as a state in 1820.

Maine is a mountainous state and even the coastline is rugged, but the coastal belt is where most settlement has developed. In the 19th century there were manufacturing towns making use of cheap water-power, and the rocky shore supported a shell-fish industry. The latter still flourishes, together with intensive horticulture, producing potatoes and fruit. The other main economic development has been in exploiting the forests for timber, pulp and paper.

The capital is Augusta, a river trading post which was fortified against Indian attacks in 1754, incorporated as a town in 1797 and chosen as capital in 1832.

TERRITORY AND POPULATION

Maine is bounded west, north and east by Canada, southeast by the Atlantic, south and southwest by New Hampshire. Land area, 30,862 sq. miles (79,932 sq. km). Census population, 1 April 2000, 1,274,923, an increase of 3·8% since 1990. July 2002 estimate, 1,294,464.

MARYLAND

KEY HISTORICAL EVENTS

The first European visitors found groups of Algonquian-speaking tribes, often under attack by Iroquois from further north. The first white settlement was made by the Calvert family, British Roman Catholics, in 1634. The settlers received some legislative rights in 1638. In 1649 their assembly passed the Act of Toleration, granting freedom of worship to all Christians. A peace treaty was signed with the Iroquois in 1652, after which it was possible for farming settlements to expand north and west. The capital (formerly at St Mary's City) was moved to Annapolis in 1694. Baltimore, which became the state's main city, was founded in 1729.

The first industry was tobacco-growing, which was based on slave-worked plantations. There were also many immigrant British small farmers, tradesmen and indentured servants.

At the close of the War of Independence the treaty of Paris was ratified in Annapolis. Maryland became a state of the Union in 1788. In 1791 the state ceded land for the new federal capital, Washington, and its economy has depended on the capital's proximity ever since. Baltimore also grew as a port and industrial city, attracting much European immigration in the 19th century. Although strong sympathy for the south was expressed, Maryland remained within the Union in the Civil War albeit under the imposition of martial law.

TERRITORY AND POPULATION

Maryland is bounded north by Pennsylvania, east by Delaware and the Atlantic, south by Virginia and West Virginia, with the Potomac River forming most of the boundary, and west by West Virginia. MASSACHUSETTS

KEY HISTORICAL EVENTS

The first European settlement was at Plymouth, when the *Mayflower* landed its company of English religious separatists in 1620. In 1626–30 more colonists arrived, the main body being a large company of English Puritans who founded a Puritan commonwealth. This commonwealth, of about 1,000 colonists led by John Winthrop, became the Massachusetts Bay Colony and was founded under a company charter. Following disagreement between the English government and the colony the charter was withdrawn in 1684, but in 1691 a new charter united a number of settlements under the name of Massachusetts Bay. The colony's government was rigidly theocratic.

Shipbuilding, iron-working and manufacturing were more important than farming from the beginning, the land being poor. The colony was Protestant and of English descent until the War of Independence. The former colony adopted its present constitution in 1780. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and on 6 Feb. 1788 became the 6th state to ratify the US constitution. The state acquired its present boundaries (having previously included Maine) in 1820.

During the 19th century industrialization and immigration from Europe both increased while Catholic Irish and Italian immigrants began to change the population's character. The main inland industry was textile manufacture, the main coastal occupation was whaling; both have now gone. Boston has remained the most important city of New England, attracting a large black population since 1950.

MICHIGAN

KEY HISTORICAL EVENTS

The French were the first European settlers, establishing a fur trade with the local Algonquian Indians in the late 17th century. They founded Sault Ste Marie in 1668

and Detroit in 1701. In 1763 Michigan passed to Britain, along with other French territory east of the Mississippi, and from Britain it passed to the USA in 1783. Britain, however, kept a force at Detroit until 1796, and recaptured Detroit in 1812. Regular American settlement did not begin until later. The Territory of Michigan (1805) had its boundaries extended after 1818 and 1834. It was admitted to the Union as a state (with its present boundaries) in 1837.

During the 19th century there was rapid industrial growth, especially in mining and metalworking. The largest groups of immigrants were British, German, Irish and Dutch. Other significant groups came from Scandinavia, Poland and Italy. Many groups of immigrants came to settle as miners, farmers and industrial workers. The motor industry became dominant, especially in Detroit. Lake Michigan ports shipped bulk cargo, especially iron ore and grain.

Detroit was the capital until 1847, when that function passed to Lansing. Detroit remained, however, an important centre of flour-milling and shipping and, after the First World War, of the motor industry.

TERRITORY AND POPULATION

Michigan is divided into two by Lake Michigan. The northern part is bounded south by the lake and by Wisconsin, west and north by Lake Superior, east by the North Channel of Lake Huron; between the two latter lakes the Canadian border runs through straits at Sault Ste Marie. The southern part is bounded in the west and north by Lake Michigan, east by Lake Huron, Ontario and Lake Erie, south by Ohio and Indiana. Total area is 96,716 sq. miles (250,493 sq. km) of which 56,804 sq. miles (147,122 sq. km) are land and 39,912 sq. miles (103,372 sq. km) water. Census population, 1 April 2000, 9,938,444, an increase of 6·9% since 1990. July 2002 estimate, 10,050,446.

Population of five federal census years was:

MINNESOTA

KEY HISTORICAL EVENTS

Minnesota remained an Indian territory until the middle of the 19th century, the main groups being Chippewa and Sioux, many of whom are still there. In the 17th century there had been some French exploration, but no permanent settlement. After passing under the nominal control of France, Britain and Spain, the area became part of the Louisiana Purchase and so was sold to the USA in 1803.

Fort Snelling was founded in 1819. Early settlers came from other states, especially New England, to exploit the great forests. Lumbering gave way to homesteading, and the American settlers were joined by Germans, Scandinavians and Poles. Agriculture, mining and forest industries became the mainstays of the economy. Minneapolis, founded as a village in 1856, grew first as a lumber centre, processing the logs floated down the Minnesota River, and then as a centre of flour-milling and grain marketing. St Paul, its twin city across the river, became Territorial capital in 1849 and state capital in 1858. St Paul also stands at the head of navigation on the Mississippi, which rises in Minnesota.

The Territory (1849) included parts of North and South Dakota, but at its admission to the Union in 1858, the state of Minnesota had its present boundaries.

TERRITORY AND POPULATION

Minnesota is bounded north by Canada, east by Lake Superior and Wisconsin, with the Mississippi River forming the boundary in the southeast, south by Iowa, west by South and North Dakota, with the Red River forming the boundary in the northwest. Land area, 79,610 sq. miles (206,189 sq. km). Census population, 1 April 2000, 4,919,479, an increase of 12·4% since 1990. July 2002 estimate, 5,019,720.

Population in five census years was:

MISSISSIPPI

KEY HISTORICAL EVENTS

Mississippi was one of the territories claimed by France after the 17th century and ceded to Britain in 1763. The indigenous people were Choctaw and Natchez. French settlers at first traded amicably with them, but in the course of three wars (1716, 1723 and 1729) the French allied with the Choctaw to drive the Natchez out. During hostilities the Natchez massacred the settlers of Fort Rosalie, which the French had founded in 1716 and which was later renamed Natchez.

In 1783 the area became part of the USA except for Natchez which was under Spanish control until 1798. The United States then made it the capital of the Territory of Mississippi. The boundaries of the Territory were extended in 1804 and again in 1812. In 1817 it was divided into two territories, with the western part becoming the state of Mississippi. (The eastern part became the state of Alabama in 1819.) The city of Jackson was laid out in 1822 as the new state capital.

A cotton plantation economy developed, based on black slave labour, and by 1860 the majority of the population was black. Mississippi joined the Confederacy during the Civil War. After defeat and reconstruction there was a return to rigid segregation and denial of black rights. This situation lasted until the 1960s. There was a black majority until the Second World War, when out-migration began to change the pattern. By 1990 about 35% of the population was black, and manufacture (especially clothing and textiles) had become the largest single employer of labour.

MISSOURI

KEY HISTORICAL EVENTS

Territory of several Indian groups, including the Missouri, the area was not settled by European immigrants until the 18th century. The French founded Ste Genevieve in 1735, partly as a lead-mining community. St Louis was founded as a fur-trading base in 1764. The area was nominally under Spanish rule from 1770 until 1800 when it passed back to France. In 1803 the USA bought it as part of the Louisiana Purchase.

St Louis was made the capital of the whole Louisiana Territory in 1805, and of a new Missouri Territory in 1812. In that year American immigration increased markedly. The Territory became a state in 1821, but there had been bitter disputes between slave-owning and anti-slavery factions, with the former succeeding in obtaining statehood without the prohibition of slavery required of all other new states north of latitude 36° 30'; this was achieved by the Missouri Compromise of 1820. The Compromise was repealed in 1854 and declared unconstitutional in 1857. During the Civil War the state held to the Union side, although St Louis was placed under martial law.

With the development of steamboat traffic on the Missouri and Mississippi rivers, and the expansion of railways, the state became the transport hub of all western movement. Lead and other mining remained important, as did livestock farming. European settlers came from Germany, Britain and Ireland.

MONTANA

KEY HISTORICAL EVENTS

Originally the territory of many groups of Indian hunters including the Sioux, Cheyenne and Chippewa, Montana was not settled by American colonists until the 19th century. The area passed to the USA with the Louisiana Purchase of 1803, but the area west of the Rockies was disputed with Britain until 1846. Trappers and fur-traders were the first immigrants, and the fortified trading post at Fort Benton (1846) became the first permanent settlement. Colonization increased when gold was found in 1862. Montana was created a separate Territory (out of Idaho and Dakota Territories) in 1864. In 1866 large-scale grazing of sheep and cattle was allowed, and this provoked violent confrontation with the indigenous people whose hunting lands were invaded. Indian wars led to the defeat of federal forces at Little Bighorn in 1876 and at Big Hole Basin in 1877, but the Indians could not continue the fight and they had been moved to reservations by 1880. Montana became a state in 1889.

Helena, the capital, was founded as a mining town in the 1860s. In the early 20th century there were many European immigrants who settled as farmers or in the mines, especially in copper-mining at Butte.

NEBRASKA

KEY HISTORICAL EVENTS

The Nebraska region was first reached by Europeans from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the USA as part of the Louisiana Purchase in 1803. During the 1840s the Platte River valley became an established trail for thousands of pioneers' wagons heading for Oregon and California. The need to serve and protect the trail led to the creation of Nebraska as a Territory in 1854. In 1862 the Homestead Act opened the area for settlement, but colonization was not very rapid until the Union Pacific Railroad was completed in 1869. The largest city, Omaha, developed as the starting point of the Union Pacific and became one of the largest railway towns in the country.

Nebraska became a state in 1867, with approximately its present boundaries except that it later received small areas from the Dakotas. Many early settlers were from Europe, brought in by railway-company schemes, but from the late 1880s eastern Nebraska suffered catastrophic drought. Crop and stock farming recovered, but crop growing was only established in the west by means of irrigation.

TERRITORY AND POPULATION

Nebraska is bounded in the north by South Dakota, with the Missouri River forming the boundary in the northeast and the boundary with Iowa and Missouri to the east, south by Kansas, southwest by Colorado and west by Wyoming. NEVADA

KEY HISTORICAL EVENTS

The area was part of Spanish America until 1821, when it became part of the newly independent state of Mexico. Following a war between Mexico and the USA, Nevada was ceded to the USA as part of California in 1848. Settlement began in 1849, and the area was separated from California and joined with Utah Territory in 1850. In 1859 a rich deposit of silver was found in the Comstock Lode. Virginia City was founded as a mining town and immigration increased rapidly. Nevada Territory was formed in 1861. During the Civil War the Federal government, allegedly in order to obtain the wealth of silver for the Union cause, agreed to admit Nevada to the Union in 1864 as the 36th state. Areas of Arizona and Utah Territories were added to it in 1866–67.

The mining boom lasted until 1882, by which time cattle ranching had become equally important in the valleys where the climate is less arid. Carson City, the capital, developed in association with the nearby mining industry. The largest cities, Las Vegas and Reno, grew most in the 20th century with the building of the Hoover dam, the introduction of legal gambling and of easily obtained divorce.

After 1950 much of the desert area was adopted by the Federal government for weapons testing and other military purposes.

Nevada is bounded north by Oregon and Idaho, east by Utah, southeast by Arizona, with the Colorado River forming most of the boundary, south and west by California. Land area, 109,889 sq. miles (284,613 sq. km). In 1999 the federal government owned 83% of the land area.

Census population on 1 April 2000, 1,998,257, an increase of 66·3% since 1990. July 2002 estimate, 2,173,491.

NEW HAMPSHIRE

KEY HISTORICAL EVENTS

The area was part of a grant by the English crown made to John Mason and fellow-colonists, and was first settled in 1623. In 1629 an area between the Merrimack and Piscatagua rivers was called New Hampshire. More settlements followed, and in 1641 they were taken under the jurisdiction of the governor of Massachusetts. New Hampshire became a separate colony in 1679.

After the War of Independence New Hampshire became one of the 13 original states of the Union, ratifying the US constitution in 1788. The state constitution, which dates from 1776, was almost totally rewritten in 1784 and amended again in 1792.

The settlers were Protestants from Britain and Northern Ireland. They developed manufacturing industries, especially shoe-making, textiles and clothing, to which large numbers of French Canadians were attracted after the Civil War.

Portsmouth, originally a fishing settlement, was the colonial capital and is the only seaport. In 1808 the state capital was moved to Concord (having had no permanent home since 1775); Concord produced the Concord Coach which was widely used on the stagecoach routes of the West until at least 1900.

Originally the territory of Delaware Indians, the area was first settled by immigrant colonists in the early 17th century, when Dutch and Swedish traders established fortified posts on the Hudson and Delaware Rivers. The Dutch took control but lost it to the English in 1664. In 1676 the English divided the area in two; the eastern portion was assigned to Sir George Carteret and the western granted to Quaker settlers. This division lasted until 1702 when New Jersey was united as a colony of the Crown and placed under the jurisdiction of the governor of New York. It became a separate colony in 1738.

During the War of Independence crucial battles were fought at Trenton, Princeton and Monmouth. New Jersey became the 3rd state of the Union in 1787. Trenton, the state capital since 1790, began as a Quaker settlement and became an iron-working town. Industrial development grew rapidly, there and elsewhere in the state, after the opening of canals and railways in the 1830s. Princeton, also a Quaker settlement, became an important post on the New York road; the college of New Jersey (Princeton University) was transferred there from Newark in 1756.

The need for supplies in the Civil War stimulated industry and New Jersey became a manufacturing state. The growth beyond its borders of New York and Philadelphia, however, produced a pattern of commuting to employment in both centres. By 1980 about 60% of the state's population lived within 30 miles of New York.

NEW MEXICO

KEY HISTORICAL EVENTS

The first European settlement was established in 1598. Until 1771 New Mexico was the Spanish kings' 'Kingdom of New Mexico'. In 1771 it was annexed to the northern province of New Spain. When New Spain won its independence in 1821, it took the name of Republic of Mexico and established New Mexico as its northernmost department. Ceded to the USA in 1848 after war between the USA and Mexico, the area was organized as a Territory in 1850, by which time its population was Spanish and Indian. There was frequent conflict, especially between new settlers and raiding parties of Navajo and Apaches. The Indian war lasted from 1861 until 1866, and from 1864–68 about 8,000 Navajo were imprisoned at Bosque Redondo.

The boundaries were altered several times when land was taken into Texas, Utah, Colorado and lastly (1863) Arizona. New Mexico became a state in 1912.

Settlement proceeded by means of irrigated crop-growing and Mexican-style ranching. During the Second World War the desert areas were brought into use as testing zones for atomic weapons. Mineral extraction also developed, especially after the discovery of uranium and petroleum.

TERRITORY AND POPULATION

New Mexico is bounded north by Colorado, northeast by Oklahoma, east by Texas, south by Texas and Mexico and west by Arizona. Land area, 121,356 sq. miles (316,901 sq. km). Public lands, administered by federal agencies (1975) amounted to 26·7m. acres or 34% of the total area. The Bureau of Indian Affairs held 7·3m. acres; the State of New Mexico held 9·4m. acres; 34·4m. acres were privately owned.

Census population, 1 April 2000, 1,819,046, an increase of 20·1% since 1990. Of the total population in 2000, 924,729 were female, 1,310,472 were 18 years old or older and 1,363,501 were urban. July 2002 estimate, 1,855,059.

The population in five census years was:

	White	*Black*	*American Indian*	*Asian and Pacific Island*	*Other*	*Total*	*Per sq. mile*
1910	304,594	1,628	20,573	506	...	327,301	2·7
1940	492,312	4,672	34,510	324	...	531,818	4·4
1980	977,587	24,020	106,119	6,825	188,343	1,302,894	10·7
1990	1,146,028	30,210	134,355	14,124	190,352	1,515,069	12·5
2000	1,214,253	34,343	173,483	20,758	376,209	1,819,046	15·0

Before 1930 New Mexico was largely a Spanish-speaking state, but after 1945 an influx of population from other states considerably reduced the percentage of persons of Spanish origin or descent. However, in recent years the percentage of the Hispanic population has begun to rise again. In 2000 the Hispanic population was 765,386, up from 579,224 in 1990 (an increase of 32·1%). At 42·1%, New Mexico has the largest percentage of persons of Hispanic origin of any state in the USA.

NEW YORK STATE

KEY HISTORICAL EVENTS

The first European immigrants came in the 17th century, when there were two powerful Indian groups in rivalry: the Iroquois confederacy (Mohawk, Oneida, Onondaga, Cayuga and Seneca) and the Algonquian-speaking Mohegan and Munsee. The Dutch made settlements at Fort Orange (now Albany) in 1624 and at New Amsterdam in 1625, trading with the Indians for furs. In the 1660s there was conflict between the Dutch and the British in the Caribbean; as part of the concluding treaty the British in 1664 received Dutch possessions in the Americas, including New Amsterdam, which they renamed New York.

In 1763 the Treaty of Paris ended war between the British and the French in North America (in which the Iroquois had allied themselves with the British). Settlers of British descent in New England then felt confident enough to expand westward into the area. The climate of northern New York being severe, most settled in the Hudson river valley. After the War of Independence New York became the 11th state of the Union (1778), having first declared itself independent of Britain in 1777.

The economy depended on manufacturing, shipping and other means of distributing goods, and trade. During the 19th century New York became the most important city in the USA. Its manufacturing industries, especially clothing, attracted thousands of European immigrants. Industrial development spread along the Hudson-Mohawk valley, which was made the route of the Erie Canal (1825) linking New York with Buffalo on Lake Erie and thus with the developing farmlands of the middle west.

On 11 Sept. 2001 New York City was attacked by hijackers when two commercial airliners were flown into the World Trade Center. The building was destroyed and 2,800 people died.

CONSTITUTION AND GOVERNMENT

The present constitution dates from 1894; a later constitutional convention, 1938, is now legally considered merely to have amended the 1894 constitution, which has now had 93 amendments. A proposed new constitution in 1967 was rejected by the electorate. The Senate consists of 60 members, and the Assembly of 150 members, both elected every two years. The state capital is Albany. For local government the state is divided into 62 counties, five of which constitute the city of New York. There were state parks and recreation areas covering 260,198 acres in 1990.

Each of the state's 62 cities is incorporated by charter, under special legislation. The government of New York City is vested in the mayor (Michael Bloomberg), elected for four years, and a city council, whose president and members are elected for four years. The council has a President and 51 members, each elected from a district wholly within the city. The mayor appoints all the heads of departments, except the comptroller, who is elected. Each of the five city boroughs (Manhattan, Bronx, Brooklyn, Queens and Staten Island) has a president, elected for four years. Each borough is also a county bearing the same name except Manhattan borough, which, as a county, is called New York, and Brooklyn, which is Kings County.

For the 108th Congress, which convened in Jan. 2003, New York State sends 29 members to the House of Representatives. It is represented in the Senate by Charles Schumer (D. 1999–2005) and Hillary Clinton (D. 2001–07).

NORTH CAROLINA

KEY HISTORICAL EVENTS

The early inhabitants were Cherokees. European settlement was attempted in 1585–87, following an exploratory visit by Sir Walter Raleigh, but this failed. Settlers from Virginia came to the shores of Albemarle Sound after 1650, and in 1663 Charles II chartered a private colony of Carolina. In 1691 the north was put under a deputy governor who ruled from Charleston in the south. The colony was formally separated into North and South Carolina in 1712. In 1729 control was taken from the private proprietors and vested in the Crown, whereupon settlement grew, and the boundary between north and south was finally fixed (1735).

After the War of Independence North Carolina became one of the original 13 states of the Union. The city of Raleigh was laid out as the new capital. Having been a plantation colony North Carolina continued to develop as a plantation state, growing tobacco with black slave labour. It was also an important source of gold before the western gold-rushes of 1848.

In 1861 at the outset of the Civil War North Carolina seceded from the Union, but General Sherman occupied the capital unopposed. A military governor was admitted in 1862, and civilian government restored with re-admission to the Union in 1868.

NORTH DAKOTA

KEY HISTORICAL EVENTS
The original inhabitants were various groups of Plains Indians. French explorers and traders were active among them in the 18th century, often operating from French possessions in Canada. France claimed the area until 1803, when it passed to the USA as part of the Louisiana Purchase, except for the northeastern part which was held by the British until 1818.

Trading with the Indians, mainly for furs, continued until the 1860s, with American traders succeeding the French. In 1861 the Dakota Territory (North and

South) was established. In 1862 the Homestead Act was passed (allowing 160 acres of public land free to any family who had worked and lived on it for five years) and this greatly stimulated settlement. Farming settlers came on to the wheat lands in great numbers, many of them from Canada, Norway and Germany.

Bismarck, the capital, began as a crossing-point on the Missouri and was fortified in 1872 to protect workers building the Northern Pacific Railway. There followed a gold-rush nearby, and the town became a service centre for prospectors. In 1889 North and South Dakota were admitted to the Union as separate states, and Bismarck became the Northern capital. The largest city is Fargo which was also a railway town, named after William George Fargo the express-company founder.

The population grew rapidly until 1890 and steadily until 1930 by which time it was about one-third European in parentage. Between 1930 and 1970 there was a steady population drain, increasing whenever farming was affected by the extremes of the continental climate.

TERRITORY AND POPULATION

North Dakota is bounded north by Canada, east by the Red River (forming a boundary with Minnesota), south by South Dakota and west by Montana. Land area, 68,976 sq. miles (178,647 sq. km). July 2002 estimate, 634,110.

OHIO

KEY HISTORICAL EVENTS

The land was inhabited by Delaware, Miami, Shawnee and Wyandot Indians. It was explored by French and British traders in the 18th century and confirmed as part of British North America in 1763. After the War of Independence it became part of the Northwest Territory of the new United States. Former American soldiers of the war came in from New England in 1788 and made the first permanent white settlement at Marietta, at the confluence of the Ohio and Muskingum rivers. In 1803 Ohio was separated from the rest of the Territory and admitted to the Union as the 17th state.

During the early 19th century there was steady immigration from Europe, mainly of Germans, Swiss, Irish and Welsh. Industrial growth began from the processing of local farm, forest and mining products; it increased rapidly with the need to supply the Union armies in the Civil War of 1861–65.

As the industrial cities grew, so immigration began again, with many whites from eastern Europe and the Balkans and blacks from the southern states looking for work in Ohio.

Cleveland, which developed rapidly as a Lake Erie port after the opening of commercial waterways to the interior and the Atlantic coast (1825, 1830 and 1855), became an iron-and-steel town during the Civil War.

OKLAHOMA

KEY HISTORICAL EVENTS

Francisco Coronado led a Spanish expedition in 1541, claiming the land for Spain. There were several Indian groups, but no strong political unit. In 1714 Juchereau de Saint Denis made the first French contact. During the 18th century French fur-traders were active, and France and Spain struggled for control, a struggle which was resolved by the French withdrawal in 1763. France returned briefly in 1800–03, and the territory then passed to the USA as part of the Louisiana Purchase.

In 1828 the Federal government set aside the area of the present state as Indian Territory, that is, a reservation and sanctuary for Indian tribes who had been driven off their lands elsewhere by white settlement. About 70 tribes came, among whom were Creeks, Choctaws and Cherokees from the southeastern states, and Plains Indians.

In 1889 the government took back about 2·5m. acres of the Territory and opened it to white settlement. About 10,000 homesteaders gathered at the site of Oklahoma

City on the Santa Fe Railway in the rush to stake their land claims. The settlers' area, and others subsequently opened to settlement, were organized as the Oklahoma Territory in 1890. In 1907 the Oklahoma and Indian Territories were combined and admitted to the Union as a state. Indian reservations were established within the state.

The economy first depended on ranching and farming, with packing stations on the railways. A mining industry grew in the 1870s attracting foreign immigration, mainly from Europe. In 1901 oil was found near Tulsa, and the industry grew rapidly.

TERRITORY AND POPULATION

Oklahoma is bounded north by Kansas, northeast by Missouri, east by Arkansas, south by Texas (the Red River forming part of the boundary) and, at the western extremity of the 'panhandle', by New Mexico and Colorado. Land area, 68,667 sq. miles (177,847 sq. km). Census population, 1 April 2000, 3,450,654, an increase of 9·7% since 1990. July 2002 estimate, 3,493,714.

The population at five federal censuses was:

The Legislature consists of a Senate of 48 members, who are elected for four years, and a House of Representatives elected for two years and consisting of 101 members. The Governor and Lieut.-Governor are elected for four-year terms; the Governor can only be elected for two terms in succession. Electors are (with necessary exceptions) all citizens 18 years or older, with the usual qualifications.

For the 108th Congress, which convened in Jan. 2003, Oklahoma sends five members to the House of Representatives. It is represented in the Senate by Don Nickles (R. 1981–2005) and James Inhofe (R. 1994–2009).

ECONOMY

Per capita income (2000) was $23,582.

Budget. In 1999 total state revenue was $11,935m. Total expenditure was $10,665m. (education, $4,178m.; public welfare, $1,767m.; highways, $998m.; health and hospitals, $533m.; police protection, $31m.). Outstanding debt, in 1999, $5,564m.

Performance. Gross State Product in 2000 was $91,773m.

ENERGY AND NATURAL RESOURCES

Oil and Gas. Production, 1998: crude oil, 78m. bbls.; natural gas, 1,645bn. cu. ft. Oklahoma ranks third in the USA for natural gas production behind Texas and Louisiana. In 1993 there were 122,094 oil and gas wells in production.

Water. The total area covered by water is approximately 1,224 sq. miles.

Minerals. Coal production (1993), 1,796,000 tons. Principal minerals are: crushed stone, cement, sand and gravel, iodine, glass sand, gypsum. Other minerals are helium, clay and sand, zinc, lead, granite, tripoli, bentonite, lime and volcanic ash. Total value of domestic non-fuel minerals produced in 1998 was $408m.

Agriculture. In 2000 the state had some 85,000 farms and ranches with a total area of 34m. acres; average size was 400 acres; average value per acre was $494 in 1996. Area harvested, 1992, 8,272,889 acres. Livestock, 1992: cattle, 4,736,594; sheep and lambs, 103,732; hogs and pigs, 260,682.

Farm income 1996: crops, $1,126m.; livestock and products, $2,439m. The major cash grain is winter wheat (value, 1997, $579m.): 1,579m. bu. of wheat for grain were harvested from 5,400,000 acres. Other crops include barley, oats, rye, grain, corn, soybeans, grain sorghum, cotton, peanuts and peaches. Value of cattle and calves produced, 1990, $3,080m.; catfish, $1m.; racehorses, $63m.

The Oklahoma Conservation Commission works with 91 conservation districts, universities, state and federal government agencies. The early work of the conservation districts, beginning in 1937, was limited to flood and erosion control: since 1970, they include urban areas also.

Irrigated production has increased in the Oklahoma ‘panhandle’. The Ogalala aquifer is the primary source of irrigation water there and in western Oklahoma, a finite source because of its isolation from major sources of recharge. Declining groundwater levels necessitate the most effective irrigation practices.

Forestry. There are 7·5m. acres of forest, one half considered commercial. The forest products industry is concentrated in the 118 eastern counties. There are 3 forest regions: Ozark (oak, hickory); Ouachita highlands (pine, oak); Cross-Timbers (post oak, black jack oak). Southern pine is the chief commercial species, at almost 80% of saw-timber harvested annually. Replanting is essential.

INDUSTRY

In 1994 there were 3,858 industrial firms: major commodities produced include transportation equipment (accounting for 15·3% of manufactured goods), petroleum and coal products (14·1%), non-electrical machinery (12·2%), food products (9·7%), electronic and electrical equipment (9·2%).

Labour. Total non-agricultural employment in 1999 was 1,462,000. Employees by branch, 1999 (in 1,000): services, 417; wholesale and retail trade, 337; government, 283; manufacturing, 184. Oklahoma’s unemployment rate was 3·4% in 1999.

OREGON

KEY HISTORICAL EVENTS

The area was divided between many Indian groups including the Chinook, Tillamook, Cayuse and Modoc. In the 18th century English and Spanish visitors tried to establish national claims, based on explorations of the 16th century. The USA also laid claim by right of discovery when an expedition entered the mouth of the Columbia River in 1792.

Oregon was disputed between Britain and the USA. An American fur company established a trading settlement at Astoria in 1811, which the British took in 1812. The Hudson Bay Company were the most active force in Oregon until the 1830s when American pioneers began to migrate westwards along the Oregon Trail. The dispute between Britain and the USA was resolved in 1846 with the boundary fixed at 49°N. lat. Oregon was organized as a Territory in 1848 but with wider boundaries; it became a state with its present boundaries in 1859.

Early settlers were mainly American. They came to farm in the Willamette Valley and to exploit the western forests. Portland developed as a port for ocean-going traffic, although it was 100 miles inland at the confluence of the Willamette and Columbia rivers. Industries followed when the railways came and the rivers were exploited for hydro-electricity. The capital of the Territory from 1851 was Salem, a mission for Indians on the Willamette river; it was confirmed as state capital in 1864. Salem became the processing centre for the farming and market-gardening Willamette Valley.

TERRITORY AND POPULATION

Oregon is bounded in the north by Washington, with the Columbia River forming most of the boundary, east by Idaho, with the Snake River forming most of the boundary, south by Nevada and California and west by the Pacific. Land area, 95,997 sq. miles (248,631 sq. km). The federal government owned (1994) 32,132,581 acres (51·73% of the state area). Census population, 1 April 2000, 3,421,399, an increase of 20·4% since 1990. July 2002 estimate, 3,521,515.

Population at five federal censuses was:

PENNSYLVANIA

KEY HISTORICAL EVENTS

Pennsylvania was occupied by four powerful tribes in the 17th century: Delaware, Susquehannock, Shawnee and Iroquois. The first white settlers were Swedish, arriving in 1643. The British became dominant in 1664, and in 1681 William Penn, an English Quaker, was given a charter to colonize the area as a sanctuary for his fellow Quakers. Penn's ideal was peaceful co-operation with the Indians and religious toleration within the colony. Several religious groups were attracted to Pennsylvania because of this policy, including Protestant sects from Germany and France. During the 18th century, co-operation with the Indians failed as the settlers pushed into more territory and the Indians resisted.

During the War of Independence the Declaration of Independence was signed in Philadelphia, the main city. Pennsylvania became one of the original 13 states of the Union. In 1812 the state capital was moved to its current location in Harrisburg, which began as a trading post and ferry point on the Susquehanna River in the south-central part of the state. The Mason-Dixon line, the state's southern boundary, became the dividing line between free and slave states during the conflict leading to the Civil War. During the war crucial battles were fought in the state, including

the battle of Gettysburg. Industrial growth was rapid after the war. Pittsburgh, founded as a British fort in 1761 during war with the French, had become an iron-making town by 1800 and grew rapidly when canal and railway links opened in the 1830s. The American Federation of Labor was founded in Pittsburgh in 1881, by which time the city was of national importance in producing coal, iron, steel and glass.

At the beginning of the 20th century, industry attracted immigration from Italy and eastern Europe. In farming areas the early sect communities survive, notably Amish and Mennonites. (The Pennsylvania 'Dutch' are of German extraction.)

TERRITORY AND POPULATION

Pennsylvania is bounded north by New York, east by New Jersey, south by Delaware and Maryland, southwest by West Virginia, west by Ohio and northwest by Lake Erie. RHODE ISLAND

KEY HISTORICAL EVENTS

The earliest white settlement was founded by Roger Williams, an English Puritan who was expelled from Massachusetts because of his dissident religious views and his insistence on the land-rights of the Indians. At Providence he bought land from the Narragansetts and founded a colony there in 1636. A charter was granted in 1663. The colony was governed according to policies of toleration, which attracted Jewish and nonconformist settlers; later there was French Canadian settlement also.

Shipping and fishing developed strongly, especially at Newport and Providence; these two cities were twin capitals until 1900, when the capital was fixed at Providence.

Significant actions took place in Rhode Island during the War of Independence. In 1790 the state accepted the federal constitution and was admitted to the Union.

Early farming development was most successful in dairying and poultry. Early industrialization was mainly in textiles, beginning in the 1790s, and flourishing on abundant water power. Textiles dominated until the industry began to decline after the First World War. British, Irish, Polish, Italian and Portuguese workers settled in the state, working in the mills or in the shipbuilding, shipping, fishing and naval ports. The crowding of a new population into cities led to the abolition of the property qualification for the franchise in 1888.

SOUTH CAROLINA

KEY HISTORICAL EVENTS

Originally the territory of Yamasee Indians, the area attracted French and Spanish explorers in the 16th century. There were attempts at settlement on the coast, none of which lasted. Charles I of England made a land grant in 1629, but the first permanent white settlement began at Charles Town in 1670, moving to Charleston in 1680. This was a proprietorial colony including North Carolina until 1712; both passed to the Crown in 1729.

The coastlands developed as plantations worked by slave labour. In the hills there were small farming settlements and many trading posts, dealing with Indian suppliers.

After active campaigns during the War of Independence, South Carolina became one of the original states of the Union in 1788.

In 1793 the cotton gin was invented, enabling the speedy mechanical separation of seed and fibre. This made it possible to grow huge areas of cotton and meet the rapidly growing needs of new textile industries. Plantation farming spread widely, and South Carolina became hostile to the anti-slavery campaign which was strong in northern states. The state first attempted to secede from the Union in 1847, but was not supported by other southern states until 1860, when secession led to civil war.

At that time the population was about 703,000, of whom 413,000 were black. During the reconstruction periods there was some political power for black citizens, but control was back in white hands by 1876. The constitution was amended in 1895 to disenfranchise most black voters, and they remained with hardly any voice in government until the Civil Rights movement of the 1960s. Columbia became the capital in 1786.

SOUTH DAKOTA

KEY HISTORICAL EVENTS

The area was part of the hunting grounds of nomadic Dakota (Sioux) Indians. French explorers visited the site of Fort Pierre in 1742–43, and claimed the area for France. In 1763 the claim fell and, together with French claims to all land west of the Mississippi, passed to Spain. Spain held the Dakotas until defeated by France in the Napoleonic Wars, when France regained the area and sold it to the USA as part of the Louisiana Purchase in 1803.

Fur-traders were active, but there was no settlement until Fort Randall was founded on the Missouri river in 1856. In 1861 North and South Dakota were organized as the Dakota Territory, and the Homestead Act of 1862 stimulated settlement, mainly in the southeast until there was a gold-rush in the Black Hills of the west in 1875–76. Colonization developed as farming communities in the east, miners and ranchers in the west. Livestock farming predominated, attracting European settlers from Scandinavia, Germany and Russia.

In 1889 the North and South were separated and admitted to the Union as states. The capital of South Dakota is Pierre, founded as a railhead in 1880, chosen as a temporary capital and confirmed as permanent capital in 1904. It faces Fort Pierre, the former centre of the fur trade, across the Missouri river. During the 20th century there have been important schemes to exploit the Missouri for power and irrigation.

TERRITORY AND POPULATION

South Dakota is bounded in the north by North Dakota, east by Minnesota, southeast by the Big Sioux River (forming the boundary with Iowa), south by Nebraska (with

the Missouri River forming part of the boundary) and west by Wyoming and Montana. Land area, 75,885 sq. miles (196,541 sq. km). Area administered by the Bureau of Indian Affairs, 1985, covered 5m. acres (10% of the state), of which 2·6m. acres were held by tribes. The federal government, 1994, owned 2,698,000 acres.

Census population, 1 April 2000, 754,844, an increase of 8·5% since 1990. July 2002 estimate, 761,063.

TENNESSEE

KEY HISTORICAL EVENTS

Bordered on the west by the Mississippi, Tennessee was part of an area inhabited by Cherokee. French, Spanish and British explorers penetrated the area up the Mississippi and traded with the Cherokee in the late 16th and 17th centuries. French claims were abandoned in 1763, colonists from the British colonies of Virginia and Carolina then began to cross the Appalachians westwards, but there was no organized Territory until after the War of Independence. In 1784 there was a short-lived, independent state called Franklin. In 1790 the South West Territory (including Tennessee) was formed, and Tennessee entered the Union as a state in 1796.

The state was active in the war against Britain in 1812. After the American victory, colonization increased and pressure for land mounted. The Cherokee were forcibly removed during the 1830s and taken to Oklahoma, a journey on which many died.

Tennessee was a slave state and seceded from the Union in 1861, although eastern Tennessee was against secession. There were important battles at Shiloh, Chattanooga, Stone River and Nashville. In 1866 Tennessee was re-admitted to the Union.

Nashville, the capital since 1843, Memphis, Knoxville, and Chattanooga all developed as river towns, Memphis becoming an important cotton and timber port. Growth was greatly accelerated by the creation of the Tennessee Valley Authority in the 1930s, producing power for a manufacturing economy. Industry increased to the extent that, by 1970, the normal southern pattern of emigration and population loss had been reversed.

TEXAS

KEY HISTORICAL EVENTS

A number of Indian tribes occupied the area before French and Spanish explorers arrived in the 16th century. In 1685 La Salle established a colony at Fort St Louis, but Texas was confirmed as Spanish in 1713. Spanish missions increased during the 18th century with San Antonio (1718) as their headquarters.

In 1820 a Virginian colonist, Moses Austin, obtained permission to begin a settlement in Texas. In 1821 the Spanish empire in the Americas came to an end, and Texas, together with Coahuila, formed a state of the newly independent Mexico. The Mexicans agreed to the Austin venture, and settlers of British and American descent came in.

The settlers became discontented with Mexican government and declared their independence in 1836. Warfare, including the siege of the Alamo fort, ended with the foundation of the independent Republic of Texas, which lasted until 1845. During this period the Texas Rangers were organized as a policing force and border patrol. Texas was annexed to the Union in Dec. 1845, as the Federal government feared its vulnerability to Mexican occupation. This led to war between Mexico and the USA from 1845 to 1848. In 1861 Texas left the Union and joined the southern states in the Civil War, being re-admitted in 1869. Ranching and cotton-growing were the main activities before the discovery of oil in 1901.

UTAH

KEY HISTORICAL EVENTS

Spanish Franciscan missionaries explored the area in 1776, finding Shoshoni Indians. Spain laid claim to Utah and designated it part of Spanish Mexico. As such it passed into the hands of the Mexican Republic when Mexico rebelled against Spain and gained independence in 1821.

In 1848, at the conclusion of war between the USA and Mexico, the USA received Utah along with other southwestern territory. Settlers had already arrived in 1847 when the Mormons (the Church of Jesus Christ of Latter-day Saints) arrived, having been driven on by local hostility in Ohio, Missouri and Illinois. Led by Brigham Young, they entered the Great Salt Valley and colonized it. In 1849 they applied for statehood but were refused. In 1850 Utah and Nevada were joined as one Territory. The Mormon community continued to ask for statehood but this was only granted in 1896, after they had renounced polygamy and disbanded their People's Party.

Mining, especially of copper, and livestock farming were the base of the economy. Settlement had to adapt to desert conditions, and the main centres of population were in the narrow belt between the Wasatch Mountains and the Great Salt Lake. Salt Lake City, the capital, was founded in 1847 and laid out according to Joseph Smith's plan for the city of Zion. It was the centre of the Mormons' provisional 'State of Deseret' and Territorial capital from 1856 until 1896, except briefly in 1858 when federal forces occupied it during conflict between territorial and Union governments.

TERRITORY AND POPULATION

Utah is bounded north by Idaho and Wyoming, east by Colorado, south by Arizona and west by Nevada. Land area, 82,144 sq. miles (212,752 sq. km). The Bureau of Indian Affairs in 1990 administered 2,317,604 acres, 2,284,766 acres of which were allotted to Indian tribes.

Census population, 1 April 2000, 2,233,169, an increase of 29·6% since 1990. July 2002 estimate, 2,316,256.

Population at five federal censuses was:

VERMONT

KEY HISTORICAL EVENTS

The original Indian hunting grounds of the Green Mountains and lakes was explored by the Frenchman Samuel de Champlain in 1609 who reached Lake Champlain on the northwest border. The first attempt at permanent settlement was also French, on Isle la Motte in 1666. In 1763 the British gained the area from the French by the Treaty of Paris. The Treaty, which also brought peace with the Indian allies of the French, opened the way for settlement, but in a mountain state transport was slow and difficult. Montpelier, the state capital from 1805, was chartered as a township site in 1781 to command the main pass through the Green Mountains.

During the War of Independence Vermont declared itself an independent state, to avoid being taken over by New Hampshire and New York. In 1791 it became the 14th state of the Union.

Most early settlers were New Englanders of British and Protestant descent. After 1812 a granite-quarrying industry grew around the town of Barre, attracting

immigrant workers from Italy and Scandinavia. French Canadians also settled in Winooski. When textile and engineering industries developed in the 19th century these brought more European workers.

Vermont saw the only Civil War action north of Pennsylvania, when a Confederate raiding party attacked from Canada in 1864.

During the 20th century the textile and engineering industries have declined but paper and lumber industries flourish. Settlement is still mainly rural or in small towns, and farming is pastoral.

TERRITORY AND POPULATION

Vermont is bounded in the north by Canada, east by New Hampshire, south by Massachusetts and west by New York. Land area, 9,250 sq. miles (23,957 sq. km). Census population, 1 April 2000, 608,827, an increase of 8·2% since 1990. July 2002 estimate, 616,592.

Population at five census years was:

	White	*Black*	*Indian*	*Asiatic*	*Total*	*Per sq. mile*
1910	354,298	1,621	26	11	355,956	39·0
1930	358,966	568	36	41	359,611	38·8
1980	506,736	1,135	984	1,355	511,456	55·1
1990	555,088	1,951	1,696	3,215[1]	562,758	60·8
2000	589,208	3,063	2,420	5,358[1]	608,827	65·8

[1]Includes Pacific Islander.

Of the total population in 2000, 310,490 were female, 461,304 were 18 years old or older and 376,379 (61·8%) were rural (67·8% in 1990). Vermont still has the highest rural population percentage of any state in the USA. In 2000 the Hispanic population was 5,504, the lowest total of any state. However, this figure represents a rise of 50·3% compared to the 1990 census figure of 3,661. The largest cities are Burlington, with a population (2000 census) of 38,889; Essex, 18,626; Rutland, 17,292; Colchester, 16,986.

SOCIAL STATISTICS

Births, 2000, were 6,501 (10·9 per 1000 population); deaths, 5,127; infant deaths, 39; marriages, 6,271; civil unions, 1704; divorces, 2,526.

CLIMATE

Burlington, Jan. 17°F (–8·3°C), July 70°F (21·1°C). Annual rainfall 33" (820 mm). Vermont belongs to the New England climate zone (*see* UNITED STATES: Climate).

CONSTITUTION AND GOVERNMENT

The constitution was adopted in 1793 and has since been amended. Amendments are proposed by two-thirds vote of the Senate every four years, and must be accepted by two sessions of the legislature; they are then submitted to popular vote. The state Legislature, consisting of a Senate of 30 members and a House of Representatives of 150 members (both elected for two years), meets in Jan. every year. The Governor and Lieut.-Governor are elected for two years. Electors are all citizens who possess certain residential qualifications and have taken the freeman’s oath set forth in the constitution.

For the 108th Congress, which convened in Jan. 2003, Vermont sends one member to the House of Representatives. It is represented in the Senate by Patrick Leahy (D. 1975–2005) and Jim Jeffords (R. 1989–2001, ind. 2001–07).

VIRGINIA

KEY HISTORICAL EVENTS

In 1607 a British colony was founded at Jamestown, on a peninsula in the James River, to grow tobacco. The area was marshy and unhealthy but the colony survived and in 1619 introduced a form of representative government. The tobacco plantations expanded and African slaves were imported. Jamestown was later abandoned, but tobacco-growing continued and spread through the eastern part of the territory.

In 1624 control of the colony passed from the Virginia Company of London to the Crown. Growth was rapid during the 17th and 18th centuries. The movement for American independence was strong in Virginia; George Washington and Thomas Jefferson were both Virginians, and crucial battles of the War of Independence were fought there.

When the Union was formed, Virginia became one of the original states, but with reservations regarding the constitution because of its attachment to slave-owning. In 1831 there was a slave rebellion. The tobacco plantations began to decline, and plantation owners turned to the breeding of slaves. While the eastern plantation lands seceded from the Union in 1861, the small farmers and miners of the western hills refused to secede and remained in the Union as West Virginia.

Richmond, the capital, became the capital of the Confederacy. Much of the Civil War's decisive conflict took place in Virginia, with considerable damage to the economy. After the war the position of the black population was little improved. Blacks remained without political or civil rights until the 1960s.

TERRITORY AND POPULATION

Virginia is bounded northwest by West Virginia, northeast by Maryland, east by the Atlantic, south by North Carolina and Tennessee and west by Kentucky. Land area, 39,594 sq. miles (102,548 sq. km). WASHINGTON

KEY HISTORICAL EVENTS

The strongest Indian tribes in the 18th century were Chinook, Nez Percé, Salish and Yakima. The area was designated by European colonizers as part of the Oregon Country. Between 1775 and 1800 it had been claimed by explorers for Spain, Britain and the USA; the dispute between the two latter nations was not settled until 1846.

The first small white settlements were Indian missions and fur-trading posts. In the 1840s American settlers began to push westwards along the Oregon Trail, making a speedy solution of the dispute with Britain necessary. When this was achieved the whole area was organized as the Oregon Territory in 1848, and Washington was made a separate Territory in 1853.

Apart from trapping and fishing, the important industry was logging, mainly to supply building timbers to the new settlements of California. After 1870 the westward extension of railways helped to stimulate settlement. Statehood was granted in 1889. The early population was composed mainly of Americans from neighbouring states to the east, and Canadians. Scandinavian immigrants followed. Seattle, the chief city, was laid out in 1853 as a saw-milling town and named after the Indian chief who had ceded the land and befriended the settlers. It grew as a port during the Alaskan and Yukon gold-rushes of the 1890s. The economy thrived on exploiting the Columbia River for hydro-electric power.

WEST VIRGINIA

KEY HISTORICAL EVENTS

In 1861 the state of Virginia seceded from the Union over the issue of slave-owning. The 40 western counties of the state were composed of hilly country, settled by miners and small farmers who were not slave-owners, and these counties ratified an ordinance providing for the creation of a new state that same year. On 20 June 1863 West Virginia became the 35th state of the Union.

The capital, Charleston, was an 18th-century fortified post on the early westward migration routes across the Appalachians. In 1795 local brine wells were tapped and the city grew as a salt town. Coal, oil, natural gas and a variety of salt brines were all found in due course. Huntington, the next largest town, developed as a railway terminus serving the same industrial area, and also providing transport on the Ohio river. Wheeling, the original state capital, was a well established, cosmopolitan city when it hosted the statehood meetings in 1861, located on the major transportation routes of the Ohio River, Baltimore and Ohio Railroad and the National Road.

Three-quarters of the state is forest and settlement has been concentrated in the mineral-bearing Kanawha valley, along the Ohio river and in the industrial Monongahela valley of the north. More than half of the population is still classified as rural. The traditional small firms and small hill-mines, however, support few, and the majority of rural dwellers commute to industrial employment.

TERRITORY AND POPULATION

WISCONSIN

KEY HISTORICAL EVENTS

The French were the first European explorers of the territory; Jean Nicolet landed at Green Bay in 1634, a mission was founded in 1671 and a permanent settlement at Green Bay followed. In 1763 French claims were surrendered to Britain. In 1783 Britain ceded them to the USA, which designated the Northwest Territory, of which Wisconsin was part. In 1836 a separate Territory of Wisconsin was organized, including the present Iowa, Minnesota and parts of the Dakotas.

Territorial organization was a great stimulus to settlement. In 1836 James Duane Doty founded the town site of Madison and successfully pressed its claim to be the capital of the Territory even before it was inhabited. In 1848 Wisconsin became a state, with its present boundaries.

The city of Milwaukee was founded, on Lake Michigan, when Indian tribes gave up their claims to the land in 1831–33. It grew rapidly as a port and industrial town, attracting Germans in the 1840s, Poles and Italians 50 years later. The Lake Michigan shore was developed as an industrial area; the rest of the south proved suitable for dairy farming; the north, mainly forests and lakes, has remained sparsely settled except for tourist bases.

There are 11 Indian reservations where more than 15,500 of Wisconsin's 47,000 Indians live. Since the Second World War there has been black immigration from the southern states to the industrial lake-shore cities.

WYOMING

KEY HISTORICAL EVENTS

The territory was inhabited by Plains Indians (Arapahoes, Sioux and Cheyenne) in the early 19th century. There was some trading between them and white Americans, but very little white settlement. In the 1840s the great western migration routes, the Oregon and the Overland Trails, ran through the territory, Wyoming offering mountain passes accessible to wagons. Once migration became a steady flow it was necessary to protect the route from Indian attack, and forts were built.

In 1867 coal was discovered. In 1868 Wyoming was organized as a separate Territory, and in 1869 the Sioux and Arapaho were confined to reservations. At the same time the route of the Union Pacific Railway was laid out, and working settlements and railway towns grew up in southern Wyoming. Settlement of the north was delayed until after the final defeat of hostile Indians in 1876.

The economy of the settlements at first depended on ranching. Cheyenne had been made Territorial capital in 1869, and also functioned as a railway town moving cattle. Casper, on the site of a fort on the Pony Express route, was also a railway town on the Chicago and North Western. Laramie started as a Union Pacific construction workers' shanty town in 1868. In 1890 oil was discovered at Casper, and Wyoming became a state in the same year. Subsequently, mineral extraction became the leading industry, as natural gas, uranium, bentonite and trona were exploited as well as oil and coal.

OUTLYING TERRITORIES

The outlying territories of the USA comprise the two Commonwealths of the Northern Mariana Islands and Puerto Rico, a number of unincorporated territories in the Pacific Ocean and one unincorporated territory in the Caribbean Sea.

COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS

KEY HISTORICAL EVENTS

In 1889 Spain ceded Guam (largest and southernmost of the Marianas Islands) to the USA and sold the rest to Germany. Occupied by Japan in 1914, the islands were administered by Japan under a League of Nations mandate until occupied by US forces in Aug. 1944. In 1947 they became part of the US-administered Trust Territory of the Pacific Islands. On 17 June 1975 the electorate adopted a covenant to establish a Commonwealth in association with the USA; this was approved by the US government in April 1976 and came into force on 1 Jan. 1978. In Nov. 1986 the islanders were granted US citizenship. The UN terminated the Trusteeship status on 22 Dec. 1990.

The Northern Marianas form a single chain of 16 mountainous islands extending north of Guam for about 560 km, with a total area of 5,050 sq. km (1,950 sq. miles) of which 464 sq. km (179 sq. miles) are dry land, and with a population (2000 census) of 69,221 (female, 37,237).

In 1917 US citizenship was conferred and in 1932 there was a name change from Porto Rico to Puerto Rico. In 1952 Puerto Rico was proclaimed a commonwealth with a representative government and a directly elected governor.

TERRITORY AND POPULATION

Puerto Rico is the most easterly of the Greater Antilles and lies between the Dominican Republic and the US Virgin Islands. The total area is 13,791 sq. km (5,325 sq. miles), of which 8,871 sq. km (3,425 sq. miles) are dry land; the population, according to the census of 2000, was 3,808,610, an increase of 8·1% over 1990. They have one non-voting representative in Washington. The island is given billions of dollars each year in food stamps and other federal aid from Washington and although Puerto Ricans fight in the US army, the island sends its own teams to the Olympic Games. The executive power resides in a Governor, elected directly by the people every four years. 22 heads of departments form the Governor's Council of Secretaries. The legislative functions are vested in a Senate, composed of 28 members, and the House of Representatives, composed of 51 members. Both houses meet annually in Jan. Puerto Rican men are subject to conscription in US services.

A new constitution was drafted by a Puerto Rican Constituent Assembly and approved by the electorate at a referendum on 3 March 1952. AMERICAN SAMOA

KEY HISTORICAL EVENTS

The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. On 14 July 1889 a treaty between the USA, Germany and Great Britain proclaimed the Samoan islands neutral territory, under a four-power government consisting of the 3 treaty powers and the local native government. By the Tripartite Treaty of 7 Nov. 1899, ratified 19 Feb. 1900, Great Britain and Germany renounced in favour of the USA all rights over the islands of the Samoan group east of 171° long. west of Greenwich, the islands to the west of that meridian being assigned to Germany (now the independent state of Samoa). The islands of Tutuila and Aunu'u were ceded to the USA by their High Chiefs on 17 April 1900, and the islands of the Manu'a group on 16 July 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb. 1929. Swain's Island, 210 miles north of the Samoan Islands, was annexed in 1925 and is administered as an integral part of American Samoa.

TERRITORY AND POPULATION

The islands (Tutuila, Aunu'u, Ta'u, Olosega, Ofu and Rose) are approximately 650 miles east-northeast of the Fiji Islands. The total area is 1,511 sq. km (583 sq. miles), of which 200 sq. km (77 sq. miles) are dry land; population (2000 census), 57,291 (29,264 males), nearly all Polynesians or part-Polynesians; density 37·9 per sq. km.

In 1995 an estimated 50·3% of the population lived in urban areas. The capital is Pago Pago, which had a population of 14,000 in 1999. The island's three Districts are Eastern (population, 1980, 17,311), Western (13,227) and Manu'a (1,732). There is also Swain's Island, with an area of 1·9 sq. miles and 100 inhabitants (1994), which lies 210 miles to the northwest. Rose Island (uninhabited) is 0·4 sq. mile in area. In 1990 some 85,000 American Samoans lived in the USA.

Samoan and English are spoken.

SOCIAL STATISTICS

In 1996 the birth rate was 35·6 per 1,000 population and the death rate 4·0 per 1,000 population. Infant mortality was 18·8 per 1,000 live births. Annual growth rate, 1995–99, 4·0%.

CLIMATE

A tropical maritime climate with a small annual range of temperature and plentiful rainfall. Pago Pago, Jan. 83°F (28·3°C), July 80°F (26·7°C). Annual rainfall 194" (4,850 mm).

CONSTITUTION AND GOVERNMENT

American Samoa is constitutionally an unorganized, unincorporated territory of the USA administered under the Department of the Interior. Its indigenous inhabitants are US nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons. Polynesian customs (not inconsistent with US laws) are respected.

Fagatogo is the seat of the government.

The islands are organized in 15 counties grouped in 3 districts; these counties and districts correspond to the traditional political units. On 25 Feb. 1948 a bicameral legislature was established, at the request of the Samoans, to have advisory legislative functions. With the adoption of the Constitution of 22 April 1960, and the revised Constitution of 1967, the legislature was vested with limited law-making authority. The lower house, or House of Representatives, is composed of 20 members elected by universal adult suffrage and 1 non-voting member for Swain's Island. The upper house, or Senate, is comprised of 18 members elected, in the traditional Samoan manner, in meetings of the chiefs. The Governor and Lieut.-Governor have been popularly elected since 1978.

RECENT ELECTIONS

At elections to the Senate and House of Representatives on 5 and 19 Nov. 2002, only non-partisans were elected.

At gubernatorial elections on 7 Nov. 2000, Tauese P. Sunia (Democrat) won with 50·7% of the vote against 47·8% for the independent Lealaifuaneva Reid.

ECONOMY

Overview. An Economic Development and Planning Office was introduced in 1971. Much has been done to promote economic expansion and outside investment interest has been stimulated. The Office has initiated the first Territorial Comprehensive Plan. This plan when completed will provide a guideline to territorial development for 20 years. The focus will be on physical development and the problems of a rapidly increasing population with limited labour resources.

Budget. The chief sources of revenue are annual federal grants from the USA, local revenues from taxes, duties, receipts from commercial operations (enterprise and special revenue funds), utilities, rents and leases, and liquor sales. In 1990–91 revenues were $97m. ($43m. in local revenue and $54m. in grant revenue).

Banking and Finance. The American Samoa branch of the Bank of Hawaii and the American Samoa Bank offer all commercial banking services. The Development Bank of American Samoa, government-owned, is concerned primarily through loans and guarantees with the economic advancement of the Territory.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* American Samoa's carbon dioxide emissions in 1998 were the equivalent of 4·5 tonnes per capita.

Electricity. Installed capacity was 33,000 kW in 1993. Production in 1998 was 125m. kWh. Per capita consumption in 1995 was an estimated 1,743 kWh. All the Manu'a islands have electricity.

Water. The total area covered by water is approximately 13 sq. miles.

Agriculture. Of the 48,640 acres of land area, 11,000 acres are suitable for tropical crops; most commercial farms are in the Tafuna plains and west Tutuila. Principal crops are coconuts, taro, bread-fruit, yams and bananas.

Livestock (1996): pigs, 11,000.

Fisheries. Total catch in 2000 was 866 tonnes.

INDUSTRY

Fish canning is important, employing the second largest number of people (after government). Attempts are being made to provide a variety of light industries. Tuna fishing and local inshore fishing are both expanding. In 1990 there were 27,991 persons of employable age, of whom 14,400 were in the workforce. The unemployment rate in 1991 was 12%.

Imports	87·4	69·0	80·2	90·9	99·7
Exports	6·4	3·5	8·7	10·1	14·6

Chief exports are canned tuna, watches, pet foods and handicrafts. Chief imports are building materials, fuel oil, food, jewellery, machines and parts, alcoholic beverages and cigarettes.

South Pacific Island Airways also operates between Pago Pago and Honolulu, and between Pago Pago and Tonga. The islands are also served by Air Nauru which operates between Pago Pago, Tahiti and Auckland, and Air Pacific (Fiji Islands and westward). Manu'a Air Transport runs local services. There are three airports.

GUAM

KEY HISTORICAL EVENTS

Magellan is said to have discovered the island in 1521; it was ceded by Spain to the USA by the Treaty of Paris (10 Dec. 1898). The island was captured by the Japanese on 10 Dec. 1941, and retaken by American forces from 21 July 1944. Guam is of great strategic importance; substantial numbers of naval and air force personnel occupy about one-third of the usable land.

TERRITORY AND POPULATION

Guam is the largest and most southern island of the Marianas Archipelago, in 13° 26' N. lat., 144° 43' E. long. Total area, 209 sq. miles (541 sq. km). Agaña, the seat of government, is about 8 miles from the anchorage in Apra Harbor. The census in 2000 showed a population of 154,805 (79,181 males), of whom 80,737 were born in Guam; density, 286·1 per sq. km. In 1995 an estimated 61·7% of the population lived in rural areas. The Malay strain is predominant. The native language is Chamorro; English is the official language and is taught in all schools.

CONSTITUTION AND GOVERNMENT

Guam's constitutional status is that of an 'unincorporated territory' of the USA. Entry of US citizens is unrestricted; foreign nationals are subject to normal regulations. In 1949–50 the President transferred the administration of the island from the Navy Department (who held it from 1899) to the Interior Department. The transfer conferred full citizenship on the Guamanians, who had previously been 'nationals' of the USA. There was a referendum on status on 30 Jan. 1982. 38% of eligible voters voted; 48·5% of those favoured Commonwealth status.

The Governor and his staff constitute the executive arm of the government. The legislature is a 21-member Senate; its powers are similar to those of an American state legislature.

RECENT ELECTIONS

At the election of 5 Nov. 2002 for the Guam Legislature the Democrats won 9 seats and the Republicans won 6. In gubernatorial elections held on the same day, Republican candidate Felix Camacho won 55·2% of the vote against 44·8% for Democrat Robert Underwood.

VIRGIN ISLANDS OF THE UNITED STATES

KEY HISTORICAL EVENTS

The Virgin Islands of the United States, formerly known as the Danish West Indies, were named and claimed for Spain by Columbus in 1493. They were later settled by Dutch and English planters, invaded by France in the mid-17th century and abandoned by the French *c.* 1700, by which time Danish influence had been established. St Croix was held by the Knights of Malta between two periods of French rule.

The Virgin Islands were purchased by the United States from Denmark for $25m. in a treaty ratified by both nations and proclaimed on 31 March 1917. Their value was wholly strategic, inasmuch as they commanded the Anegada Passage from the Atlantic Ocean to the Caribbean Sea and the approach to the Panama Canal. Although the inhabitants were made US citizens in 1927, the islands are, constitutionally, an ‘unincorporated territory’.

TERRITORY AND POPULATION

The Virgin Islands group, lying about 40 miles due east of Puerto Rico, comprises the islands of St Thomas (31 sq. miles), St Croix (83 sq. miles), St John (20 sq. miles) and 65 small islets or cays, mostly uninhabited. The total area is 1,910 sq. km (738 sq. miles), of which 346 sq. km (134 sq. miles) are dry land.

The population according to the 2000 census was 108,612 (females, 56,748); density 811 per sq. mile. Official population estimate for July 2002 was 123,498. An estimated 54·9% of the population were rural in 1995.

Population (2000 census) of St Croix, 53,234; St Thomas, 51,181; St John, 4,197. In 2000, 69·8% of the population were native born.

The capital and only city, Charlotte Amalie, on St Thomas, had a population (2000 census) of 11,044. There are two towns on St Croix with 2000 census populations of: Christiansted, 2,637; Frederiksted, 732.

SOCIAL STATISTICS

1997 births, 2,017; deaths, 620. Rates, 1997 (per 1,000 population); birth, 17·6; death, 5·4; infant mortality, 12·9 per 1,000 live births.

CLIMATE

Average temperatures vary from 77°F to 82°F throughout the year; humidity is low. Average annual rainfall, about 45". The islands lie in the hurricane belt; tropical storms with heavy rainfall can occur in late summer.

CONSTITUTION AND GOVERNMENT

The Organic Act of 22 July 1954 gives the US Department of the Interior full jurisdiction; some limited legislative powers are given to a single-chambered legislature, composed of 15 senators elected for two years representing the two legislative districts of St Croix and St Thomas-St John.

The Governor is elected by the residents. Since 1954 there have been four attempts to redraft the Constitution, to provide for greater autonomy. Each has been rejected by the electorate. The latest was defeated in a referendum in Nov. 1981, 50% of the electorate participating.

For administration, there are 14 executive departments, 13 of which are under commissioners and the other, the Department of Justice, under an Attorney-General. The US Department of the Interior appoints a Federal Comptroller of government revenue and expenditure.

The franchise is vested in residents who are citizens of the United States, 18 years of age or over. In 1986 there were 34,183 voters, of whom 26,377 participated in the local elections that year. They do not participate in the US presidential election but they have a non-voting representative in Congress.

The capital is Charlotte Amalie, on St Thomas Island.

RECENT ELECTIONS

Elections for governor held on 5 Nov. 2002 were won by Charles Turnbull II (Democrat) with 50·5% of the votes, ahead of John DeJongh in second place with 24·4%. The turn-out was 62%. In Senate elections held on 7 Nov. 2000 the Democratic Party of the Virgin Islands won 8 out of 15 seats.

KEY HISTORICAL EVENTS

Uruguay was the last colony settled by Spain in the Americas. Part of the Spanish viceroyalty of Rio de la Plata until revolutionaries expelled the Spanish in 1811 and subsequently a province of Brazil, Uruguay declared independence on 25 Aug. 1825. Conflict between two political parties, the *blancos* (conservatives) and the *colorados* (liberals), led, in 1865–70, to the War of the Triple Alliance. In 1903 peace and prosperity were restored under President José Batlle y Ordóñez. Since 1904 Uruguay has been unique in her constitutional innovations, all designed to protect her from dictatorship. A favoured device was the collegiate system of government, in which the two largest political parties were represented.

The early part of the 20th century saw the development of a welfare state in Uruguay which encouraged extensive immigration. In 1919 a new constitution was adopted providing for a *colegiado*—a plural executive based on the Swiss pattern. However, the system was abolished in 1933 and replaced by presidential government, with quadrennial elections. From 1951 to 1966 a collective form of leadership again replaced the presidency. During the 1960s, following a series of strikes and riots, the Army became increasingly influential, repressive measures were adopted and presidential government was restored in 1967. The Tupamaro, Marxist urban guerrillas, sought violent revolution but were finally defeated by the Army in 1972. The return to civilian rule came on 12 Feb. 1985.

Congress consists of a *Senate* of 31 members and a *Chamber of Deputies* of 99 members, both elected by proportional representation for five-year terms. The electoral system provides that the successful presidential candidate be a member of the party which gains a parliamentary majority. Electors vote for deputies on a first-past-the-post system, and simultaneously vote for a presidential candidate of the same party. The winners of the second vote are credited with the number of votes obtained by their party in the parliamentary elections. Referendums may be called at the instigation of 10,000 signatories.

ECONOMY

In 1998 services contributed 64·0% of GDP, industry 27·5% and agriculture 8·5%.

Overview. Uruguay's small economy benefits from a favourable climate for agriculture and a substantial hydropower potential. Economic development has been restrained in recent years by high—though declining—inflation and extensive government regulation. Uruguayan trade has continued to expand and the potential for new markets continued to open through negotiations with neighbouring countries and the EU.

Currency. The unit of currency is the *Uruguayan peso* (UYP), of 100 *centésimos*, which replaced the nuevo peso in March 1993 at 1 Uruguayan peso = 1,000 nuevos pesos. In June 2002 Uruguay allowed the peso to float freely. Foreign exchange reserves were US$1,791m. and gold reserves 8,000 troy oz in May 2002 (1·8m. troy oz in Nov. 1999). Inflation, which had been over 100% in 1990, was 4·4% in 2001. Total money supply in Feb. 2002 was 12,456m. pesos.

Budget. Central government finance (1m. pesos):

	1995	*1996*	*1997*	*1998*	*1999*	*2000*

Expenditure	35,390	47,914	62,363	72,673	76,079	76,489

Standard rate of VAT is 23%.

Performance. Uruguay depends heavily on its two large neighbours, Uruguay and Argentina. In 1999, as a consequence of the devaluation of the Brazilian *real* and the worst drought since 1988, Uruguay's economy shrank by 2·8%. In 2000 there was negative growth again, of 1·4%, and the general downturn in the world economy exacerbated by Argentina's crisis caused the economy to contract again in 2001, by 3·1%. Total GDP in 2001 was US$18·4bn.

Banking and Finance. The Central Bank (*President*, Julio de Brun) was inaugurated on 16 May 1967. It is the bank of issue and supreme regulatory authority. In 1994 there were 22 commercial banks, 3 state-supported and 18 foreign-owned. Savings banks deposits were 1,993,029m. pesos in 1995. KEY HISTORICAL EVENTS

Descended from nomadic Mongol tribes who settled in Central Asia in the 13th century, the Uzbeks came under Russian control in the late 19th century. In Oct. 1917 the Tashkent Soviet assumed authority. The semi-independent Khanates of Khiva and Bokhara were first (1920) transformed into People's Republics, then (1923–24) into Soviet Socialist Republics, and finally merged in the Uzbek SSR and other republics. On 20 June 1990 the Supreme Soviet adopted a declaration of sovereignty and in Aug. 1991, following an unsuccessful coup, declared independence as the Republic of Uzbekistan. In Dec. 1991 Uzbekistan became a member of the CIS.

Islam Karimov became head of state in 1990 and was elected president in 1991 and again in 2000. In that year Uzbek border guards moved their posts 5 km into a part of neighbouring Kazakhstan. Borders with Russia and Kyrgyzstan still remain undefined, yet the chief cause for concern is the Islamist Movement of Uzbekistan's fight to create an Islamic state in the Fergana Valley. Bomb blasts in Tashkent, one of which almost killed the president in 1999, were blamed on religious extremists and the army suffered losses fighting the IMU in 2000. Central Asian governments have agreed to co-operate on the issue.

The population in 1997 was 23,467,700 (11,842,800 females); density, 52·5 per sq. km. In 1999, 62·8% of the population lived in rural areas.

CONSTITUTION AND GOVERNMENT
A new constitution was adopted on 8 Dec. 1992 stating that Uzbekistan is a pluralist democracy. The constitution restricts the president to standing for two five-year terms. In Jan. 2002 a referendum was held at which 91% of the electorate voted in favour of extending the presidential term from five to seven years. It was not clear whether the change would affect the current presidential term, scheduled to end in 2005. Voters were also in favour of changing from a single-chamber legislature to a bicameral parliament.

Parliament is the 250-member *Oliy Majlis* (Supreme Assembly).

KEY HISTORICAL EVENTS

Vanuatu occupies the group of islands formerly known as the New Hebrides, in the southwestern Pacific Ocean. Captain Bligh and his companions, cast adrift by the *Bounty* mutineers, sailed through part of the island group in 1789. Sandalwood merchants and European missionaries came to the islands in the mid-19th century and were then followed by cotton planters—mostly French and British—in 1868. In response to Australian calls to annexe the islands, Britain and France agreed on joint supervision. Joint sovereignty was held over the indigenous Melanesian people but each nation retained responsibility for its own nationals according to a protocol of 1914. The island group escaped Japanese invasion during the Second World War and became an Allied base. On 30 July 1980 New Hebrides became an independent nation under the name of Vanuatu, meaning 'Our Land Forever'.

TERRITORY AND POPULATION

Vanuatu comprises 80 islands, which lie roughly 800 km west of the Fiji Islands and 400 km northeast of New Caledonia. The estimated land area is 4,706 sq. miles (12,190 sq. km). They also claim Matthew and Hunter islands. 67 islands were inhabited in 1990. Population at the 1999 census, 186,678; density, 15·3 per sq. km.

It has its own railway station (for freight only), postal facilities, coins and radio. Twelve buildings in and outside Rome enjoy extra-territorial rights, including the Basilicas of St John Lateran, St Mary Major and St Paul without the Walls, the Pope's summer villa at Castel Gandolfo and a further Vatican radio station on Italian soil. *Radio Vaticana* broadcasts an extensive service in 34 languages from the transmitters in Vatican City and in Italy. The Holy See and the Vatican are not synonymous—the Holy See, referring to the primacy of the Pope, is located in Vatican City. The official language is Latin.

Vatican City has about 900 inhabitants.

CONSTITUTION AND GOVERNMENT
Vatican City State is governed by a Commission appointed by the Pope. The reason for its existence is to provide an extra-territorial, independent base for the Holy See, the government of the Roman Catholic Church. The Pope exercises sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in the first instance, to the Sacred Roman Rota in appeal and to the Supreme Tribunal of the Signature in final appeal.

The Pope is elected by the College of Cardinals, meeting in secret conclave. The election is by scrutiny and requires a two-thirds majority.

CURRENT ADMINISTRATION
Supreme Pontiff: **John Paul II** (Karol Wojtyła), born at Wadowice near Kraków, Poland, 18 May 1920. Archbishop of Kraków 1964–78, created Cardinal in 1967; elected Pope 16 Oct. 1978, inaugurated 22 Oct. 1978.

Pope John Paul II was the first non-Italian to be elected since Pope Adrian VI (a Dutchman) in 1522.

Secretary of State: Cardinal Angelo Sodano.

Secretary for Relations with Other States: H. E. Mgr Jean-Louis Tauran.

Office of the Sovereign of the Vatican City: http://www.vatican.va

ECONOMY

Currency. Since 1 Jan. 2002 the Vatican City has been using the euro. Italy has agreed that the Vatican City may mint a small part of the total Italian euro coin contingent with their own motifs. Average annual inflation in the period 1997–2001 was 11·2%.

Budget. The Vatican's budget is financed primarily by contributions from Roman Catholics around the world, various investment income, visitors to museums, and

sales of souvenirs and postage stamps. Revenues in 1994 were US$175·5m. and expenditures US$175m.

Performance. Real GDP growth was 1·7% in 2001.

SOCIAL INSTITUTIONS

Justice. In 2002 the Vatican City's legal system hosted 397 civil cases and 608 criminal cases—more cases than there are inhabitants. Many of the offences are committed by outsiders, principally at St Peter's Basilica and the museums.

Roman Catholic Church. The Roman Pontiff is in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity. The Pope is the Vicar of Christ and the Successor of St Peter, who exercises universal governance over the Church. He is also the sovereign ruler of Vatican City State. He has for advisers the Sacred College of Cardinals, consisting in Jan. 2003 of 171 Cardinals from 66 countries (150 created by Pope John Paul II), of whom 112 are cardinal electors—those under the age of 80 who may enter into conclave to elect a new Pope. Cardinals, addressed by the title of 'Eminence', are appointed by the Pope from senior ecclesiastics who are either the bishops of important Sees or the heads of departments at the Roman Curia. In addition to the College of Cardinals, there is a Synod of Bishops, created by Pope Paul VI and formally instituted on 15 Sept. 1965. This consists of the Patriarchs and certain Metropolitans of the Catholic Church of Oriental Rite, of elected representatives of the national episcopal conferences and religious orders of the world, of the Cardinals in charge of the Roman Congregations and of other persons nominated by the Pope. The Synod meets in both general (global) and special (regional) assemblies. General Synods are scheduled to take place every three years. The last was held in Oct. 2001 on the theme of the mission of the local bishop in the universal church.

The central administration of the Roman Catholic Church is carried out by a number of permanent organisms called Congregations, Council, Commissions and Offices. The Congregations are composed of a number of Cardinals and diocesan bishops (both appointed for five-year periods), with Consultors and Officials. Besides the Secretariat of State (which has two sections, including the Section for Relations with States) there are now nine Congregations, viz.: Doctrine, Oriental Churches, Bishops, the Sacraments and Divine Worship, Clergy, Religious, Catholic Education, Evangelization of the Peoples and Causes of the Saints. Pontifical Councils have replaced some of the previously designated Secretariats and Prefectures and now represent the Laity, Christian Unity, the Family, Justice and Peace, Cor Unum, Migrants, Health Care Workers, Interpretation of Legislative Texts, Inter-Religious Dialogue, Culture, Preserving the Patrimony of Art and History, and a Commission, for Latin America. There are also various Offices. There are three academies: the Pontifical Academy for Sciences, the Pontifical Academy for Life and the Pontifical Academy for Social Sciences, the latter two instituted by Pope John Paul II.

CULTURE

Broadcasting. There were 3 AM, 4 FM and 2 shortwave radio broadcasting stations in 1998, and 1 television station in 1996.

KEY HISTORICAL EVENTS

Columbus sighted Venezuela in 1498 and it was visited by Alonso de Ojeda and Amerigo Vespucci in 1499 who named it Venezuela (Little Venice). It was part of the Spanish colony of New Granada until 1821 when it became independent, at first in union with Colombia and then as an independent republic from 1830. Up to 1945 the country was governed mainly by dictators. In 1945 a three-day revolt against the reactionary government of Gen. Isaias Medina led to constitutional and economic reforms. In 1961 a new constitution provided for a presidential election every five years, a national congress, and state and municipal legislative assemblies. Twenty political parties participated in the 1983 elections. By now the economy was in crisis and corruption linked to drug trafficking was widespread. In Feb. 1992 there were two abortive coups. A state of emergency was declared. In Dec. 1993 Dr Rafael Caldera Rodríguez's election as president reflected disenchantment with the established political parties. He took office in the early stages of a banking crisis which cost 15% of GDP to resolve. Fiscal tightening backed by the IMF brought rapid recovery. Hugo Chávez Frías, who succeeded as president in Feb. 1999, continued with economic reforms and amended the constitution to increase presidential powers.

In Dec. 1999 the north coast of Venezuela was hit by devastating floods and mudslides which resulted in approximately 30,000 deaths.

President Chávez was deposed and arrested on 12 April 2002 in a coup following a general strike, but he was back in the presidential palace just 48 hours later.

TERRITORY AND POPULATION

Venezuela is bounded to the north by the Caribbean with a 2,813 km coastline, east by the Atlantic and Guyana, south by Brazil, and southwest and west by Colombia. The area is 916,490 sq. km (353,857 sq. miles) including 72 islands in the Caribbean. Population (1990) census, 19,455,429 (86·6% urban, 1999). Estimate (1997) 21·8m.; density, 23·9 per sq. km.

The UN gives a projected population for 2010 of 28·72m.

The official language is Spanish. English is taught as a mandatory second language in high schools.

CLIMATE

The climate ranges from warm temperate to tropical. Temperatures vary little throughout the year and rainfall is plentiful. The dry season is from Dec. to April. The hottest months are July and August. Caracas, Jan. 65°F (18·3°C), July 69°F (20·6°C). Annual rainfall 32" (833 mm). Ciudad Bolívar, Jan. 79°F (26·1°C), July 81°F (27·2°C). Annual rainfall 41" (1,016 mm). Maracaibo, Jan. 81°F (27·2°C), July 85°F (29·4°C). Annual rainfall 23" (577 mm).

CONSTITUTION AND GOVERNMENT

The current constitution was approved in a referendum held on 15 Dec. 1999. Venezuela is a federal republic, comprising 34 federal dependencies, 23 states and 1 federal district. Executive power is vested in the President. The ministers, who together constitute the Council of Ministers, are appointed by the President and head various executive departments. There are 17 ministries and 7 officials who also have the rank of Minister of State.

90% of votes cast in a referendum (the first in Venezuela's history) on 25 April 1999 were in favour of the plan to rewrite the constitution proposed by President Chávez. As a result, on 25 July the public was to elect a constitutional assembly to write a new constitution, which was subsequently to be voted on in a national referendum. In Aug. 1999 the constitutional assembly declared a national state of emergency. It subsequently suspended the Supreme Court, turned the elected Congress into little more than a sub-committee, stripping it of all its powers, and assumed many of the responsibilities of government. In Dec. 1999 the President's plan to redraft the constitution was approved by over 70% of voters in a referendum. As a result presidents are able to serve two consecutive six-year-terms instead of terms of five years which cannot be consecutive, the senate is abolished and greater powers are being given to the state and the armed forces. President Chávez has effectively taken over both the executive and the judiciary. The constitution provides for procedures by which the president may reject bills passed by Congress, as well as provisions by which Congress may override such presidential veto acts.

National Anthem. 'Gloria al bravo pueblo' ('Glory to the brave people'); words by Vicente Salias, tune by Juan Landaeta.

RECENT ELECTIONS

ECONOMY

In 1998 services accounted for 61·0% of GDP, industry 34·0% and agriculture 5·0%.

Overview. A stabilization programme of April 1996 introduced market-oriented reforms. An ambitious programme of privatization has stalled, with 23 companies having been privatized between 1991 and 1997.

Currency. The unit of currency is the *bolívar* (VEB) of 100 *céntimos*. Foreign exchange reserves were US$7,204m. and gold reserves 10·50m. troy oz in June 2002. Exchange controls were abolished in April 1996. The bolívar was devalued by 12·6% in 1998, and in Feb. 2002 it was floated, ending a regime that permitted the bolívar to trade only within a fixed band. However, in Feb. 2003 it was pegged to the dollar. The inflation rate in 2001 was 12·5%, the lowest in more than 15 years and down from nearly 100% in 1996. There was then a steady rise in inflation, with the annualized rate reaching 30·7% in Nov. 2002. Total money supply in May 2002 was Bs 7,232·47bn.

Budget. The fiscal year is the calendar year. Revenues and expenditures in Bs 1m.:

President for five-year terms. Since 1993 foreign banks have been allowed a controlling interest in domestic banks.

There is a stock exchange in Caracas.

ENERGY AND NATURAL RESOURCES

Oil and Gas. Proven resources of oil were 77·7bn. bbls. in 2001. Venezuela has the highest reserves of oil of any country outside the Middle East. The oil sector was nationalized in 1976, but private and foreign investment have again been permitted since 1992. Crude oil production in 1998 was 1·13bn. bbls. (3·1m. bbls. a day). Venezuela is the largest exporter of oil to the USA. Oil provides about 40% of Venezuela's revenues. Natural gas production (1999) 32·0bn. cu. metres. SOCIAL INSTITUTIONS

Justice. A new penal code was implemented on 1 July 1999. The new, US-style system features public trials, verbal arguments, prosecutors, citizen juries and the presumption of innocence, instead of an inquisitorial system inherited from Spain which included secretive trials and long exchanges of written arguments.

In Aug. 1999 the new constitutional assembly declared a judicial emergency, granting itself sweeping new powers to dismiss judges and overhaul the court system. The assembly excluded the Supreme Court and the national Judicial Council from a commission charged with reorganizing the judiciary. President Chávez declared the assembly the supreme power in Venezuela.

The court system is plagued by chronic corruption and an astounding case backlog. Only about 9,700 of the country's 23,000 prisoners in 1999 had actually been convicted. In Oct. 1999 over 100 judges accused of corruption were suspended.

KEY HISTORICAL EVENTS

By the end of the 15th century, the Vietnamese had conquered most of the Kingdom of Champa (now Vietnam's central area) and by the end of the 18th century had acquired Cochin-China (now its southern area). At the end of the 18th century, France helped to establish the Emperor Gia-Long as ruler of a unified Vietnam. Cambodia had become a French protectorate in 1863 and in 1899, after the extension of French protection to Laos in 1893, the Indo Chinese Union was proclaimed.

In 1940 Vietnam was occupied by the Japanese. In Aug. 1945 they allowed the Vietminh movement to seize power, dethrone the Emperor and establish a republic known as Vietnam. On 6 March 1946 France recognized 'the Democratic Republic of Vietnam' as a 'Free State within the Indo-Chinese Federation'. On 19 Dec. Vietminh forces made a surprise attack on Hanoi, the signal for nearly eight years of hostilities. An agreement on the cessation of hostilities was reached on 20 July 1954. The French withdrew and by the Paris Agreement of 29 Dec. 1954 completed the transfer of sovereignty to Vietnam which was divided along the 17th parallel into Communist North Vietnam and the non-Communist South. From 1959 the North promoted insurgency in the south, provoking retaliation from the USA. A full scale guerrilla war developed.

In Paris on 27 Jan. 1973 an agreement was signed ending the war in Vietnam. However, hostilities continued between the North and the South until the latter's defeat in 1975. Between 150,000 and 200,000 South Vietnamese fled the country. The unification of North and South Vietnam into the Socialist Republic of Vietnam finally took place on 2 July 1976. Vietnam invaded Cambodia in Dec. 1978 and China attacked Vietnam in consequence. In 1986 Vietnam implemented economic reforms, gradually shifting to a multi-sectoral market economy under state regulation. On 11 July 1995 Vietnam and the USA normalized relations. On 28 July 1995 Vietnam became an official member of the Association of South East Asian Nations (ASEAN) and in the same month signed a trade agreement with the European Union.

CONSTITUTION AND GOVERNMENT

The National Assembly unanimously approved a new constitution on 15 April 1992. Under this the Communist Party retains a monopoly of power and the responsibility for guiding the state according to the tenets of Marxism-Leninism and Ho Chi Minh, but with certain curbs on its administrative functions. The powers of the National Assembly are increased. The 450-member *National Assembly* is elected for five-year terms. Candidates may be proposed by the Communist Party or the Fatherland Front (which groups various social organizations), or they may propose themselves as individual Independents. The Assembly convenes three times a year and appoints a prime minister and cabinet. It elects the *President*, the head of state. The latter heads a *State Council* which issues decrees when the National Assembly is not in session.

The ultimate source of political power is the Communist Party of Vietnam, founded in 1930; it had 2·2m. members in 1996.

Further reforms in the 1990s failed to prevent the effects of the Asian economic crisis. A deepening of the *Doi Moi* process, with further economic liberalization, was scheduled in a 'Ten Year Socio-Economic Development Strategy 2001–10'.

The 1992 constitution embodies the market-oriented reforms of recent years, recognizing citizens' right to engage in private business. A bankruptcy law was passed in Jan. 1994.

KEY HISTORICAL EVENTS

Following an agreement in Dec. 1989 on a constitution for a unified state, the (northern) Yemen Arab Republic and the (southern) People's Democratic Republic of Yemen were united as the Republic of Yemen on 22 May 1990. In Aug. 1993 Vice-President Ali Salem Albidh withdrew to Aden demanding reforms as a condition of re-joining President Saleh in Sana'a. Albidh agreed to a modified reform programme but clashes between north and south escalated into full civil war at the beginning of May. Southern officials announced their secession from Yemen on 21 May 1994. Aden was captured by northern forces on 7 June 1994. The former vice-president and government went into exile.

TERRITORY AND POPULATION

Yemen is bounded in the north by Saudi Arabia, east by Oman, south by the Gulf of Aden and west by the Red Sea. The territory includes 112 islands including Kamaran (181 sq. km) and Perim (300 sq. km) in the Red Sea and Socotra (3,500 sq. km) in the Gulf of Aden. The islands of Greater and Lesser Hanish are claimed by both Yemen and Eritrea. On 15 Dec. 1995 Eritrean troops occupied them, and Yemen retaliated with aerial bombardments. A ceasefire was agreed at presidential level on 17 Dec. On 20 Dec. the UN resolved to send a good offices mission to the area. In an agreement of 21 May 1996 brokered by France, Yemen and Eritrea renounced the use of force to settle the dispute and agreed to submit it to arbitration. The area is 555,000 sq. km excluding the desert Empty Quarter (Rub Al-Khahi). A dispute with Saudi Arabia broke out in Dec. 1994 over some 1,500–2,000 km of undemarcated desert boundary. A memorandum of understanding signed on 26 Feb. 1995 reaffirmed the border agreement reached at Taif in 1934, and on 12 June 2000 a 'final and permanent' border treaty between the two countries was signed. An agreement of June 1995 completed the demarcation of the border with Oman.

The population was estimated at 15·8m. in 1995; density, 21 persons per sq. km. The UN gives a projected population for 2010 of 27·36m.

In 1999, 75·5% of the population lived in rural areas. At the census of 1994 the population was 14,832,673. There were 1,168,199 citizens working abroad, mainly in Saudi Arabia and the United Arab Emirates, not included in the census total. Since 1990 Saudi Arabia has compulsorily repatriated almost all Yemeni workers. In 1994 there were 17 governorates plus the capital city, Sana'a:

	1994 census population		*1994 census population*
Abyan	414,543	Lahej	634,652
Aden	562,162	Mahrah	112,512

The population of the capital, Sana'a, was 1,231,000 in 1999. The commercial capital is the port of Aden, with a population of (1995) 562,000. Other important towns are Ta'iz, the port of Hodeida, Mukalla, Ibb and Abyan.

On 28 Sept. 1994 the Assembly of Representatives unanimously adopted a new constitution founded on Islamic law. It abolished the former five-member Presidential Council and installed a *President* elected by parliament for a five-year term, subsequently amended to a seven-year term through a referendum held on 20 Feb. 2001. As a result of the same referendum the term for MPs was extended from four to six years.

KEY HISTORICAL EVENTS

The majority of the population is of Bantu origin. There are more than 70 different tribes, the most important being the Bemba and the Bgoni in the northeast. One of the more successful of the invading tribes was the Lozi under Lewanika, who obtained the protection of the British government in 1891. In 1900 the British South Africa Company acquired trading and mining rights. From 1911 the territory was known as Northern Rhodesia and in 1924 the Crown took over the administration.

In 1953 the Federation of Rhodesia and Nyasaland, of which Northern Rhodesia was a part, was created. Federation brought economic benefits to Northern Rhodesia but it was from the outset opposed by African leaders. In March 1963 Britain agreed to Northern Rhodesia's right to secede from the Federation. In Jan. 1964 full internal self-government was attained. On 24 Oct. Northern Rhodesia became an independent republic within the Commonwealth, changing its name to Zambia. A highly centralized one-party state was created which suffocated the emergent economy. Living standards fell sharply and the production of copper, Zambia's biggest foreign exchange earner, almost halved. In 1991 the Movement for Multiparty Democracy (MMD) was elected on a promise to transform the economy.

TERRITORY AND POPULATION

Zambia is bounded by the Democratic Republic of the Congo in the north, Tanzania in the northeast, Malaŵi in the east, Mozambique in the southeast, Zimbabwe and Namibia in the south, and by Angola in the west. The area is 290,586 sq. miles (752,614 sq. km). Population estimate (1997), 9·35m.; population density, 11·7 per sq. km. In 1999, 60·5% of the population were rural.

The projected population for 2010 is 12·99m.

The republic is divided into nine provinces. Area, population and chief towns:

Province	*Area (in sq. km)*	*Population (1990 census)*	*Chief Town*
Central	94,395	725,611	Kabwe
Copperbelt	31,328	1,579,542	Ndola
Eastern	69,106	973,818	Chipata
Luapula	50,567	526,705	Mansa
Lusaka	21,898	1,207,980	Lusaka
Northern	147,826	867,795	Kasama
North-Western	125,827	383,146	Solwezi
Southern	85,283	946,353	Livingstone
Western	126,386	607,447	Mongu

The capital is Lusaka, which had a population in 1999 of 1,577,000. Other major towns (with estimated 1990 population in 1,000) are: Ndola, 329; Kitwe, 288; Kabwe, 154; Chingola, 142; Mufulira, 124; Luanshya, 118; Livingstone, 77.

The official language is English and the main ethnic groups are the Bemba (34%), Tonga (16%), Nyanja (14%) and Lozi (9%).

SOCIAL STATISTICS

Births, 1995, 351,000; deaths, 149,000. 1995 birth rate per 1,000 population, 43·4; death rate, 18·5. Zambia's life expectancy at birth in 2000 was 40 years, down from 50 in 1990. The sharp decline is largely attributed to the huge number of people in the country with HIV. Annual population growth rate, 1990–99, 2·4%. Infant mortality, 1999, 112 per 1,000 live births; fertility rate, 1999, 5·4 births per woman.

CLIMATE

The climate is tropical, but has three seasons. The cool, dry one is from May to Aug., a hot dry one follows until Nov., when the wet season commences. Frosts may occur in some areas in the cool season. Lusaka, Jan. 70°F (21·1°C), July 61°F (16·1°C). Annual rainfall 33" (836 mm). Livingstone, Jan. 75°F (23·9°C), July 61°F (16·1°C). Annual rainfall 27" (673 mm). Ndola, Jan. 70°F (21·1°C), July 59°F (15°C). Annual rainfall 52" (1,293 mm).

CONSTITUTION AND GOVERNMENT

In Aug. 1991 the National Assembly adopted a new constitution by 107 votes to 15 permitting multi-party elections for a new wholly elected parliament of 150 members. Candidates for election as president must have both parents born in Zambia (this excludes ex-president Kaunda). The constitution was amended in 1996 shortly before the parliamentary and presidential elections. The amendment restricts the president from serving more than two terms of office.

National Anthem. 'Stand and Sing of Zambia'; words collective, tune by M. E. Sontonga.

RECENT ELECTIONS

Parliamentary and presidential elections took place on 27 Dec. 2001. The elections were beset by allegations of vote rigging, prompting investigations from EU monitors. Levy Mwanawasa, former president Frederick Chiluba's chosen successor, defeated ten other candidates running for the presidency yet only won 28·8% of votes cast.

In the parliamentary elections, Levy Mwanawasa's party, the Movement for Multiparty Democracy (MMD), gained 69 seats in the 159-seat National Assembly; the United Party for National Development gained 49; the United National Independence Party, 13; the Forum for Democracy and Development, 12; and the Heritage Party, 4. Mwanawasa's inaugural speech was boycotted by all ten opposition parties.

INTERNATIONAL RELATIONS

Zambia is a member of the UN, WTO, the Commonwealth, SADC, the African Union, African Development Bank, COMESA, IOM and is an ACP member state of the ACP-EU relationship.

During the 1990s Zambia received foreign aid equivalent to approximately US$900 a head, but according to the *World Bank* GNP per head declined from US$390 in 1991 to US$330 in 1999.

ECONOMY

In 1998 agriculture accounted for 17·3% of GDP, industry 26·4% and services 56·3%.

Overview. The privatization programme of 280 state-owned companies (255 had been sold by Aug. 2001) has created one of the most liberal economies in Africa. The most significant privatization has been that of the Zambia Consolidated Copper Mines Ltd (ZCCM), which previously accounted for approximately 70% of economic activity in the country.

Currency. The unit of currency is the *kwacha* (ZMK) of 100 *ngwee*. Foreign exchange reserves were US$98m. in April 2002. In Dec. 1992 the official and free market exchange rates were merged and the kwacha devalued 29%. Inflation, which was 183·3% in 1993, was brought down to 21·7% in 2001. Total money supply in May 2002 was 99,836m. kwacha.

Budget. The fiscal year is the calendar year. Budget in 1bn. kwacha:

	1996	*1997*	*1998*[1]	*1999*[2]

Expenditure	842·7	1,313·6	1,717·1	1,874·3

[1]Provisional. [2]Forecast.

Performance. In 1998 there was a recession, with the economy shrinking by 1·9%. This was caused by various problems including the non-completion of the privatization of the Zambia Consolidated Copper Mines, the negative effects of the El Niño climate phenomenon and the economic crisis in East Asia which adversely affected the price of copper. There was a slight recovery in 1999, with the economy expanding by 2·4%, followed by growth of 3·6% in 2000 and 4·9% in 2001. Total GDP in 2001 was US$3·6bn.

Banking and Finance. The central bank is the Bank of Zambia (*Governor*, Dr Caleb Fundanga). In 1996, 20 banks were operating. The Bank of Zambia monitors and supervises the operations of financial institutions. Banks and building societies are governed by the Banking and Financial Services Act 1994.

Zambia is the world's fourth leading producer of copper and produces a fifth of the world's cobalt. It is well-endowed with gemstones, especially emeralds, amethysts, aquamarine, tourmaline and garnets. In 1990 the government freed the gemstones trade from restrictions. In 1998, 192,189 tonnes of washed coal were produced (164,443 tonnes in 1997).

Zambia ranks 7th in the world for copper production. Since 1990 non-copper exports have increased in value from US$50m. to US$230m. All criminal cases tried by subordinate courts are subject to revision by the High Court.

KEY HISTORICAL EVENTS

The territory which now forms Zimbabwe was administered by the British South Africa Company from the beginning of European colonization in 1890 until 1923 when it was granted the status of a self-governing colony. In 1911 it was divided into Southern and Northern Rhodesia (*see* Zambia). In 1953 Southern and Northern Rhodesia were again united, along with Nyasaland, to form the Federation of Rhodesia and Nyasaland. When this federation was dissolved on 31 Dec. 1963 Southern Rhodesia reverted to the status of a self-governing colony within the British Commonwealth.

On 11 Nov. 1965 the white-dominated government issued a unilateral declaration of independence (UDI). Thereupon the Governor dismissed the prime minister, Ian Smith, and his cabinet and the British government reasserted formal responsibility for Rhodesia; but effective internal government was carried on by the Smith cabinet. From 1–3 Dec. Harold Wilson, the British prime minister, met Smith on board H.M.S. *Tiger* and drafted a 'Working Document' on progress towards legal independence. This statement was rejected by the Smith government. On 2 March 1970 the Smith government declared Rhodesia a republic and adopted a new constitution. On 3 March 1978 Smith signed a constitutional agreement with the internationally-backed nationalist leaders. A draft constitution was published in Jan. 1979 and was accepted by the white electorate in a referendum. Following the Commonwealth Conference held in Lusaka in Aug. 1979, elections took place in March 1980 resulting in a victory for the Zimbabwe African National Union (ZANU). Southern Rhodesia became the Republic of Zimbabwe.

Almost immediately, the question of land redistribution became a hot political issue. In colonial days, Africans had been ejected from the best farming country. All sides recognized the need for reform but were unable to agree on the means of achieving it. In 20 years, 3·5m. ha of land have been acquired from white farmers, with the UK footing the £44m. bill for resettlement, but only 70,000 families have benefited. Another 400,000 ha went to senior colleagues in President Mugabe's government. The economy, meanwhile, suffered roaring inflation, unemployment and acute shortages. A policy of land occupation, with black settlers taking over white-owned farms, started in early 2000. Pressures on President Mugabe to restore the rule of law were ignored and violence escalated. Elections took place in June 2000, in which President Mugabe achieved a narrow victory. Violence continued during the months which followed, as support for Mugabe dwindled. In the lead-up to the 2002 presidential election, again won by Mugabe but by dubious means, the opposition leader, Morgan Tsvangirai, was charged with treason. The land reform plan, involving the redistribution of white-owned land to landless black Zimbabweans, continued in 2002 with large numbers of farms seized by war veterans. Several African countries, including Zimbabwe, faced famine in 2002.

TERRITORY AND POPULATION

Zimbabwe is bounded in the north by Zambia, east by Mozambique, south by South Africa and west by Botswana and the Caprivi Strip of Namibia. The area is 150,872 sq. miles (390,759 sq. km). The population was (1992 census) 10,401,767 (51·2% female). Estimate, 1995, 11,475,000 (50·2% female); density, 29·4 per sq. km. In 1999, 65·4% of the population were rural.

By 2010 the effects of AIDS are expected to result in the population declining to 9m.

There are eight provinces and two cities, Harare and Bulawayo, with provincial status. Area and population (1992 census):

	Area (sq. km)	Population		Area (sq. km)	Population
Bulawayo	479	620,936	Mashonaland West	57,441	1,116,928
Harare	872	1,478,810	Masvingo	56,566	1,221,845
Manicaland	36,459	1,537,676	Matabeleland North	75,025	640,957
Mashonaland Central	28,374	857,318	Matebeleland South	54,172	591,747
Mashonaland East	32,230	1,033,336	Midlands	49,166	1,302,212

Harare, the capital, had a population in 1999 of 1,686,000. Other main cities (with 1992 census populations) were Bulawayo (620,936), Chitungwiza (274,035), Mutare (131,808) and Gweru (124,735). The population is approximately 98% African, 1% mixed and Asian and there are approximately 70,000 whites. The main ethno-linguistic groups are the Shona (71%), Ndebele (16%), Ndau (3%) and Nyanja (3%). Other smaller ones include Kalanga, Manyika, Tonga and Lozi.

The official language is English.

SOCIAL STATISTICS

1995 births, 434,000; deaths, 158,000. Rates, 1995: birth, 38·8 per 1,000 population; death 14·1 per 1,000. Annual population growth rate, 1990–99, 1·7%. Zimbabwe's expectation of life at birth in 1999 was 43·2 years for males and 42·6 for females, down from (average) 54 years in 1993. The sharp decline is largely attributed to the huge number of people in the country with HIV. Researchers predict that by 2008 it will have dropped to 31 years. Approximately 25% of all adults are infected with HIV. Infant mortality, 1999, 60 per 1,000 live births; fertility rate, 1999, 3·7 births per woman.

CLIMATE

Though situated in the tropics, conditions are remarkably temperate throughout the year because of altitude, and an inland position keeps humidity low. The warmest weather occurs in the three months before the main rainy season, which starts in Nov. and lasts till March. The cool season is from mid-May to mid-Aug. and, though days are mild and sunny, nights are chilly. Harare, Jan. 69°F (20·6°C), July 57°F (13·9°C). Annual rainfall 33" (828 mm). Bulawayo, Jan. 71°F (21·7°C), July 57°F (13·9°C). Annual rainfall 24" (594 mm). Victoria Falls, Jan. 78°F (25·6°C), July 61°F (16·1°C). Annual rainfall 28" (710 mm).

CONSTITUTION AND GOVERNMENT

The Constitution provides for a single-chamber 150-member Parliament (*House of Assembly*), universal suffrage for citizens over the age of 18, an *Executive President* (elected for a six-year term of office by Parliament), an independent judiciary enjoying security of tenure and a Declaration of Rights, derogation from certain of the provisions being permitted, within specified limits, during a state of emergency. The House of Assembly is elected for five-year terms: 120 members are elected by universal suffrage, 10 are chiefs elected by all the country's tribal chiefs, 12 are appointed by the President and 8 are provincial governors. The constitution can be amended by a two-thirds parliamentary majority.

In a referendum on 12–13 Feb. 2000 on the adoption of a new constitution 697,754 (54·6%) voted against and only 578,210 in favour. Under the new constitution Zimbabwe would have had an Executive President and an Executive Prime Minister sharing power, but many people felt that it would have strengthened President Mugabe's hold on power.

National Anthem. 'Ngaikomborerwe Nyika yeZimbabwe' ('Blessed be the Land of Zimbabwe'); words by Dr Solomon M. Mutswairo; tune by Fred Changundega.

RECENT ELECTIONS

At the parliamentary elections of 24–25 June 2000 turn-out was 57%. The Zimbabwe African National Union-Patriotic Front (ZANU-PF) gained 62 of the 150 available seats (48·6% of votes cast). The Movement for Democratic Change, established in Jan. 2000, won 57 seats (47·0%) and the Zimbabwe African National Union-Ndonga gained 1 seat. 12 seats went to appointed non-constituency members, 8 went to *ex-officio* governor members and 10 to *ex-officio* chief members. The conduct of Mugabe's ZANU-PF during the pre-election campaign received widespread

international condemnation. White-owned farms were illegally seized and there was a campaign of intimidation against opposition supporters that saw more than 30 people die.

Presidential elections were held between 9–11 March 2002. Incumbent Robert Mugabe was re-elected with 56·2% of votes cast, against 42·0% for Morgan Tsvangirai. There were three other candidates. Observers claimed the elections failed to meet international standards for a democratic poll.

The headquarters of the ZAF and the main ZAF stations are in Harare; the second main base is at Gweru, with many secondary airfields throughout the country. There were 58 combat aircraft, including Hunters and F-7s (MiG-21), and 24 armed helicopters.

INTERNATIONAL RELATIONS

Zimbabwe is a member of UN, WTO, the Commonwealth, the African Union, African Development Bank, COMESA, SADC, IOM, and is an ACP member state of the ACP-EU relationship. Following the controversial presidential election of March 2002 Zimbabwe was suspended from the Commonwealth's councils for a year, extended for nine months in March 2003.

ECONOMY

Agriculture accounted for 19·5% of GDP in 1998, industry 24·4% and services 56·1%.

Robert Mugabe's 20-year rule has left the economy in a desperate situation. There is roaring inflation, heavy unemployment and shortages of food and other necessities, culminating in the authorities making an international appeal for food in July 2001. In Feb. 2000 the country ran out of gasoline because it could not pay the import bills.

Overview. The second phase of structural adjustment dubbed Zimbabwe Programme for Economic and Social Transformation (ZIMPREST) was launched in early 1998. Its goals are similar to those of the first phase (1991–95), promoting economic stabilization, liberalization of trade, deregulation, reform of the public sector and social reform. But confidence in the economy was undermined by

promises to pay compensation (Z$365m.) to war veterans and to take over 1,471 privately-owned farms for resettlement. Meanwhile, inflation is beyond control and unemployment is high. Were it not for support from South Africa and other neighbouring states, the economy would collapse.

Currency. The unit of currency is the *Zimbabwe dollar* (ZWD), divided into 100 *cents*. Gold reserves were 121,000 troy oz in April 2002 and foreign exchange reserves US$72m. The currency was devalued 17% in Jan. 1994 and made fully convertible. Its value dropped by 65% in 1998. It was devalued again in Aug. 2000 by 24%. Whereas at the time of independence the Zimbabwean dollar was on a parity with the US dollar, by 2000 it was worth less than 2 cents. Inflation, which stood at 18·8% in 1997, had risen to 76·7% by 2001. Total money supply was Z$176,427m. in April 2002.

Budget. The 1999 budget forecast a budget deficit of 6%.

Revenue and expenditure (in Z$1,000):

	1996–97	*1997–98*
Revenue	27,289	52,152
Expenditure	32,366	63,857

The top rate of income tax is 50%; the top corporate income tax rate is 35%.

Performance. Real GDP growth was 2·5% in 1998, but in 1999 the economy contracted by 0·2%. In 2000 and 2001 it shrank further by 5·1% and 8·5% respectively. Zimbabwe's total GDP in 2001 was US$9·1bn.

Banking and Finance. The Reserve Bank of Zimbabwe is the central bank (established 1965; *Governor*, Dr Leonard Tsumba). It acts as banker to the government and to the commercial banks, is the note-issuing authority and co-ordinates the application of the government's monetary policy. The Zimbabwe Development Bank, established in 1983 as a development finance institution, is 51% government-owned. In 1997 there were seven commercial and five merchant banks. There are five registered finance houses, three of which are subsidiaries of commercial banks.

The IMF announced in June 1998 that it was to lend Zimbabwe US$175m. in the form of a 13-month standby credit which would allow Harare to draw US$52m. immediately to replenish its depleted reserves.

There is a stock exchange.

Weights and Measures. The metric system is in use but the US short ton is also used.

ENERGY AND NATURAL RESOURCES

Environment. According to the *World Bank Atlas* carbon dioxide emissions were the equivalent of 1·2 tonnes per capita in 1998.

Electricity. Installed capacity was 2m. kW in 1997. In 1997 Zimbabwe Electricity Supply Authority's (Zesa) five power stations supplied 7,323·3 GWh, and a further 3,171·5 GWh was imported via the Southern African Power Pool (SAPP). Electricity sales during the financial year 1995–96 increased by 3·6% and revenues grew by 28% from US$2,222·7m. to US$2,852·7m. Consumption per capita in 1998 was 896 kWh.

Minerals. The total value of all minerals produced in 1995 was Z$5,249·3m. 1995 production: gold, 23·9 tonnes, value Z$2,395m.; nickel, value (1993) Z$369·1m.; asbestos, 0·70m. tonnes; coal (1996), 5·2m. tonnes. Diamond production in 1998 totalled 70,000 carats.

Agriculture. Agriculture is the largest employer, providing jobs for 25% of the workforce. In 1998 there were 3·25m. ha of arable land and 0·13m. ha of permanent crops.

A constitutional amendment providing for the compulsory purchase of land for peasant resettlement came into force in March 1992. A provision to seize white-owned farmland for peasant resettlement was part of the government's new draft constitution that was rejected in the referendum of Feb. 2000. Various deadlines were given for white farmers to abandon their property during Aug. and Sept. 2002. The government claims that 300,000 landless black Zimbabweans have been resettled on seized land.

The staple food crop is maize, but 2002 production was less than a third of that in 2000. Tobacco is the most important cash crop. Production, 2000, in 1,000 tonnes: sugarcane, 4,228; maize, 2,108; seed cotton, 327; wheat, 250; tobacco, 228; cottonseed, 199; groundnuts, 191; cassava, 175; soybeans, 144; cotton lint, 128; sorghum, 103; bananas, 80; oranges, 80. Zimbabwe is the world's second largest exporter of flue-cured tobacco. In 1996 more than 201m. kg of tobacco were sold, fetching Z$5·8bn. More than 150,000 people work in the tobacco industry. SOCIAL INSTITUTIONS

Justice. The general common law of Zimbabwe is the Roman Dutch law as it applied in the Colony of the Cape of Good Hope on 10 June 1891, as subsequently modified by statute. Provision is made by statute for the application of African customary law by all courts in appropriate cases.

The death penalty is authorized. The last executions took place in May 2002.

The Supreme Court consists of the Chief Justice and at least two Supreme Court judges. It is the final court of appeal. It exercises appellate jurisdiction in appeals from the High Court and other courts and tribunals; its only original jurisdiction is that conferred on it by the Constitution to enforce the protective provisions of the Declaration of Rights. The Court's permanent seat is in Harare but it also sits regularly in Bulawayo.

The High Court is also headed by the Chief Justice, supported by the Judge President and an appropriate number of High Court judges. It has full original jurisdiction, in both Civil and Criminal cases, over all persons and all matters in Zimbabwe. The Judge President is in charge of the Court, subject to the directions of the Chief Justice. The Court has permanent seats in both Harare and Bulawayo and sittings are held three times a year in three other principal towns.

Regional courts, established in Harare and Bulawayo but also holding sittings in other centres, exercise a solely criminal jurisdiction which is intermediate between that of the High Court and the Magistrates' courts. Magistrates' courts, established in 20 centres throughout the country, and staffed by full-time professional magistrates, exercise both civil and criminal jurisdiction.

Primary courts consist of village courts and community courts. Village courts are presided over by officers selected for the purpose from the local population, sitting with two assessors. They deal with certain classes of civil cases only and have jurisdiction only where African customary law is applicable. Community courts are presided over by presiding officers in full-time public service who may be assisted by assessors. They have jurisdiction in all civil cases determinable by African customary law and also deal with appeals from village courts. They also have limited criminal jurisdiction in respect of petty offences.

The population in penal institutions in Aug. 1998 was 18,271 (155 per 100,000 of national population).

Religion. Over a third of the population adhere to traditional animist religion. In 1997 approximately 2·42m. persons were Protestants, 1·54m. African Christians, 800,000 Roman Catholics and 2·03m. followers of other religions.

Education. Education is compulsory. 'Manageable' school fees were introduced in 1991; primary education had hitherto been free to all. All instruction is given in English. There are also over 3,800 private primary schools and over 950 private secondary schools, all of which must be registered by the Ministry of Education. In 1998 there were 2,507,098 pupils at primary schools and 847,296 pupils at secondary schools. In 1999 the adult literacy rate was 88% (92·3% among males and 83·8% among females). Both the overall rate and the rate for males are the highest in Africa.

There are ten teachers' training colleges, eight of which are in association with the University of Zimbabwe. In addition, there are four special training centres for teacher trainees in the Zimbabwe Integrated National Teacher Education Course. In 1990 there were 17,873 students enrolled at teachers' training colleges, 1,003 students at agricultural colleges and 20,943 students at technical colleges.
